## New Data Acquisition Programming Tools for Windows®

CLEVELAND, October 2, 2001 — IOtech, Inc. has announced the addition of a family of powerful new programming tools for their WaveBook™, DaqBook™, and DaqBoard™ data acquisition products. DaqCOM™ uses Microsoft®'s Component Object Model (COM) to provide a host of features for users who are developing custom applications with IOtech products. DaqCOM™ can be used with any COM-compatible language, including Visual Basic®, VBA®, Visual C++, Delphi™ and Java, operating under Windows® 98/2000/Me/NT.

### Product Features

- DaqView™ or WaveView™ can be used to configure and set-up an application. Then, the configuration can be imported and all set-up parameters into a program. This allows users to create custom programs from existing or previously configured DaqView™ or WaveView™ applications.
- Save/Load feature allows acquisition configurations to be saved and loaded by the same or other applications, greatly reducing the amount of effort required to create new programs from existing configurations. Configurations can be saved and reloaded at a later time with little programming effort.
- Automatic Data Conversion to appropriate engineering units or user defined scaling via  $mx+b$  as well as raw binary data format support
- Extensive built in context sensitive help for use in the Microsoft® VisualStudio environment
- DaqExplorer™ — a comprehensive DaqCOM™ application which allows users and developers to completely configure and model their application before developing any code.

A network version, DaqCOM/Net™, is also available.

## Pricing

Product	Description	U.S. Price
DaqCOM™	ActiveX/COM-based applications program interface	\$395
DaqCOM/Net™	ActiveX/COM-based applications program interface with network support	\$695

## About IOtech

IOtech produces data acquisition hardware and software for use in PC-based test & measurement and industrial automation systems. Its products are used in research and manufacturing facilities and are sold throughout the world. IOtech, Inc. is located at 25971 Cannon Road, Cleveland, Ohio, 44146; telephone: (440) 439-4091; fax: (440) 439-4093; E-mail: sales@iotech.com; World Wide Web: [www.iotech.com](http://www.iotech.com).
