| OBJET | ILLUSTRATIONS | PROCEDURE | INFORMATIONS |
|----------------------------|---------------|---|--|
| Preparation | | | |
| Visual checking | | 1) Check the dial. 2) Check the hands. 3) Check the case, case back and glass. 4) Check the hand-setting stem. | No scratches, no dust, no finger spots, no discolouration, great flatness / straightness. |
| Existing hands removing | | If the movement does not have dial and have hands work, use the maintaining plate hands extractor to avoid damaging the gear. | TC-50205 |
| Dial and hands fitting | | 1) Place the movement into the movement holder N° 1-012905. 2) Fit the dial. 3) Fit the hour hand and the minute hand at 12h. 4) Fit the central hand (second, second chrono, minute chrono, moon indication, tide, day, second time zone) at 12h. | 1-012905 |
| Hand-setting stem | | 1) Removing the stem using the extractor holder movement N° 5-049122. 2) Cut it at the length wanted and stick strongly the crown. Comment: Always remove the stem in rest position. The movement is ready to be cased. | 5-049122 A length of 0.5 mm between the case and the crown is necessary to insure the pusher function of the stem (except for the version 9500/1010). |
| Casing | | | |
| Movement casing | | Insert the movement in the case avoiding shocks in the middle. | Be careful of the hands positions to not shock dial index. |
| Hand-setting stem | | Insert the hand-setting stem after possible greasing of the axis. | |
| Casing ring | | Insert the casing ring. There are no casing screws. | |
| Hand-setting stem checking | | Check the straight rotation of the crown and the different positions of the hand-setting stem. | |
