## Safety Precautions

Thank you for purchasing this product.  
(These instructions are for KA-DV300U)  
Before beginning to operate this unit, please read the instruction manual carefully in order to make sure that the best possible performance is obtained.

Due to design modifications, data given in this instruction book are subject to possible change without prior notice.

**WARNING:**  
**TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.**

**AVERTISSEMENT:**  
**POUR EVITER LES RISQUES D'INCENDIE OU D'ELECTRO-CUTION, NE PAS EXPOSER L'APPAREIL A L'HUMIDITE OU A LA PLUIE.**

**POWER SYSTEM**  
**Connection of POWER supply**  
The power for the network pack is supplied through the camera that is connected to the network pack.

This equipment is in conformity with the provisions and protection requirements of the corresponding European Directives. This equipment is designed for professional video appliances and can be used in the following environments:

- residential area (in houses) or rural area
- commercial and light industry; e.g. offices or theatres
- urban outdoors

In order to keep the best performance and furthermore for electromagnetic compatibility. Use the PC Card which acquired a CE mark.

**Caution**

Where there are strong electromagnetic waves or magnetism, for example near a radio or TV transmitter, transformer, motor, etc., the picture may be disturbed. In such case, please keep the apparatus away from the sources of the disturbance.

## Product Components

### Network Pack KA-DV300

Adapter for encoding/decoding video/audio data by connecting to GY-DV300.

### Network Pack Startup Guide (This document)

This document describes the basic matters for use of the Network Pack.

### CD-ROM

The following software and these Instructions are included on the provided CD-ROM.

- **Streamproducer Software**

Software used for distributing movies on a network.

- **Network Pack User's Guide (pdf)**

Reference guide for the Network Pack.

- **User's Guide (pdf) to "Streamproducer" – the software for network distribution.**

Software for live broadcasting and distribution on networks.

Setting of the KA-DV300 is performed on the menu screen of the GY-DV300 camcorder. For details on the setting methods, please see the Network Pack User's Guide (pdf) included on the provided CD-ROM.

**CD-ROM\MENU\Network Pack User's Guide (pdf)**

When the Streamproducer program included on the provided CD-ROM is installed, the Network Pack User's Guide (pdf) is automatically installed on the PC and added to the Start menu.

**[Start/Programs/KA-DV300U/User's Guide]**

The Adobe Acrobat Reader is required to view PDF files.

## Features

- By connecting the unit to GY-DV300, video/audio of camera or tape playback can be encoded/decoded in realtime. Video data is converted to MPEG-4 and audio data is converted to G726.
- Installing a LAN-card in the PC card slot enables real-time streaming.
- Installing a Compact Flash card in the PC card slot enables real-time capturing.
- Network distribution of the video/audio file created by the KA-DV300 is possible when the "Streamproducer" program included on the provided CD-ROM is installed on the PC.

## Precautions

- Be sure to turn the camcorder's power supply OFF before the KA-DV300 is attached to the camcorder.
  - Be sure to turn the camcorder's power supply OFF before inserting or removing CF (Compact Flash) cards, etc., into and from the camcorder. Inserting or removing cards while the camcorder's power supply is turned ON can result in corruption of the recorded sections of the card or damage to the card itself.
  - The KA-DV300 accepts the following cards for which operation has been confirmed:

Operating voltage	3.3 V
Current consumption	Max. 300 mA

    - Wired LAN-card
      - US: EA2900-117 (Revision C) (Name of manufacturer: Socket Communications, Inc)<sup>\*1</sup>
      - Europe: EA2903-162 (Revision C) (Name of manufacturer: Socket Communications, Inc)<sup>\*1</sup>
      - Asia: EA2906-194 (Revision C) (Name of manufacturer: Socket Communications, Inc)<sup>\*1</sup>(The Revision designation is indicated in the upper right of the serial number label affixed to the package.)
    - Wireless LAN-card
      - TEW-PC16 (firmware version 0.8.3 or later) (Name of manufacturer: TRENDware)
      - WCF11 (Name of manufacturer: LINKSYS)<sup>\*2</sup>
    - CF (Compact Flash) card
      - SDCFB-16-801 ~ SDCFB-256-801 (Name of manufacturer: SunDisk)<sup>\*1</sup>

<sup>\*1</sup>: Use PCMCIA card TYPE I or TYPE II adapter  
<sup>\*2</sup>: Use PCMCIA card TYPE II adapter
- Do not use other cards that those for which operation has been confirmed. Improper installation may cause damage to the KA-DV300.  
(For the latest cards for which operation have been confirmed, please consult the person in charge of professional video equipment at your nearest JVC-authorized service agent.)

\* The names of actual companies and products mentioned in this document may be the trademarks or registered trademarks of their respective owners.  
In this document, symbols like ™, ®, ©, etc. have been omitted.

## Precautions (cont'd)

### Streamproducer Operating Environment

- Under the following conditions, the Streamproducer can be used in the required operating environment.
  - When using 1 camera or 1 file.
  - When recording of the camera image is not performed.
  - When switched distribution is not performed.

#### Required operating environment

Hardware	
CPU	Pentium III 700 MHz
Memory	128 MB
Display	XGA (1024 X 768)
Hard disk	* 50 MB for installation * 1 hour viewing time requires empty hard disk space equivalent to 25 MB (high compression) to 200 MB (low compression).
Network	* 1 LAN system for connecting the network pack * Internet connection to download codec program for playback of moving pictures * Other network environment for distribution if distribution is to be performed in other environment than that described above
Software	
OS	Windows 2000 Professional (English)
Others	An environment in which Windows Media Player 7.1 or later is already installed is necessary for installation of Streamproducer

- When using multiple cameras or files, the following operating environment is recommended in order to make full use of the application's functions.

#### Recommended Operation Environment

Hardware	
CPU	Pentium 4 2.2 GHz or higher
Memory	512 MB or more
Display	SXGA (1280 X 1024) or more

Other operating environment demands are the same as the required operating environment demands.

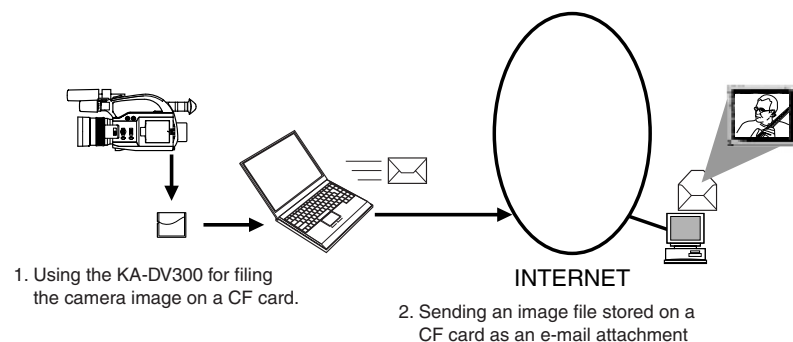

#### MEMO

The described required operating environment and recommend operating environment are both meant as guidelines to ensure optimal use of the application but are not meant as guarantee of operation. Also, even if you use a computer that complies with the operating environment, optimal use of the application may not be obtainable due to the configuration of your system.

English

## What the KA-DV300 can be used for

### Sending camera video/audio by email using CF (Compact Flash) card

#### Operation method

- ☞ See Network Pack User's Guide (pdf) "CF card recording"

### Viewing and filing camera images on your PC using "Streamcapture"

#### Operation method

- ☞ • See "LAN card", "Streamcapture" in the Network Pack User's Guide (pdf)
- See the User's Guide to the "Streamproducer" software for network distribution.

#### Operating environment

- Windows 2000
- Internet Explorer 5.0 or later

## What the KA-DV300 can be used for (cont'd)

### Connecting a notebook computer for remote control with monitor

Camera settings and VTR control can be performed using a notebook computer.

#### Operation method

☞ See "Streamcodec" in the Network Pack User's Guide.

### Distributing camera images on an intranet

1. Using the KA-DV300 to transfer the camera images to a PC

2. Using Streamproducer to redistribute the camera images transferred to the PC  
**Operating environment**  
 • Windows 2000  
 • Internet Explorer 5.0 or later

3. Using Windows Media Player to view the distributed camera images on a PC  
**Operating environment**  
 • Windows 98 (SE), Me, 2000

#### Operation method

☞ See the User's Guide to the "Streamproducer" software for network distribution.  
 • See "Network settings", "LAN card" in the Network Pack User's Guide (pdf)

English

## Controls, Connectors and Indicators

#### ① Camera connection terminal

To connect the DV camcorder (GY-DV300).  
 (☞ See E-9 "How to Attach")

#### ② PC card slot

To insert a LAN card, Compact Flash card, etc.

#### ③ Access lamp

This lamp lights when the card is in use.

#### ④ Guard

Guard to prevent the card from being inadvertently ejected.

#### ⑤ Service terminal.

Do not use this terminal.

⑥ **Camera mounting screw holes** (1/4 inch)  
 Used to mount the KA-DV300 and the GY-DV300 on a camera tripod.

#### ⑦ Release button

Press this button to release the KA-DV300 from the GY-DV300.

## How to Attach

Be sure to turn OFF the GY-DV300 and open the “cover” at the lower part of the camera before attaching the KA-DV300 using the following procedure.

1. Hook the claw at the rear of the KA-DV300 onto the notch of the GY-DV300.
2. While pressing the Release button, press the claw at the front of the KA-DV300 into the notch of the GY-DV300.
3. Attempt to move the KA-DV300 back and forth to ensure that it is securely attached to the camcorder.

To detach, perform steps **2.** and **1.** in order while pressing the Release button.

English

## Confirming correct attachment

Use the following procedure to confirm that the KA-DV300 is correctly attached.

1. Turn OFF the GY-DV300.
2. Insert the card.
3. Turn ON the GY-DV300.

4. Confirm the card status.

The card status is displayed on the GY-DV300's LCD screen or viewfinder screen in accordance with the type of the card.

\* Be sure to turn OFF the GY-DV300's power supply before the card is removed from the camcorder.

## Installing Streamproducer

1. Insert the CD-ROM with Streamproducer into the CD-ROM drive.

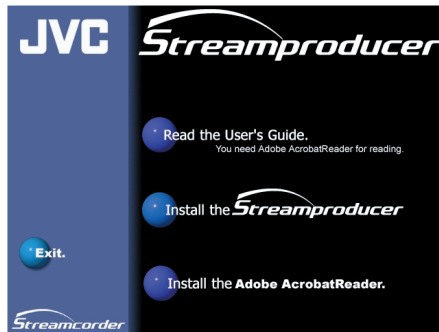

Wait until the access lamp of the CD-ROM drive goes out.

The screen shown on the left appears.

English

2. Click on "English".

The screen shown on the left appears.

3. Click on "Install Streamproducer".

The Installer starts up.

Detailed information on how to operate the Streamproducer is described in the "Read User's Guide", so please refer to this.

The "Read User's Guide" can be invoked by selecting:  
Start menu/Programs/Streamproducer/User's Guide.

## Specifications

- Mass: 150 g (main unit only)
- Power supply: Supplied from the GY-DV300
- Power consumption: DC 7.2 V --- 0.61 A (main unit only)
- Allowable operating temperature: 0°C to 40°C
- Allowable storage temperature: -20°C to 60°C
- Allowable operating humidity: 30% to 80% RH
- Provided accessories  
CD-ROM  
INSTRUCTIONS  
Warranty Card (USA and Canada only)

- External Dimensions (Unit: mm)

Design and specifications are subject to change without notice.

When attaching Network Pack KA-DV300 to DV Camcorder GY-DV300, network related menus are added to the GY-DV300 menu screen.

This User's Guide explains settings for the network related menus, operation for recording streaming data to a CF (Compact Flash) memory card and operation for sending streaming data using a LAN card. When a LAN card is connected, menu screen settings for the Network Pack and GY-DV300 can be operated from your PC.

## Introduction

## Inserting/removing CF memory card/LAN card

- The KA-DV300 accepts the following cards for which operation has been confirmed:
    - Operating voltage 3.3 V
    - Current consumption Max. 300 mA
  - Wired LAN-card
    - US: EA2900-117 (Revision C) (Name of manufacturer: Socket Communications, Inc)<sup>\*1</sup>
    - Europe:EA2903-162 (Revision C) (Name of manufacturer: Socket Communications, Inc)<sup>\*1</sup>
    - Asia: EA2906-194 (Revision C) (Name of manufacturer: Socket Communications, Inc)<sup>\*1</sup>
  - \* Revision indicated on the upper right of package production label.
  - Wireless LAN-card
    - TEW-PC16 (firmware version 0.8.3 or later) (Name of manufacturer: TRENDware)
    - WCF11 (Name of manufacturer: LINKSYS)<sup>\*2</sup>
  - CF (Compact Flash) card
    - SDCFB-16-801 ~ SDCFB-256-801 (Name of manufacturer: SunDisk)<sup>\*1</sup>
- <sup>\*1</sup>: Use PCMCIA card TYPE I or TYPE II adapter  
<sup>\*2</sup>: Use PCMCIA card TYPE II adapter

### Caution

- Make sure the power of GY-DV300 is off when inserting/removing a CF memory card/LAN card. Inserting/removing a card with the unit power on may damage the data storage section of the CF memory card or the card itself.
- Do not use the wireless LAN card continuously for more than 48 hours.

### Inserting card

1. Turn off the GY-DV300 power.
2. Insert a card into the KA-DV300 card slot.
3. Turn on the GY-DV300 power.

- Card status according to the inserted card type is displayed on the LCD screen/viewfinder screen. (☞ page 4)

### Memo

When turning the power on, the card status display shown on left will flash during initialization.

### Removing card

- Check to make sure the ACCESS lamp of KA-DV300 is off. The ACCESS lamp will light when the card is in operation.

1. Turn off the GY-DV300 power.
2. Press the EJECT button of KA-DV300 and remove the card.

# Introduction

## LCD screen/viewfinder screen

Information from Network Pack KA-DV300 is displayed on the GY-DV300 LCD screen/viewfinder screen.

### 1 Card status displays

Display	Description
	No card is inserted in Network Pack. Flashing display during initialization (after power on).
 (White display)	LAN card is inserted in Network Pack.
 (Yellow display)	Video/audio data is being sent from LAN card.
 (Red display)	Video/audio data from LAN card is being recorded by remote media.
 (White display)	CF memory card is inserted in Network Pack.
 (Red display)	CF memory card is being recorded with data.
 Flashing display	Card is inserted in Network Pack but transmission is not available. There is possibility of unit malfunction. Contact your nearest JVC dealer.

### 2 CF Memory card warning display

Displays CF memory card status and system errors.

