

**IBM** Marketing Publications KWIC Index

*Notice:* Sale and Distribution of publications listed herein are processed through IBM branch offices. For information and assistance in ordering, contact the IBM office listed in your local directory.

## Preface

Part	Page
Title Index . . . . .	1
Machine Index . . . . .	235
Price Section . . . . .	1

The price section indicates the price (SP) for each item. Sequence is by order number (in which, *the first character is ignored*). Information printed in columns headed U/M (unit of measure) and RFC (requisition from code) is for use by IBM in processing requests.

### Note on Prices

*The prices given are those in effect at the time this catalog is prepared for printing, and are subject to change without notice.* Publications may also be withdrawn from distribution without notice if the information they contain becomes obsolete or if usage is low. If the price isn't shown, contact your IBM representative for further information.

### KWIC Indexing

KWIC (Keyword In Context) is a retrieval system that selects keywords from a file of compressed titles. An item may then be found under each keyword, except one (such as PLM or system) prevented from indexing because it would create a group too large or otherwise impractical.

For example, *IBM System/360 Conversion Aids: The 7074 Emulator Program for IBM System/360 Models 50 and 65 Program Logic Manual*, GY27-7111, is listed as "#S/360-50/65 EMUL 7074 PLM." Entries appear in the alphabetic title index under S/360-50/65 and EMUL. An entry also appears in the numeric machine index under 7074. No entry appears under PLM. The number sign (#) shows the beginning of a title; a period, the end.

### What's Listed

This catalog lists publications available for distribution or sale to users of IBM data processing products and services. Included are technical publications, briefs, photographs, educational materials, and periodicals. (The amount of information on each item is small; requirements should be verified in a bibliography or IBM office reference sources before orders are placed.) Materials related to the maintenance of IBM products are in the IBM Customer Engineering KWIC Index, GY20-0073.

### About Order Numbers

The first character of the eight-position order number is the *use key*, which governs the availability of the document. Use key G means that the item is available to customers, through the IBM representative, without charge for quantities that meet normal requirements. Use key S means that the item is for sale through IBM branch offices. Use key L means that the item is available only to licensees for the Licensed program; prices shown for these items represent the use charge. Use keys are ignored in order-number sorting.

**A Bill Of Forms** is an order number in the form of GBOF-1234. It's a single order number for a package of separately available documents.

**Microfiche** documents are identifiable from the alphabetic character in the third position of the order number; e.g., LY#0-5432. The same document on paper would have the corresponding order number of LY20-5432.

**Back Editions** that support an earlier release of a programming system are denoted by a "T" or "Q" indicating a "pseudonumber," e.g., G700-0183. Refer to the appropriate system BIBLIOGRAPHY for information on these items as well as for abstracts, current editions, and other information on the technical support documentation for that system.

## Title Compressions Commonly Used in this KWIC Index

A/N — Availability notice  
A/P — Accounts payable  
A/R — Accounts receivable  
ADV(isory)  
ARM — Application reference manual

BR(ochure), BROCH

CASS(ette)  
COMMU(nications)  
CONV(ersion)  
CSE — Course

D/B — Data base  
DEV(ice)

EMUL(ation)

FDP — Field developed program  
FIN(ance, financial)  
FORT(RAN)

GD, GDE — Guide  
GIM — General information manual

IMP GD — Implementation guide  
IMPP — Installation manual - physical planning  
INV(entory)  
ISP — Independent study program  
IST — In-shop training  
IUP — Installed user program

KEYB(oard)  
KEYP(unch)

LOG(ic) — PLM  
LPDO — Licensed program design objectives  
LPS — Licensed program specifications

MAN, MANL — Manual  
MESGS — Messages  
MON(itor)

OE&I — Order entry & inventory  
OEMI — Original equipment manufacturers' information

ONL(ine)  
OPR-GD, OG — Operator's Guide

PDOM — Prog description/operations manual  
PLGD — Planning guide  
PLM — Program logic manual  
PPFD — Program product functional description  
PPS — Program product specifications  
PROGRS GD, PGD, PG  
PRPQ — Programming RPQ  
PUN(ch)

R/P — Read(er)-punch  
REF, RM — Reference manual  
RPQ — Request for price quotation  
RTN(S) — Routine(s)

SERV(ice)  
SG — System guide  
SORT/M, S/M — Sort/merge  
SUP — system library Supplement

TEC-B — Technical bulletin  
TERM UGD, TUG — Terminal user's guide  
TIM(ing)

UGD — User's guide  
UM — User's manual

WKBK — Workbook  
WKSTA — Workstation  
WT — World Trade Corporation

### Fortieth Edition (January 1981)

This is a major revision of, and supersedes, G320-1621-38.

It is possible that this material may contain references to, or information about, IBM products (machines and programs), programming, or services that are not announced in your country. Such references or information must not be construed to mean that IBM intends to announce such IBM products, programming, or services in your country.

Publications are not stocked at the address given below; requests for IBM publications should be made to your IBM representative or to the IBM branch office serving your locality.

Comments may be addressed to IBM Corporation, Publications Support Services, Department 812, 1133 Westchester Avenue, White Plains, New York 10604. IBM may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation whatever. You may, of course, continue to use the information you supply.

# Price Section

Prices (SP) are those in effect at press time, and may be changed without notice. If no price is shown, contact an IBM representative for further information. An asterisk after an order number means the item is for WTC use only; a plus sign, for U.S.A. use only. U/M and RFC are for use by IBM in processing orders.
