Warnings, Cautions and Others

CAUTION

To reduce the risk of electrical shocks, fire, etc.:
1. Do not remove screws, covers or cabinet.
2. Do not expose this appliance to rain or moisture.

Caution — STANDBY/ON ⏻/| button!

Disconnect the mains plug to shut the power off completely. The STANDBY/ON ⏻/| button in any position does not disconnect the mains line. The power can be remote controlled.

CAUTION

• Do not block the ventilation openings or holes.
  (If the ventilation openings or holes are blocked by a newspaper or cloth, etc., the heat may not be able to get out).
• Do not place any naked flame sources, such as lighted candles, on the apparatus.
• When discarding batteries, environmental problems must be considered and local rules or laws governing the disposal of these batteries must be followed strictly.
• Do not expose this apparatus to rain, moisture, dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.

Caution: Proper Ventilation

To avoid risk of electric shock and fire and to protect from damage, locate the apparatus as follows:
Front:No obstructions and open spacing.
Sides:No obstructions in 3 cm from the sides.
Top:No obstructions in 5 cm from the top.
Back:No obstructions in 15 cm from the back.
Bottom:No obstructions, place on the level surface.

Precautions

Notes on the power cord
• When you are away on travel or otherwise for an extended period of time, remove the plug from the wall outlet. A small amount of power (1.0W) is always consumed while the power cord is connected to the wall outlet.
• When unplugging the unit from the wall outlet, always pull the plug, not the power cord.
• Do not handle the power cord with wet hands!

Avoid moisture, water and dust
• Do not place the unit in moist or dusty places.
• If water gets inside the unit, turn off the power and remove the plug from the wall outlet, then consult your dealer. Using the unit in this state may cause a fire or electrical shock.

Avoid high temperatures
• Do not expose the unit to direct sunlight or place it near a heating device.

Notes on installation
• Select a place which is level, dry and neither too hot nor too cold between 5°C and 35°C.
• Leave sufficient distance between the unit and the TV.
• Do not install the unit in a place subject to vibrations.

To prevent malfunction of the unit
• There are no user-serviceable parts inside. If anything goes wrong, unplug the power cord and consult your dealer.
• Do not insert any metallic objects, such as wires, hairpins, coins, etc. into the unit.
• Do not block the vents. Blocking the vents may damage the unit.

To clean the cabinet
• Use a soft cloth. Follow the relevant instructions on the use of chemically-coated cloths.
• Do not use benzene, thinner or other organic solvents and disinfectants. These may cause deformation or discoloring.

About discs

Playable disc types

Discs with the following marks can be played back on the unit.

DVD VIDEO	SVCD	Video CD	Audio CD
DVD VIDEO	COMPACT DISC SUPER VIDEO	Video CD COMPACT DISC DIGITAL VIDEO	COMPACT DISC DIGITAL AUDIO

The DVD Logo is a trademark.
The unit can also play back the following discs:
• DVD-R and DVD-RW discs written in the DVD VIDEO format and finalized
• CD-R and CD-RW discs written in the SVCD, Video CD or Audio CD format and finalized
• CD-R and CD-RW discs written in MP3 or WMA in accordance with the "ISO 9660" format (See page 22 for details.)
• CD-R and CD-RW discs written in JPEG in accordance with the "ISO 9660" format (See page 24 for details.)

NOTE

If a disc gets dirty, scratched or warped, or due to the disc characteristics or recording conditions, it may take considerable time for the unit to read the content, or the unit may not be able to play back such discs.

The unit can play back audio signals recorded in MIX-MODE CD, CD-G, CD-EXTRA and CD TEXT.

Region code of DVD VIDEO

DVD VIDEO players and DVD VIDEO discs have their own Region Code numbers. This unit can play back DVD VIDEO discs whose Region Code numbers include the unit's Region Code, which is indicated on the region code symbol on the rear panel. Example of playable DVD discs when the unit's Region Code is "2":

ALL	2	2 5	1 2 3 4	1 2 3 4 5 6

Color system format

This unit is compatible with the PAL and NTSC systems. You can select "PAL" or "NTSC" while using the NTSC/PAL selector on the rear panel (for details, see page 6).

Unplayable discs

The unit does not play back discs listed below. If you try to play back these discs, noise may generate causing damage to speakers.

• DVD-RW discs written in the VR format
• DVD-ROM, DVD-RAM, DVD AUDIO, CD-ROM, PHOTO CD, SACD

In addition, the unit does not play:
• Unfinalized discs
• Discs of irregular shape or discs with tape, seals or paste on either the label side or playback side. Playing back these discs may damage the unit.

Digital audio formats

The unit supports the following digital audio formats (see page 43 "Glossary" for descriptions of each audio format):

Linear PCM, Dolby Digital, DTS (Digital Theater Systems)

NOTE

Depending on the unit's [DIGITAL AUDIO OUTPUT] setting, digital audio signals may not be output as they are recorded on the disc. See "DIGITAL AUDIO OUTPUT" on page 33 for details.

Notes on discs

• With some DVD VIDEO discs, the unit starts playback automatically after inserting the disc.
• The image may be sometimes poor or noisy due to defects in the disc itself.
• With some discs, operations described in this manual may not be possible.

Care and handling of discs

If a disc gets dirty, dusty, scratched or warped, playback sound and picture may be deteriorated. Take proper precautions when handling discs.

Handling
• Do not touch the surface of the disc.
• Do not damage, stick paper to, or use any adhesive on either the label side or playback side.

Storing discs
• Keep discs in their cases. If discs are piled on top of one another without their protective cases, they can be damaged.
• Do not put discs in a location where they may be exposed to direct sunlight, or where the humidity or temperature is high. Avoid leaving discs in a car!

Cleaning discs
• Wipe with a soft dry cloth, moving from the center outwards. If a disc is difficult to clean, wipe with a cloth moistened with water.
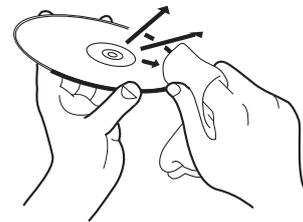

• Never use record cleaners, petrol, alcohol or any anti-static agents.

