IBM Enhanced 5250 Display Station Emulation Adapter
IBM 5250 Emulation Adapter/A
IBM 5250 Emulation PCMCIA Adapter
IBM 5250 Emulation PCI Adapter
```

6.  You will receive three messages, after the third message is displayed, press any key.

7.  At the next menu select the option "Change Adapter Configuration."

```
View Adapter Configuration
Change Adapter Configuration
Test Adapter Configuration
Select Adapter Type
Exit
```
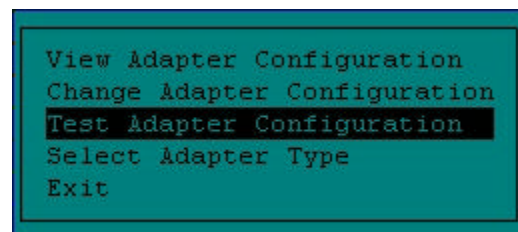

8.  Select the option "Automatic Configuration" and press the enter key.

```
Automatic Configuration
Change I/O Port
Change Memory
Change Interrupt
Enable Plug-n-Play
Disable Plug-n-Play
```
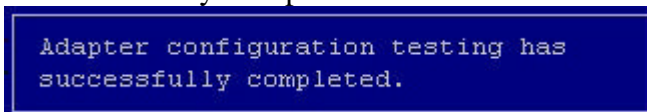

9.  You will receive a message after you have automatically configured the settings on your adaptor.
    Press any key to continue.

```
┌──────────────── Message ────────────────┐
│                                          │
│ The IBM 5250 Display Station Emulation Adapter's │
│ I/O port address and memory address have │
│ successfully been determined.            │
│                                          │
│                                          │
│                                          │
│                                          │
│                                          │
│ Press any key                            │
└──────────────────────────────────────────┘
```

10. Press "Escape" to return to the previous menu.

```
View Adapter Configuration
Change Adapter Configuration
Test Adapter Configuration
Select Adapter Type
Exit
```

11. Select "Test Adapter Configuration" and press enter.

12. Upon completion of the test you should receive a message that informs you "Your Adapter Test has Successfully Completed."

```
Adapter configuration testing has
successfully completed.
```

13. If you have received that message, your adapter is configured properly. You may need to run our line diagnostic tests.

14. If you have received an error message you may need to change the resource settings or call technical support at 1-800-237-5511.