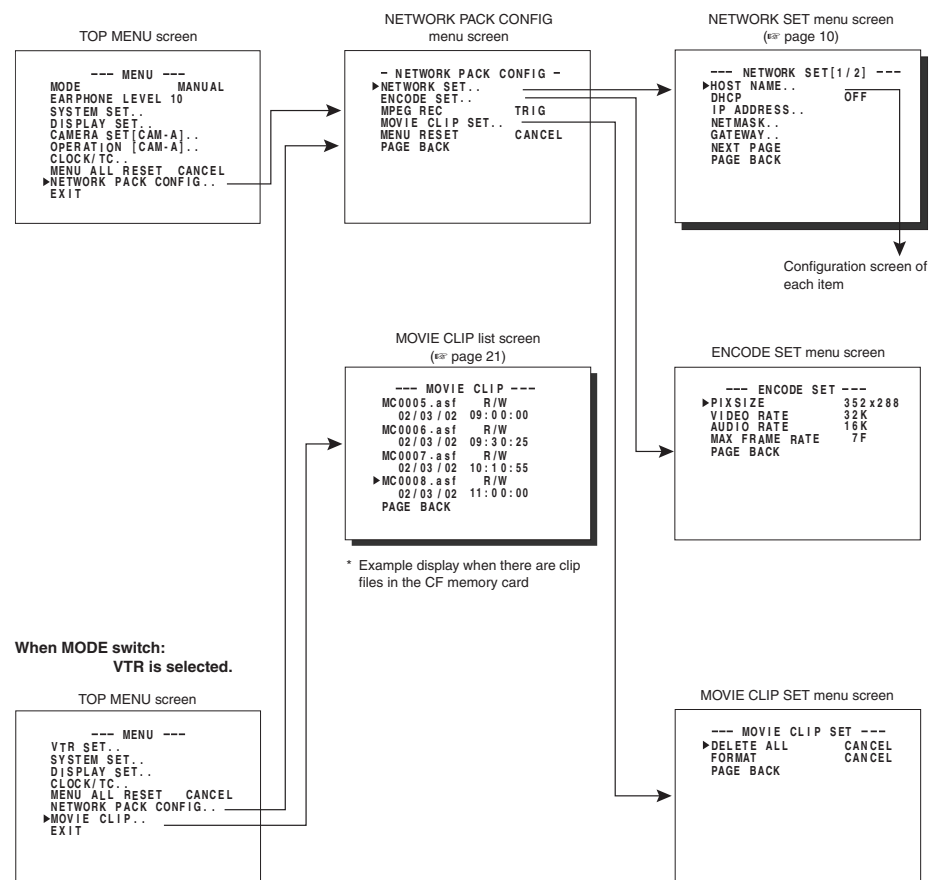

\* For details concerning warning displays, see page 37.

# Menu screen

## Menu screen structure

When attaching Network Pack KA-DV300 to DV Camcorder GY-DV300, NETWORK PACK CONFIG menu and MOVIE CLIP menu are added to the GY-DV300 TOP MENU screen.

### MODE switch: When CAM-A or CAM-B is selected

### When MODE switch: VTR is selected.

MENU RESET	● CANCEL EXECUTE	Selecting EXECUTE and pressing the SELECT dial returns NETWORK PACK CONFIG menu screen settings to the original factory settings.
PAGE BACK		Pressing the SELECT dial returns to the TOP MENU screen.

## Menu screen

### Setting the NETWORK PACK CONFIG menu screen

Menu screen settings can be made regardless of whether a card is inserted. Settings will be stored in the KA-DV300 memory even when turning the power off.

- The NETWORK PACK CONFIG menu screen will not appear during card initialization (flashing display).

TOP MENU screen

Cursor

NETWORK PACK CONFIG menu screen

NETWORK SET menu screen  
(☞ page 10)

Setting

Setting

- Settings are made by viewing the LCD screen or viewfinder screen. If OUTPUT CHAR of the DISPLAY [2/2] menu screen is set to MIX, the menu screen also appears on the monitor screen connected to the VIDEO OUT or Y/C connector.

1. Set the POWER switch to ON.
2. Set the MODE switch.
  - Set to "CAM-A" or "CAM-B" when shooting a video.
  - Set to "VTR" for VTR playback, clip file playback or DV signal recording.
3. Press the MENU button for about 1 seconds. The TOP MENU screen appears.
4. Turn the SELECT dial, move the cursor (▶) to NETWORK PACK CONFIG and press the SELECT dial.
  - The NETWORK PACK CONFIG menu screen appears.
5. Select the item to set. Turn the SELECT dial, move the cursor to the desired item to set and press the SELECT dial.
  - The selected menu screen appears.
  - When selecting MPEG REC or MENU RESET, the setting area flashes and the setting can be changed. Set the item according to step 7.
  - When selecting NETWORK SET, the network related setting screen appears. (☞ page 10)
6. Select an item within the menu screen. Turn the SELECT dial, move the cursor (▶) to the desired item to set and press the SELECT dial.
  - The setting area flashes and the setting can be changed.
7. Change the setting. Turn the SELECT dial to change the setting and press the SELECT dial.
  - Flashing of the setting area stops and the new setting is confirmed.

- When changing multiple settings, repeat steps 6 and 7 above.

8. Return to the TOP MENU screen. Turn the SELECT dial, move the cursor (▶) to PAGE BACK and press the SELECT dial.
9. When quitting menu screen setting and returning to the normal screen, perform one of the following operations.
  - Press the MENU button.
  - Move the cursor (▶) to EXIT in the TOP MENU screen and press the SELECT dial.

## Menu screen Returning the NETWORK PACK CONFIG menu screen to factory settings

NETWORK PACK CONFIG menu screen

1. Press the MENU button to display the TOP MENU screen.
2. Turn the SELECT dial to select NETWORK PACK CONFIG and press the SELECT dial.
  - The NETWORK PACK CONFIG menu screen appears.
3. Turn the SELECT dial to set MENU RESET to "EXECUTE" and press the SELECT dial.
  - When resetting the menu, "MENU RESET." will appear at the bottom of the screen for about 5 seconds.
  - The NETWORK PACK CONFIG menu screen settings will return to the factory settings.

# Network settings

## Setting the NETWORK SET menu screen

When using a LAN card, network related settings for KA-DV300 are made using NETWORK SET of the NETWORK PACK CONFIG menu. Settings will be stored in the KA-DV300 memory even when turning the power off.

<GY-DV300 rear panel>

TOP MENU screen

NETWORK PACK CONFIG menu screen

NETWORK SET [1/2] menu screen

NETWORK SET [2/2] menu screen

### Settings are made by viewing the LCD screen or viewfinder screen.

If OUTPUT CHAR of the DISPLAY [2/2] menu screen is set to MIX, the menu screen also appears on the monitor screen connected to the VIDEO OUT or Y/C connector.

### Display the NETWORK SET menu screen

1. Turn on the GY-DV300 power.
2. Press the MENU button to display the TOP MENU screen.
3. Turn the SELECT dial, move the cursor (▶) to NETWORK PACK CONFIG and press the SELECT dial.
  - The NETWORK PACK CONFIG menu screen appears.
4. Turn the SELECT dial, move the cursor (▶) to NETWORK SET and press the SELECT dial.
  - The NETWORK SET [1/2] menu screen will appear.
  - The NETWORK SET menu screen is structured by 2 pages.

### Select NEXT PAGE and press the SELECT dial to display the NETWORK SET [2/2] menu screen.

Select PAGE BACK in the NETWORK SET [2/2] menu screen and press the SELECT dial to return to the NETWORK SET [1/2] menu screen.

5. Set DHCP to ON or OFF in the NETWORK SET [1/2] menu screen.
  - Items other than DHCP are set in the individual setting screen. (☞ page 12)
6. To return to the normal screen after completing setting, perform one of the following operations.
  - Press the MENU button
  - Select PAGE BACK to return to the TOP MENU screen. Select EXIT in the TOP MENU screen and press the SELECT dial.

# Network settings

## NETWORK SET menu screen items

[1/2] screen ● indicates default factory setting.

Item	Setting	Description
HOST NAME		Displays the host name input setting screen. (Max. 64 alphanumerical characters) [Factory setting: none]
DHCP	●OFF ON	Select whether DHCP server is used. OFF: Use this setting when using LAN connection rather than DHCP. When this setting is used, IP ADDRESS and NETMASK, GATEWAY must also be set. ON: Use this setting when using DHCP connection. When using this setting, IP ADDRESS and NETMASK, GATEWAY are automatically set.
IP ADDRESS		Displays the IP address setting screen. (Max. 12 numerical characters) When using LAN connection with DHCP set to OFF, this setting is required. Set a unique IP address. IP ADDRESS setting is not available when DHCP is set to ON. [Factory setting] 192.168.100.101]
NETMASK		Displays the subnet mask input screen. (Max. 12 numerical characters) This setting is required when using LAN connection with DHCP set to OFF. NETMASK setting is not available if DHCP is set to ON. [Factory setting: 255.255.255.000]
GATEWAY		Displays the gateway address input screen. (Max. 12 numerical characters) GATEWAY setting is not available when DHCP is set to ON. [Factory setting: 192.168.100.254]
NEXT PAGE		Pressing the SELECT dial displays the NETWORK SET [2/2] menu screen.
PAGE BACK		Pressing the SELECT dial returns to the NETWORK PACK CONFIG menu screen.

[2/2] screen

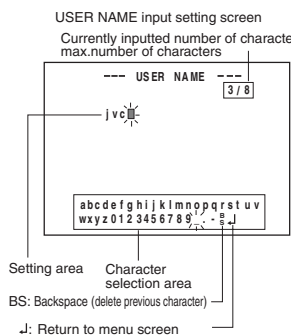

Item	Setting	Description
RTP	1 : : ●5004 : 99999	The screen for setting RTP, RTSP and HTTP port numbers appears. Normally, the unit can be used without changing the factory settings. If there are port restrictions for the LAN environment of your PC, consult your network administrator. * When changing a port number, refer to "5-1. Connecting with Camcorder" of the "Streamproducer" User's Guide of the network distribution software to change settings. * Do not use the same port numbers for RTP, RTSP and HTTP.

PAGE BACK		Pressing the SELECT dial returns to the NETWORK SET [1/2] menu screen.

# Network settings

## Making network related settings

Network related settings are made in the individual input setting screens.

Here, USER NAME is set as an example. Other settings are also made in the same manner.

Example: Changing USER NAME from jvc to jvc-1234

■ Select USER NAME in the NETWORK SET [2/2] menu screen and press the SELECT dial.

- The USER NAME input setting screen appears.

1. Characters are selected from the character selection area on the bottom of the screen.  
Turn the SELECT dial to flash “\_” in the character selection area and press the SELECT dial.
  - The setting changes to “jvc\_” and the following digit of the setting area flashes.
2. Turn the SELECT dial to select “1” in the character selection area and press the SELECT dial.
  - The setting changes to “jvc\_1” and the following digit of the setting area flashes.
3. Repeat the above step to set “jvc\_1234” in the setting area.

■ To delete or edit set characters, select “BS” within the character selection area and press the SELECT dial.

The previous character will be deleted. The character on the left will be deleted each time this operation is repeated.

■ The currently inputted number of characters and the maximum number of characters are displayed on the upper right of the screen.

4. When completed, select “J” within the character selection area and press the SELECT dial.

- NETWORK SET [2/2] menu screen returns in the LCD or viewfinder.

# Network settings

## Detailed IP settings (LAN)

Example of IP address and subnet mast settings when using LAN is shown below.

- Operation is only guaranteed for Windows 2000.
- Internet Explorer 5.0 or later
- Windows Media Player 7.01 or later

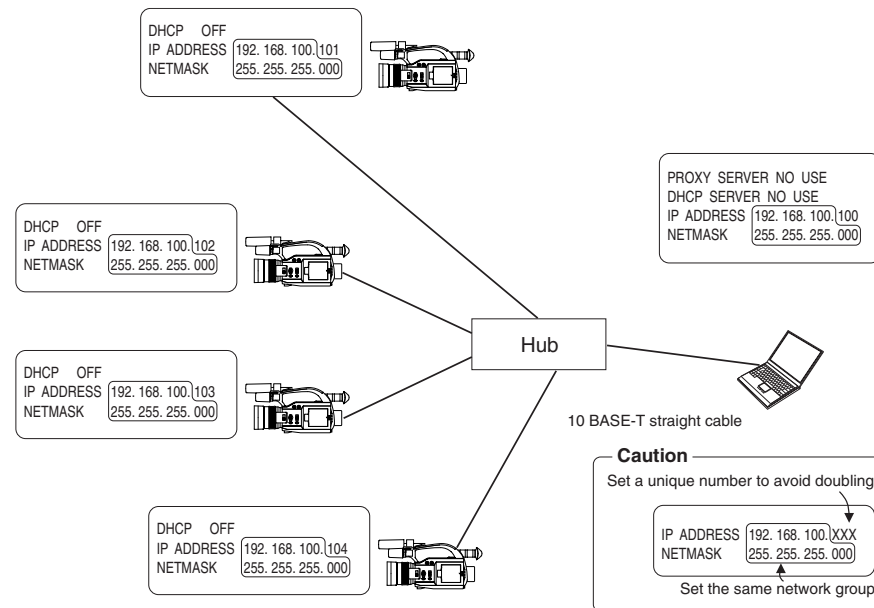

### 1. For 1:1 communication between PC and GY-DV300/KA-DV300

\* For the PC settings when using a LAN card, refer to the instruction manual included with the LAN card.

### 2. For communication between PC and multiple GY-DV300/KA-DV300

# Network settings

## Detailed network settings (WLAN)

Example of network settings when using wireless LAN is shown below.

- Operation is only guaranteed for Windows 2000.
- Internet Explorer 5.0 or later
- Windows Media Player 7.01 or later

### 1. For communication with PC without returning access point (Ad hoc mode)

DHCP	OFF
WLAN AD HOC MODE	ON
WLAN ESS ID	abcdef
WLAN CH	2
IP ADDRESS	192.168.100.101
NETMASK	255.255.255.000

Set a unique number to avoid doubling

PROXY SERVER	OFF
DHCP SERVER	OFF
IP ADDRESS	192.168.100.100
NETMASK	255.255.255.000

Set the same network group

PC wireless LAN driver settings	
NetworkType	802.11 Ad Hoc Mode
ESS ID	abcdef
Channel	2
Encryption Mode	Open System

\* For the PC settings when using a LAN card, refer to the instruction manual included with the LAN card.

### Cautionary items concerning Wireless LAN (WLAN)

- For the WLAN ESS ID, input the values of ESSID set in:  
Ad hoc mode: PC of other party  
Infrastructure: Access point
- When setting WLAN AD HOC MODE, the network mode setting of the wireless LAN card on the PC side must be set to 802.11 Adhoc.
- WLAN CH is the wireless frequency band used for communication. If there is an access point, adapter, etc., using the same band in the proximity, there may be a hindrance in the communication and may reduce throughput or the quality of communication. When setting, check the settings of surrounding access points, etc., to avoid doubling.

#### Frequency bands (ISM bands) and channels (IEEE803.11b standard)

- N. America : FCC / 2.412~2.462GHz (11 channels)
- Europe : CE ETSI / 2.412~2.472GHz (13 channels)
- Japan : 2.412~2.4835GHz (14 channels)
- France : 2.457~2.472GHz (4 channels)
- Spain : 2.457~2.462GHz (2 channels)

14 channels of the 2.4GHz band used by the wireless LAN.  
Since adjacent channels causes signal interference, channels are normally spaced 5 channels apart.

