INSTRUCTIONS

Warnings, Cautions and Others

Caution— ⏻/I (standby/on) button!
Disconnect the mains plug to shut the power off completely (the STANDBY lamp goes off). When installing the apparatus, ensure that the plug is easily accessible. The ⏻/I (standby/on) button in any position does not disconnect the mains line.
• When the System is on standby, the STANDBY lamp lights red.
• When the System is turned on, the STANDBY lamp goes off.
The power can be remote controlled.

CAUTION
To reduce the risk of electrical shocks, fire, etc.:
1. Do not remove screws, covers or cabinet.
2. Do not expose this appliance to rain or moisture.

CAUTION
• Do not block the ventilation openings or holes.
  (If the ventilation openings or holes are blocked by a newspaper or cloth, etc., the heat may not be able to get out.)
• Do not place any naked flame sources, such as lighted candles, on the apparatus.
• When discarding batteries, environmental problems must be considered and local rules or laws governing the disposal of these batteries must be followed strictly.
• Do not expose this apparatus to rain, moisture, dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.

IMPORTANT FOR LASER PRODUCTS

1. CLASS 1 LASER PRODUCT
2. **CAUTION**: Do not open the top cover. There are no user serviceable parts inside the Unit; leave all servicing to qualified service personnel.
3. **CAUTION**: Visible and/or invisible class 1M laser radiation when open. Do not view directly with optical instruments.

Caution: Proper Ventilation

To avoid risk of electric shock and fire, and to prevent damage, locate the apparatus as follows
1. Front: No obstructions and open spacing.
2. Sides/ Top/ Back: No obstructions should be placed in the areas shown by the dimensions below.
3. Bottom: Place on the level surface. Maintain an adequate air path for ventilation by placing on a stand with a height of 10 cm or more.

The minimal clearance is shown as below:

Introduction

Precautions ● ● ● ● ● ● ● ● ● ●

Installation

• Install the System in a location with adequate ventilation to prevent internal heat buildup in the System.

 DO NOT install the System in a location near heat sources, or in a place subject to direct sunlight, excessive dust or vibration.

• Install in a place which is level, dry and neither too hot nor too cold—between 5°C and 35°C.
• Leave sufficient distance between the System and the TV.
• Keep the speakers away from the TV to avoid interference with the TV.

Power sources

• When unplugging the System from the wall outlet, always pull on the plug, not the AC power cord.

 DO NOT handle the AC power cord with wet hands.

Moisture condensation

Moisture may condense on the lenses inside the System in the following cases:
• After starting to heat the room
• In a damp room
• If the System is brought directly from a cold to a warm place.

Should this occur, the System may malfunction. In this case, leave the System turned on for a few hours until the moisture evaporates, unplug the AC power cord, then plug it in again.

Internal heat

• Make sure there is good ventilation around the unit. Poor ventilation could overheat and damage the unit.
• A cooling fan is inside the System (except for CA-MXDK1 and CA-MXDK15) to prevent heat buildup.

 DO NOT block the ventilation openings or holes. If they are blocked by a newspaper or cloth, etc., the heat may not be able to get out.

Others

• Should any metallic object or liquid fall into the System, unplug the AC power cord and consult your dealer before operating any further.

 DO NOT disassemble the System since there are no user serviceable parts inside.

• If you are not going to operate the System for an extended period of time, unplug the AC power cord from the wall outlet.

If anything goes wrong, unplug the AC power cord and consult your dealer.

Playable Disc Types ● ● ● ● ● ● INFO

DVD Logo is a trademark of DVD Format/Logo Licensing Corporation.

• CD-R/-RW/-ROM: Recorded in the Audio CD, Video CD and SVCD formats. MP3, WMA, JPEG, MPEG-1, MPEG-2, ASF* and DivX* files written in accordance with the "ISO 9660" format can also be played.

• DVD-R/-RW: Recorded in the DVD Video format or the DVD Video Recording (VR) format. MP3, WMA, JPEG, MPEG-1, MPEG-2, ASF* and DivX* files written in the UDF format can also be played.

