## LINE DOUBLER

# VU-LD20U

**Thank you for purchasing this product.**

Before using your new purchase, please read this instruction manual thoroughly. And, after reading, be sure to store this instruction manual in a safe place for future reference.

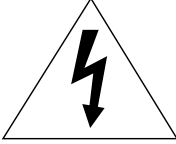

## *Instruction Manual*

**For Customer Use:**

Enter below the Serial No. which is located on the rear of the cabinet. Retain this information for future reference.

Model No. VU-LD20U \_\_\_\_\_

Serial No. \_\_\_\_\_

	<b>CAUTION</b> RISK OF ELECTRIC SHOCK DO NOT OPEN	
<b>CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.</b>		

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

## IMPORTANT:

RECORDING OF COPYRIGHTED TELEVISION PROGRAMS MAY VIOLATE COPYRIGHT LAW.

## WARNING:

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.

## CAUTION:

TO PREVENT ELECTRIC SHOCK HAZARD, DO NOT USE THIS (POLARIZED) PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

	<b>AVERTISSEMENT</b> DANGER D'ELECTROCUTION NE PAS OUVRIR	
<b>AVERTISSEMENT: POUR ELIMINER TOUT RISQUE D'ELECTROCUTION NE PAS OUVRIR LE COUVERCLE (OU LA PARTIE ARRIERE). AUCUNE PIECE PEPARABLE PAR L'UTILISATEUR NE SE TROUVE A L'INTERIEUR. POUR TOUTE INTERVENTION D'ENTRETIEN OU DE REPARATION SE CONFIER AUX TECHNICIENS QUALIFIES.</b>		

La flèche symbolisant le tonnerre à l’intérieur d’un triangle équilatéral a pour but de prévenir l’utilisateur de la présence d’une “tension dangereuse” non isolée se trouvant à l’intérieur du dispositif; elle est d’une magnitude suffisante pour constituer un risque de décharge électrique.

Le point d’exclamation à l’intérieur d’un triangle équilatéral a pour but de prévenir l’utilisateur de la présence d’importantes instructions concernant l’entretien et le un fonctionnement indiquées dans les textes accompagnant le dispositif.

## MISE EN GARDE :

AFIN DE REDUIRE LES RISQUES D'INCENDIE OU DE DECHARGE ELECTRIQUE, NE PAS EXPOSER CET APPAREIL A LA PLUIE OU A L'HUMIDITE.

## ATTENTION :

AFIN DE REDUIRE LES RISQUES DE DECHARGE ELECTRIQUE, NE PAS UTILISER LA FICHE (POLARISEE) DE CET APPAREIL AVEC UN PROLONGATEUR, UNE PRISE OU UNE AUTRE PRISE DE COURANT SAUF SI CES LAMES PEUVENT ETRE INSEREES A FOND.

## REMARQUE :

ETANT DONNE QUE CE PROJECTEUR EST UN APPAREIL QUI DOIT ETRE BRANCHE, LA PRISE MURALE DOIT ETRE INSTALLEE PRES DU PROJECTEUR ET DOIT ETRE FACILEMENT ACCESSIBLE.

# FEATURES

## Stunning image quality through highly accurate signal processing

Our original three-dimension Y/C separation circuit has been employed together with the image processing circuit made by Faroudja in the decoder section, the line doubler section, and the bandwidth expander section. Consistent signal processing with high accuracy from input to output provides stunning image quality.

### - Line doubler section

Signals from the decoder section are progressively processed in the line doubler section. Faroudja's unique motion algorithm rids jaggies and flickers from images by converting film images of 30 frames per second into 24 frames per second and applying total still image processing. Reproduction through double the number of scanning lines realizes natural progressive processing with higher accuracy and less missing information.

### - NTSC color decoder section

Faroudja's most reliable decoder for 10-bit processing and Analog Device's high performance AD converter jointly offer highly accurate AD conversion. In addition, Faroudja's original chroma band expansion circuit provides film-like images of high definition, greatly enhancing color transition, trangent and resolution.

### - Bandwidth expander section

In the bandwidth expander section, signals are refined to obtain higher image quality after the line doubling processing. Bandwidth of Y (luminance) signal is doubled through the non-linear processing. Expanded bandwidth increases image detail, improves trangent and enhances sharpness of images, achieving dramatic development in video image quality and striking beauty and impression.

### - Y/C separation circuit section

Our original three-dimension filter correctly separates signals having motion images as well as signals having stationary images, considerably reducing cross-color and dot interference.

## Selector function to connect 18 video sources at the maximum

Selectable inputs of three types, VIDEO IN, S-VIDEO IN and COMPONENT IN, allow 18 video sources at the maximum to be connected depending on combination.

## Various image quality adjustments

Various image quality adjustments, from basic adjustments of sharpness, contrast, etc. to advanced adjustments such as black level extension adjustment, are available and offer a possible use as an equalizer. These adjustments can be memorized in every program. Images are easily reproduced according to the preprogrammed adjustments just by switching the programs depending on image materials.

The Faroudja name is the registered trademark of Faroudja, Inc. in the United States.

# IMPORTANT SAFEGUARDS

Please read all these instructions carefully regarding your Line double before you begin operating it. Follow all warnings and instructions marked on the Line doubler. Thank you.

## 1 Read Instructions

All the safety and operating instructions should be read before the product is operated.

## 2 Retain Instructions

The safety and operating instructions should be retained for future reference.

## 3 Heed Warnings

All warnings on the product and in the operating instructions should be adhered to.

## 4 Follow Instructions

All operating and use instructions should be followed.

## 5 Cleaning

Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.

## 6 Attachments

Do not use attachments not recommended by the product manufacturer as they may cause hazards.

## 7 Water and Moisture

Do not use this product near water — for example, near a bath tub, wash bowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool, and the like.

## 8 Accessories

Do not place this product on an unstable cart, stand, tripod, bracket, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the product. Any mounting of the product should follow the manufacturer's instructions, and should use a mounting accessory recommended by the manufacturer.

9 A product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.

## 10 Ventilation

Slots and openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered. The openings should

never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer's instructions have been adhered to.

## 11 Power Sources

This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operating instructions.

## 12 Grounding or Polarization

This product is equipped with a polarized alternating-current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.

## 13 Power-Cord Protection

Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.

## 14 Outdoor Antenna Grounding

If an outside antenna or cable system is connected to the product, be sure the antenna or cable system is grounded so as to provide some protection against voltage surges and built-up static charges.

Article 810 of the National Electrical Code, ANSI/NFPA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode.

## 15 Lightning

For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the product due to lightning and power-line surges.

## 16 Power Lines

An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep from touching such power lines or circuits as contact with them might be fatal.

## 17 Overloading

Do not overload wall outlets, extension cords, or integral convenience receptacles as this can result in fire risk or electric shock.

## 18 Object and Liquid Entry

Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.

