IC-M2A

Meets
MIL-STD 810

Big Screen, Tough Body and It's Waterproof too!

Extra Large LCD Display

A large LCD* offers easy to read large channel indication. The S-meter shows the signal strength of the received signal. In addition, bright LCD backlighting is great for night time operation.

* 35x24 mm, 1 3/8 x 1 5/16 in. dimensions

The photo shows actual display size.

Waterproof Construction

The IC-M2A is built waterproof to endure 1 meter depth for 30 minutes. (Equivalent to JIS waterproof specification grade 7.) Non-corrosive construction ensures reliable long life communication out on the water.

Simple Operation

Well spaced, clearly labeled switches on the front panel provides easy one-hand access to frequently used functions. To access secondary functions, just hold the each button for one second. The function name is indicated beside each button in white lettering for easy recognition. The IC-M2A does not require complicated operation to use it efficiently and its maximum potential.

Powerful 5W Output Power

The supplied BP-224 Ni-Cd battery pack generates a powerful 5W of output power and provides 8 hours of typical operating time*. For saving battery consumption, the output power can be reduced to 3W or 1W. The BP-223 alkaline cell case is also available during charging.

* Tx:Rx:Stand-by duty ratio = 5:5:90

Desktop Charger Supplied

The BC-150 desktop charger is a simple drop-in charger. It has screw holes for easy installation, and also a cradle to hold an unattached battery – You can leave it alone to charge even in choppy seas.