* CA-MXDK5 only

In addition to the above discs, this System can play back audio data recorded on CD Text, and CD-Extra.

• It is possible to play back finalized +R/+RW (DVD Video Format only) discs. "DVD" lights on the front display panel when a +R/+RW disc is loaded.
• The following discs cannot be played back:
  DVD-ROM, DVD-RAM, CD-I (CD-I Ready), CD-G (CD Graphics), Photo CD, etc.
  Playing back these discs will generate noise and damage the speakers.
• For MX-DK3 and MX-DK1/MX-DK15:
  This unit cannot play back DVD-VR discs with CPRM (Content Protection for Recordable Media).
• In this manual, "file" and "track" are interchangeably used for MP3/WMA/MPEG-1/MPEG-2/ASF/DivX/JPEG operations.

About color system

This System accommodates both NTSC and PAL system and can play back discs recorded with either system.
To change the color system, see page 6.

Note on Region Code

DVD players and DVDs have their own Region Code numbers. This System can play back only DVDs with Region Code numbers including "4" for Australia and Central and South America, "3" for Southeast Asia, and "2" for the Middle East. For your available Region code, check the rear panel of your main unit.
EX.: For Southeast Asia

If a DVD with the improper Region Code numbers is loaded, "REGION ERR" appears on the display and playback will not start.

The System can play back the following digital audio formats.
- **LPCM** (Linear PCM), **◻◻ DIGITAL** (Dolby Digital), **DTS** (Digital Theater Systems), **MLP** (Meridian Lossless Packing)

Caution for DualDisc playback

The Non-DVD side of a "DualDisc" does not comply with the "Compact Disc Digital Audio" standard. Therefore, the use of Non-DVD side of a DualDisc on this product may not be recommended.

IMPORTANT: Before playing a disc, make sure of the following...
- Turn on the TV and select an appropriate input mode on the TV to view the pictures or on-screen displays on the TV screen.
- For disc playback, you can change the initial setting to your preference. See "Setup Menu Operations" on page 34.

If " ⊘ " appears on the TV screen when you press a button, the disc cannot perform the operation you have tried to do, or data required for that operation is not recorded on the disc.

How to Read This Manual ⬤ ⬤ ⬤ ⬤ ⬤

- Button and control operations are explained in the table below.
- **Some related tips and notes are explained later in the sections "Learning More about This System" and "Troubleshooting," but not in the same section explaining the operations (INFO indicates that the content has some information).**

|	
	Indicates that you press the button **briefly**.
	Indicates that you press the button **briefly and repeatedly** until an option you want is selected.
	Indicates that you press one of the buttons.
2 sec.	Indicates that you **press and hold** the button for a specified period. The number inside the arrow indicates the time to hold (in the example, 2 seconds).
	Indicates that you turn the control toward the specified direction(s).
Remote ONLY	Indicates that this operation is only possible using the remote control.
Main Unit ONLY	Indicates that this operation is only possible using the buttons and controls on the main unit.

Contents ⬤ ⬤ ⬤ ⬤ ⬤ ⬤ ⬤ ⬤ ⬤ ⬤

Connections

Do not connect the AC power cord until all other connections have been made.

• Connect VIDEO OUT directly to the video input of your TV. Connecting VIDEO OUT to a TV via a VCR may cause a monitor problem when playing back a copy-protected disc. You may also have a monitor problem when connecting the player to an integrated TV/Video system.
Supplied Accessories
• FM antenna (1)
• AM loop antenna (1)
• Composite video cord (1)
• Remote control (1)
• Batteries (2)
• AC plug adaptor (1) (not supplied for the Middle East and Australia)
If any item is missing, consult your dealer immediately.

❶ **From AM/FM antenna**
See page 4.

❷ **From the video input of TV/monitor (component terminal for CA-MXDK5 only)**
See page 4.

❸ **From the digital input of digital audio component such as CD recorder, etc.**
See page 4.

❹ **From auxiliary equipment**
See page 4.