Notes on copyright
Check the copyright laws in your country before recording from DVD VIDEO, SVCD, Video CD, Audio CD, MP3, WMA and JPEG discs.
Recording of copyrighted material may infringe copyright laws.

Preparations

Connections

Before using the unit, connect the unit to a TV and/or amplifier.

Before making connections

- **Do not connect the AC power cord until all other connections have been made.**
- **Connect VIDEO OUT of the unit directly to the video input of your TV. Connecting VIDEO OUT of the unit to a TV via a VCR may cause a monitor problem when playing back a copy-protected disc. You may also have a monitor problem when connecting the unit to an integrated TV/Video system.**

- In the following description, "TV" may be substituted with "monitor" or "projector."
- Terminal names used for other components may be different from those used in the following description.

Connecting to a TV

The following sections Ⓐ to Ⓒ describe TV connections where only a TV is connected to the unit so that you will hear audio from the TV.

NOTE

If your TV has a monaural audio input instead of stereo, you need to use an optional audio cable which converts stereo audio output to monaural.

Ⓑ Connecting to a TV with an S-video jack

If your TV has an S-VIDEO input, you can get better picture quality by connecting it with the S-VIDEO output of the unit using an S-video cable instead of connecting the video input of the TV to the VIDEO jack of the unit.

NOTE

When using the S-VIDEO output jack, do not connect the COMPONENT VIDEO OUT jacks on the unit.

Preparations

Ⓒ **Connecting to a TV with component jacks**

You can enjoy picture of high-fidelity color reproduction by connecting the COMPONENT VIDEO OUT jacks on the unit to your TV.

NOTES

• Connect "Y" to "Y," "P$_B$" to "P$_B$" (C$_B$), "P$_R$" to "P$_R$" (C$_R$) correctly.
• When using the COMPONENT VIDEO OUT jacks, do not connect the S-VIDEO output jack on the unit.
• If your TV has component video input jacks of BNC type, use an adapter which converts a pin jack to a BNC jack (not supplied).

Progressive scan video playback available

In the Progressive scanning mode, you can enjoy high quality picture with less flickers when the COMPONENT VIDEO OUT jacks are connected to a TV or monitor that supports the progressive video input.

About the scanning mode

Depending on the material source format, DVD VIDEO discs can be classified into two types; film source and video source (note that some DVD VIDEO discs contain both film source and video source). Film sources are recorded as 24-frame-per-second information, while (NTSC) video sources are recorded as 30-frame-per-second (60-field-per-second interlaced) information.
When the unit plays back a film source material, uninterlaced progressive output signals are created using the original information. When a video source material is played back, the unit interleaves lines between the interlaced lines on each to create the interpolated picture and outputs as the progressive signal.

Selecting the 525i/525p/REMOTE selector position
• If your TV equipped with component jacks does not support the progressive scanning mode
  Set the 525i/525p/REMOTE selector to "525i."
• If your TV equipped with component jacks supports the progressive scanning mode
  Set the 525i/525p/REMOTE selector to "525p."
• If you want to select the scanning mode between the interlace and progressive modes (depending on the source condition, or when connecting more than one television, etc.)
  Set the 525i/525p/REMOTE selector to "REMOTE."
  Thus you can select the mode from the remote control unit.

NOTE

You must change the 525i/525p/REMOTE selector position while the unit power is off. Otherwise, the changed setting is not effective.

Activating the Progressive scanning mode using the remote control unit

When the unit is turned on and the 525i/525p/REMOTE selector is set to "REMOTE," press and hold down VFP - PROGRESSIVE SCAN for a few seconds.
The scanning mode switches between the Progressive scanning and Interlaced scanning modes.

When the scanning mode is set to the Progressive mode, the PROGRESSIVE indicator on the front panel turns on.
Depending on the [PICTURE SOURCE] setting on the [PICTURE] preference display and whether the current DVD VIDEO disc is film-source or video-source, the color of the

indicator differs, as shown in the table below.

Setting of [PICTURE SOURCE]	Source type of DVD VIDEO	
	Film source	**Video source**
AUTO	Green	Red
FILM	Green	Green
VIDEO (NORMAL)/ (ACTIVE)	Red	Red

* While stopped in the Progressive scanning mode, the PROGRESSIVE indicator is lit in red regardless of the [PICTURE SOURCE] selection.

NOTES

• The Progressive scanning mode works only when you connect the unit's COMPONENT VIDEO OUT jacks to your TV.
• The Progressive scanning mode works only when the signal format is NTSC.
• There are some progressive TV and High-Definition TV sets that are not fully compatible with the unit, resulting in the unnatural picture when playing back a DVD VIDEO disc in the Progressive scanning mode. In such a case, use the Interlaced scanning mode. To check the compatibility of your TV set, contact your local JVC customer service center.
• All JVC progressive TV and High-Definition TV sets are fully compatible with the unit (Example: AV-61S902).
• The VIDEO jack, S-VIDEO jack and COMPONENT VIDEO OUT jacks cannot be used at the same time. Connect cable(s) only to the jack(s) you want to use.

Connecting to a digital audio device

You can enjoy sound of enhanced quality by connecting the unit's DIGITAL OUT (either OPTICAL or COAXIAL) jack to a digital input of an amplifier, etc., using an optical or coaxial digital cable. The digital audio signal on a disc will be transferred directly from the unit. If the connected digital audio equipment is a Dolby Digital or DTS decoder or an amplifier with a built-in decoder, you can enjoy high-quality surround sound.