## 19 Servicing

Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

## 20 Damage Requiring Service

Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:

- (a) When the power-supply cord or plug is damaged.
- (b) If liquid has been spilled, or objects have fallen into the product.
- (c) If the product has been exposed to rain or water.
- (d) If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to its normal operation.
- (e) If the product has been dropped or damaged in any way.
- (f) When the product exhibits a distinct change in performance – this indicates a need for service.

## 21 Replacement Parts

When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards.

## 22 Safety Check

Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.

## 23 Heat

The product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.

### Declaration of Conformity

**Model Number** : VU-LD20U  
**Trade Name** : JVC  
**Responsible Party** : JVC Americas Corp.  
**Address** : 1700 Valley Road Wayne,  
N.J. 07470  
**Telephone Number** : 973-315-5000

This device complies with Part 15 of FCC Rules.

Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

### COMPLIANCE NOTICE OF INDUSTRY CANADA

This Class B digital apparatus complies with Canadian ICES-003.

### NOTICE DE CONFORMITE AU CANADA

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

# OVERVIEW OF THE PRODUCT

## Front panel

### ① POWER button

Press the POWER button to turn on the product while the MAIN SW on the rear panel is ON. Press this button again to turn it off. The power indicator illuminates in red during stand-by when the MAIN SW is ON. The power indicator illuminates in green while the power is supplied.

### ② S-VIDEO 6 / VIDEO 6 INPUT terminals

Use to connect with a device having a VIDEO or S-VIDEO terminal such as a video camera or videodisc player. Remove the cover by loosening the two cover-fixing screws using a screwdriver to use these terminals.

### ③ Program buttons (Prog. 1 to 10)

Use to select the programs of the memorized input terminals, etc. The indicator of the selected program illuminates. The recommended settings have been preprogrammed at the time of delivery from the factory. The video mute operates about 2 seconds when the programs are switched.

### ④ AVC button

Use to display functions of an AV amplifier having on-screen function which is connected to the AVC terminal on the rear panel.

One press on this button illuminates the indicator in orange and displays the images supplied to the AVC input. Another press on this button displays the images of the previously selected program. You can't adjust the quality of the images supplied to the AVC terminal.

### ⑤ REMOTE SENSOR

The REMOTE SENSOR receives the commands from the remote control.

## Rear panel

① **OUTPUT 1 terminals (BNC)**

Use to connect with a video device having RGB terminals such as a Projector. HD and VD are output at 1.0 Vp-p (75Ω termination).

② **S-VIDEO (S-Y/C-1 to 5) IN / VIDEO IN (VIDEO-1 to 5) terminals**

Use to connect with a device having Video or S-Video terminals as a VCR or videodisc player.

③ **MAIN SW**

Set the MAIN SW to ON to turn on the main power and to OFF to turn it off. Set this switch to OFF before long absence of operation of the product.

④ **OUTPUT 2 terminal (mini D-SUB 15P)**

Use to connect with an LCD projector. HD and VD are output at the TTL level.

⑤ **RS-232C terminal (mini D-SUB 9P)**

Use to connect with an PC.

⑥ **REC-OUT terminal**

Use to output supplied signals directly. When composite video signals or S-video signals are supplied, the composite video signals or the S-video signals are output. (Signals from a device connected to the COMPONENT IN terminals are not output.)

⑦ **AVC terminal**

Use to connect with an AV amplifier having on-screen function to display its functions. You can't adjust the quality of images supplied to the AVC terminal.

⑧ **COMPONENT IN (Y/U/V-1 to 6) terminals**

Use to connect with a device which provides video component signals such as a DVD player.

⑨ **Power supplying terminal**

Use to connect with the attached power cable.

# OVERVIEW OF THE REMOTE CONTROL

## ① Illumination button

One press on this button illuminates the titles of the buttons about 10 seconds. (▲, ▼, ◀ and ▶ and ENTER buttons are not illuminated. However, they light with stored light after the remote control is put in a bright place for a while.) Another press on this button cancels illumination.

## ② PROGRAM button

Use to select the programs in turn.

## ③ PICTURE button

Use to adjust the image quality together with ◀ and ▶ buttons. See page 20 for details.

### SHARPNESS button

Use to adjust sharpness (image quality).

### CONT(CONTRAST) button

Use to adjust contrast.

### BRIGHT button

Use to adjust brightness.

### COLOR button

Use to adjust color intensity.

### TINT button

Use to adjust tint.

## ④ ▲, ▼, ◀ and ▶ buttons

Press these buttons to select items or change settings while a menu screen or image quality adjustment screen is displayed.

## ⑤ PROGRAM buttons, 1 to 10

Use to select the program numbers directly.

## ⑥ POWER button

Press the ON side to turn on the product while the MAIN SW on the rear panel is set to ON. Press the OFF side to turn it off.

## ⑦ ESC button

Use to display the previous menu screen. One press on this button without a menu screen displayed, the title of the currently selected program, input terminals and video format are displayed about 5 seconds.

## ⑧ ENTER button

Use to fix a selected item on a menu screen.

⑨ **VC MENU button**

Use to display the VIDEO EQUALIZING MENU for image quality adjustment. Press this button again to cancel the VIDEO EQUALIZING MENU. See page 21 for details.

⑩ **LIST button**

Use to confirm and set the contents of the programs. See page 15 for details.

⑪ **AVC button**

Use to display functions of an AV amplifier connected to the AVC terminal.

## Batteries installation

- 1** Push the back cover in the direction of the arrow to remove it.
- 2** Load the batteries making sure that they are positioned correctly (+ to +, and - to -).
- 3** Attach the back cover.

- Use four AA size dry batteries.

## Handling the remote control

Do not drop it or give it a shock.

Do not spill liquid on it or put it on a wet object.

Do not wipe it with volatile liquid such as benzine or thinner.