❺ **From subwoofers (CA-MXDK5 and MX-DK3)**
See page 5.

❻ **From surround speakers (CA-MXDK5 and MX-DK3)**
See page 5.

❼ **From main speakers**
See page 5.

❽ **Voltage Selector**
Before plugging in, confirm the position the voltage selector points to. See page 6 and the back cover.

❾ **To a wall outlet**
Plug in the AC power cord only after all connections are complete.
• Before plugging in, confirm the position the voltage selector points to. See page 6 and the back cover.
• If the wall outlet does not match the AC plug, use the supplied AC plug adaptor (not supplied for the Middle East and Australia).

* The illustration above is for CA-MXDK5.

3

❶ AM/FM antenna

To assemble the AM loop antenna

To connect AM/FM antenna

FM antenna (supplied)

Extend it so that you can obtain the best reception.

AM loop antenna (supplied)

Turn it until the best reception is obtained.
For better AM/FM reception

FM outdoor antenna (not supplied)

AM loop antenna (supplied)
Keep it connected.

Vinyl-covered wire (not supplied)
Extend it horizontally.
- Disconnect the supplied FM antenna, and connect to an outdoor FM antenna using a 75 Ω wire with coaxial type connector (IEC or DIN45325).
- Make sure the antenna conductors do not touch any other terminals, connecting cords or the power cord. Also, keep the antennas away from metallic parts of the System, connecting cords, and the AC power cord. This could cause poor reception.

❷ TV/monitor

Green
Blue
Red

Component video cord (not supplied)

S-video cord (not supplied)

Composite video cord (supplied)

- **Connect the VIDEO jack, S-VIDEO jack, or COMPONENT jacks (CA-MXDK5 only) whichever you want to use.**
- To select progressive scanning mode (see page 6), use COMPONENT jacks (CA-MXDK5 only).
- To select the video output to match the color system of your TV (PAL or NTSC), see page 6.

❸ Digital audio component

Protective cap

OPTICAL DIGITAL OUTPUT
- Set "DIGITAL AUDIO OUTPUT" in the "AUDIO" preference display correctly according to the connected digital audio equipment (see page 35). If setting is incorrect, loud noise may be generated causing damage to the speakers.

Digital audio signals are output from this System only when "DVD/CD" is selected as the source.

❹ Auxiliary equipment

Red

Stereo audio cord (not supplied)

White
4
**For the Australian model**
Stereo mini plug
(not supplied)

⑤ Subwoofers (for CA-MXDK5 and MX-DK3)

• MX-DK3 has only one subwoofer.
• When connecting the speaker cords, match the polarity of
  the speaker terminals: (+) to (+) and (–) to (–).
CA-MXDK5

From right
subwoofer

From left
subwoofer

MX-DK3

From the subwoofer

• Use only speakers with the same speaker impedance as
  indicated by the speaker terminals on the rear of the unit.

⑥ Surround speakers (for CA-MXDK5 and MX-DK3)

From right surround
speaker (not supplied)

From left surround
speaker (not supplied)

• The surround speakers connected can reproduce the bass
  sounds recorded in front left and right channels, but cannot
  reproduce the surround signals recorded in DVD multi-
  channel discs.

⑦ Main speakers

• When connecting the speaker cords, match the polarity of
  the speaker terminals: (+) to (+) and (–) to (–).
From right
main speaker

From left
main speaker

• Use only speakers with the same speaker impedance as
  indicated by the speaker terminals on the rear of the unit.
• The speakers are magnetically shielded to avoid color
  distortions on TVs. However, if not installed properly, it
  may cause color distortions. So, pay attention to the
  following when installing the speakers.
  – When placing the speakers near a TV set, turn off the TV's
    main power switch or unplug it before installing the
    speakers.
    Then wait at least 30 minutes before turning on the TV's
    main power switch again.

Some TVs may still be affected even though you have
followed the above. If this happens, move the speakers away
from the TV.