NOTES

- Connect the unit and the digital audio device by using either an optical digital cable or a coaxial digital cable.
- It is not recommended to use the digital jacks for dubbing. When recording the sounds (DVD VIDEO, SVCD, Video CD or Audio CD) played back on the unit, record them through the analog jacks.
- Depending on the disc, no signal may be output from the DIGITAL OUT. Make an analog connection in this case.
- **Set [DIGITAL AUDIO OUTPUT] in the [AUDIO] preference display correctly according to the connected digital audio equipment. If setting made for [DIGITAL AUDIO OUTPUT] is incorrect, loud noise may be generated causing damage to the speakers (see page 33).**

When using the DIGITAL OUT (OPTICAL) jack, remove the protection cap. Do not lose the removed cap.
When the DIGITAL OUT (OPTICAL) jack is not used, replace the protection cap in the jack.

5
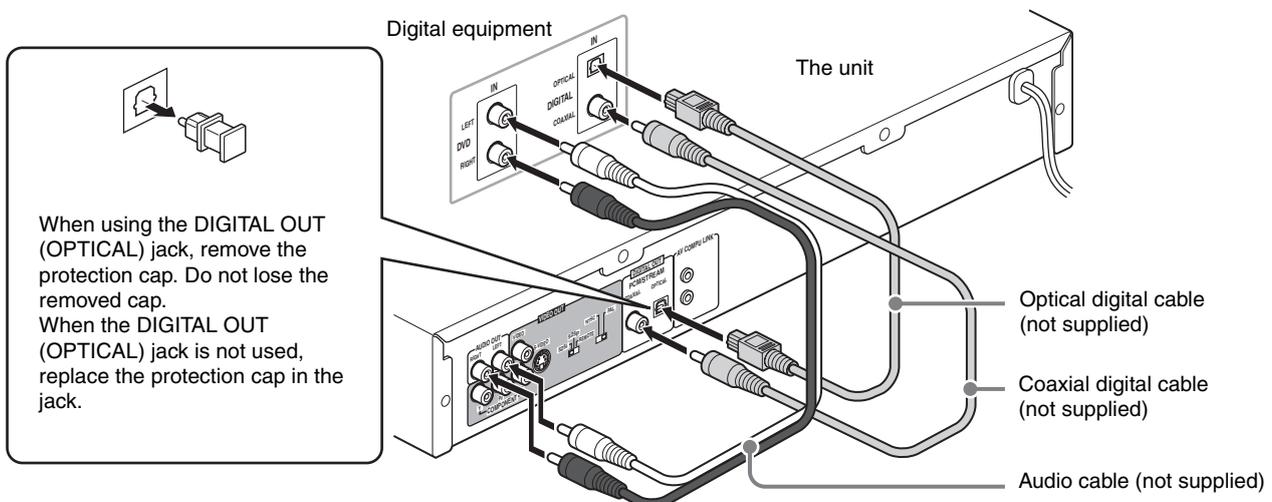

Selecting PAL or NTSC

Set the NTSC/PAL selector on the rear panel to "PAL" or "NTSC" to match the color system of your TV. Make sure that the color system of a DVD VIDEO/SVCD/Video CD disc labeled on the package matches your TV.
If you use a multi-color system TV, you can play discs recorded on both PAL and NTSC systems by setting the NTSC/PAL selector appropriately.
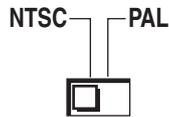

NTSC ── ── PAL

NOTE

Change the NTSC/PAL selector position in stop mode or with no disc inserted. The changed setting is not effective if you change the selector position in playback mode.

Connecting the power cord

When all the audio/video connections have been made, connect the AC power plug to the wall outlet. Make sure that the plugs are inserted firmly.
The STANDBY indicator lights in red.

⚠ **Warning**

• Disconnect the power cord:
  - if you are not going to use the unit for a long time.
  - before cleaning the unit.
  - before moving the unit.
• Do not:
  - connect or disconnect the power cord with wet hands.
  - pull the power cord when disconnecting it, as this may damage the cord and cause fire, electric shock, or other accidents.

⚠ **Caution**

• Do not alter, twist or pull the power cord, or put anything heavy on it, which may cause fire, electric shock, or other accidents.
• If the cord is damaged, consult a dealer and have the power cord replaced with a new one.

Using the remote control unit

To install batteries

Open the compartment cover, and place the two supplied R6P (SUM-3)/AA(15F) batteries in the remote control unit according to the polarity markings ("+" and "−") inside the compartment. Then replace the cover.
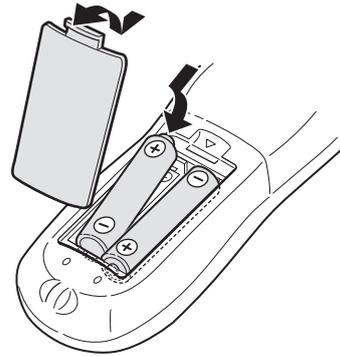

The batteries will last about six months with normal use.
If the functions of the remote control unit become erratic, replace the batteries.

Precautions of the safe use of batteries

Observe the following precautions for the safe use of batteries. If they are used improperly their lives will be shortened, they may burst or their contents may leak.
• Remove the batteries from the remote control unit if it is not going to be used for a long period of time.
• Remove dead batteries and dispose of them properly.
• Never leave dead batteries lying around, take them apart, mix them with other refuse, or throw them into an incinerator.
• Never touch liquid that has leaked out of a battery.
• Do not mix new and old batteries, or batteries of different types, when replacing them.

Remote sensor

Point the top of the remote control unit toward the remote sensor as directly as possible. If you operate it from a diagonal position, the operating range (approx. 5 m) may be shorter.

Resuming playback

| DVD VIDEO | Super VCD | Video CD |

The unit can memorize the position on a disc where you interrupt playback, and resume playback from that position later.
There are three resume modes; ON, OFF and DISC RESUME. The mode is initially set to ON when you purchased the unit.
• You can select the mode using the preference display (see page 33).

When the resume mode is "ON"

When you press ■, the unit stops playback and memorizes the interrupted position. The TV screen shows [RESUME STOP] and the [RESUME] indicator lights up in the display window.
The memory of the interrupted position is not cleared if you turn off the unit.
When you turn off the unit after setting the resume function, simply press ▶. The unit is turned on, and playback starts from the interrupted position. If you turn on the unit by pressing ⏻/|STANDBY/ON then press ▶, playback starts from the beginning of the disc.
Note that the memory is cleared if you open the disc tray.

