## **Transportation Solutions SourceBook For In-Vehicle Data Acquisition Now Available**

CLEVELAND, OH, March 2003 — For over 10 years, IOtech has offered the widest variety of test solutions for making in-vehicle measurements from simple temperature measurement systems to sophisticated systems that measure sound, vibration, strain, location and vehicle network parameters. IOtech has just completed a compilation of actual customer-developed applications into a new publication, the Transportation Solutions SourceBook. These application stories cover in-vehicle data acquisition solutions for a variety of vehicles. They include:

- Transmission and brake testing
- Airbag testing
- Vehicle crash testing
- Quality assurance testing
- Military vehicle off-road testing

There are a total 15 product applications included in this publication and feature all six families of products designed for in-vehicle measurements. The Transportation Solutions SourceBook is free and can be ordered on-line at [www.iotech.com](http://www.iotech.com).

### **About IOtech**

IOtech produces data acquisition hardware and software for use in PC-based test & measurement and industrial automation systems. Its products are used in research and manufacturing facilities and are sold throughout the world. IOtech, Inc. is located at 25971 Cannon Road, Cleveland, Ohio, 44146; telephone: (440) 439-4091; fax: (440) 439-4093; E-mail: [sales@iotech.com](mailto:sales@iotech.com); [www.iotech.com](http://www.iotech.com).