## NOTE

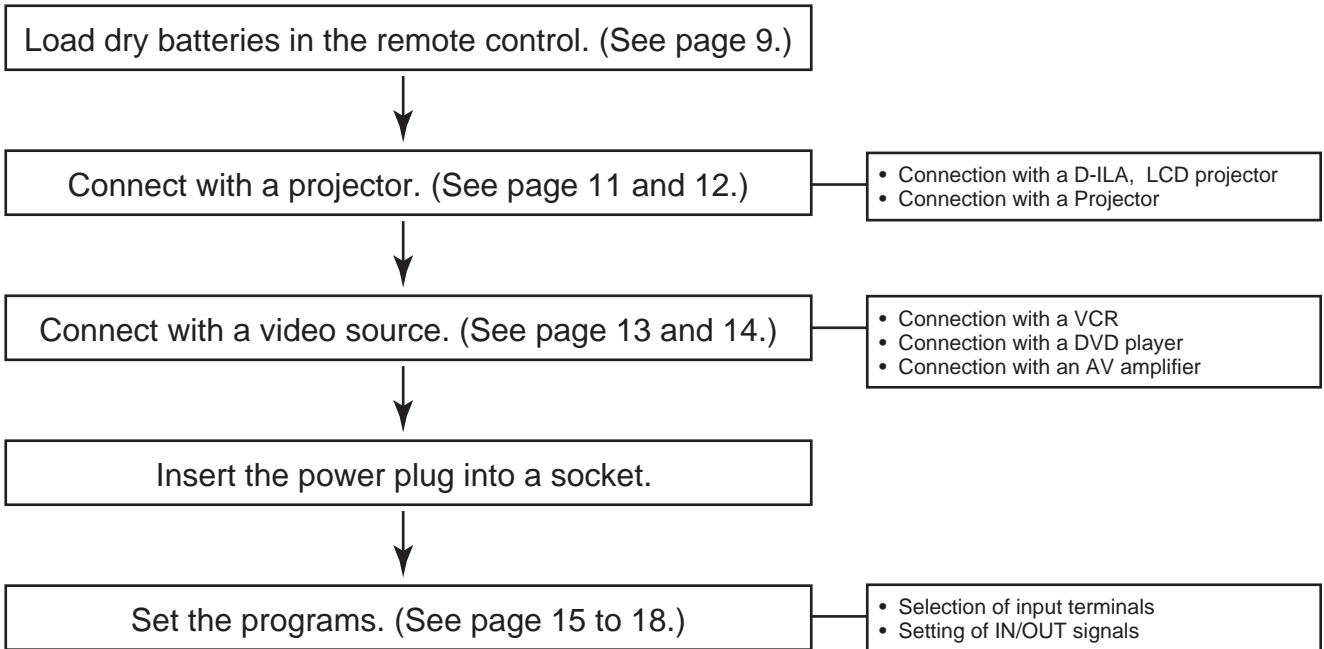

### Handling batteries

Wrong usage of batteries may cause a leak of inside solution or an explosion. Please follow the instructions below.

- Load the batteries in the correct positions.
- Do not use new and old batteries together, or batteries of different type together.
- Take the batteries out before long absence of operation of the remote control. In case of a leak of inside solution, wipe up the solution off the remote control and load new batteries.
- Do not take the batteries apart or throw them into flames.
- Do not use alkaline dry batteries. Wrong usage may lead to generating heat, an explosion and a leak of inside solution causing an injury or burn.
- Do not try to recharge the batteries.

# PREPARATION

## Preparing for operation

## System configuration

This product can be connected with 2 projectors and 18 video sources at the maximum.

# CONNECTIONS

## Connection with a D-ILA, LCD projector

## Example of the advanced image quality adjustment screen

```

VIDEO EQUALIZING MENU 2
COLOR-COMP      : 1
GAMMA-COR      : OFF
DC-TRN-COR     : OFF
PRE/OVER       : 1
Y-EDGE        : OFF
C-EDGE        : OFF
↓ MENU 3
    
```

```

VIDEO EQUALIZING MENU 3
PICTURE-EX     : OFF
COLOR-EX      : OFF
↓ MENU 1
    
```

- HD and VD from the OUTPUT2 (mini D-SUB 15P) are output at the TTL level.

Important!

- Turn off the power before connection.
- Insert the plug completely.
- Unplug by holding the plug, not by pulling the cable out.
- Also refer to the users' guide of the D-ILA, LCD projector.

## CONNECTIONS (continued)

### Connection with a Projector

#### Example of the advanced image quality adjustment screen

```
VIDEO EQUALIZING MENU 2
COLOR-COMP      : 1
GAMMA-COR      : OFF
DC-TRN-COR     : OFF
PRE/OVER       : 4
Y-EDGE         : OFF
C-EDGE         : OFF
↓ MENU 3
```

```
VIDEO EQUALIZING MENU 3
PICTURE-EX     : OFF
COLOR-EX       : OFF
```

↓ MENU 1

#### Important!

- Turn off the power before connection.
- Insert the plug completely.
- Unplug by holding the plug, not by pulling the cable out.
- Also refer to the users' guide of the projector.

## Connection with a VCR

### Example of the program setting screen

```
PROGRAM 1 :
INPUT TERMINAL : S-Y/C-3
VIDEO FORMAT :
COLOR MATRIX :
LINE DOUBLER : ON
VIDEO BAND : WIDE
PROG-TITLE : VTR
```

See page 15 to 18 for setting and the setting items.

- Noises may appear on images when a videotape with unstable sync signals is played back. In such a case, it is recommended to use a VCR with a built-in TBC (Time Base Corrector) circuit.
- Noises may appear on images when a videotape with poor recording quality is played back, it is forwarded being played back, or the product receives television signals in poor signal area. This is due to unstable sync signals, not a product's failure.

## Connection with a DVD player

### Example of the program setting screen

```
PROGRAM 1 :
INPUT TERMINAL : Y/U/V-1
VIDEO FORMAT : 15.7k
COLOR MATRIX : YCbCr
LINE DOUBLER : ON
VIDEO BAND : WIDE
PROG-TITLE : DVD
```

See page 15 to 18 for setting and the setting items.

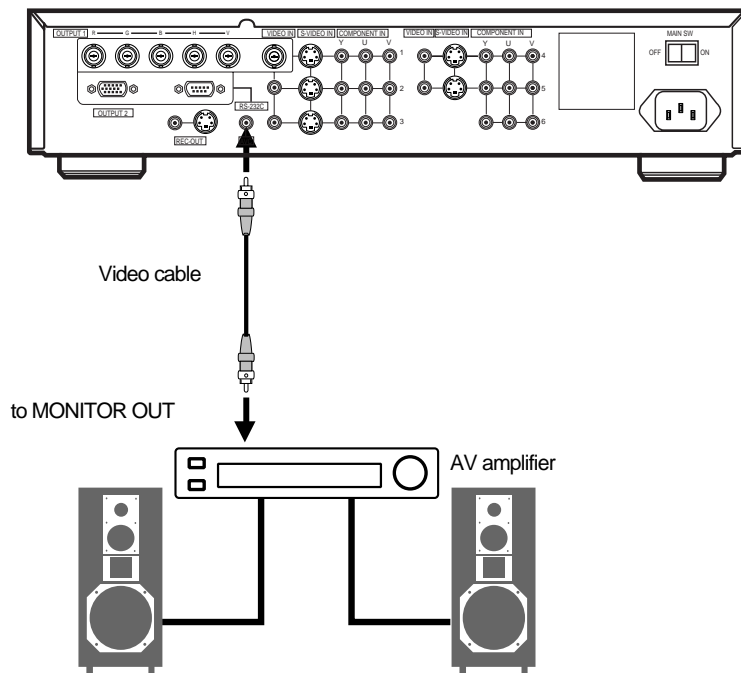

### Important!

- Turn off the power before connection.
- Use the correct connecting cables which fit to the terminals.
- Insert the plug completely.
- Unplug by holding the plug, not by pulling the cable out.
- Also refer to the users' guide of the connected device because some devices have terminals of different names or need different connection.

## CONNECTIONS (continued)

---

### Connection with an AV amplifier

---

#### Important!

- Turn off the power before connection.
- Use the correct connecting cables which fit to the terminals.
- Insert the plug completely.
- Unplug by holding the plug, not by pulling the cable out.
- Also refer to the users' guide of the connected device because some devices have terminals of different names or need different connection.

