- Minor repairs free of charge
- Battery replacement

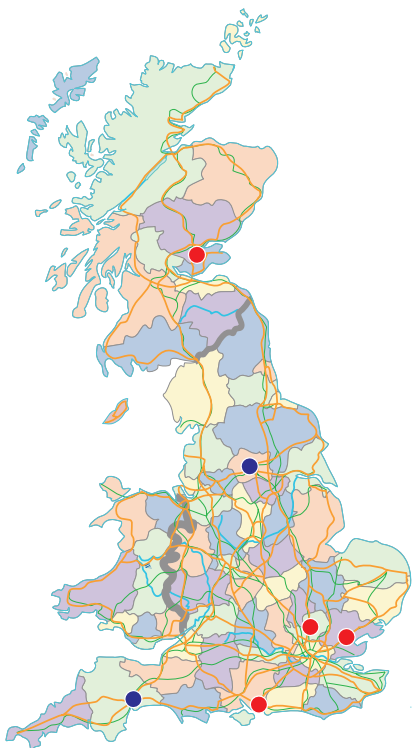

Are the following critical to your business success?

- High levels of test equipment availability
- ISO 9000 registration
- Total cost control
- Quality
- Measurement integrity & traceability
- A managed repair policy

At IFR we believe they are - for all your equipment, regardless of manufacturer. That is why we have designed the UK's only third party service organization that provides:

- Efficient turnaround of equipment
- Calibration and repair of over 20,000 product types
- Nation wide collection/delivery service
- 4 technical service centres across the UK
- NAMAS accreditation for over 30 parameters

IFR's 4 regional technical service and 2 distribution centres.

### The Complete Service

IFR collect and return your equipment free of charge. Our specially adapted vehicles will protect your equipment and save you the time and costs of packing the equipment and using a courier company.

Work will be processed through one of our 4 regional service centres, ensuring that turnaround time is kept to a minimum and quality is maintained.

You may rest assured that your equipment will be safety checked and calibrated in accordance with manufacturer's specifications. Quotations are provided where significant repairs are required.

### Technical Excellence

IFR has over 40 years experience of calibration and repair services. Our NAMAS laboratory has an extensive range of accreditations and all of our service centres have ISO 9002 approval that is regularly audited.

As the largest service organisation of its kind, naturally our staff offer in-depth specialist knowledge of a broad range of equipment. All calibrations are carried out following the requirements of ISO 10012-1 and measurements are traceable to national standards.

### Competitive

IFR run a programme of continual investment in the Service Group providing customers with a faster and more effective service. This enables you to concentrate on your core business safe in the knowledge that your valuable test equipment assets are well looked after. So whether it's mechanical, electronic, calibration or repair ...