When the resume mode is "DISC RESUME"

When you press ■, the unit stops playback and memorizes the interrupted position. The TV screen shows [RESUME STOP] and the [RESUME] indicator lights up in the display window.

The memory of the interrupted position is not cleared if you open the disc tray or turn off the unit.

Hint
The unit memorizes interrupted positions for the last 30 discs played. Storing a new interrupted position will erase the interrupted position stored for the first disc.

To clear the memory

Press ■ while the disc is stopped.

To resume playback

When the resume mode is "ON"

While the disc you interrupted playback is still on the disc tray, press ►.

The unit resumes playback from the position where playback was interrupted. The TV screen shows [RESUME PLAY].

To play back from the beginning
Press ■ before pressing ► to start playback.

When the resume mode is "DISC RESUME"

1 Press ⏏ to insert a disc for which the unit has stored an interrupted position.

The TV screen shows [RESUME STOP].

2 Press ►.

The TV screen shows [RESUME PLAY] and the unit resumes playback from the position where playback was interrupted.

To play back from the beginning
After inserting the disc, press ■ before pressing ► to start playback.

NOTES
• If you change the [RESUME] setting from [DISC RESUME] to [OFF] or [ON], you cannot resume playback of a disc whose "resuming" position is stored. However, when you again set [RESUME] to [DISC RESUME], you will then be able to resume playback of the disc.
• If you interrupt the playback of a disc for which an interrupted position has already been stored, the memory will be updated with the new interrupted position.
• For a double-sided DVD VIDEO disc, the unit regards each side as a different disc. Therefore, to resume playback of such a disc, the disc must be inserted with the same side down.
• When the unit memorizes an interrupted point for a disc, it also memorizes Audio, Subtitle and Angle settings.
• The unit may not resume playback exactly from the interrupted point. In the case of an SVCD/Video CD disc with PBC function, the unit may resume playback from a point slightly earlier or later than the point where playback was interrupted.

Various speed playback

To advance or reverse playback rapidly while monitoring

DVD VIDEO | Super VCD | Video CD | Audio CD

During playback, press ►► or ◄◄ on the remote control unit.

You can select from 1.5 times, 5 times, 20 times and 60 times normal speed. Pressing ► returns the unit to normal playback.

During playback, hold down ►►❘ or ❘◄◄.

Playback is advanced or reversed at 5 times normal speed.

NOTE
During rapid playback, the sound will be muted except when playing an Audio CD, and when playing a DVD VIDEO or Video CD at 1.5 times normal speed. For Audio CD discs, the sound will be heard intermittently.

x1.5 Quick Playback with sound

DVD VIDEO | Video CD

When you select 1.5 times normal speed playback, the disc is played back with sound.
• For DVD VIDEO discs, the subtitle does not go off.
• If the sound of a DVD VIDEO disc is recorded in Dolby Digital or DTS format, stereo linear PCM signals are output. With some DVD VIDEO discs, the sound quality and volume may alter, or the sound may be out of tune.
• To switch from rapid reverse playback to x1.5 Quick Playback, first press ►, then press ►► once.
• When the KARAOKE function is turned on, no sound will be heard during x 1.5 Quick Playback. Also, note that you cannot change the KARAOKE function settings during x 1.5 Quick Playback, though the input signal from the MIC jack(s) is output from the unit.

To advance a still picture frame by frame

NOTES
- Depending on the disc type and the unit status, what is specified differs:

unit status	Disc type	What is specified
While stopped	DVD VIDEO	title
	SVCD/Video CD/Audio CD	track
During playback	DVD VIDEO	chapter
	SVCD/Video CD/Audio CD	track

- During DVD VIDEO playback, if a menu is shown on the TV screen, the numeric buttons may be used for selecting an item in the menu.

About screen saver function
A television monitor may have an image burned into it if a static image is displayed for a long time. To prevent this, the unit automatically activates the screen saver function if a static picture, such as an on-screen display or menu, is displayed for over 5 minutes.
When the screen saver function is activated, the TV screen gets darker.
Pressing any buttons will release the screen saver function (see page 32).

TV ⎯○⎯ DVD
KARAOKE

Make sure that the TV - KARAOKE - DVD switch on the remote control unit is set to "DVD" when using the ▲/▼/◀/▶ and TV/VIDEO - CANCEL buttons for controlling the unit.

Operations

The unit can play back MP3 files and WMA files on a home recorded CD-R/RW disc or commercially available CD. We refer to a disc that contains MP3 and/or WMA files as an "MP3/WMA disc" in this manual.
Note that if a disc contains both of MP3/WMA files and JPEG files, you can only play back files of the type selected by the [MP3&WMA/JPEG] setting in the [PICTURE] preference display. (see page 33).

About MP3/WMA discs

On an MP3/WMA disc, each song is recorded as a file (track). Files are sometimes grouped into folders by artists, album, etc.
• Each file is regarded as a track.
• A folder which has one or more files is regarded as a group.
• A folder which does not directly contain any tracks is ignored.
• Files which do not belong to any folder are grouped into "group 1."
• The unit recognizes up to 150 tracks per group, and up to 99 groups per disc. If there are files other than MP3/WMA files, they also count in the 150-file total.

Max. 99 groups per disc

Notes for making your own MP3/WMA disc using a CD-R/CD-RW disc

• Select "ISO 9660" as the disc format.
• As for MP3 files, we recommend you to record your material at a 44.1 kHz sampling rate, using the 128 kbps data transfer rate.

• As for WMA files, make sure that the copyright feature is set to off.
• As for WMA files, we recommend you to record your material at a bit rate of 64 kbps or higher.

Basic operations

Use the following buttons to control MP3/WMA disc playback.

ENTER: Starts playback while stopped.
▶ (SELECT): Starts playback while stopped or paused.
■: Stops playback.
II: Pauses playback.
I◀◀/▶▶I: Skips back or forward a track during playback. Selects the previous or next track while stopped.

