

## **Engineering Release – IMPORTANT INFORMATION**

“Engineering Release” means that the development of this software is not yet concluded. The term Engineering Release includes Engineering Releases (ER), Engineering Drops (ED), Demo builds, patches, or any other deliverables not considered as official “General Availability” (GA) or “Maintenance Release” (MR). Engineering Releases may be partially or fully functional, contain defects, or not conform to standards. The documentation may be incomplete. For details, see release notes.

**Engineering Releases are provided “AS IS”, are not fully qualified, and must not to be used for production releases or for commercial products.**

### **Waiver:**

You acknowledge that Engineering Releases may deviate from the Data Sheet and may not fully represent production releases since they are not yet fully qualified. You understand there is no long term support for Engineering Releases.

Intel does not accept any liability or give any warranty for this Engineering Release. In particular, you waive any liability for consequential or incidental damages caused by:

- Your use of this Engineering Release other than for evaluation purposes, particularly the installation or integration in a product to be sold by you; and
- Deviation or lapse in function of the Engineering Release.