# INPUT SETTING

You can set programs for every input signal and select them by the program buttons. Ten program buttons on the front panel specify not the input terminals but the programs. So, it is necessary to connect your video sources to optional terminals and set programs in advance.

## Setting program

<b>1</b>	<b>Turn on the connected devices.</b>	
<b>2</b>	<b>Turn on the MAIN SW on the rear panel.</b> The main power indicator illuminates in red.	
<b>3</b>	<b>Press the POWER button.</b> The power indicator illuminates in green.	
<b>4</b>	<b>Press the LIST button on the remote control.</b> <ul style="list-style-type: none"> <li>• The SOURCE PROGRAM LIST is displayed.</li> <li>• The SOURCE PROGRAM LIST-1 is displayed when any of the program numbers 1 to 5 is selected.</li> <li>• The SOURCE PROGRAM LIST-2 is displayed when any of the program numbers 6 to 10 is selected.</li> <li>• Press the LIST button again to cancel the SOURCE PROGRAM LIST.</li> <li>• The SOURCE PROGRAM LIST is automatically canceled when there is no press on the buttons for 15 seconds.</li> </ul>	<div style="border: 1px solid black; padding: 5px; margin-bottom: 10px;"> <p>SOURCE PROGRAM LIST-1</p> <p>PROGRAM 1 : LD</p> <p>PROGRAM 2 : DVD</p> <p>PROGRAM 3 : HD</p> <p>PROGRAM 4 : VTR1</p> <p>PROGRAM 5 : VTR2</p> <p style="text-align: center;">ENTER : PROGRAMING MENU</p> </div> <div style="border: 1px solid black; padding: 5px;"> <p>SOURCE PROGRAM LIST-2</p> <p>PROGRAM 6 :</p> <p>PROGRAM 7 :</p> <p>PROGRAM 8 :</p> <p>PROGRAM 9 :</p> <p>PROGRAM10 :</p> <p style="text-align: center;">ENTER : PROGRAMING MENU</p> </div>

## INPUT SETTING (continued)

<p><b>5</b> Press the ▲ or ▼ button on the remote control to select a program number to be set.</p> <p>The selected program is displayed in yellow.</p>									
<p><b>6</b> Press the ENTER button.</p> <p>The program setting screen of the selected program number is displayed.</p>	<pre>PROGRAM 1: INPUT TERMINAL :S-Y/C-1 VIDEO FORMAT  : COLOR MATRIX   : LINE DOUBLER   :ON VIDEO BAND     :WIDE PROG-TITLE     :LD</pre>								
<p><b>7</b> Press the ◀ or ▶ button on the remote control to select the INPUT TERMINAL.</p> <ul style="list-style-type: none"> <li>Select the INPUT TERMINAL corresponding to the connected input terminal. Refer to the table on the right.</li> </ul>	<table border="1"> <thead> <tr> <th>Type of input terminal</th> <th>Display</th> </tr> </thead> <tbody> <tr> <td>Video terminal</td> <td>VIDEO-1to 6</td> </tr> <tr> <td>S-Video terminal</td> <td>S-Y/C-1 to 6</td> </tr> <tr> <td>Component(Y/U/V)terminal</td> <td>Y/U/V-1 to 6</td> </tr> </tbody> </table>	Type of input terminal	Display	Video terminal	VIDEO-1to 6	S-Video terminal	S-Y/C-1 to 6	Component(Y/U/V)terminal	Y/U/V-1 to 6
Type of input terminal	Display								
Video terminal	VIDEO-1to 6								
S-Video terminal	S-Y/C-1 to 6								
Component(Y/U/V)terminal	Y/U/V-1 to 6								
<p><b>8</b> Press the ENTER button.</p> <ul style="list-style-type: none"> <li>Images supplied to the selected input terminal are displayed.</li> </ul>									
<p><b>9</b> Press the ▲ or ▼ button on the remote control to select an item to be changed.</p> <ul style="list-style-type: none"> <li>The selected item is displayed in yellow.</li> <li>Some items can not be changed due to the INPUT TERMINAL setting, etc. You can not select such items.</li> <li>See page 17 for detailed description of each item.</li> </ul>	<pre>PROGRAM 1: INPUT TERMINAL :S-Y/C-1 VIDEO FORMAT   : COLOR MATRIX   : LINE DOUBLER   :ON VIDEO BAND     :WIDE PROG-TITLE     :LD</pre>								
<p><b>10</b> Press the ◀ or ▶ button on the remote control to change the setting of the selected item.</p>	<pre>PROGRAM 1: INPUT TERMINAL :S-Y/C-1 VIDEO FORMAT   : COLOR MATRIX   : LINE DOUBLER   :OFF VIDEO BAND     :WIDE PROG-TITLE     :LD</pre>								
<p><b>11</b> Press the ENTER button.</p> <ul style="list-style-type: none"> <li>The changed setting is fixed.</li> <li>The input terminal is also changed at the same time when you change the INPUT TERMINAL setting.</li> </ul>									
<p><b>12</b> Press the VC MENU button.</p> <p>The program setting screen is canceled.</p>									

- The program setting screen is automatically canceled when there is no press on the buttons for 15 seconds. Even when the program setting screen disappears before pressing the ENTER button, the changed settings are effective.

## Program setting items

### 1 INPUT TERMINAL setting

Use this item to select the INPUT TERMINAL.

Type of input terminal	Display
Video terminal	VIDEO-1 to 6
S-Video terminal	S-Y/C-1 to 6
Component(Y/U/V)terminal	Y/U/V-1 to 6

```
PROGRAM 1:
INPUT TERMINAL :S-Y/C-1
VIDEO FORMAT   :
COLOR MATRIX   :
LINE DOUBLER   :ON
VIDEO BAND     :WIDE
PROG-TITLE     :LD
```

The settings of VIDEO FORMAT, COLOR MATRIX and LINE DOUBLER may be fixed and not be changed due to the INPUT TERMINAL setting. Refer to the following table for setting. (Yes : Changeable, No: Not changeable)

INPUT TERMINAL setting	VIDEO	S-Y/C	Y/U/V	
VIDEO FORMAT	No (Not selectable)	No (Not selectable)	Yes	
COLOR MATRIX	No (Not selectable)	No (Not selectable)	Yes	
LINE DOUBLER	Yes	Yes	VIDEO FORMAT setting	
			15.7k	31.5k or HDTV
			Yes	No (Fixed to OFF)

### 2 VIDEO FORMAT setting

Use this item to set the VIDEO FORMAT only when Y/U/V is selected.

15.7k ..... For general setting.

31.5k ..... Select when progressive signals from a DVD player for high-definition, etc. are supplied to the input terminal.

HDTV .... Select when HDTV signals from an LD player, an NTSC/HD converter, etc. are supplied to the input terminal.

- FORMAT ERROR sign is displayed about 30 seconds when the VIDEO FORMAT not corresponding to the input signals is selected.

### 3 COLOR MATRIX setting

Use this item to set the COLOR MATRIX only when Y/U/V is selected.

YCbCr ... Select when a DVD player having the component video output terminals (Y, Cb, Cr) is connected to the input terminal.