### Memo

For network settings and LAN card driver settings, refer to the respective instruction manuals.

## Recording on a CF memory card Formatting a CF memory card

When an unformatted CF memory card is inserted and the GY-DV300 power is turned on, "NO CF FORMAT!" appears in the LCD screen/viewfinder screen.

NETWORK PACK CONFIG menu screen

MOVIE CLIP SET menu screen

Flashing display during formatting

1. Press the MENU button to display the TOP MENU screen.
2. Use the SELECT dial to select NETWORK PACK CONFIG menu screen → MOVIE CLIP SET menu screen.
3. Set FORMAT in the MOVIE CLIP SET menu screen to "EXECUTE" and press the SELECT dial.
  - The formatting begins. During formatting, "FORMAT" appears on the screen.
4. When formatting is completed, to the MOVIE CLIP SET menu screen returns. The FORMAT setting will return to CANCEL.
5. To return to the NETWORK PACK CONFIG menu screen, select PAGE BACK and press the SELECT dial.
  - To return to the normal screen, press the MENU button.

### CF memory recording time

Estimated recording time of CF memory cards is shown below:

CF memory card size	Video compression rate (when fixed at audio 32K)		
	384kbps	256kbps	128kbps ~ 32kbps
16MByte	3min.	5min.	10min. or more
32MByte	7min.	11min.	20min. or more
64MByte	15min.	22min.	40min. or more
128MByte	30min.	44min.	80min. or more
192MByte	46min.	66min.	120min. or more
256MByte	61min.	88min.	160min. or more

### Caution

The recording time may be shorter than the above estimate depending on the movement of the subject.

## Recording on a CF memory card Recording video on a DV cassette tape and CF memory card

- "NO CF FORMAT!" will appear if the inserted CF memory card is not formatted. Format the card in the MOVIE CLIP SET menu screen. (☞ page 16)

LCD screen

CF : Red display during recording

ENCODE SET menu screen

Set to TRIG

LCD screen

CF memory card remaining warning

1. Insert a CF memory card into the Network Pack.
2. Turn on the GY-DV300 power. Check to see that the CF display appears on the LCD screen/viewfinder screen. (When the power is turned on, ⏏ display will flash during initialization.)
3. Insert a recordable DV cassette tape.
4. Set the MODE switch to "CAM-A" or "CAM-B".
5. Set the NETWORK PACK CONFIG menu screen.
  - ① Set MPEG REC to "TRIG".
  - ② Set the video/audio compression in the ENCODE SET menu screen. (☞ page 6)
  - ③ When completed with settings, press the MENU button to return to the normal screen.
6. Press the REC START/STOP button on GY-DV300 to start recording on the DV cassette tape as well as video/audio streaming data on the CF memory card.
  - During CF memory card recording, CF display will light red.
7. To stop recording, press the REC START/STOP button.
8. To resume recording, press the REC START/STOP button once more.
9. To end recording, press the REC START/STOP button.
  - \* Before turning off the power, check to make sure the CF indicator on the LCD screen is white.
  - Turning the power off when the CF indicator is red will damage the recorded clip file.

### Memo

- When the DV cassette tape has reached the end during recording, CF memory card recording will also stop.
- Every time recording is performed, the recorded event is stored in the clip list of the CF memory card. Stored contents of clip list: Clip number and date/time when recording was started. All events can be played back on the MOVIE CLIP screen. (☞ page 21)
- The CF memory card remaining warning is displayed on the LCD screen/viewfinder screen. (☞ page 38)

• "NO CF FORMAT!" will appear if the inserted CF memory card is not formatted. Format the card in the MOVIE CLIP SET menu screen. (☞ page 16)

1. Insert a CF memory card into the Network Pack.
2. Turn on the GY-DV300 power. Check to see that the [CF] display appears on the LCD screen/viewfinder screen. (When the power is turned on, [CF] display will flash during initialization.)
3. Set the MODE switch to "CAM-A" or "CAM-B".
4. Set the NETWORK PACK CONFIG menu screen.
  - ① Set MPEG REC to "SPLIT".
  - ② Set the video/audio compression in the ENCODE SET menu screen. (☞ page 6)
  - ③ When completed with settings, press the MENU button to return to the normal screen.
5. Press the SELECT dial on GY-DV300 to start recording streaming data on the CF memory card.
  - During recording, [CF] display will light red.
6. To stop recording, press the SELECT dial.
7. To resume recording, press the SELECT dial once more.
8. To end recording, press the SELECT dial.
  - \* Before turning off the power, check to make sure the [CF] indicator on the LCD screen is white.
  - Turning the power off when the [CF] indicator is red will damage the recorded clip file.

### Memo

- Every time recording is performed, the recorded event is stored in the clip list of the CF memory card. Stored contents of clip list: Clip number and date/time when recording was started. All events can be played back on the MOVIE CLIP screen. (☞ page 21)
- The CF memory card remaining warning is displayed on the LCD screen/viewfinder screen. (☞ page 38)
- Pressing the REC START/STOP button of GY-DV300 will start recording to the DV cassette tape.
- When using the SELECT dial for GAIN or SHUTTER operation, no operation on the SELECT dial will be accepted for about 3 seconds after the operation is completed.

• "NO CF FORMAT!" will appear if the inserted CF memory card is not formatted. Format the card in the MOVIE CLIP SET menu screen. (☞ page 16)

1. Insert a CF memory card into the Network Pack.
2. Turn on the GY-DV300 power. Check to see that the [CF] display appears on the LCD screen/viewfinder screen. (When the power is turned on, [CF] display will flash during initialization.)
3. Insert the recorded DV cassette tape.
4. Set the MODE switch to "VTR".
5. Set the NETWORK PACK CONFIG menu screen.
  - ① Set MPEG REC.
    - When recording using the REC START/STOP button of GY-DV300, set to "TRIG".
    - When recording using the SELECT dial, set to "SPLIT".
  - ② Set the video/audio compression in the ENCODE SET menu screen. (☞ page 6)
  - ③ When completed with settings, press the MENU button to return to the normal screen.
6. Press the BAR (▶/||) button of GY-DV300 to start DV cassette tape playback.
7. Press the REC START/STOP button or SELECT dial at the scene to start recording on the CF memory card. (The recording method of using REC START/STOP button or SELECT dial is set in MPEG REC.)
  - During recording, the [CF] display appears in red.
8. To stop recording, press the REC START/STOP button or SELECT dial.
9. To resume recording, press the REC START/STOP button or SELECT dial once more.
10. To end recording, press the REC START/STOP button or press the SELECT dial.
  - \* Before turning off the power, check to make sure the [CF] indicator on the LCD screen is white.
  - Turning the power off when the [CF] indicator is red will damage the recorded clip file.

### Memo

- Every time recording is performed, the recorded event is stored in the clip list of the CF memory card. Stored contents of clip list: Clip number and date/time when recording was started. All events can be played back on the MOVIE CLIP screen. (☞ page 21)
- The CF memory card remaining time is displayed on the LCD screen/viewfinder screen.

## Recording on a CF memory card Deleting all clips on a CF memory card

MOVIE CLIP of the NETWORK PACK CONFIG menu screen is used to delete all clips on a CF memory card.

NETWORK PACK CONFIG menu screen

MOVIE CLIP SET menu screen

Set to EXECUTE

Deleting

MOVIE CLIP SET menu screen

1. Insert an already recorded CF memory card.
2. Turn on the GY-DV300 power.  
Check to see that the **[CF]** display appears on the LCD screen/viewfinder screen.
3. Press the MENU button to display the TOP MENU screen.
4. Use the SELECT dial to select NETWORK PACK CONFIG menu screen → MOVIE CLIP SET menu screen.
5. Set DELETE ALL in the MOVIE CLIP SET menu screen to "EXECUTE" and press the SELECT dial.
  - Deletion is executed and "DELETE.." appears flashing on the screen.
6. When deletion is completed, to the MOVIE CLIP SET menu screen returns. DELETE ALL setting will return to "CANCEL".
7. ■ To return to the NETWORK CONFIG menu screen, select PAGE BACK and press the SELECT dial.  
■ To return to the normal screen, press the MENU button.

### Memo

- Protected clips are not deleted.

## MOVIE CLIP

### Playing back video/audio recorded on a CF memory card

Every time recording is performed, the recorded event is stored in the clip list of the CF memory card. The clip list is stored with the recorded event number (clip number) and the date/time when the recording was started. All events (clip numbers) can be played back on the MOVIE CLIP screen.

- MOVIE CLIP will not appear during card initialization (flashing **[ ]** display).

TOP MENU screen

### Memo

When a MOVIE CLIP menu item is selected and the SELECT dial is pressed with no clips recorded on the CF memory card, "NO CLIP!" will flash for about 3 seconds.  
If there is no CF memory card inserted, "NO CF CARD!" will flash for about 3 seconds.

CLIP FUNCTION screen

Selected clip number      Still image (starting point) of the selected clip

1. Insert an already recorded CF memory card.
2. Turn on the GY-DV300 power.  
Check to see that the **[CF]** display appears on the LCD screen/viewfinder screen. (When the power is turned on, **[ ]** display will flash during initialization.)
3. Set the MODE switch to "VTR".
4. Make sure GY-DV300 is not in operation.
5. Display the MOVIE CLIP screen.
  - ① Press the MENU button to display the TOP MENU screen.
  - ② Turn the SELECT dial, move the cursor (▶) to MOVIE CLIP and press the SELECT dial.
    - The movie clip list of the latest clip page recorded on the CF memory card and the still image (starting point) of the latest clip number appear by overlapping.

MOVIE CLIP screen

The clip page in the MOVIE CLIP screen displays 4 lists per page.

6. Select the clip to play back.
  - ① Turn the SELECT dial and move the cursor (▶) to the clip to play back.
    - Turning the SELECT dial up scrolls to the page with smaller (older) clip numbers.
    - Turning the SELECT dial down scrolls to the page with larger (newer) clip numbers.
    - Press the [FWD] button to scroll to the next page. Press the [REV] button to scroll to the previous page.
    - Press and hold the [FWD] button for about 2 seconds to scroll to the page with the newest clip.
    - Press and hold the [REV] button for about 2 seconds to scroll to the page with the oldest clip.
  - ② Press the SELECT dial.
    - CLIP FUNCTION screen of the selected clip appears.
    - Still image (starting point) of the selected clip appears.

### Note

ASF files recorded using another device may not play back properly on this unit.

<GY-DV300 rear panel>

7. Play back the clip. Turn the SELECT dial, move the cursor to REVIEW and press the SELECT dial.
  - The movie clip is played back after the still image is displayed for about 1 second. The value of the recorded pixel size (352 X 288 or 176 X 144) appears during displaying the still image. The value of the recorded max. bit rate appears during playback.
8. To pause playback, press the BAR (▶/||) button.
9. To resume playback, press the BAR (▶/||) button once more.
10. The following operations are performed when the playback of the selected clip ends.
  - When there are no following clips, the unit pauses at the beginning of the current clip.
  - When there are following clips, the unit displays the still image of the next clip for about 1 second, then starts playback. When all remaining clips are played back, the unit pauses at the beginning of the played back clip.

■ Selecting PAGE BACK during playback or pausing and press the SELECT dial will return to the MOVIE CLIP screen.

### To move to another clip during playback

- Playback will remain on the current clip even when the FWD (▶▶) button is pressed if the latest clip is being played back.
  - Pressing the REV (◀◀) button during play back of the oldest clip will start playback at the starting point of the that clip.
- To move to the next clip during middle of playback or pausing, press the FWD (▶▶) button of GY-DV300.
    - The playback of the current clip stops and the unit pauses at the starting point of the next clip. Pressing the FWD (▶▶) button again pauses at the starting point of the following the next clip.
  - To move to the previous clip during middle of playback or pausing, press the REV (◀◀) button of GY-DV300.
    - The playback of the current clip stops and the unit pauses at the starting point of the previous clip. Pressing the REV (◀◀) button again pauses at the starting point of the clip before the previous clip.
  - To move to the latest clip during middle of playback or pausing, press the FWD (▶▶) button of GY-DV300 for more than 2 seconds.
    - The unit pauses at the starting point of the latest clip. To start playback, press the BAR (▶/||) button.
  - To move to the oldest clip during middle of playback or pausing, press the REV (◀◀) button of GY-DV300 for more than 2 seconds.
    - The unit pauses at the starting point of the oldest clip. To start playback, press the BAR (▶/||) button.

Clips recorded on a CF memory card can be protected using the MOVIE CLIP screen.

<GY-DV300 rear panel>

- When executing FORMAT in the MOVIE CLIP SET menu screen, protected clips will also be deleted.
- Protected clips will not be deleted even when executing DELETE ALL in the MOVIE CLIP SET menu screen.

1. Insert an already recorded CF memory card.
2. Turn on the GY-DV300 power. Check to see that the [CF] display appears on the LCD screen/viewfinder screen. (When the power is turned on, [CF] display will flash during initialization.)
3. Set the MODE switch to "VTR".
4. Make sure GY-DV300 is not in operation.
5. Display the MOVIE CLIP screen.
  - ① Press the MENU button to display the TOP MENU screen.
  - ② Turn the SELECT dial, move the cursor (▶) to MOVIE CLIP and press the SELECT dial.
    - The latest page of the MOVIE CLIP screen appears. R/W display appears on the right of the clip number.
6. Select the clip to protect. Turn the SELECT dial, move the cursor (▶) to the clip to protect and press the SELECT dial.
  - The CLIP FUNCTION screen of the selected clip appears.
7. Turn the SELECT dial, move the cursor to PROTECT in the CLIP FUNCTION screen and press the SELECT dial.

Clip number

- The selected clip is protected. The R/W display on the right of the clip number will change to an R display.

8. To return to the MOVIE CLIP screen after completing setting, select PAGE BACK and press the SELECT dial.

- To cancel the protection, select PROTECT in the CLIP FUNCTION screen and press the SELECT dial.
  - The R display will change to an R/W display and the protection on the clip will be canceled.

## MOVIE CLIP

### Deleting a clip file on a CF memory card

Clips recorded on a CF memory card can be deleted using the MOVIE CLIP screen.

TOP MENU screen

MOVIE CLIP screen

CLIP FUNCTION screen

Confirmation screen

Deleting Flashing display

1. Insert an already recorded CF memory card.
2. Turn on the GY-DV300 power.  
Check to see that the [CF] display appears on the LCD screen/viewfinder screen.  
(When the power is turned on, [CF] display will flash during initialization.)
3. Set the MODE switch to "VTR".
4. Make sure GY-DV300 is not in operation.
5. Display the MOVIE CLIP screen.
  - ① Press the MENU button to display the TOP MENU screen.
  - ② Turn the SELECT dial, move the cursor (▶) to MOVIE CLIP and press the SELECT dial.
    - The latest page of the MOVIE CLIP screen appears.
6. Select the clip to delete.  
Turn the SELECT dial, move the cursor (▶) to the clip to delete and press the SELECT dial.
  - The CLIP FUNCTION screen of the selected clip appears.
7. Turn the SELECT dial, move the cursor to DELETE in the CLIP FUNCTION screen and press the SELECT dial.
  - A "DELETE OK?" confirmation message appears. (Confirmation screen)
8. To delete, select YES using the SELECT dial and press the SELECT dial.
  - "DELETE ." flashes on the screen for about 5 seconds and then the MOVIE CLIP screen returns. The clip is deleted from the MOVIE CLIP screen.
  - To cancel the deletion, select PAGE BACK and press the SELECT dial.

