

Starter Kits™

DaqBoard/1000 & DaqBoard/2000 PCI-Based Data Acquisition Quick-Start Kits

The DaqBoard Starter Kit™ includes everything necessary for a complete PCI based data acquisition solution. Two DaqBoard Starter Kits are available. Each kit includes a 16-bit, 200-kHz PCI DaqBoard, cable, and screw-terminal board for signal connection along with DaqView/2000™ software for easy, real time collection of data. The DaqBoard/2000 Starter Kit also offers support for DASYLab® software and is compatible with our DBK series of signal conditioning and channel expansion options.

The Starter Kits are priced below the cost of their individual components, providing you with added cost savings. Just open the box, follow the simple *quick-start* instructions, and in minutes a fully functional PCI board-based system can be running on a desktop or industrial PC.

The DaqBoard/2000 Starter Kit includes DaqBoard/2000, DaqView2000 software, DBK202, and CA-195 cable

Software

DaqView2000™ software is included with each Starter Kit. This software provides *Out-of-the-Box™* access to all board functions without the need for programming. Also included with each kit are drivers and sample applications for Visual Basic®, C/C++, LabVIEW®, MATLAB®, and C++ for Linux. DaqCOM™ ActiveX/COM-based applications program interface is also included. The DaqBoard/2000 includes drivers for DASYLab®. Together, this software supports rapid board test/verification and application program development.

Ordering Information

Description	Part No.
DaqBoard/1000, DaqView2000 software, TB-100, and CA-G56 cable	DAQ1000/STR-KIT
DaqBoard/2000, DaqView2000 software, DBK202, and CA-195 cable	DAQ2000/STR-KIT

The DaqBoard/1000 Starter Kit includes DaqBoard/1000, DaqView2000 software, TB-100, and CA-G56 cable