YPbPr .... Select when an LD player, an NTSC/HD converter having the HDTV component video output terminals (Y, Pb, Pr) is connected to the input terminal.

### 4 LINE DOUBLER setting

Use this item to carry out conversion of interlace signals into progressive signals.

ON ..... Conversion is carried out. (For general setting.)

OFF ..... Conversion is not carried out.

### 5 VIDEO BAND setting

Use this item to set the VIDEO BAND.

NORMAL .... For general video band. Select for an input video source with poor S/N.

WIDE ..... For wide video band. More detailed images are displayed. Noises increase when the input video source has poor S/N. (For general setting.)

### 6 PROG-TITLE setting

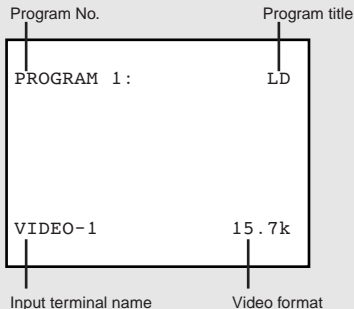

Use to set the PROG-TITLE. See the next page for setting.

# INPUT SETTING (continued)

## Program title setting

<p><b>1</b> Carry out steps 1 to 6 on page 16.</p> <p>The program setting screen of the selected program number is displayed.</p>	<pre>PROGRAM 1: INPUT TERMINAL :S-Y/C-1 VIDEO FORMAT  : COLOR MATRIX  : LINE DOUBLER  :ON VIDEO BAND    :WIDE PROG-TITLE   :LD</pre>
<p><b>2</b> Press the ▲ or ▼ button on the remote control to select PROG-TITLE.</p>	<pre>PROGRAM 1: INPUT TERMINAL :S-Y/C-1 VIDEO FORMAT  : COLOR MATRIX  : LINE DOUBLER  :ON VIDEO BAND    :WIDE PROG-TITLE   :LD</pre>
<p><b>3</b> Press the ENTER button.</p> <p>The TITLE EDIT screen is displayed and you can select the first letter of the title.</p> <ul style="list-style-type: none"> <li>You can enter ten letters at the maximum.</li> </ul>	<pre>PROGRAM 1:  TITLE EDIT    LD-----   / \ ABCDEFHGHIJKLMNOPQRSTU VWXYZ0123456789.+*/*=( abcdefghijklmnopqrstuv wxyz"'.,:; SPACE [ ] END</pre>
<p><b>4</b> Press the ◀, ▶, ▲ or ▼ button on the remote control to select a letter and press the ENTER button.</p> <ul style="list-style-type: none"> <li>The selected letter is fixed and the setting screen for the next letter is displayed.</li> <li>Select ◀ or ▶ and press the ENTER button to change the next letter on the left or right.</li> <li>Select SPACE and press the ENTER button to enter a space.</li> </ul>	<pre>PROGRAM 1:  TITLE EDIT    VD-----   / \ ABCDEFHGHIJKLMNOPQRSTU VWXYZ0123456789.+*/*=( abcdefghijklmnopqrstuv wxyz"'.,:; SPACE [ ] END</pre>
<p><b>5</b> Repeat the above operation to enter the title.</p>	
<p><b>6</b> Press the ◀, ▶, ▲ or ▼ button on the remote control to select END and press the ENTER button (or the VC MENU button).</p> <p>The menu screen disappears.</p> <ul style="list-style-type: none"> <li>Press the ESC button to display the program setting screen again.</li> <li>The menu screen disappears when the tenth letter is entered.</li> </ul>	

# BASIC USE ( To see the images from the connected devices)

<p><b>1</b> Turn on the power of the connected devices.</p>	
<p><b>2</b> Turn on the MAIN SW on the rear panel. The main power indicator illuminates in red.</p>	
<p><b>3</b> Press the POWER button. The power indicator illuminates in green.</p>	
<p><b>4</b> Select a program. Press the Program button (1 to 10), the PROGRAM <math>\wedge</math> or <math>\vee</math> button on the remote control. The images of the selected program are displayed. The settings of the selected program are displayed about 5 seconds at this time.</p> <ul style="list-style-type: none"> <li>• Press the ESC button to cancel the images.</li> <li>• No images are displayed when you select a program in which no signals are supplied to the preprogram input terminal. HD and VD outputs are stopped after NO SIGNAL sign is displayed about 30 seconds. They are output again when you carry out any kind of operation.</li> <li>• Press the PROGRAM buttons on the remote control to select the programs in turn. Each press on the <math>\wedge</math> button changes the programs as 1→2→3→... Each press on the <math>\vee</math> button changes the program as 1→10→9→...</li> </ul>	 <p>The screenshot shows a rectangular display area with the following text and labels:</p> <ul style="list-style-type: none"> <li>Top-left: PROGRAM 1 : (Label: Program No.)</li> <li>Top-right: LD (Label: Program title)</li> <li>Bottom-left: VIDEO-1 (Label: Input terminal name)</li> <li>Bottom-right: 15.7k (Label: Video format)</li> </ul>

- New images are displayed in 2 seconds after changing the programs.
- Images may not appear on the screen at the moment of changing the video channel when a VCR is connected.
- Images which are reproduced by special playback (Still image, Speed search, Slow play, etc.) may have noises or not be displayed when a VCR is connected. Noises may also appear on images when an old tape is played back.
- FORMAT ERROR is displayed about 30 seconds when a signal not corresponding to the setting of VIDEO FORMAT on the program setting screen is supplied. In such a case, change the VIDEO FORMAT setting on the program setting screen or change the input signals.

## LINE DOUBLER

The LINE DOUBLER function converts the images by interlace scanning into those by progressive scanning to output. Set the LINE DOUBLER to ON on the program setting screen to use this function.

- The 3-2 PULL DOWN function operates for film images. If the images are not processed by the 3-2 PULL DOWN function, the edges of moving images may become scratchy.
- It may take about 2 seconds until the 3-2 PULL DOWN function operates when the images are switched by the chapter search etc.
- Images may appear blurred or shake vertically when the LINE DOUBLER is set to ON with a game player, etc. connected. In such a case, set the LINE DOUBLER to OFF.
- The edges of moving images may become scratchy when using a picture element display device such as an LCD or monitor.

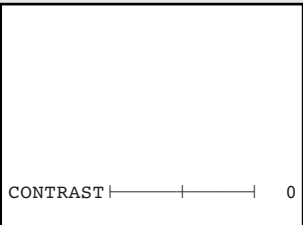

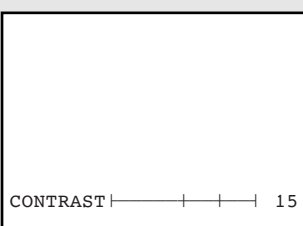

## KEY LOCK

The KEY LOCK function is provided to prevent wrong button operation.

1. Press the Program 1 button on the product and the POWER button at the same time.  
When pressing these keys for the KEY LOCK function during standby, the power is turned on and the KEY LOCK mode is activated automatically.
2. To cancel the KEY LOCK mode,  
Press the Program 10 button on the product and the POWER button at the same time.