#### Memo

- Protected clips cannot be deleted even when selecting DELETE.  
In this case, "PROTECT!" will flash for about 2 seconds and then CLIP FUNCTION screen returns.
- After deleting a clip and there are no remaining clips left on the CF memory card, "NO CLIP!" flashes on the screen for about 3 seconds and then the TOP MENU screen returns.
- To delete all clips, use the MOVIE CLIP SET in the NETWORK PACK CONFIG menu screen. (☞ page 20)

## MOVIE CLIP

### Playing back CF memory card clips on your PC

Clips recorded on a CF memory card can be played back on your PC.

\* If the PC is equipped with PCMCIA slot(s), CF card reader is not required.

#### Caution

- Clips recorded on CF memory cards are stored in ASF file format.
- To play back a clip on your PC, Windows Media Player 7.01 is required.
- \* Windows Media Player is compatible with Windows 2000/98(SE)/Me operating system.
- \* Media Player can be downloaded from the Microsoft Website.  
During this time, download the following codec software as well.  
The codec software is automatically downloaded when opening the clip file and running Windows Media Player.
  - Video codec (decoder) ISO MPEG4
  - Audio codec (decoder) G.726

#### Operation

1. Load data already recorded on a CF memory card to your PC using a CF card reader, etc.
2. Launch Explorer, etc., and open the recorded clip file in ASF format.
  - Windows Media Player launches and the clip is played back.

#### Memo

Video and audio files (clip files) in CF memory cards can be appended to email as attachment files.

## LAN card Sending video using LAN card while recording on a DV cassette tape

No LAN card is inserted when the display appears. Turn off the power and insert a LAN card. Then, turn the power back on.

1. Insert a LAN card into the Network Pack.
2. Turn on the GY-DV300 power.  
Check to see that the LAN card display is showing on the LCD screen/viewfinder screen.
3. Set the MODE switch to "CAM-A" or "CAM-B".
4. Insert a recordable DV cassette tape.  
• GY-DV300 will be in the standby mode.
5. Set the NETWORK PACK CONFIG menu screen.  
① Set MPEG REC to "TRIG".  
② Set the video/audio compress in the ENCODE SET menu screen. (see page 6)  
③ When completed, press the MENU button to return to the normal screen.
6. When pressing the REC START/STOP button of GY-DV300 while Streamproducer is in operation\*, transmission of video/audio streaming data from the LAN card is started simultaneously with recording to DV cassette tape.  
• The LAN card display on the LCD screen/viewfinder screen will be as follows:  
: Yellow display during data transmission.  
Displayed in red when the media operating Streamproducer\* at the destination of transmission starts recording.  
\* Perform setting described in "5-2 Operating video from DV camcorder • Trigger mode function" of network distribution software "Streamproducer" User's Guide.
7. To stop transmission or recording, press the REC START/STOP button.  
• GY-DV300 will be in the standby mode.
8. To resume transmission or recording, press the REC START/STOP button once more.
9. To end, press the REC START/STOP button to stop transmission and recording and turn off the power.  
Lastly, remove the LAN card.

### Memo

- Streaming data will be sent from the LAN card even when a DV cassette tape is not inserted.
- When the DV cassette tape reaches the end during recording, the transmission of streaming data from the LAN card is also stopped.

## LAN card Sending video using a LAN card (no DV cassette tape recording)

<GY-DV300 rear panel>

No LAN card is inserted when the display appears. Turn off the power and insert a LAN card. Then, turn the power back on.

1. Insert a LAN card into the Network Pack.
2. Turn on the GY-DV300 power.  
Check to see that the LAN card display is showing on the LCD screen/viewfinder screen.
3. Set the MODE switch to "CAM-A".
4. Set the NETWORK PACK CONFIG menu screen.  
① Set MPEG REC to "SPLIT".  
② Set the video/audio compress in the ENCODE SET menu screen. (see page 6)  
③ When completed, press the MENU button to return to the normal screen.
5. When turning the SELECT dial of GY-DV300 while Streamproducer is in operation\*, transmission of video/audio streaming data from the LAN card is started.  
• The LAN card display on the LCD screen/viewfinder screen will be as follows:  
: Yellow display during data transmission.  
Displayed in red when the media operating Streamproducer\* at the destination of transmission starts recording.  
\* Perform setting described in "5-2 Operating video from DV camcorder • Trigger mode function" of network distribution software "Streamproducer" User's Guide.
6. To stop transmission, press the SELECT dial.
7. To resume transmission, press the SELECT dial once more.
8. To end, press the SELECT dial to stop transmission and turn off the power.  
Lastly, remove the LAN card.

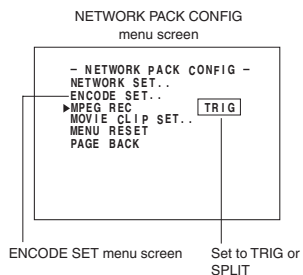

### Memo

- When using the SELECT dial for GAIN or SHUTTER operation, no operation on the SELECT dial will be accepted for about 3 seconds after the operation is completed.
- Recording will not be made on the DV cassette tape even if a tape is inserted.

## LAN card Sending playback signals of a DV cassette tape using a LAN card

No LAN card is inserted when the  display appears on. Turn off the power and insert a LAN card. Then, turn the power back on.

1. Insert a LAN card into the Network Pack.
2. Turn on the GY-DV300 power.  
Check to see that the LAN card display is showing on the LCD screen/viewfinder screen.
3. Set the MODE switch to "VTR".
4. Insert the recorded DV cassette tape.
5. Set the NETWORK PACK CONFIG menu screen.
  - ① Set MPEG REC to "SPLIT".
  - ② Set the video/audio compression in the ENCODE SET menu screen. (☞ page 6)
  - ③ When completed with settings, press the MENU button to return to the normal screen.
6. Launch Streamproducer.\*
7. Press the BAR (▶||) button of GY-DV300 to start DV cassette tape playback.
8. Press the SELECT dial at the beginning of the scene to send from LAN card.
  - Start transmission. The LAN card display on the LCD screen/viewfinder screen will be as follows:
    - : Yellow display during data transmission.
    - : Displayed in red when the media operating Streamproducer\* at the destination of transmission starts recording.
  - \* Perform setting described in "5-2 Operating video from DV camcorder • Trigger mode function" of network distribution software "Streamproducer" User's Guide.
9. To stop transmission, press the SELECT dial.
10. To resume transmission, press the SELECT dial once more.
11. To end, stop transmission and turn off the power. Lastly, remove the LAN memory card.

## NETWORK PACK SETUP Controlling GY-DU300/KA-DU300 via a LAN card

With the Network Pack, GY-DV300/KA-DV300 can be controlled via LAN. It is also possible to playback video and audio from KA-DV300 on your PC in the STREAMCAPTURE screen in realtime (live display) as well as save data to files. However, note that video and audio from KA-DV300 can be played back only on one PC at a time. Peer-to-peer connection that directly connects the unit with a PC is explained here.

1. Turn your PC and GY-DV300 power off.
2. Insert the PCMCIA LAN card to specify into KA-DV300.
3. Connect the unit and PC using a 10 BASE-T cross cable.
4. Turn the PC and GY-DV300 power on.
5. Insert a recordable DV cassette tape.
6. PC settings
  - Set the LAN card driver according to the manual provided by the card manufacturer.
  - Network settings (☞ page 13)
    - ① Set the following items in the TCP IP properties:
      - \* DHCP server is not used.
      - IP address: 192.168.100.105
      - Subnet mask: 255.255.255.000
    - ② Setting the proxy server.
      - Set the proxy server using the "LAN SETTINGS" of Windows.
      - When using peer-to-peer communication that directly connects the PC and KA-DV300, deselect the "Use a proxy server" checkbox.
      - When the "Use a proxy server" setting must be enabled due to a LAN environment (in-company LAN, etc.), click "Advanced..." and input the IP address of GY-DV300 in "Exceptions" of the "Use a proxy server" setting. (☞ "About proxy servers," Page 41)
7. Launch the browser on your PC and enter 192.168.100.101 (default factory setting) in the address bar and press ENTER.
  - A confirmation window for user ID and password appears.
8. Input the user ID and password.
  - ① For the user ID, input "jvc" (factory setting).  
For the password, input "ka-dv300" (factory setting) or the name set in the NETWORK SET [2/2] menu screen. (☞ page 10)
  - ② Check to make sure the inputted user ID and password are correct and click the OK icon.  
(Check "Save password" so that the password does not need to be inputted for future accesses.)
9. If the user ID and password are correct, the NETWORK PACK SETUP screen appears on the PC monitor.
  - GY-DV300/KA-DV300 settings and operations can be controlled using the NETWORK PACK SETUP. (☞ page 30)

### Caution

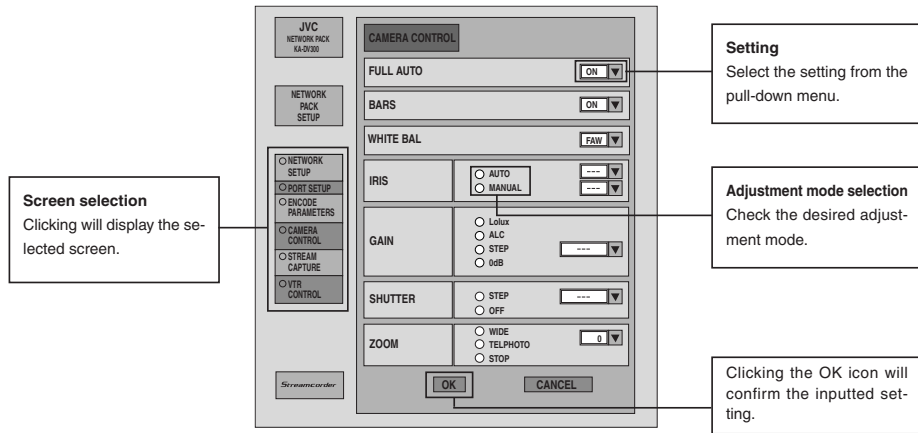

- When setting the NETWORK PACK SETUP screen (CAMERA CONTROL, NETWORK SETUP, PORT SETUP or ENCODE PARAMETERS) and the same menu screen is displayed on the LCD screen or viewfinder of GY-DV300, values set in the NETWORK PACK SETUP screen will not appear on menu screen of the LCD screen or the viewfinder of GY-DV300.  
The values set in the NETWORK PACK SETUP screen will appear after the menu screen of GY-DV300 is closed once and reopened.
- During camera/VTR control, noise may be heard from the speakers. However, this is not a malfunction. If the noise becomes irritating, open the "Sound & Multimedia" property from the Windows Control Panel and set the sound of "Windows Explorer Start Navigation" of "Sound Events" to off.  
\* For setting details, see Windows' Help.

# NETWORK PACK SETUP

## CAMERA CONTROL screen

When the correct user ID and password are accepted, the following Streamcorder screen appears. Camera adjustments of GY-DV300 can be made in the CAMERA CONTROL screen.

### Setting range

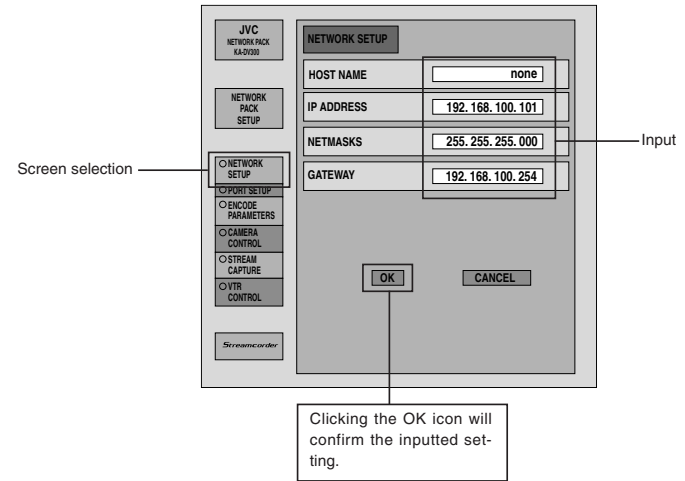

- When setting AUTO to ON, items other than BARS will not be available.
- When setting BARS to ON, all other items will not be available.
- When setting GAIN to ALC, IRIS and SHUTTER will not be available.

Item	Adjustment mode	Setting/description
AUTO		ON: Auto mode on. Items other than BARS cannot be set. OFF: Auto mode off
BARS		ON: Color bar signals are outputted. Other items cannot be set. OFF: Color bar signals are not outputted.
WHITE BAL		FAW: Full white balance mode PRESET: White balance will be in the preset state. (3200K) MEMORY 1 ~ 3: White balance setting stored in the GY-DV300 memory will be used.
IRIS	AUTO	Auto iris mode. Iris will be adjusted within the following range: [-3, -2, -1, 0, 1, 2, 3.]
	MANUAL	Manual iris mode. Iris will be adjusted within the following range: [CLOSE, F16, F11, F8, F5.6, F4, F2.8, F2, F1.6]
GAIN	Lolux	Lolux mode
	ALC	ALC (Auto Level Control) mode. IRIS and SHUTTER cannot be set
	STEP	Gain can be set within the following range. (1 dB steps) [-3dB ~ 0dB ~ 18dB]
	0dB	0dB (Sensitivity is not increased)
SHUTTER	STEP	Shutter speed can be set within the following range: [1/100 (1/120), 1/250, 1/500, 1/1000, 1/2000] ( ) for E model
	OFF	Shutter speed will be 1/60 (1/50). ( ) for E model
ZOOM	WIDE	Zoom is set to WIDE. The zoom will move from the current position to WIDE in the following rate. [0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10]
	TELEPHOTE	Zoom is set to TELEPHOTE. The zoom will move from the current position to TELE in the following rate. [0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10]
	STOP	Use this setting when not using zoom.

# NETWORK PACK SETUP

## NETWORK SETUP screen

Clicking NETWORK SETUP on the left of the Streamcorder screen displays the NETWORK SETUP screen for performing network related settings.

Contact your network administrator for any unclear points concerning network settings.