If you press ▶ (SELECT) during playback, or press ■ to stop playback followed by ▶ (SELECT), the unit starts playback from the beginning of the current track.

NOTES

• The unit does not support "packet writing (UDF format)" discs.
• The unit does not support the ID3 tag.
• The unit supports discs recorded with multiple sessions.
• Some discs may not play due to disc characteristics or recording conditions.
• When an MP3/WMA disc is played back, the KARAOKE function cannot be turned on.
• As for MP3, the unit only can play back tracks with the following file extensions; ".MP3," ".Mp3," ".mp3" and ".mP3."
• As for WMA, the unit only can play back tracks with the following file extensions; ".WMA," ".wma," and any other combination of upper case and lower case letters (such as ".Wma").
• Time required for reading the disc contents may vary for different discs, depending on the numbers of groups (folders) and tracks (files) recorded, etc.
• You cannot advance or reverse playback by pressing ▶▶ or ◀◀, or by holding down ▶▶I or I◀◀ during MP3/WMA disc playback.
• The unit supports WMA files recorded with a bit rate of 48 kbps or higher. The unit cannot play back WMA files recorded with a bit rate under 48 kbps.

Selecting the desired group and track

When inserting an MP3/WMA disc, after the disc contents are read, the MP3/WMA CONTROL display automatically appears on the TV screen.
You can specify the desired group/track from the display using the following procedure.

1 **Make sure that the black (cursor) bar is in the left (group) column.**

If it is in the right column, press ◀ to move it to the left column.

2 **Press ▲/▼ to move the bar to a desired group.**

On the right column, tracks in the selected group are shown.

**3** **Press I◀◀/▶▶I to select a desired track, then press ENTER or ▶ (SELECT).**

You can select the default menu language to be displayed if it is contained on a DVD VIDEO disc.

Setting options

ENGLISH, SPANISH, FRENCH, CHINESE, GERMAN, ITALIAN, JAPANESE, language code from AA to ZU
• If the disc does not have a menu in the selected language, the disc's default language will be used.
• For details about language codes, see "Appendix B: Table of languages and their abbreviations" on page 42.
• You cannot change the setting during playback.

AUDIO LANGUAGE

You can select the default audio language to be played if it is contained on a DVD VIDEO disc.

Setting options

ENGLISH, SPANISH, FRENCH, CHINESE, GERMAN, ITALIAN, JAPANESE, language code from AA to ZU
• If the disc does not have the selected language, the disc's default language will be used.
• For details about language codes, see "Appendix B: Table of languages and their abbreviations" on page 42.
• You cannot change the setting during playback.

PICTURE menu

MONITOR TYPE

You can select the monitor type to match your TV when you play back DVD VIDEO discs recorded for wide-screen televisions.

Setting options

16:9 NORMAL, 16:9 AUTO, 4:3 LB, 4:3 PS, 16:9 MULTI NORMAL, 16:9 MULTI AUTO, 4:3 MULTI LB, 4:3 MULTI PS
[16:9 NORMAL] (Wide television screen): select when you connect the unit to a wide-screen (16:9) TV whose aspect ratio is fixed to 16:9 (the unit automatically adjusts the screen width of the output signal correctly when playing back a 4:3 source). If you play a 4:3 DVD VIDEO source using the [16:9 NORMAL] mode, the picture character changes slightly due to the process for converting the picture width.
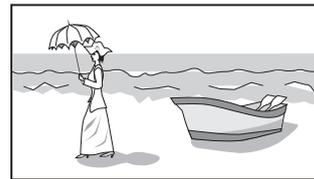

[16:9 AUTO] (Wide television screen): select when you connect the unit to a wide-screen (16:9) TV.
[4:3 LB] (Letter Box conversion): select when you connect the unit to a normal (4:3) TV.
When playing back a DVD VIDEO disc recorded in wide picture format, the picture is shown with black bars at the top and bottom.

[4:3 PS] (Pan Scan conversion): select when you connect the unit to a normal (4:3) TV.
When playing back a DVD VIDEO disc recorded in wide picture format, the picture is zoomed to fill the screen vertically, and the left and right sides of the image are chopped off.
Note, however, that the picture will be shown in the 4:3 LB mode even if you select the 4:3 PS mode depending on the disc.
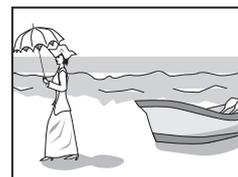

[16:9 MULTI NORMAL] [16:9 MULTI AUTO]
[4:3 MULTI LB] [4:3 MULTI PS]: These "MULTI" options should be selected when you connect the unit to a TV that supports both the PAL and NTSC systems. If you select one of these options, the unit outputs a PAL or NTSC video signal according to the disc, regardless of the NTSC/PAL selector setting.

PICTURE SOURCE

This mode selects whether the content on the disc is processed by field (video source) or by frame (film source). You can obtain optimal picture quality according to the source type to be played back by selecting an appropriate option. This setting is available for both the interlaced mode and progressive scanning mode.

Setting options

AUTO, FILM, VIDEO(NORMAL), VIDEO(ACTIVE)
[AUTO]: select when playing back a disc containing both video and film source materials.
The unit recognizes the picture type (film or video source) of the current disc according to the disc information. Normally, select this option.
[FILM]: select when playing back a film source disc.
[VIDEO(NORMAL)]: select when playing back a video source disc with relatively a few movements.
[VIDEO(ACTIVE)]: select when playing back a video source disc with relatively a lot of movements.

SCREEN SAVER

You can set the screen saver function to ON or OFF. (See page 13.)

Setting options

ON, OFF

MP3&WMA/JPEG

The unit can play MP3/WMA and JPEG files recorded on a CD-R/CD-RW disc. However, if a disc contains both MP3/WMA and JPEG files, you can only play files of the type selected in this menu item.

Setting options
MP3&WMA, JPEG
[MP3&WMA]: when selected, only MP3/WMA files can be played back.
[JPEG]: when selected, only JPEG files can be played back.