• DO NOT connect more than one speaker to
  each terminal.
• DO NOT push or pull the speakers as this
  will damage the foot spacers at the bottom
  of the speakers.
5

⑧ Voltage Selector

Use a screwdriver to rotate the voltage selector so that the voltage mark is pointing to the same voltage as where you are plugging in the unit. (See also the back cover page.)

When your mains lead (AC) line voltage is 230-240V

When your mains lead (AC) line voltage is 220 V
Voltage mark

Voltage mark

When your mains lead (AC) line voltage is 110V

When your mains lead (AC) line voltage is 127 V

Voltage mark

Voltage mark

STOP! DO NOT plug in before setting the voltage selector on the rear of the unit and all connection procedures are complete.

Preparing the Remote Control ● ● ● ●

R6(SUM-3)/AA(15F)

STOP! DO NOT recharge, short, disassemble, heat the battery or dispose of it in a fire.

• Dispose of batteries in the proper manner, according to federal, state, and local regulations.

When using the remote control

Point the top of the remote control toward the remote sensor as directly as possible. If you operate it from a diagonal position, the operating range (approx. 5 m) may be shorter.

Changing the Color System and ● ● ● Scanning Mode *Remote ONLY* ⟫ ● ● ● INFO

You can select the video output to match the color system of your TV (PAL or NTSC).

Also, CA-MXDK5 supports progressive scanning. If you connect a progressive TV through the COMPONENT jacks, you can enjoy a high quality picture from the built-in DVD player by selecting "PAL/NTSC PRG."

1 Enter the color system setting mode.

SHIFT   SCAN MODE 9
(While holding...)

2 Select the color system and scanning mode.

→ PAL ⟷ PAL PRG*←
→ NTSC PRG* ⟷ NTSC ←
PAL/NTSC	Interlaced scanning. For a conventional TV.
PAL/NTSC PRG*	Progressive scanning. For a progressive TV.

* Only for CA-MXDK5. PROGRESSIVE indicator lights on when progressive mode is selected.

3 Store the setting.

ENTER/SET

Canceling the Demonstration *Main Unit ONLY* ● ●

When you plug in the AC power cord to a wall outlet, the System automatically starts the display demonstration.

2 sec.

→ DEMO OFF →
← DEMO START ←

To start the demonstration, select DEMO START.

Display Indication

The indications on the display tell you a lot of things while you are operating the System.
Before operating the System, be familiar with when and how the indicator illuminates on the display.

1 PROGRESSIVE indicator (CA-MXDK5 only)
   • Lights when the progressive scanning mode is selected (see page 6).

2 BONUS indicator (CA-MXDK5 only)
   • Lights when DVD Audio with bonus group is detected (see page 17).
3 DVD LEV. 1/2/3 indicators
   • Lights to indicate the DVD increase level (see page 12).

4 MIC indicator
   • Lights when the Karaoke mode is activated (see page 28).

5 3D PHONIC indicator
   • Lights when 3D Phonic is activated (see page 13).

6 V.MASK indicator
   • Lights when the Vocal Masking mode is activated (see page 29).

7 RESUME indicator
   • Lights when the Resume function is activated (see page 10).

8 SOUND TURBO indicator
   • Lights when SOUND TURBO is activated (see page 12).

9 SURROUND indicator
   • Lights when Surround mode is activated (see page 13).

10 Timer indicators (see pages 32 and 33)
   • SLEEP: flashes when the Sleep Timer is activated.
   • DAILY: lights when the Daily Timer is on standby; flashes while working or being set.
   • REC: lights when the Recording Timer is on standby; flashes while working or being set.
   • ⏱: lights when Sleep Timer is working or when Daily Timer or Recording Timer is on standby, working or being set.

11 Source signal indicators
   • □□ D: lights when a source signal is Dolby Digital.
   • DTS: lights when a source signal is DTS.

12 Tape operation indicators
   • REC: lights while recording (see pages 26 and 27).
   • TAPE: lights when TAPE-A or TAPE-B is selected.
   • A: lights when TAPE-A is selected.
   • B: lights when TAPE-B is selected.
   • ◀ ▶ (tape direction):
     – Lights to indicate the current tape running direction.
     – Flashes slowly during playback and recording.
     – Flashes quickly while rewinding a tape.