Item	Description	Factory setting
HOST NAME	The host name can be set. (Max: 64 alphanumerical characters)	none
IP ADDRESS	The IP address can be set. (Max: 12 numerical characters) (☞ page 11)	192.168.100.101
NETMASK	The subnet mask can be set. (Max: 12 numerical characters) (☞ page 11)	255.255.255.000
GATE WAY	The gateway address can be set. (Max: 12 numerical characters) (☞ page 11)	192.168.100.254

### Caution

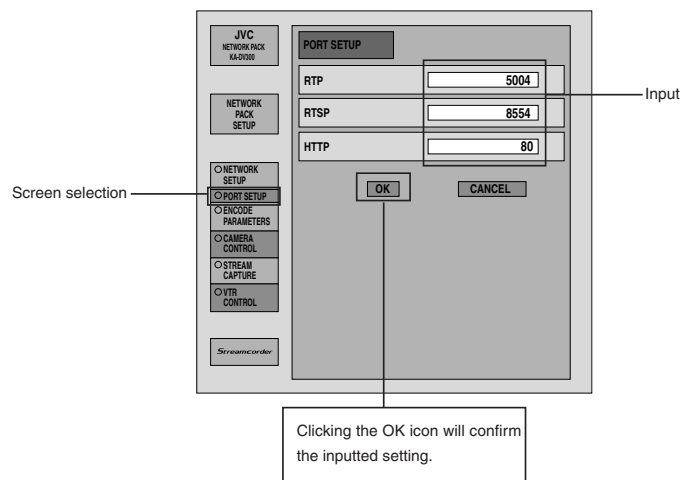

When changing the IP address in the Streamcorder screen, set the browser URL of the PC again. (☞ operation 7. on pages 29)

# NETWORK PACK SETUP

## PORT SETUP screen

Clicking PORT SETUP on the left of the Streamcorder screen displays the PORT SETUP screen for performing port settings.

Item	Description	Factory setting
RTP	The RTP port can be set. (Max: 5 numerical characters)	5004
RTSP	The RTSP port can be set. (Max: 4 numerical characters)	8554
HTTP	The HTTP port can be set. (Max: 4 numerical characters)	0080

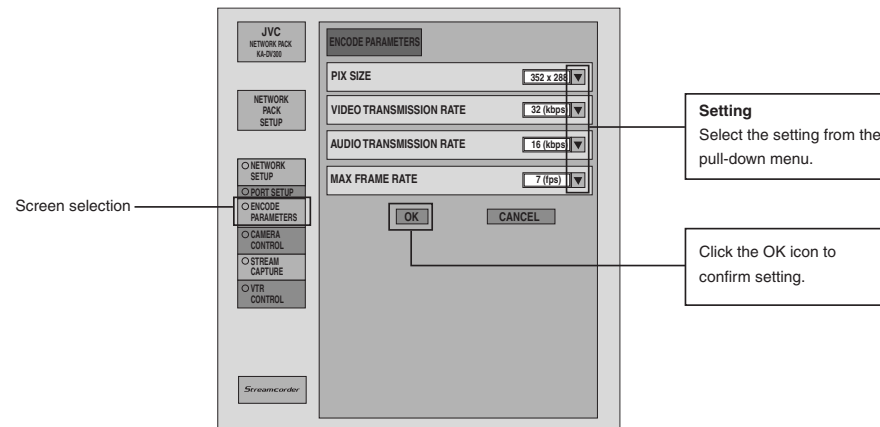

\* Changing ports require special knowledge. Always consult the administrator of the connecting network when making changes.

\* Do not use the same port numbers for RTP, RTSP and HTTP.

# NETWORK PACK SETUP

## ENCODE PARAMETERS screen

Clicking ENCODE PARAMETERS on the left of the Streamcorder screen displays the ENCODE PARAMETERS screen for performing video/audio compression settings.

### Setting range

● indicates default factory setting.

Item	Setting	Description
PIX SIZE	● 352 × 288	Sets the video compression size. 352 × 288: Sets the image size to 352 × 288 pixels. (CIF) 176 × 144: Sets the image size to 176 × 144 pixels. (QCIF) (1/4 image size of CIF.)
	176 × 144	
VIDEO TRANSMISSION RATE	● 32K (bps)	Sets the video streaming speed.
	64K (bps)	
	128K (bps)	
	256K (bps)	
	384K (bps)	
AUDIO TRANSMISSION RATE	OFF	Sets the audio streaming speed.
	● 16K (bps)	
	32K (bps)	
MAX FRAME RATE ( ) : for E model	30F (25F)	Sets the frame rate per second. 30F (25F): Transfer is made using the frame rate of the original video. 15F (13F): Transfer is made using 1/2 the frame rate of the original video. 7F (6F): Transfer is made using 1/4 the frame rate of the original video. 4F (3F): Transfer is made using 1/8 the frame rate of the original video. * When setting PIX SIZE to "352 × 288", 30F will not be available.
	15F (13F)	
	● 7F (6F)	
	4F (3F)	

### Memo

The relationship of PIX SIZE, VIDEO RATE and MAX FRAME RATE are as follows:

VIDEO TRANSMISSION RATE (bps)	PIX SIZE		VIDEO TRANSMISSION RATE (bps)	PIX SIZE	
	352 × 288	176 × 144		352 × 288	176 × 144
384K	15 (12) Frames	30 (25) Frames	64K	15 (12) Frames	30 (25) Frames
256K	15 (12) Frames	30 (25) Frames	32K	7 (6) Frames	30 (25) Frames
128K	15 (12) Frames	30 (25) Frames			

# NETWORK PACK SETUP

## VTR CONTROL screen

Clicking VTR CONTROL on the Streamcorder screen displays the following VTR CONTROL screen for controlling the VTR functions of GY-DV300.

Click to close the screen and return to the previous screen.

**VTR control icons**  
Click each button to perform operation.

■ To control the VTR in the Streamcorder screen, the following menu items of GY-DV300 must be set in advance.

- Set NET REMOTE in the SYSTEM SET [2/2] menu screen to ON.  
When set to OFF, the VTR cannot be controlled from the Streamcorder screen.

■ VTR control icon operations by MODE switch settings of GY-DV300 are as follows:

—: Mode will not change

GY-DV300 state		Clicking VTR control icon					
MODE switch	Previous mode	REC	REW	STOP	FF	PLAY	PAUSE/STILL
VTR	STOP	REC	REW	—	FF	PLAY	—
	FF	—	REW	STOP	—	PLAY	—
	REW	—	—	STOP	FF	PLAY	—
	PLAY	—	REV search	STOP	FWD search	—	STILL
	STILL	—	REV search	STOP	FWD search	PLAY	—
	FWD search	—	REV search	STOP	—	PLAY	STILL
	REV search	—	—	STOP	FWD search	PLAY	STILL
CAM-A or CAM-B	STOP	REC	—	—	—	—	—
	REC	—	—	—	—	—	STBY
	STBY	REC	—	STOP	—	—	—

# NETWORK PACK SETUP

## STREAMCAPTURE screen (Playing back video/audio using a PC and saving to file)

Clicking STREAMCAPTURE on the left of the Streamcorder screen displays the Streamcapture screen shown below. Video and audio sent from KA-DV300 via LAN can be played back on your PC in the Streamcapture screen or data can be saved to files. It can be used on a PC that has Streamproducer installed.

\* Since video on the STREAMCAPTURE screen is converted video data, images will take more time to appear than the actual video taken with GY-DV300.

Operation buttons	
VIEW	Click to view video or listen to audio from KA-DV300 on your PC.
STOP	Click to stop operation.
CAPTURE	Click to save video or audio to a PC. <b>Default destination</b> My Document¥Streamcorder (¥IPAddress) <b>Saved file name:</b> The file name based on the capture start time will be used. 2 0 0 2 0 3 0 4 - 1 5 3 0 0 0 .asf Year Month Day Hour Minute Second
MUTE	Click to turn on/off the mute setting. When on, the playback sound will be muted.

**Caution**  
About 10 seconds is required for video to be played back after pressing the VIEW or CAPTURE button.

**Video display**  
The display size can be changed in the Property dialog box. (≪≪ page 36)

The button is available when playback is stopped.  
Clicking the button will display the Property dialog box.  
Video display size and the save destination folder can be changed. (≪≪ page 36)

**Status/Time elapsed display**

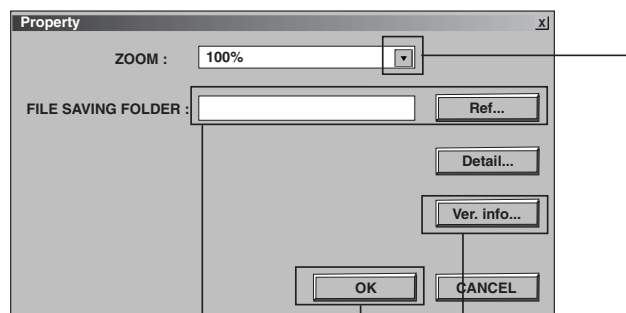

- The current status is displayed.  
VIEWING: Video or audio from KA-DV300 is being played back in realtime (live display).  
CAPTURING: Video or audio is being saved in your PC.  
STOP: Playback is stopped.  
BUFFERING: Data is being buffered from KA-DV300.
- Displays the time elapsed since the start of Preview or Capture operation. (Time: minutes:seconds)

# NETWORK PACK SETUP

## STREAMCAPTURE screen

Property dialog box

### Save destination folder

The default save destination is as follows:  
Set this field when changing the save destination folder.

My Document¥Streamcorder (¥IPAddress)

When changing the destination folder, press the Ref... button and select the desired folder. The changed destination folder will be the default folder for future save operations.

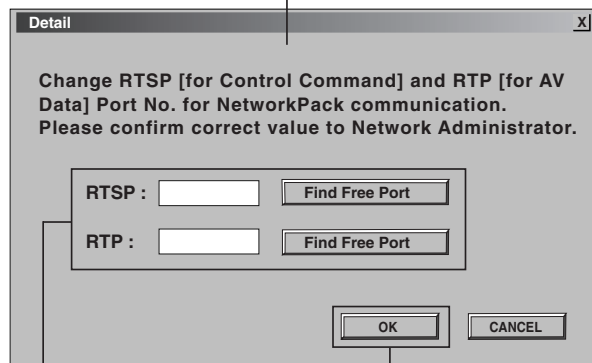

Click the OK button to confirm settings.

### Select the video display size

Select the display size from the pull-down menu.

Setting range:  
50%, 100%, 200%,  
fit to window

Advanced settings dialog box

### Client side RTSP port setting/RTP port setting

Normally, the unit can be used without changing the factory settings.  
If there are port restrictions for the LAN environment of your PC, consult your network administrator.

(Default settings: RTSP 8554  
RTP 5004)

Click the OK button to confirm settings.

# Others

## Troubleshooting

When there is a system error, network error, unit malfunction, etc., KA-DV300 displays the error on the GY-DV300 LCD screen or viewfinder screen.

Screen display	Cause	Remedy	Reference page
<File system related>			
CF REMAIN 60SEC! (Flashing for 3 sec.)	Remaining time became less than 60 seconds during recording to CF memory card.	Stop recording and replace with a new CF memory card, or delete files on the current CF memory card to secure recording space.	24
CF REMAIN 30SEC!	Remaining time became less than 30 seconds during recording to CF memory card.		
CF REMAIN 20SEC!	Remaining time became less than 20 seconds during recording to CF memory card.		
CF REMAIN 10SEC!	Remaining time became less than 10 seconds during recording to CF memory card.		
CF FULL! (Displayed until CF recording stops)	Remaining time has run out during recording to CF memory card.		
CF FULL! (Flashing for 3 sec.)	Recording is being attempted on CF memory card with remaining time of less than 10 seconds.		
FORMAT ERROR!	Failed to format CF memory card.	Check the CF memory card and format again. If the card still cannot be formatted, contact your nearest JVC-authorized service agent.	16
NO CF FORMAT! (Flashing)	CF memory card is unformatted, or an unknown format is being used.	Check the CF memory card and format.	16

## Troubleshooting

Screen display	Cause	Remedy	Reference page
<Operation related>			
NO CF CARD! (Flashing for 3 sec.)	There is no CF memory card inserted.	Insert a CF memory card.	3
PROTECT! (Flashing for 3 sec.)	Deletion of a protected clip file was attempted.	To delete the clip file, remove the protection.	23
NO CLIP! (Flashing for 3 sec.)	There is no CF memory card inserted, of there is no clip file available.	Check the CF memory card.	—
SET WLAN AD HOC MODE OFF! (Flashing for 3 sec.)	Use of DHCP server was attempted while in the AD HOC mode.	Set DHCP in the NETWORK SET menu screen to OFF when using the AD HOC mode.	11
SET DHCP OFF! (Flashing for 3 sec.)	Selection of AD HOC mode was attempted while using DHCP server.	Set WLAN AD MOC MODE in the NETWORK SET menu screen to OFF when using DHCP server.	11
SET VIDEO RATE 64K – 384K! (Flashing for 3 sec.)	Attempted to set MAX FRAM RATE to 15F when VIDEO RATE is set to 32K in the ENCODE SET menu.	Use VIDEO RATE between 64K ~ 384K.	6
SET MAX FRAME RATE 7F OR 4F! (Flashing for 3 sec.)	Attempted to set VIDEO RATE to 32K when MAX FRAME RATE is set to 15F in the ENCODE SET menu.	Use MAX FRAME RATE 7F or 4F.	6
SET MAX FRAME RATE 15F – 4F! (Flashing for 3 sec.)	Attempted to set PIX SIZE to 352 × 288 with MAX FRAME RATE set to 30F.	Use MAX FRAME RATE 15F ~ 4F.	6
SET PIX SIZE 176 × 144! (Flashing for 3 sec.)	Attempted to set MAX FRAME RATE to 30F with PIX SIZE set to 352 × 288.	Use PIX SIZE 176 × 144.	6

## Others

## Checking communication/connection

By using the PING command standard to Windows, it is possible to check whether the connection is correct and that communication can be made from the PC to KA-DV300.

1. Launch the command prompt.
  - For Windows 2000  
From the Start button, select [Programs] → [Accessories] → [Command Prompt].
2. Input the following and press the Enter key.
 

```
PING xxx.xxx.xxx.xxx
(xxx.xxx.xxx.xxx is the IP address of the other party)
Input example: When the IP address of the other party is "192.168.0.10"
PING 192.168.0.010
```
3. Check to see that the other party is successfully displayed.
 

If connection is not successful, "Request timed out" or "Destination host unreachable" message will appear.