AUDIO menu

DIGITAL AUDIO OUTPUT

To connect the unit's digital output to an external device equipped with a digital input, this item must be set correctly.
See "Appendix C: Digital output signal chart" on page 42 for details about the relation between the setting and output signals.

Setting options
PCM ONLY, DOLBY DIGITAL/PCM, STREAM/PCM
[PCM ONLY]: select when you connect the DIGITAL OUT jack of the unit to the linear PCM digital input of other audio equipment.
[DOLBY DIGITAL/PCM]: select when you connect the digital input of a Dolby Digital decoder or an amplifier with a built-in Dolby Digital decoder.
When this option is selected, playing back a disc recorded by the MPEG Multichannel format outputs a linear PCM digital signal.
[STREAM/PCM]: select when you connect the digital input of an amplifier with a built-in DTS, MPEG Multichannel or Dolby Digital decoder, or the stand-alone unit of such a decoder.
• With some DVD VIDEO discs that are not fully copy-protected, a 20 or 24 bit digital signal may be output.
• A signal recorded with the 96 kHz or higher sampling frequency is output from the DIGITAL OUT jack with the 48 kHz sampling frequency.
• When playing a DVD VIDEO or Audio CD disc with DTS, use a DTS decoder to get correct signals from your speakers.

ANALOG DOWN MIX

To correctly play the audio on a DVD VIDEO disc recorded with surround multichannel audio, you must set this item properly according to your audio system configuration.
(This function does not work when the 3D PHONIC function is activated.)

Setting options
DOLBY SURROUND, STEREO
[DOLBY SURROUND]: select when listening to multichannel surround audio with the unit's analog AUDIO OUT terminals connected to a surround decoder.
[STEREO]: select when listening to conventional two-channel stereo audio with the unit's AUDIO OUT terminals connected to a stereo amplifier/receiver or television set, or in case you want to record the audio from a DVD VIDEO disc to MiniDisc, cassette, etc.

D. RANGE CONTROL

This setting provides optimal audio quality from the analog AUDIO OUT terminals for listening to DVD VIDEO discs recorded in Dolby Digital format, at low or middle volume.

Setting options
WIDE RANGE, NORMAL, TV MODE
[WIDE RANGE]: when selected, audio is played back with the widest dynamic range so that you can enjoy powerful playback sound.
[NORMAL]: normally, select this option.

[TV MODE]: select if DVD VIDEO disc sound level is lower than TV program sound level. Thus you can hear sound at a lower volume clearly.

OUTPUT LEVEL

This setting allows you to attenuate the level of the signal output from the unit's analog AUDIO OUT terminals.

Setting options
STANDARD, LOW
• If the sound output from the speaker is distorted, select [LOW].

OTHERS menu

RESUME

You can select the resume playback mode.
See pages 11 and 12 for details about the resume playback function.

Setting options
ON, OFF, DISC RESUME
[ON]: when selected, the unit can resume playback of the disc from the position where playback was last interrupted, if the disc is still in the disc tray.
[OFF]: when selected, the resume function is deactivated.
[DISC RESUME]: when selected, the unit can resume playback of the last 30 discs played. The unit retains a memory of the interrupted positions of the last 30 discs played, even though they have been removed from the disc tray.

ON SCREEN GUIDE

The unit can display "on-screen guide" icons or characters on the picture, which show what is happening to the disc or the unit.

Example of "on-screen guide" icons: 📹 , ◯⟩⟩ , 🗔

Setting options
ON, OFF
[ON]: when selected, the on-screen guide is activated.

AUTO STANDBY

When the unit is stopped for more than 30 minutes or 60 minutes, the unit enters standby mode automatically.

Setting options
60, 30, OFF

AV COMPULINK MODE

You must set this item correctly to use the AV COMPU LINK system.

Setting options
DVD1, DVD2, DVD3
• See page 38 for details about the AV COMPU LINK function.

PARENTAL LOCK

When this option is selected, pressing ENTER on the remote control unit brings up the PARENTAL LOCK display shown below. This allows you to restrict children from playing DVD VIDEO discs.

The parental lock feature is set.

⬡ moves to [EXIT]. Pressing ENTER again returns to the [OTHERS] menu of the preference display.

Hint

If you want to change the password at step 8, do it before pressing ENTER.

To change the settings

DVD VIDEO

You can change the parental lock settings later.

1 **Bring up the OTHERS menu.**

2 **Press ▲/▼ to move ⇗ to select [PARENTAL LOCK] and press ENTER.**

The parental lock on-screen display appears on the TV screen.

3 **While ⇗ is pointing to [PASSWORD], press the numeric buttons to enter your current 4-digit password then press ENTER.**

⇗ moves to [COUNTRY CODE] if you enter the correct password.
If you enter a wrong password, "WRONG! RETRY..." appears on the TV screen, and you cannot go to the next step.
If you forget your password, enter "8888." The current password is deleted and you can set a new password.

4 **To change the [COUNTRY CODE] or [SET LEVEL], press ENTER to bring up the associated pull-down menu when ⇗ is pointing to the desired item.**

5 **Press ▲/▼ to select the desired option then press ENTER.**

If you change the country code, you must reselect the parental lock level.

6 **While ⇗ is pointing to [PASSWORD], press the numeric buttons to enter a 4-digit password.**

The password entered in this step becomes the new password. If you want to keep the same password as before, enter the same password.

7 **Press ENTER.**

⇗ moves to [EXIT]. Pressing ENTER again returns to the [OTHERS] menu of the preference display.

NOTE

If you enter the wrong password more than 3 times in step 3 above, ⇗ moves to [EXIT] automatically and ▲/▼ do not work.

To temporarily release the Parental Lock

DVD VIDEO

If the parental level is set to a strict value, some discs may not play at all.
When you insert such a disc and try to play it, the following parental lock on-screen display appears on the TV screen, asking you whether you want the parental lock to be temporarily released or not.