# IMAGE QUALITY ADJUSTMENT

## Basic image quality adjustment

<p><b>1 Select a program to adjust the image quality</b> Press the PROGRAM (1 to 10) button, the PROGRAM <math>\wedge</math> or <math>\vee</math> button on the remote control.</p>	
<p><b>2 Press the PICTURE button on the remote control (SHARPNESS, CONT, BRIGHT, COLOR, or TINT) to adjust the desired item.</b> The adjustment screen of the selected item is displayed.</p>	
<p><b>3 Press the <math>\blacktriangleleft</math> or <math>\blacktriangleright</math> button on the remote control to change the setting.</b></p> <ul style="list-style-type: none"><li>• Press the <math>\blacktriangleleft</math> button to decrease the setting, and press the <math>\blacktriangleright</math> button to increase the setting. The setting can be changed from -31 to 31 (Except SHARPNESS).</li><li>• Press the <math>\blacktriangleup</math> or <math>\blacktriangledown</math> button to select the adjustment item and change the setting only for SHARPNESS. (See below.)</li><li>• The adjustment screen disappear in about 15 seconds without pressing the <math>\blacktriangleleft</math> or <math>\blacktriangleright</math> button.</li><li>• Press the ESC button to cancel the adjustment screen.</li></ul>	

- The settings of the image quality adjustment are memorized in each program. The memorized settings will be kept even when the power is turned off.

## Adjustment items

### 1. SHARPNESS adjustment

Use this item to adjust the sharpness of images in every frequency. Press the SHARP button to display the image quality setting screen.

1. Press the  $\blacktriangleup$  or  $\blacktriangledown$  button to display SHARPNESS FREQUENCY in yellow.
2. Press the  $\blacktriangleleft$  or  $\blacktriangleright$  button to set SHARPNESS FREQUENCY.
  - Each press on the  $\blacktriangleright$  button change the setting as 1(LOW) $\rightarrow$ 2(STD) $\rightarrow$ 3(MID) $\rightarrow$ 4(HIGH). Each press on the  $\blacktriangleleft$  button changes it in reverse.
3. Press the  $\blacktriangleup$  or  $\blacktriangledown$  button to display GAIN in yellow.
4. Press the  $\blacktriangleleft$  or  $\blacktriangleright$  button to adjust GAIN.
  - Each press on the  $\blacktriangleright$  button sharpens the images. Each press on the  $\blacktriangleleft$  button softens the images.

### 2. CONTRAST adjustment

Use this item to adjust the ratio of black and white contrast of images. Press the CONT button to display the contrast setting screen. Each press on the  $\blacktriangleright$  button strengthens the contrast. Each press on the  $\blacktriangleleft$  button weakens the contrast.

### 3. BRIGHT adjustment

Use this item to adjust the luminance of the whole image. Press the BRIGHT button to display the bright setting screen. Each press on the  $\blacktriangleright$  button brightens the images. Each press on the  $\blacktriangleleft$  button darkens the images.

### 4. COLOR adjustment

Use this item to adjust the color intensity of images. Press the COLOR button to display the color setting screen. Each press on the  $\blacktriangleright$  button increase the color intensity. Each press on the  $\blacktriangleleft$  button decrease the color intensity.

### 5. TINT adjustment

Use this item to adjust the color tone of images. Press the TINT button to display the tint setting screen. Each press on the  $\blacktriangleright$  button shifts green on skin color. Each press on the  $\blacktriangleleft$  button shifts purple on skin color.

- When the settings of the image quality adjustment (e.g. contrast and luminance) are increased too much, the images may not be displayed clearly. It happens due to a large signal supplied to the product, not to a product's failure.

## Advanced image quality adjustment

<p><b>1 Select a program to adjust the image quality</b> Press the PROGRAM (1 to 10) button, the PROGRAM <math>\wedge</math> or <math>\vee</math> button on the remote control.</p>	
<p><b>2 Press the VC MENU button on the remote control.</b> The CONTROL MENU is displayed.</p>	<pre>CONTROL MENU 1:VIDEO EQUALIZING 2:SOURCE SETTING 3:PARAMETER ENTRY</pre>
<p><b>3 Press the <math>\blacktriangle</math> or <math>\blacktriangledown</math> button on the remote control to select VIDEO EQUALIZING, and press the ENTER button.</b> The VIDEO EQUALIZING MENU is displayed.</p>	<pre>VIDEO EQUALIZING MENU 1 COLOR-TEMP      :HIGH Y-NR             :OFF C-NR             :OFF YCS PARAMETER   : Y/C-DELAY       :0  ↓ MENU 2</pre>
<p><b>4 Press the <math>\blacktriangle</math> or <math>\blacktriangledown</math> button on the remote control to select the item to be changed.</b></p> <ul style="list-style-type: none"> <li>The selected item is displayed in yellow.</li> <li>Some items can not be changed due to the INPUT TERMINAL setting, etc. You can not select such items.</li> <li>Keep pressing the <math>\blacktriangledown</math> button to switch the screens as MENU1→MENU2→MENU3.</li> <li>See page 22 for details of each item.</li> </ul>	<pre>VIDEO EQUALIZING MENU 1 COLOR-TEMP      :HIGH Y-NR             :OFF C-NR             :OFF YCS PARAMETER   : Y/C-DELAY       :0  ↓ MENU 2  ↓  VIDEO EQUALIZING MENU 2 COLOR-COMP      :1 GAMMA-COR       :OFF DC-TRN-COR      :OFF PRE/OVER        :1 Y-EDGE          :MID C-EDGE          :MID  ↓ MENU 3  ↓  VIDEO EQUALIZING MENU 3 PICTURE-EX      :MID COLOR-EX        :ON  ↓ MENU 1</pre>
<p><b>5 Press the <math>\blacktriangleleft</math> or <math>\blacktriangleright</math> button on the remote control to change the setting items.</b></p>	
<p><b>6 Press the VC MENU button.</b> The menu screen disappears.</p>	

- The settings of the image quality adjustment are memorized in each program. The memorized settings will be kept even when the power is turned off.

# IMAGE QUALITY ADJUSTMENT (continued)

## Adjustment items

### VIDEO EQUALIZING MENU 1

#### 1. COLOR-TEMP setting

Use this item to set the color temperature. Each press on the ► button changes the selection as HIGH (luminance of TV monitor/ Japanese standard)►USER►REF (Reference)►LOW (luminance of sunlight)►MID (luminance of TV monitor/Europe and America). Each press on the ◀ button to changes it in reverse.

Select USER to change the relative balance of each color (detail setting).

##### Detail setting

1. Select USER for COLOR-TEMP setting.

2. Press the ENTER button.

3. Select the color to be adjusted.

Press the ▲ or ▼ button to select R (Red) or B (Blue).

4. Adjust the color.

Selecting R ..... Each press on the ► button strengthens red, making the images reddish. Each press on the ◀ button weakens red, adding more cyan to the image.