## Others

## Terminology

- **IP address**  
Identification number assigned to each computer that is connected to a network. The address is used for communication between network devices.
- **LAN (Local Area Network)**  
A network structured within a relatively small range such as in a single building or an office of a company.
- **DHCP (Dynamic Host Control Protocol)**  
Method of automatically assigning IP address within a network. When a computer is connected to a network, the DHCP server automatically assigns the IP address.
- **WAN (Wide Area Network)**  
A network structured within a wide area such as between the main office of a company and its branch offices. Internet is also generally referred to as WAN.
- **Netmask**  
An IP address has the following two roles: 1) address for identifying the network, and 2) address for identifying individual computers. Netmask is a 32-bit value that defines the number of bits of the IP address to use for identifying the network.
- **Gateway**  
Hardware and software that translates different types of protocols when a computer communicates with another computer outside the network. The gateway IP address is referred to as the gateway address.
- **RTP (Realtime Transport Protocol)**  
Protocol to transmit in realtime digitalized video/audio data via a network.
- **RTSP (Real Time Streaming Protocol)**  
Protocol to control realtime transmission of video/audio data via a network.
- **HTTP (Hypertext Transport Protocol)**  
Protocol used when transferring HTML (Hypertext Markup Language) files between WWW server and browser.
- **Protocol**  
A set rule for a computer or communication device to perform communication over a network, etc.
- **IEEE802,11b**  
International standard for wireless LAN with maximum communication speed of 11Mbps.
- **Channel (wireless LAN)**  
Frequency range used by wireless LAN. The same frequency must be set by two sides for proper communication.  
If there is an access point, adapter, etc., using the same band in the proximity, there may be a hindrance in the communication and may reduce throughput or the quality of communication. When setting, check the settings of surrounding access points, etc., to avoid doubling.
- **ESS-ID (wireless LAN)**  
Network identification name used by wireless LAN. The name is used to distinguish other wireless LAN devices.
- **Ad hoc mode (wireless LAN)**  
A mode for direct communication without passing through an access point.
- **Infrastrucure (wireless LAN)**  
Form of communication via an access point.

## Others

## Terminology

- **Encryption mode**  
Setting for encrypting the flow of data during wireless communication.  
Following settings are available:  
None (Open System): No encryption. Setting will be unavailable and throughput will be improved. However, there is the risk of information leakage.  
40bit WEP: Encryption is performed using 40-bit encryption key.  
128bit: Encryption is performed using 104-bit + 24-bit (1V) keys. Although throughput will decline compared to Open System, security of data will be improved.
- **Access point (wireless LAN)**  
Relay point for infrastructure communication. It can also serve as the relay point for cable LAN or wireless LAN.
- **ASF (Advanced Streaming Format)**  
Data streaming format developed by Microsoft Corporation (U.S.) for transmission of video and audio.
- **Host name**  
Name of a device (not limited to a computer but all connection devices with an IP address) on a network.
- **Port number**  
Number used for detecting applications and service during TCP/IP communication.
- **TCP/IP**  
Abbreviation for Transmission Control Protocol/Internet Protocol and is one of the protocols used during network connection.

→ OVER

### ■ About IP address

#### Global IP address and local IP address

There are 2 types of IP addresses: "global IP address" and "local IP address".

**Global IP address:** Just as different IP addresses are needed on a network, all PCs using the Internet worldwide must use a unique IP address. This IP address is referred to as "global IP address".

Normally, the global address is assigned by the IS provider.

**Local IP address:** In an environment not connected to the Internet (within a household, within a company, etc.), separate IP addresses can be used freely within a network.

This IP address is referred to as "local IP address".

#### IP address classes

IP addresses are categorized into 3 classes depending on the number of PCs structuring a network.

"Class A IP addresses" are used for large-scale networks, "Class B IP addresses" are used for medium-scale networks and "Class C IP addresses" are used for small-scale networks.

Within a network, all IP addresses must be of the same class. Each IP address is structured by a series of 4 digit numbers separated by a period. The first number of the IP address indicates the class.

First number of the IP address	Class	Application (number of PCs structuring the network)
1~127	Class A	For large-scale networks (max. approx. 16 million units)
128~191	Class B	For medium-scale networks (max. approx. 65,000 units)
192~223	Class C	For small-scale networks (max. approx. 120 units)

\* "224 ~ 255" are normally not used for IP addresses.

For example, a network structured by a few PCs to dozens of PCs would use Class C IP addresses.

Normally, the following special IP addresses are used when structuring a network.

Class	Set IP address
Class A	10.0.0.0 ~ 10.255.255.255
Class B	172.16.0.0 ~ 172.31.255.255
Class C	192.168.0.0 ~ 192.168.255.255

#### About proxy server

A proxy is a "relay point" for accessing the Internet. When enabling "Use a proxy server", the proxy server will make access to the Internet.

Since various access information is cached at this time, downloading will be faster when reloading the same information from the Internet since the data is loaded from the proxy server.

# Streamproducer

## User's Guide

## Welcome to Streamproducer

Welcome to Streamproducer, the software that records and playback MPEG-4 files from up to four GY-DV300U + KA-DV300U on a PC. Streamproducer provides hot switching of four live cameras or PC stored MPEG-4 files its output may be multicasted to a maximum of ten clients in a LAN. Streamproducer enables you to employ these operations on PC easily. For details on the GY-DV300U or KA-DV300U, please read its respective manuals.

### [Important]

Please carefully read this End-User License Agreement ("Agreement") before installing or using the "Streamproducer" ("Software") on your PC. The right to use the Software is granted by Victor Company of Japan, Limited ("JVC") to You only on the condition that You agree to the following Agreement. If You do not agree to the terms of the Agreement, you may not install the Software any more. HOWEVER, INSTALLING OR USING THE SOFTWARE INDICATES YOUR ACCEPTANCE OF THESE TERMS AND CONDITIONS. The Software also includes the associated materials, and any modification, upgrade and update of the Software granted to You by JVC.

### END-USER LICENSE AGREEMENT

#### 1. Copyright; Ownership

You acknowledge that all copyrights and other intellectual property rights in the Software is owned by JVC and its licensor, and remain vested in JVC and such licensor. The Software is protected under the copyright law of Japan and other countries, and related Conventions.

#### 2. Grant of License

- (1) Subject to the conditions of the Agreement, JVC grants to You a non-exclusive right to use the Software. You may install and use the Software on a HDD or other storage devices incorporated in Your PC.
- (2) You may make a copy of the Software for the back-up and storage purpose.

#### 3. Restriction

- (1) You may not modify, reverse engineer, decompile or disassemble (except to the extent as permitted by the applicable laws) the Software in any manner.
- (2) You may not copy or use Software, in whole or in part, other than as expressly specified in this Agreement.
- (3) You have no right to grant a license to use the Software, and may not sell, lease or rent the Software to any other person for any purpose.

#### 4. Limited Warranty

THE SOFTWARE IS PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND. JVC DOES NOT MAKE ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. SHOULD THERE BE ANY PROBLEM ARISING FROM OR CAUSED BY THE SOFTWARE, YOU SHOULD SETTLE ALL SUCH PROBLEM AT YOUR OWN COSTS AND RESPONSIBILITIES.

#### 5. Limitation of Liability

JVC WILL HAVE NO LIABILITY WITH RESPECT TO ITS OBLIGATIONS UNDER THIS AGREEMENT OR OTHERWISE FOR CONSEQUENTIAL, EXEMPLARY, INCIDENTAL OR PUNITIVE DAMAGES EVEN IF IT HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. YOU WILL INDEMNIFY AND HOLD HARMLESS JVC FROM ANY LOSS, LIABILITY OR COSTS ARISING OUT OF OR IN ANY WAY CONNECTED TO CLAIMS FROM ANY OTHER PERSONS RELATING TO THE USE OF THE SOFTWARE.

#### 6. Term

This Agreement will become effective on the date when You install the Software onto Your machine, and continue to be in effect until the termination under the reasons as below:

Should You breach any provision of this Agreement, JVC may terminate this Agreement without giving any notice to You. In this event, JVC may claim against You any damages caused by Your breach. Should this Agreement be terminated, You should immediately destroy the Software stored in Your machine (including the erase from any memory in Your PC), and then will not possess such Software.

7. Export Control

You agree that You will not ship, transfer or export the Software or underlying information and technology to any countries to which Japan and other relevant countries embargoed goods.

8. U.S. Government User

If You are an agency of the United States of America (the "Government"), You acknowledge JVC's representation that the Software is a "Commercial Item" as defined in Federal Acquisition Regulation (FAR) part 2.101 (g) consisting unpublished "Commercial Computer Software" as those items are used at FAR part 12.212 and is only licensed to You with the same use rights JVC grants all commercial end users pursuant to the terms of this Agreement.

9. General

- (1) No modification, change, addition, deletion or other alteration of or to the Agreement will be valid unless reduced to writing and signed by an authorized representative of JVC.
- (2) Even if any part of the Agreement is held invalid by or in conflict with any law having jurisdiction over this Agreement, the remaining provisions will remain in full force and effect.

The Agreement shall be governed by and interpreted under the laws of Japan. The Tokyo District Court has jurisdiction over all disputes which may arise with respect to the execution, interpretation and performance of this Agreement.

## 1. Required equipment for performance

Streamproducer requires the following equipment for its performance.

### Minimum required specification

#### <Hardware>

<b>CPU</b>	Pentium III 700MHz or later
<b>Memory</b>	128MB minimum
<b>Display</b>	XGA ( 1024 x 768 )
<b>Hard disk</b>	50MB for install. 25MB space for displaying per one hour (high compression) -- 200MB space for displaying per one hour (low compression).
<b>Network</b>	-One LAN system for connect to NETWORK PACK. -Internet connection to load the CODEC program for video playback. - Other network connection for casting on internet.

#### <Software>

<b>OS</b>	Windows2000 Professional
<b>Other</b>	Windows Media Player 7.1 or later must be installed in advance.

You can use Streamproducer with the PC if it meets the following three requirements and the minimum required specification.

1. Connection with only one camera or playback only one file.
2. Without recording the image from the camera.
3. Without switch casting.

You need the PC which supplies the following recommended specification if you use Streamproducer with multiple cameras and files.

### Recommended specification

#### <Hardware>

<b>CPU</b>	Pentium4 2.2GHz or later
<b>Memory</b>	512MB or more
<b>Display</b>	SXGA (1280 x 1024) or more

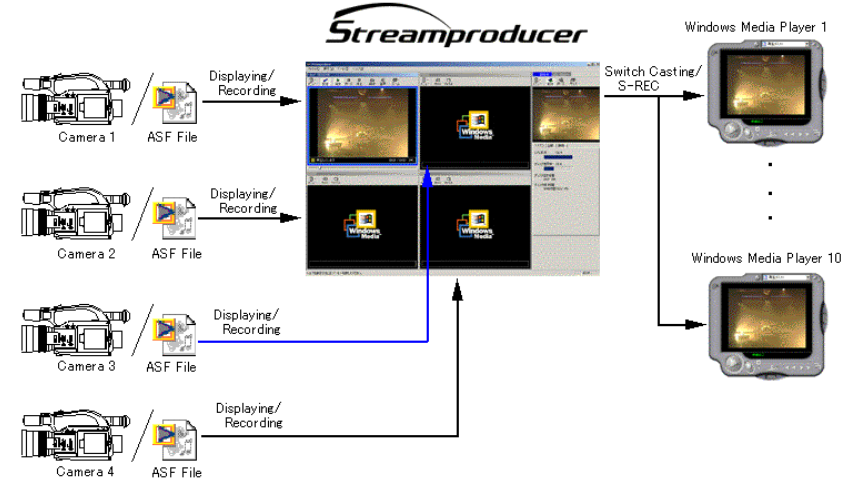

and the other contents accord with the minimum required specification.

Attention: The minimum required specification and the recommended specification are the standards for using Streamproducer smoothly. These specifications do not warrant the performance. It is possible that you can not use Streamproducer smoothly depends on the ability of your PC and network devices.

### An example in case of use with the minimum required specification

### An example in case of use with the recommended specification

## 2. Install and Uninstall Streamproducer

### 2-1. Install Windows Media Player

You must install Windows Media Player to use Streamproducer.

You can install Windows Media Player from Microsoft website address below.

(This website address may be changed or amended without prior notice.)

<http://www.microsoft.com/windows/windowsmedia/>

### 2-2. Install Streamproducer

Insert the CD-ROM in CD-ROM drive to install Streamproducer. Startup program (autorun.exe) appears.

(Choose [English] for your language.)

Click [Install Streamproducer] to start the setup program (setup.exe).

Install following the prompts by this program.

You need to login your PC as the user having the right of Administrator to install Streamproducer.

It is also possible to install by choosing [Run...] from the Window's [Start] menu, or by choosing CD-ROM drive from [My computer].

### 2-3. Install CODEC program

You must install the CODEC program through the internet when you use Streamproducer first time.

("ISO MPEG4" is the CODEC for composing images and "G.726" for output sound with Streamproducer.)

It is needed for processing images and sound with Stramproducer. The clients viewing your casting images needs the same CODEC program to receive the image and sound.

Confirm that your PC is connected to the internet and you can see the websites before install the CODEC.

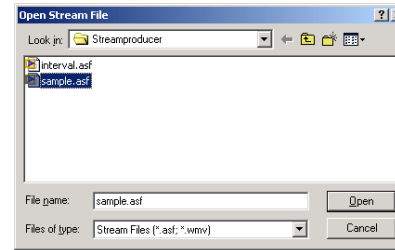

Choose [Streamproducer] from Windows [Program], [Start] menu to start Stramproducer.

Click [File] button.

Open Stream File dialog box appears.

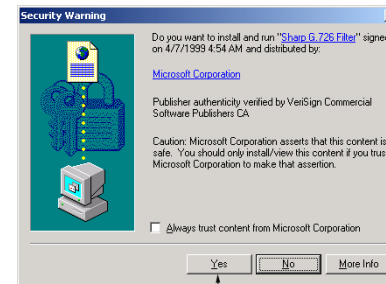

Choose the "sample.asf" file from the folder that you installed Streamproducer.

Click [OK] button.

Streamproducer starts to install CODEC.

The following dialog box appears;

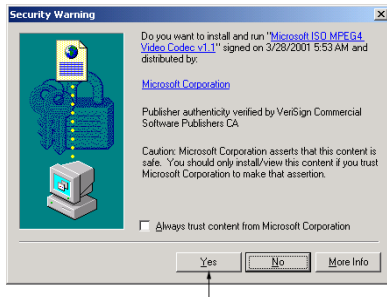

this dialog box prompts to proceed with install CODEC for sound.

Click [Yes] and wait until the installation is completed.

< Contents >

Next, the following dialog box appears;

this dialog box prompts to proceed with install CODEC for video (image).

Click [Yes] and wait until the installation is completed.

The installation is completed successfully and Streamproducer stands by for playback sample.asf file.

(WindowsMedia logo disappears and the Video display window turns black.)

You completed to install CODEC successfully if Steamproducer stands by for playback sample.asf file.

Click [Close] from [Menu] button of the Video display window.

< Contents >

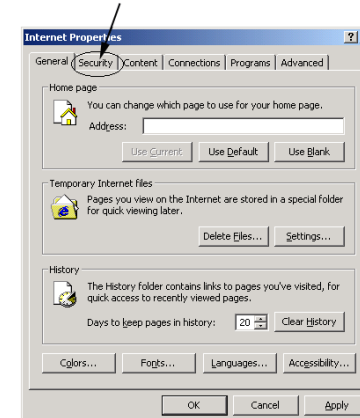

It depends on the security setting of InternetExplorer whether the prompt dialog boxes appear or not during install CODEC . Please confirm the security setting in case of that Streamproducer does not stand by for playback sample.asf file. Streamproducer may not install the CODEC completely.