1 **Press ▲/▼ to move ⇗ to [TEMPORARY RELEASE], then press ENTER.**

AV COMPU LINK remote control system

The JVC AV COMPU LINK system allows you to enjoy video or audio with the simplest operation. If your video/audio unit (such as a DVD unit, CD unit and VCR) and TV or/and amplifier/receiver support the JVC AV COMPU LINK system and are tied with the JVC AV COMPU LINK cable(s), simply starting the unit will automatically make all necessary settings on the TV and/or amplifier/receiver to allow you to enjoy the playback.

AV COMPU LINK

Connection and setup

Using an AV COMPU LINK cable, connect the AV COMPU LINK terminals of each component to one another.
• The unit's AV COMPU LINK setting is controlled using the OTHERS menu in the preference display. See page 33.
• For information on the connection between a TV and a receiver, refer to the receiver's instructions.

The unit
• If you connect the unit to a TV and receiver via AV COMPU LINK, set the unit's AV COMPU LINK setting to DVD1.

IMPORTANT!
When you make video connection between the unit and another device (such as a receiver and TV) via the composite, S-video or component jacks, as well as AV COMPU LINK connection, see also the instruction manual of the other device.

Notes for connection

• If you connect the unit to a receiver via AV COMPU LINK in a system including a Dolby Digital decoder, some functions may not be performed automatically.
• Connect the AUDIO OUT jacks of the unit to the audio input jacks of a receiver indicating "DVD." Otherwise, the system will not work correctly.
• There may be no description about connections to the unit in the instruction manual of a TV or VCR. However, a TV or VCR with AV COMPU LINK terminals indicating "II," "EX" or "III" can be connected to the unit.

Operation

The JVC AV COMPU LINK system allows you to enjoy video and/or audio by simply pressing Play on the source component (the component which plays back the video or audio, such as a DVD unit or VCR). You do not even have to switch on power on the TV or receiver.

1 Turn on the main power of the TV.

2 Insert a disc (or tape) into the source component.

3 Press ► of the source component.

The following actions are performed automatically:
• Turning on the TV power.
• Setting the source of the TV to the external input (VIDEO-1 or VIDEO-2).
• Turning on receiver power.
• Setting the source of the receiver to the component which has started playback.

Additional information

Troubleshooting

Power

Power does not come on.
➡ Power plug is not inserted securely. Plug in securely.

Operation

"REGION CODE ERROR!" is shown on the TV screen.
➡ Region code of the inserted disc does not match the unit. Check the region code of the disc printed on the disc jacket.

Operation is not possible.
➡ Microcomputer malfunction due to lightning or static electricity. Turn off the power and unplug the power cord, then connect the power cord again.
➡ Moisture condensation caused by a sudden change of temperature or humidity. Turn off the power, then turn it on a few hours later.
➡ The disc does not allow the operation, or an unplayable disc is inserted. Check and replace the disc (see page 2).

[LOCK] is displayed on the display window and the disc tray does not open.
➡ When you press ⏏ for the disc tray 1 while pressing down ∎ on the unit in standby mode, the tray lock function is activated. The disc trays cannot be opened or closed in this status. To release this status, press ⏏ for the disc tray 1 while pressing down ∎ on the unit in standby mode.

Picture

Picture is noisy.
➡ The unit is connected to a VCR directly and the copyguard function is activated. Connect the unit so that the picture signal flows directly to the TV.
➡ With some discs, the picture may be blurred when [PICTURE SOURCE] is set to [FILM] or [AUTO]. Set [PICTURE SOURCE] to [VIDEO (NORMAL)] or [VIDEO (ACTIVE)].

Picture is distorted when using COMPONENT VIDEO OUT or S-VIDEO output jack(s).
➡ Both the component connection and S-video connection are made. Disconnect the unused one.

No picture is displayed on the TV screen or the screen is blurred or divided into two parts.
➡ The unit is in the progressive scanning mode though it is connected to a TV via the VIDEO or S-VIDEO jack. Set the 525i/525p/REMOTE selector on the rear panel to "525i," or set it to "REMOTE" and make the Progressive scanning mode inactive by using the VFP - PROGRESSIVE SCAN button (see page 4).

Audio

DVD VIDEO disc playback sound level is lower than TV broadcast sound level.
➡ Set the [D.RANGE CONTROL] preference to [TV MODE] (see page 33).

Analog audio output is distorted.
➡ Set the [OUTPUT LEVEL] preference to [LOW] (see page 33).

MP3/WMA

No sound comes out.
➡ MP3/WMA disc is recorded with the "packet writing (UDF format)." It cannot be played.

Files (tracks) are not played in the recorded order.
➡ This unit plays the files in the alphabetic order. So, the playback order can vary.

WMA files cannot be played back.
➡ The file is copy protected.
➡ The file is recorded with a bit rate under 48 kbps. The unit does not support such WMA files.

JPEG

No picture is played back, or the screen turns black.
➡ Format of the files is not the baseline JPEG. The unit supports only the baseline JPEG format.

The preference display cannot be turned on.
➡ You cannot turn on the preference display when a JPEG disc is inserted.

KARAOKE

The KARAOKE function cannot be turned on.
➡ You cannot turn on the KARAOKE function while playing back an MP3/WMA disc.

The musical key cannot be shifted.
➡ You cannot shift the musical key when playing back an Audio CD with DTS, or a DVD with DTS, MPEG Multichannel or 96 kHz linear PCM.

The multichannel playback cannot be made.
➡ The KARAOKE function is turned on.

Specifications and appearance are subject to change without prior notice.

