# IOtech's 2003 Product Catalog Now Available

CLEVELAND, July 2002 — IOtech's new 2003 PC-based Data Acquisition & Instrumentation Catalog has just been released.  This full-color, 384-page catalog introduces several new high-speed Ethernet-based data acquisition products, including the new 1-MHz WaveBook/516E™ and the multifunction DaqBook/2000E™. Several new additions to IOtech's PointScan™ family of Ethernet-based distributed I/O modules are also included.

A new low-cost family of multifunction PCI data acquisition boards are introduced in this catalog, augmenting IOtech's high-performance, low-cost DaqBoard/2000™ line of data acquisition boards. The new ADAC™ boards will set the new standard for low price in the 12- and 16-bit board market.

IOtech's 2003 catalog is available free of charge and may be requested via the web at **www.iotech.com/pr2003**, email at sales@iotech.com, or phone at 1-888-831-4315.

## About IOtech

IOtech produces data acquisition hardware and software for use in PC-based test & measurement and industrial automation systems. Its products are used in research and manufacturing facilities and are sold throughout the world. IOtech, Inc. is located at 25971 Cannon Road, Cleveland, Ohio, 44146.