#### 2-4. Confirm the security setting of your InternetExplorer

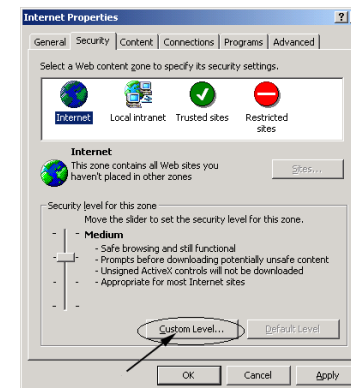

Click the right button of the mouse pointing InternetExplorer icon.

Choose [Properties] from the menu.

Internet Properties dialog box appears. Click [Security] tag.

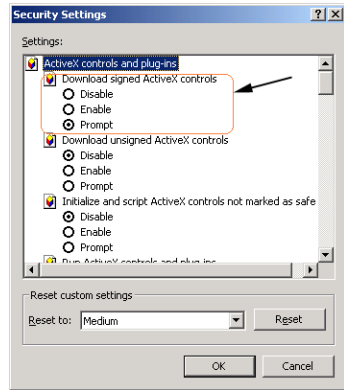

The dialog box for security setting appears.

Click [Custom Level...] button.

Security settings dialog box appears.

Confirm your setting on the area of "Download signed ActiveX controls".

<Disable> It is impossible to install CODEC if you check this choice.

<Enable> It is possible to install CODEC without the prompt dialog box.

<Prompts> The prompt dialog box appears before install CODEC and install it if you proceed to install.

Choose <Enable> or <Prompt> to install CODEC completely.

(<Prompt> is recommended in security respect.)

Click [OK] and try to install CODEC again if you change the security setting.

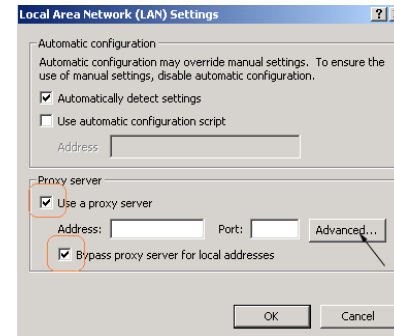

## 2-5. Setting a proxy server

You need to specify a proxy server to receive the image from KA-DV300U NETWORK PACK.

Click the right button of the mouse pointing InternetExplorer icon and choose [Properties] from the menu as the same way of confirming the security setting.

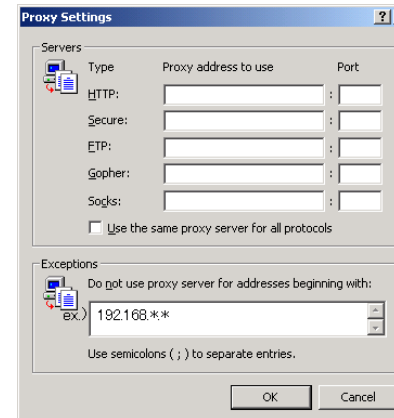

Click [Connections] tag to open the setting dialog for LAN.

Click [LAN Settings...] button to open [Local Area Network (LAN) Settings] dialog box.

◆ In case of connecting PC ; Streamproducer with one KA-DV300U NETWORK PACK directly.  
Remove the check mark on the [Use a proxy server] box.

◆ In case of using local area network.  
Check on the [Use a proxy server] box and type the address of the proxy server.  
Check on the [Bypass proxy server for local addresses] box and click [Advanced...] button to open [Proxy Settings] dialog box.

Type the IP address of the DV CAMCORDER in the blank of [Do not use proxy for addresses beginning with:].  
Click [OK] button after your proxy settings.

## 2-6. Uninstall Streamproducer

You can uninstall Streamproducer by the following two ways.  
You need to login your PC as the user having the right of Administrator to uninstall Streamproducer.

### 1. Using Streamproducer CD-ROM

Insert the Streamproducer CD-ROM in the CD-ROM drive.  
The start up program (autorun.exe) appears.  
Choose [English] as the language and [Install the Streamproducer] as the same way of the installation.

A message for confirmation of removing Streamproducer appears.  
Click [OK] to remove Streamproducer.

### 2. Using "Add/Remove Programs"

Choose [Add/Remove Programs] icon from Control Panel of My Computer.  
Click [Streamproducer] on the list of Currently installed Programs and click [Remove] button.

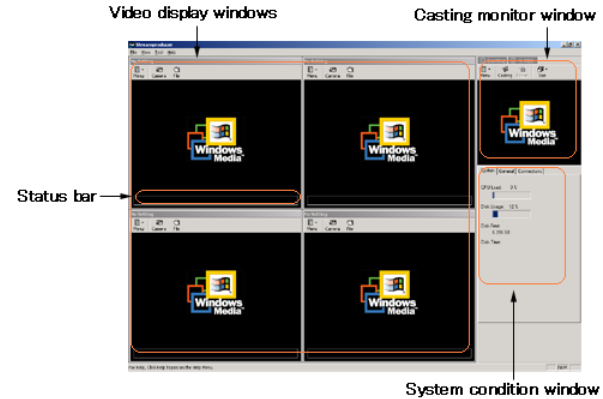

A message for confirmation of removing Streamproducer appears.  
Click [OK] to remove Streamproducer.

## 3. Start Streamproducer

Choose [Streamproducer] from Windows [Program], [Start] menu.

Operation window appears.

The operation window of Streamproducer has three areas; one for each function:

[Video display windows] These four windows display saved contents or images from cameras.

[Casting monitor window] This window shows casting image.

[System condition window] This window shows about the system condition and casting information.

The video display windows will not display images immediately after opening until the contents to be displayed are selected.

## 4. Close Streamproducer

Choose [Exit] from [File] menu of Streamproducer to close.

Or click on the X icon on the upper right hand corner.

## 5. Display images from cameras

Streamproducer can record and cast live images from cameras. First you must connect Streamproducer (your PC) with GY-DV300U DV CAMCORDER. Up to four cameras can be connected at a time, each camera's image is shown on its own video display window.

### 5-1. Connect with cameras

(1) Click [Camera] button on the video display window indicating "No Setting".

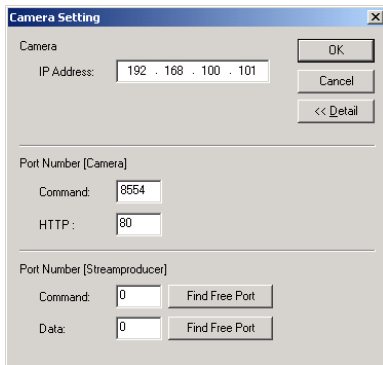

(2) The camera setting dialog box appears.

Enter the camera's IP address and click [OK].

(You can also invoke the camera setting dialog by choosing [Connect to a Camera] from [Menu] button.)

(3) There click on the [Detail] button of the camera setting dialog and specify the port number for the camera and for Streamproducer.

- It is necessary to specify the port number if there are network devices like routers between the camera's network pack and Streamproducer. Ask your network administrator for more detail.
- You do not need to specify the port number if you connect the camera, KA-DV300U directly to Streamproducer in the same condition that you bought them.
- For the details on the setting, please read the User's Guide of KA-DV300U NETWORK PACK, chapter "NETWORK PACK SETUP".

### Port Number [Camera] Enter the port number specified on the NETWORK PACK

Command :

Enter the port number for RTSP connection (TCP). This number is specified on the NETWORK PACK.

You can not connect with the DV CAMCORDER if you enter the different port number from that specified on the NETWORK PACK.

HTTP :

Enter the port number for HTTP connection.

This number is used when the Streamproducer opens the WEB page for NETWORK PACK setting.

For the confirmation of the number specified on the NETWORK PACK, please read the User's Guide of KA-DV300U NETWORK PACK, "NETWORK PACK SETUP" page.

### Port Number [Streamproducer] Enter the port number of the PC

Command:

Enter the port number for RTSP connection (TCP).

Enter the port number of Streamproducer to send the RTSP commands to the NETWORK PACK.

Data:

Enter the port number for RTSP connection (UDP)

Enter the port number of Streamproducer to receive video data from the NETWORK PACK.

Click [OK] button when you finished setting.

(4) Camera Name dialog appears.

The host name of the camera is shown as the Camera Name.

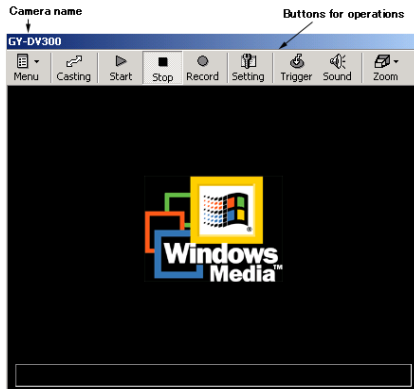

If you do not specify the host name, Camera Name "none" is appears

Enter the camera name and click [OK] button.

Streamproducer makes the folder by this Camera Name and stores recorded images in the folder.

(5) Streamproducer is connected with the camera.

Camera name is shown above of the video display window.

Buttons for operation images appear above of the video display window.

You can see more information about the camera currently connected by choosing [Property...] after click on the [Menu] button.

It is possible to change the camera by choosing [Other Camera...] from [Menu] button.

## 5-2. Displaying images from cameras

Each video display window has its own buttons and operation menu. It is possible to operate up to four video display windows separately by clicking on its control buttons or operation menu.

Note: Operations; Start, Stop, Capture, Trigger, and Sound on this page do not mean casting stop or start but of the individual video display window. Please see "7. Casting" about casting image and operation casting image.

### [ Start ]

Click the [Start] button to display image from a connected camera.

( You can also display it by choosing [Start Playback] from [Menu] button. )

The live image from camera appears on the video display window.

### [ Stop ]

Click the [Stop] button to stop displaying connected camera.

( You can also stop by choosing [Stop Playback] from [Menu] button. )

### [ Capture ]

Click the [Capture] button to start recording the image from the camera.

( You can also start recording by choosing [Start Capturing] from [Menu] button. )

Click [Stop] button to stop recording.

### [ Setting ]

Click the [Setting] button to open the page for setting of DV CAMCORDER and NETWORK PACK by your internet browser.

For details on the settings, please read the User's Guide of KA-DV300U NETWORK PACK.

( You can also open the page by choosing [Camera Setting] from [Menu] button. )

### [ Trigger ]

Click the [Trigger] button to start recording images from the camera automatically when the camera starts recording. (Streamproducer detects the recording trigger from the camera and starts recording at the same time.)

Streamproducer stops recording automatically when the camera stops recording.

The [Trigger] button appears to be pushed when you click it, indicating that the trigger mode is effective. (It is possible to achieve the same effect by choosing [Capture Trigger] from the [Menu] button.)

Click the [Trigger] button again to stop the trigger mode. The [Trigger] button reverts to its usual position indicating that the trigger mode disabled. (You can also stop the trigger mode by choosing [Capture Trigger] from [Menu] button. If there is a check mark next to 'Capture Trigger' it indicates that the trigger mode is effective, and stopped if there is NOT a check mark.)

Please read "[Trigger mode](#)" on this chapter for more details about trigger mode.

[ Sound ]

Click the [Sound] button to enable sound output.

(You can also enable sound output by choosing [Output Sound] from [Menu] button. )

The [Sound] button appears to be pushed when you click it to indicate 'output sound'.

Click the [Sound] button again to mute the sound. The [Sound] button switches to the default position which is sound off.

(You can also mute the sound by choosing [Output Sound] from the [Menu] button. If there is a check mark next to 'Output Sound' it indicates that sound is enabled, and muted if there is NOT a check mark. )

[ Zoom ]

Choose [Fit to Window Size], [50%], [100%] or [200%] from [Zoom] button to change the magnification of the displaying image .

( You can also change the magnification by choosing [Zoom] from [Menu] button of each video display window. )

[ Casting ]

Click the [Casting] button to start casting. Please see "7-2. Start casting" more about casting.

( You can also start casting by choosing [Start/Switch Casting] from [Menu] button.

[ Property... ]

Choose [Property...], from [Menu] button to confirm the camera setting.

You can also change the camera name here.

[ Other Camera... ]

Choose [Other Camera], from [Menu] button to connect with other camera.

[ Close ]

Choose [Close], from [Menu] button to cut off network connection with camera.

The network connection is cut and the video display window reverts to "No Setting".

● Trigger mode

Trigger mode is the unique function of the Streamcorder products.

The button controls of DV CAMCORDER connect with the controls of recording on the Streamproducer.

The video display window turns to trigger mode by the [Trigger] button. You need to stop all functions (Start, Capture, and Casting) before make the video display window Trigger mode.

(A confirmation message appears if some functions are effective.)

< Streamproducer working by the DV CAMCORDER's controls >

You need specify the "NETWORK PACK CONFIG" menu depend on the working of Streamproducer.

(1) [TRIG]

You can record the images on the miniDV cassette of DV CAMCORDER and the PC of Streamproducer the same time on this mode. A miniDV cassette is needed in the DV CAMCORDER.

"NO TAPE" sign appears if no cassette is in the DV CAMCORDER.

-Start recording

Push [REC SART/STOP] button of DV CAMCORDER.

The "e" sign turns red on the display of DV CAMCORDER.

-Stop recording

Push [REC START/STOP] button of DV CAMCORDER again during the "e" sign is red.

The "e" sign reverts yellow on the display of DV CAMCORDER.

REC START/STOP Button

(2) [SPLIT]

You can record the images on the PC of Streamproducer independently of the recording on the miniDV cassette on this mode.

It is not necessary to set the cassette on the DV CAMCORDER.

-Start recording

Push [SELECT] dial of DV CAMCORDER.

The "e" sign turns red on the display of DV CAMCORDER.

-Stop recording

Push [SELECT] dial of DV CAMCORDER again during the "e" sign is red.

The "e" sign reverts yellow on the display of DV CAMCORDER.

(3) [OFF]

Trigger mode does not work if you choose [OFF].

5-3. Save recorded images

Recorded images are saved in the location specified on Option dialog of Streamproducer. Please see "9-2. Option dialog" about specifying saving place.

6. Playback files

Streamproducer can playback and cast the contents saved in the hard disk or CF card of up to four files at the simultaneously, each stream is shown on its own video display window.

6-1. Select files

When no file is selected, the menu bar indicates "No Setting". Click the [File] button on the video display window to invoke the open stream file.

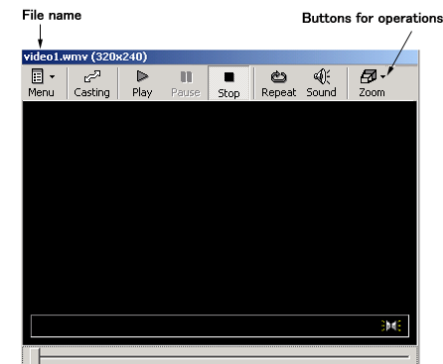

Open Stream File dialog appears.

Select a file and click [Open] button.

( You can also see Open Stream File dialog by choosing [Playback a File] from [Menu] button.)

File name is shown above the video display window.