General

Readable discs	DVD VIDEO, DVD-R (Video format), DVD-RW (Video format), SVCD, Video CD, Audio CD (CD-DA), MP3/WMA format, JPEG, CD-R/RW (CD-DA, SVCD, Video CD, MP3/WMA format, JPEG)
Video format	NTSC 525i (Interlaced scan)/525p (Progressive scan) selectable
	PAL Interlaced scan

Other

Power requirements
  AC 110 V-240 V $\sim$, 50 Hz/60 Hz
  (Only for Australia model: AC 240 V $\sim$, 50 Hz)
Power consumption
  12 W (POWER ON), 1.0 W (STANDBY mode)
Mass 4.4 kg
Dimensions (W × H × D)
  435 mm × 83 mm × 322 mm

Video outputs

COMPONENT (pin jacks)
  Y Output: 1.0 Vp-p (75 Ω)
  P_B/P_R Output: 0.7 Vp-p (75 Ω)
VIDEO OUT (pin jack)
  1.0 Vp-p (75 Ω)
S-VIDEO OUT (S jack)
  Y Output: 1.0 Vp-p (75 Ω)
  C Output: 286 mVp-p (75 Ω)
Horizontal resolution
  500 lines or more

Audio input

MIC 1/2   4 mVrms (8.2 kΩ)

Audio outputs

ANALOG OUT (pin jack)
  2.0 Vrms (10 kΩ)
DIGITAL OUT (COAXIAL)
  0.5 Vp-p (75 Ω termination)
DIGITAL OUT (OPTICAL)
  −21 dBm to −15 dBm (peak)

Audio characteristics

Frequency response
  CD (sampling frequency 44.1 kHz):
    2 Hz to 20 kHz
  DVD (sampling frequency 48 kHz):
    2 Hz to 22 kHz
    (4 Hz to 20 kHz for DTS and Dolby Digital bitstream signals)
  DVD (sampling frequency 96 kHz)
    2 Hz to 44 kHz
Dynamic range   16 bit: More than 98 dB
    20/24 bit: More than 100 dB
Wow and flutter Unmeasurable (less than ± 0.002%)
Total harmonic distortion
    less than 0.006%

Appendix D: Glossary

525i/525p
Indicates the number of scanning lines and scanning format of an image signal. 525i indicates 525 scanning lines with interlace format, and 525p indicates 525 scanning lines with progressive format.

Aspect ratio
A ratio which defines the shape of the rectangular picture in a TV. It is the width of the picture relative to the height. A conventional TV picture is 4:3 in aspect ratio.

Bitstream
The digital form of multichannel audio data (e.g., 5.1-channel) before it is decoded into its various channels.

Chapter/title
Chapter is the smallest division and title is the largest division on DVD VIDEO. A chapter is a division of a title and similar to a track for Video CD or Audio CD.

Component video
Video signals with three channels of separate information that makes up the picture. There are some types of component video, such as R/G/B and Y/$C_B(P_B)$/$C_R(P_R)$.

Composite video
A single video signal commonly used in most consumer video products that contains all luminance, color, and synchronization information.

Dolby Digital (AC3)
A six-channel system consisting of left, center, right, left rear, right rear and LFE (Low-Frequency Effect channel, for use with a sub-woofer) channels. All processing is done in the digital domain. Not all Dolby Digital discs contain six (5.1) channels of information.

Dolby Surround/Dolby Pro Logic
Dolby Surround records four channels of front and rear audio in two channels in a way that allows a decoder to recover the original four channels for playback. Because the audio is recorded in two channels, it can be played back naturally by a two-channel stereo system.
Dolby Pro Logic introduces directional circuits in decoder-side processing (increasing the level of specific channels and lowering the level of silent channels) for greater spatial perspective, and adds a center speaker used primarily for dialog. The result is enhanced channel separation.

Down-mix
Internal stereo mix of multichannel surround audio by a DVD unit. The down-mix signals are output from stereo output connectors.

DTS
A Digital Surround audio encoding format configured with six (5.1) channels, similar to Dolby Digital. It requires a decoder, either in the unit or in an external receiver. DTS stands for Digital Theater Systems.
Not all DTS discs contain six (5.1) channels of information.

Dynamic range
The difference between the loudest and softest sounds.

Interlaced scanning
In a conventional video system, a picture is shown on the display monitor in between lines of two halves. The Interlaced scanning system places lines of the second half of the picture in-between lines of the first half of the picture.

JPEG
A popular file format for still image compression and storage. JPEG stands for Joint Photographic Experts Group. There are three sub-types of the JPEG format as follows.
• baseline JPEG: used for digital cameras, the web, etc.
• progressive JPEG: used for the web
• lossless JPEG: an old type, rarely used now

Linear PCM audio
PCM stands for "pulse code modulation." Linear PCM is the usual method for digitally encoding audio without compression, and is used for the audio tracks on DVD VIDEO discs, Audio CDs, etc.

MP3
MP3 is an audio data compression format, which stands for MPEG-1 Audio Layer 3. Using MP3, you can achieve a data reduction of about 1:10.

MPEG
A family of Standards for compressing audio-visual information. "MPEG" standards include MPEG-1, MPEG-2 and MPEG-4. Video CD and MP3 are based on MPEG-1, while DVD is based on MPEG-2. MPEG stands for Moving Picture coding Experts Group.

MPEG Multichannel
This feature expands the 5.1 channel audio format recorded on the disc to a 7.1 channel format. The further expansion of the 5.1 channel audio makes it easy for you to reproduce the movie theater experience in your own home.

NTSC (National television system committee)
A black and white and color TV system format used in the U.S.A., Canada, Mexico and Japan.

PAL (Phase Alternation by Line)
A color TV system format used extensively in Western Europe.

PBC
PBC stands for "Playback control" and is a method of controlling disc play for Video CDs (VCD). You are able to interact with the disc through menus.

Progressive scanning
Progressive scanning displays all the horizontal lines of a picture at one time, as a single frame. A progressive scanning DVD unit converts the interlaced (525i) video from DVD into progressive (525p) format for connection to a progressive display. It dramatically increases the vertical resolution.

S-video
A video signal which improves picture quality over standard composite connections. Used on Super VHS, DVD, high end TV monitors, etc.

Track
The smallest division on SVCD, Video CD and Audio CD discs.

WMA
WMA is an abbreviation of "Windows Media Audio," and is an audio data compression format developed by Microsoft Corporation. Sound quality of data compressed using WMA is the same as that of MP3, though the WMA file size is smaller than that of MP3.