Selecting B ..... Each press on the ► button strengthens blue, making the image bluish. Each press on the ◀ button weakens blue, adding more yellow to the image.

5. Press the ESC button.

The VIDEO-EQUALIZING MENU 1 appears.

#### 2. Y-NR setting

Use this item to carry out noise reduction of luminance signals. Y-NR is available only when the INPUT TERMINAL on the program setting screen is set to S-Y/C.

ON ..... Noise reduction of luminance signals is carried out.

OFF ..... Noise reduction of luminance signals is not carried out.

#### 3. C-NR setting

Use this item to carry out noise reduction of color signals. C-NR is available only when the INPUT TERMINAL on the program setting screen is set to S-Y/C and Y-NR is set to ON.

ON ..... Noise reduction of color signals is carried out.

OFF ..... Noise reduction of color signals is not carried out.

#### 4. YCS PARAMETER setting

Use this item to set the mode for Y/C separation. YCS PARAMETER is available only when the INPUT TERMINAL on the program setting screen is set to VIDEO. Each press on the ► button changes the mode as 2D►3D-STD►3D-MID►3D-HR►2D... Each press on the ◀ button changes it in reverse.

2D ..... For two-dimensional Y/C separation by Faroudja IC circuit. This is the best mode for the images containing neutral colors because cross color is reduced.

3D-STD ..... For three-dimensional Y/C separation.

3D-MID ..... For three-dimensional Y/C separation. This mode provides high detailed images because it emphasizes only the high frequency areas of the luminance signals and the color signals. However, cross colors may often occur.

3D-HR ..... For three-dimensional Y/C separation. This mode provides the highest resolution images because TVH is set with a filter. However, the dot interference may occur. This is the best mode for monochrome movies.

#### 5. Y/C-DELAY adjustment

Use this item to adjust the dislocation between outline (the luminance signals) and color (the color signals). Y/C-DELAY is adjustable only when the LINE DOUBLER on the program setting screen is set to ON. Each press on the ► button changes the setting as 0►+1►+2. Each press on the ◀ button changes it as 0►-1►-2.

-1, -2 ..... Select when the color is slightly moved to the right.

0 ..... For general setting.

+1,+2 ..... Select when the color is slightly moved to the left.

```
VIDEO EQUALIZING MENU 1
COLOR-TEMP      :HIGH
Y-NR            :OFF
C-NR            :OFF
YCS PARAMETER  :
Y/C-DELAY      :0
↓ MENU 2
```

## VIDEO EQUALIZING MENU 2

### 1. COLOR-COMP adjustment

Use this item to adjust the color detection axis. Depending on the selected modes, the color balance (especially skin color) is changed. Each press on the ► button changes the setting as 1→2→3. Each pressing on the ◀ button changes it in reverse.

- 1 ..... JAPAN mode. For general setting.
- 2 ..... USA mode.
- 3 ..... EUROPE mode.

### 2. GAMMA-COR setting

Use this item to set the gamma correction (output signals correction for input signals' luminance). Each pressing on the ► button changes the setting as OFF→1→2→3→...15. Each pressing on the ◀ button changes it in reverse.

OFF ..... Gamma correction is not carried out.

1 to 15 ...Gamma correction is carried out. The compensation of gamma correction becomes larger and the image becomes lighter as the setting value increases. (See the right graph for the compensation.)

### 3. DC-TRAN-COR adjustment

Use this item to adjust the DC transfer rate for luminance signals. Each press on the ► button changes the setting as OFF→90(%)→85(%)→80(%). Each pressing on the ◀ button changes it in reverse.

OFF ..... For general adjustment.

90/85/80 ..... The DC transfer rate is changed. Select when the black and white contrast is too strong. The contrast becomes weaker as the setting value decreases.

### 4. PRE/OVER setting

Use this item to set the ratio of Pre-shoot against Overshoot of images.

Each press on the ► button changes the setting as 1→2→3→4. Each pressing on the ◀ button changes it in reverse.

1 ..... Corrects the ratio of Pre-shoot against Overshoot to 1:1.

2/3/4 ..... The ratio of Pre-shoot becomes higher as the setting value increases. Set at 1 for general setting.

### 5. Y-EDGE setting

Use this item to carry out edge reform of luminance signals. Each Press on the ► button changes the setting as OFF→LOW→MID→HIGH. Each press on the ◀ button changes it in reverse. Set to OFF for general setting. The edges may become scratchy when any other setting than OFF is selected.

### 6. C-EDGE setting

Use this item to carry out edge reform of color difference signals. Each press on the ► button changes the setting as OFF→LOW→MID→HIGH. Each press on the ◀ button changes it in reverse. Set to OFF for general setting.

COLOR-COMP	: 1
GAMMA-COR	: OFF
DC-TRN-COR	: OFF
PRE/OVER	: 1
Y-EDGE	: OFF
C-EDGE	: MID
↓ MENU 3	

## VIDEO EQUALIZING MENU 3

### 1. PICTURE-EX setting

Use this item to carry out black extension. PICTURE-EX enhances the contrast without changing the white level. Each press on the ► button changes the setting as OFF→LOW→MID→HIGH. Each press on the ◀ button changes it in reverse.

OFF ..... Black extension is not carried out. Select when connecting with a Graphics CRT projector.

LOW ..... Extends when the black level of the signal is under IRE30%. (Low)

MID ..... Extends when the black level of the signal is under IRE35%. (Middle)

HIGH ..... Extends when the black level of the signal is under IRE40%. (High)

### 2. COLOR-EX setting

Use this item to carry out color signal extension.

OFF ..... Color signal extension is not carried out. For general setting.

ON ..... Color signal extension is carried out.

# Control this line doubler by using a personal computer

You can control this product using a personal computer (PC) having an RS-232C terminal by connecting them together.

## Functions controlled by a PC

- Power on/off
- Image quality adjustment (CONTRAST, COLOR, TINT, SHARPNESS)
- Program switching
- Line doubler setting

## Connection

Turn off your PC and the product before connecting them together.

## Important!

- A serial adapter for 25-pin is required when you connect a PC made by IBM having a serial port for 25-pin only or a compatible PC with it. Ask your dealer about details on such connection.

## PC system requirements for control

- Compatible device with IBM-PC/AT having an RS-232C terminal
- Windows 95

## Trademark

Microsoft, Windows is a registered trademark of Microsoft Corporation in the United States and other countries.

IBM-PC/AT is a registered trademark of IBM Corp.

  
FAROUJIA PICTURE PLUS™ and FAROUJIA Laboratories® is a registered trademark of Faroudja, Inc. in the United States.

Other company names and brand names described in this manual are the trademark or registered trademark of each company.

The marks of ® and ™ are omitted in this manual.

## Product representation

Microsoft® windows® 95 operating system is represented as Windows 95 in this manual.

Use the attached application software designed only for control to control the product using a PC.

### To install the application software

- 1 Insert the attached floppy disk into the floppy disc drive.
2. Double-click My Computer on your desk top and then double-click 3 1/2 Floppy in the My Computer window.
3. Select the VULD20.EXE file in the 3 1/2 Floppy disc drive window and then drag the VULD20.EXE file to the Hard disc drive folder in the My Computer window.