Buttons for operation of images appear above the video display window.

You can see additional information about the selected file by choosing [Property...] from [Menu] button.

## 6-2. Operate contents of files

Each video display window has its own buttons and operation menu. It is possible to operate up to four video display windows separately by clicking on its control buttons or operation menu.

Note: Operations; Play, Pause, Stop, Repeat, and Sound on this page do not mean casting stop or start but of the individual video display window. Please see "Casting" about casting images and operate casting image.

### [ Play ]

Click the [Play] button to start playback a file. ( You can also start playback by choosing [Play] from the [Menu] button. ) The file starts to playback from the beginning on the video display window.

### [ Pause ]

Click the [Pause] button to make the file pause. ( You can also pause by choosing [Pause] from the [Menu] button. ) Click the [Play] button to resume file playback.

### [ Stop ]

Click the [Stop] button to stop the file playback. (You can also stop by choosing [Stop] from the [Menu] button. )

### [ Repeat ]

Click the [Repeat] button to repeat playback the same file automatically.

( It is possible to repeat playback by choosing [Repeat] from the [Menu] button. )

The [Repeat] button appears to be pushed if you click it and it indicates that the repeat function is effective. Click the [Repeat] button again to stop the repeat function. The [Repeat] button reverts to its usual position indicating that the repeat function is disabled. ( You can also stop the repeat function by choosing [Repeat] from the [Menu] button. If there is a check mark next to 'Repeat' it indicates that the repeat function is effective and stopped if there is NOT a check mark. )

### [ Sound ]

Click the [Sound] button to enable sound output.

(You can also enable sound output by choosing [Output Sound] from [Menu] button. )

The [Sound] button appears to be pushed when you click it to indicate 'output sound'.

Click the [Sound] button again to mute the sound. The [Sound] button switches to the default position which is sound off.

(You can also mute the sound by choosing [Output Sound] from the [Menu] button. If there is a check mark next to 'Output Sound' it indicates that sound is enabled, and muted if there is NOT a check mark. )

### [ Zoom ]

Choose [Fit to Window Size], [50%], [100%] or [200%] from [Zoom] button to change the magnification of the displaying image .

( You can also change the magnification by choosing [Zoom] from [Menu] button of each video display window. )

### [ Casting ]

Click the [Casting] button to start casting. Please see "Start casting" for more details about casting.

( You can also start casting by choosing [Start/Switch Casting] from [Menu] button.

### [ Property... ]

Choose [Property...], from [Menu] button to confirm the detail information about the file.

### [ Open Other File... ]

Choose [Open Other File], from [Menu] button to playback and cast other file.

### [ Close ]

Choose [Close], from [Menu] button to close the file.

Video display windows turn to "No Setting".

### [ Seekbar ]

Drag the seekbar to the point you want to start playback.

## 7. Casting

It is possible to cast live images from a connected camera or the contents of the selected file. The casting monitor window displays the current cast image. The [Casting] sign turns blue while casting.

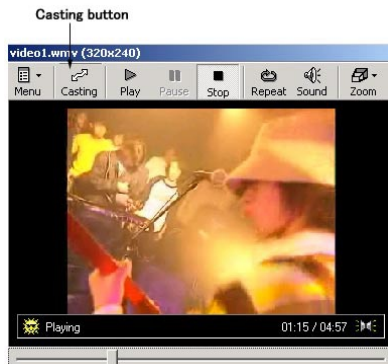

### 7-1. Select casting item

You must select an item for casting on the Video display window to start casting. It is necessary to choose the image from connected camera or saved files as a casting item. First, connect with a camera if you want to cast the image from the camera, or select a file if you want to cast the saved contents.

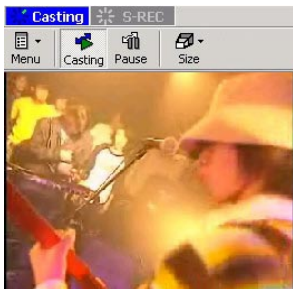

### 7-2. Start casting

Click the [Casting] button to start casting the contents of the video display window.

( You can also start casting by choosing [Start Casting] from the [Menu] button. )

Casting starts.

The casting monitor window displays the casting image and the [Casting] sign turns blue while the casting is in progress.

## 7-3. Operate casting image

You can operate casting image by buttons of casting monitor window.

### [ Pause ]

Click the [Pause] button on the casting monitor window to pause the casting recording the casting image. ( It is also possible to pause by choosing [Pause Casting] from the [Menu] button of casting monitor window. )

Click the [Play] button of the video display window to casting.

Click the [Casting] button to resume casting on the video display window.

### [ Size ]

Choose [Small], [Medium] or [Large] from [Size] button to change the size of casting monitor window. ( You can also change the size by choosing [Display Size] from [Menu] button of casting monitor window. )

All four video display windows resize automatically depending on the size of casting monitor window. For example, if the casting monitor window becomes large, all four video display windows become smaller maintaining the aspect ratio.

### [ Repeat Casting ]

Choose [Repeat Casting] from the [Menu] button of casting monitor window to repeat casting the same image automatically.

Click [Repeat Casting] from [Menu] button of casting monitor window to stop repeat function.

A check mark next to 'Repeat Casting' indicates that the repeat function is effective and not if there is NOT a check mark.

### [ Sound ]

Choose [Output Sound] from the [Menu] button of the casting monitor window to output sound.

Choose again [Output Sound] from the [Menu] button of casting monitor window to mute the sound.

(If there is a check mark next to 'Output Sound' it indicates that sound is enabled, and muted if there is NOT a check mark. )

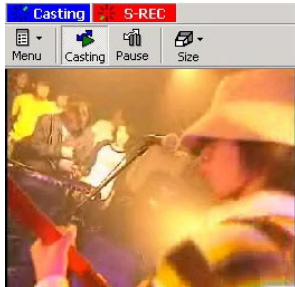

The [Output Sound] is the function enables output of sound of the selected camera to your PC. It does not affect the stream casting audio. Streamproducer outputs the sound of the streaming image even if [Output Sound] is off.

### 7-4. Save casting image

You can save the cast images automatically. Saved images are stored in the place you specified by Option dialog of Streamproducer.

You need to make the function of recording effective on Option dialog before starting recording.

Casting monitor window shows the casting image and starts recording the same time if you start casting.

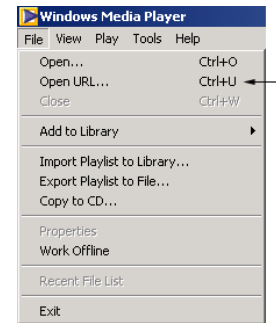

[S-REC] sign is red during recording.

Click [Pause] button to stop recording.

### 8. Receive the casting image

You can receive and view the casting image through Windows Media Player.

Start Windows Media Player and choose [Open URL...] from [File] menu to view the casting image.

Enter the URL for receiving the casting image.

The URL is specified by the IPaddress and portnumber of the casting place. (Casting PC with Streamproducer)

Streamproducer shows the URL on the [system condition window](#).

The client viewers must enter this URL on Windows Media Player to receive the casting image.

Sample of Internet URL

Sample of LAN URL

Enter the URL and click [OK].

#### Attention:

**When you receive the casting image switched by the casting buttons on the video display windows. (switch casting)**

Windows Media Player may be cut the connection with the casting image when it received a high bit rate image after the receiving a lower bit rate image by Streamproducer's switch casting.

The client viewers can prevent this matter by receiving a high bit rate casting image from Streamproducer first, and receiving a lower bit rate image after that.

For more details about difficulty with receiving, please read "[10. Troubleshooting](#)".

## 9. Menu and dialogs

The following topics include about "System condition window" and "Option".

### 9-1. System condition window

System condition window shows condition of the PC and information about casting.

[System] shows the following items.

#### [ CPU ]

About CPU load condition.

#### [ Disk ]

Displays the occupation of the file location folder that specified on the Option dialog.

#### [ Disk Free ]

Shows amount of free disk remaining in GB.

#### [ Disk (time) ]

Shows the rough amount of available recording time.

[General] shows the following items.

#### [ Video Size ]

Shows the pixel dimensions of the casting image. (width x Height)

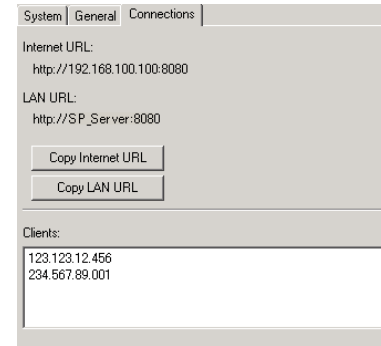

#### [ Length ]

Shows the length of the casting data.

#### [ Bit Rate ]

Shows bit rate of the casting image.

[Connections] shows the following items.

#### [ Internet URL ]

Shows the internet URL for receiving the casting image from Streamproducer.

For details on the process of receiving the casting image, please read "8. Receive the casting image".

#### [ LAN URL ]

Shows the LAN URL for receiving the casting image in case of casting by LAN.

#### [ Copy Internet URL ]

You can use this button to copy Internet URL temporarily on the clipboard and paste it on the mail for information of your casting URL.

#### [ Copy LAN URL ]

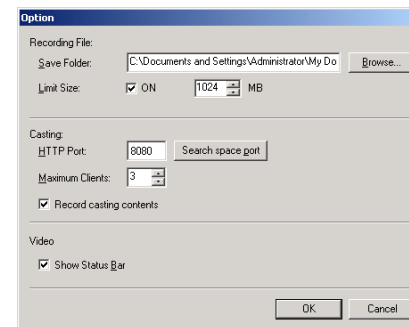

You can use this button to copy LAN URL temporarily on the clipboard and paste it on the mail for information of your casting URL.

#### [ Clients ]

Shows the IP addresses of the client viewers.

### 9-2. Option dialog

Choose [Option...] from [Tool] menu of Streamproducer.

Option dialog appears.

#### [ Recording File: Save Folder ]

You can specify the folder to save recorded images.

Some sub folders are made under the specified folder by the name of connected cameras automatically and the images are saved in the sub folders depend on the camera name.

Click [Brows...] button to see browse for folder dialog.

Choose the folder to save the recorded images.

#### [ Recording File: Limit Size ]

Streamproducer displays the images from DV CAMCORDERS after saving the image data on the hard disk of the PC temporarily.

In case that the Limit Size is effective (check the box "ON")

A temporal file is re-composed if the amount of stored data reaches the size that you specified.

The controls; Start, Capture and Casting are stopped a moment, and you can not display and recording images during the re-composing the temporal file. After that, the Start and Capture are resumed. The Casting does not resumed automatically.

#### [ Casting: HTTP Port ]

You can specify the port number to use for casting.

Unused port number is provided by [Search space port] button.

#### [ Maximum Clients ]

The number of clients available to cast the same time. The maximum is 10.

#### [ Recording casting contents ]

Image contents you cast are saved on your PC if you check in this box before casting.

Take the check mark off if you do not need to save the contents you cast.

Saved items are stored in the sub folder named "Casting" in the place you specified at [Save Folder] on this dialog.

#### [ Video: Show Status Bar ]

The status of operation is shown on each video display window if you check in this box before your operation.

Take the check mark off if you want to hide the Status Bar.

## 10. Troubleshooting

The following topics include common solutions to problems you may encounter when using Streamproducer.

### Failed in connection to a camera.

- ◆ Make sure the IP address and RTST port number of the camera.
  - ⇒ Enter the IP address and port number correctly in Camera Setting dialog.
- ◆ Verify the set up of your PC network. It is necessary to establish a LAN connection with cameras correctly.
  - ⇒ Check the LAN card manual Windows Help of the for more detail.
- ◆ Confirm that the LAN card is inserted correctly in the network pack.
  - ⇒ Make sure the LAN card is oriented properly and seated in the PCMCIA CardBus slot.
- ◆ Electromagnetic wave condition may be poor when using wireless LAN.
  - ⇒ Place metal articles that may be blocking the transmission away from the camera and your PC.
  - ⇒ The distance between the camera and your PC may exceed the maximum allowed for a reliable connection. Check the manual for the wireless LAN card to confirm the maximum distance.
- ◆ Port setting may not be correct.
  - ⇒ Make sure the setting of your personal firewall if you are using WindowsXP.
  - ⇒ Ask your network administrator to make sure the port setting if you have network devices such as a router between the camera and your PC.

### Unable to receive live image contents from a camera by [Play] button.

Communications with the network pack may have been interrupted by some reasons.

- ⇒ Refrain from using microwave near to the machines when using wireless LAN.
- ⇒ Place metal articles that may be blocking the transmission away from the camera and your PC when using wireless LAN.
- ⇒ Make sure the LAN cables are not severed if you use cables.
- ⇒ Make sure the LAN card is inserted correctly in the NETWORK PACK.

### Unable to receive casting image.

- ◆ Send Ping command to the IP address of Streamproducer.

You may receive the casting image after sending Ping command completely.

⇒ Send Ping command:

Click [Command Prompt] from [Accessories] menu of [Program] by Windows [Start] button.

On the Command Prompt window, type the IP address of Streamproducer after "C: \>ping" and push [Enter] key.

(ex.) C: \>ping 192.168.100.101

Receive again the casting image after sending Ping command. It is wrong with your network connections if you can not send ping command completely.

- ◆ Confirm that the receiving PC is connected to the Internet (LAN) correctly.
- ◆ Confirm that the access point is specified correctly on the Windows Media Player.

[< Contents >](#)

◆ The CODEC ( a software program required for compressing or expanding the AV data ) is not installed correctly.

⇒ Download the CODEC by the process. (See "Start and close Streamproducer" about the CODEC.)

#### **"Error" in starting live or playback files.**

◆ The CODEC ( a software program required for compressing or expanding the AV data ) is not installed correctly.

⇒ Download the CODEC by the process. (See "Start and close Streamproducer" about the CODEC.)

#### **Unable to cast or change casting contents.**

◆ Make sure the contents were generated by the KA-DV300U Streamproducer assures you of processing only contents recorded or streamed by the KA-DV300U.

#### **Unable to record.**

◆ Confirm in the system condition window that your PC has enough free space on the hard disk

#### **Live contents are not smooth.**

◆ Make sure on system condition window that your PC has enough CPU power left.

◆ Refrain from running other applications at the same time.

◆ Try to connect to fewer cameras or playback fewer files at the same time.

◆ Try to stop and resume recording or casting.

◆ Disable the DirectDraw acceleration on the Display property dialog.

⇒ Click the right button of the mouse pointing desktop and choose Properties to open [Display Properties] dialog box.

Click [Settings] tab, [Advanced] button, and [Troubleshooting] tab.

Drag the bar of Hardware acceleration to control the level.

Change the level to disable the DirectDraw acceleration referring the message on this dialog box.

Click [OK] button after your settings.

#### **Unable to hear the sound.**

◆ Turn the [Sound] button on of the video display window.

#### **Unable to start the application.**

◆ Restart your PC once.

◆ The Application may not be installed correctly.

⇒ Install the application again. ( See "2. Install and Uninstall Streamproducer" about install. )