### To start the program

1. Double-click My Computer on your desk top and then double-click Hard disc in the My Computer window.
2. Select and double-click the VULD20.EXE file in the Hard disc drive window.

The following window is displayed.

The screenshot shows a control window titled "VU-LD20/VU-LD20U". It contains several control panels:

- POWER**: ON/OFF buttons.
- INPUT**: UP/DOWN buttons.
- CONTRAST**: UP/DOWN buttons.
- TINT**: UP/DOWN buttons.
- COLOR**: UP/DOWN buttons.
- SHARPNESS**: UP/DOWN buttons.
- DOUBLER**: ON/OFF buttons.
- Status**: A text field showing "Ready".
- COM Port**: A dropdown menu set to "COM1".

Callouts on the left side of the window provide descriptions for POWER, CONTRAST, COLOR, DOUBLER, and COM Port. Callouts on the right side provide descriptions for INPUT, TINT, SHARPNESS, and Status.

**POWER**  
Use to turn on or off the power while the main power switch is set to ON.

**CONTRAST**  
Use to adjust contrast (brightness ratio of black and white).

**COLOR**  
Use to adjust color (color intensity).

**DOUBLER**  
Use to select the operation of the line doubler.

**COM Port**  
Use to select the port number of the connected PC.

**INPUT**  
Use to select the programs in turn.

**TINT**  
Use to adjust tint.

**SHARPNESS**  
Use to adjust sharpness.

**Status**  
Indicates the status of communication.  
Ready..... Waiting to receive commands.  
Sending..... Sending commands.  
COM Port Error.. An error has occurred.  
Timed Out.... Time out

- Change the port of the connected PC shown in the COM Port selection box at the lower- left of the window when clicking the buttons doesn't work.

### To quit the program

Click the Close button in the upper-right corner of the window.

# TROUBLESHOOTING

---

Check the following before asking your dealer for service.

Signal problems may be regarded as a product's failure.

-  Images are not displayed on the screen, or NO SIGNAL is displayed.
- Is the power cord of the video projector or the product connected?
  - Is the connecting cable of the video projector or the product connected?
  - Are the correct connection terminals of the external device selected for the input signals?
  - Is the INPUT TERMINAL of the program setting screen set correctly?
  - Is the connecting terminal of the external device connected?
  - Is the external device turned on?
  - Is the video mute operated for the external device?
  - Are the signal connections with the external device or projector correct?

-  The color tone is not right.
- Are the signal connections with the external device or projector correct?
  - Are the signals (RGB, YCbCr or YPbPr) of the external device or projector, and the input signals of the product set correctly?

-  The buttons are not effective.
- Is the KEY LOCK function effective?
  - Press the Program 10 button and the POWER button at the same time to cancel the KEY LOCK.

-  FORMAT ERROR is displayed.
- Is VIDEO FORMAT of the program setting screen set correctly?
  - This product does not recognize the input video signals as a standard NTSC signal when they contain unnecessary signals such as noise (under shoot below pedestal). In such a case, ask your dealer about the connected device.

-  Noises appear on the images.
- Is the videotape played back by special playback such as Still, Fast forward, Slow, etc.?
  - Are you playing an old videotape?
  - Noises may appear when a videotape with unstable sync signals is played back. In such a case, it is recommend to use a VCR with a built-in TBC (Time Base Corrector) circuit.
  - Are you using a video source which provides weak image signals, especially weak synchronizing signals (not-standard sync. or with noises etc.)?
  - Are the images supplied from a poor-receiving tuner?

-  The edges are scratchy even when the LINE DOUBLER is set to ON.
- The edges of moving images other than film images may become scratchy. Some software may record images as both video and film images.
  - The 3-2 PULL DOWN function may not be effective when the images are switched by the chapter search.
  - The edges of moving images may become scratchy when using a picture element display device such as an LCD or monitor.

-  The product does not operate correctly when connected with an external device.
- This product is not applicable to any other projectors than JVC LCD projector.  
(If connecting with other manufacturer's product, set the sync. signal of the connected external device to H/V separate manually. The product may operate.)
  - This product outputs 525p signals (DVD progressive). When it is connected with a VGA signal device, images may be displayed by under-scanning, or not be displayed at all due to bad sync.

-  Setting of CONTRAST, SHARPNESS, BRIGHT, COLOR or TINT are not memorized.
- Settings are not memorized when the power is turned off while the adjustment screen of CONTRAST, SHARPNESS, BRIGHT, COLOR or TINT is displayed. Press the ESC button on the remote control or turn off the power after the adjustment screen disappears to keep the settings.

(HDTV input only  $\pm 10\%$ )

75 $\Omega$  termination, positive

G: BNC connector

0.7Vp-p  $\pm 20\%$

(HDTV input only  $\pm 10\%$ )

75 $\Omega$  termination, positive

B: BNC connector

0.7Vp-p  $\pm 20\%$

(HDTV input only  $\pm 10\%$ )

75 $\Omega$  termination, positive

HD: BNC connector

Horizontal sync. output, 1.0Vp-p

75 $\Omega$  termination, positive

VD: BNC connector

Vertical sync. output, 1.0Vp-p

75 $\Omega$  termination, positive

OUTPUT 2

D-SUB 15P connector

(See Connectors)

HD: TTL level output

VD: TTL level output

#### MONITOR output

REC-OUT

RCA connector

1.0Vp-p  $\pm 20\%$  negative sync

75 $\Omega$  termination

4P DIN connector

Y output: 1.0Vp-p  $\pm 20\%$  negative sync

75 $\Omega$  termination

C output: Burst 0.286Vp-p  $\pm 20\%$

75 $\Omega$  termination

---

## General

---

<b>Rated power supply</b>	AC120 V, 60 Hz
<b>Rated input</b>	41 W
<b>Operating conditions</b>	Temperature: +5 °C to +35 °C    humidity: 30% to 80%
<b>Installation conditions</b>	Temperature: -20 °C to +35 °C    humidity: 30% to 90%
<b>Outside dimensions</b>	42.6 cm X 10.0 cm X 33.9 cm
<b>Weight</b>	Approx. 8.5 kg

## Connectors

---

### OUTPUT 2 (D-SUB-15PIN)

PIN NO.	SPEC	PIN NO.	SPEC
1	R(RE D)	9	-
2	G(GREEN)	10	GND
3	B(BLUE)	11	GND
4	GND	12	-
5	GND	13	HD
6	GND	14	VD
7	GND	15	-
8	GND		

### RS-232C (D-SUB-9PIN)

PIN NO.	NAME	I/O
1	N.C.	
2	RXD	IN
3	TXD	OUT
4	N.C.	
5	GND	
6	N.C.	
7	N.C.	
8	N.C.	
9	N.C.	

---

## What's included in the box

---

- Remote control (1)
- AA batteries (4)
- AC power cord 2.9m (1)
- Instruction manual (1)
- Warranty card (1)
- Toll free card (1)