13 Main display

14 MP3 indicator
   • Lights while playing back an MP3 track.

15 WMA indicator
   • Lights while playing back a WMA track.

16 Disc operation indicators
   • REP: lights when Repeat Play mode is activated.
   • 1: lights when One Track/Chapter/Step Repeat is activated.

17 PRGM indicator
   • Lights when Program Play mode is activated.

18 RND indicator
   • Lights when Random Play is activated.

19 B.S.P. indicator (CA-MXDK5 only)
   • Lights when browsable still picture on DVD Audio is available (see page 16).

20 ST (stereo) indicator
   • Lights while an FM stereo station with sufficient signal strength is tuned in (see page 9).

21 MONO indicator
   • Lights while receiving an FM stereo station in monaural (see page 9).

7

Daily Operations—Playback

In this manual, the operations using the remote control are mainly explained; however, you can use the buttons and controls on the main unit if they have the same (or similar) name and marks.

VOLUME 15

❶ Turn on the power.

The STANDBY lamp on the main unit goes off.
- Without pressing ⏻/I AUDIO, the System also turns on by pressing one of the source select buttons in the next step.

❷ Select the source.

Playback automatically starts if the selected source is ready to start playback.
- If you press AUX, start playback on the external component.

❸ Adjust the volume.

❹ Operate the target source as explained later.

To turn off (standby) the System

⏻/I AUDIO

The STANDBY lamp on the main unit lights in red.
- A small amount of power is always consumed even while on standby.

For private listening

Connect a pair of headphones to the PHONES jack on the main unit. The sound will no longer come out of the speakers. **Be sure to turn down the volume before connecting or putting on the headphones.**
- Disconnecting the headphones will activate the speakers again.

⚠ STOP! DO NOT turn off (standby) the System with the volume set to an extremely high level; otherwise, the sudden blast of sound can damage your hearing, speakers and/or headphones when you turn on the System or start playback.

Adjusting the Volume ● ● ● ● ● ● ●

The volume level can be adjusted in 32 steps (VOLUME MIN, VOLUME 1 – VOLUME 30, and VOLUME MAX).

Remote control:	Main unit:

3D PHONIC → 3D ACTION → 3D DRAMA → 3D THEATER → 3D OFF → (back to 3D ACTION)
| 3D PHONIC | ACTION | On the TV screen |

3D ACTION	Suitable for action movies and sports programs.
3D DRAMA	Creates natural and warm sound. Enjoy movies in a relaxed mood.
3D THEATER	Enjoy sound effects like in a major movie theater.

Selecting the Sound Modes ● ● ● ● ●

You can select one of the preset Sound Modes.

SOUND MODE

Surround Modes
DANCE → HALL → STADIUM → ROCK → POP → CLASSIC → USER 1-3 → OFF → (back to DANCE)
SEA Modes
Surround Modes*	
DANCE	Increases resonance and bass.
HALL	Adds depth and brilliance to the sound.
STADIUM	Adds clarity and spreads the sound, as in an outdoor stadium.
SEA (Sound Effect Amplifier) Modes	
ROCK	Boosts low and high frequency. Good for acoustic music.
POP	Good for vocal music.
CLASSIC	Good for classical music.
User Modes	
USER 1/2/3	Your individual mode stored in memory. See the next column "Creating Your Own Sound Modes—User Mode."
OFF	No Sound Mode effect.

* Surround elements are added to the SEA elements to create being-there feeling in your room.

Creating Your Own Sound Modes
—User Mode *Remote ONLY* ● ● ● ● `INFO`

You can create your own Sound Modes to make sounds suit your taste. The changed settings can be stored as the USER 1, USER 2 and USER 3 Modes.

1 **Select one of the preset Sound Modes.**
   • **If you want to add surround elements to your Sound Mode,** select one of the Surround Modes.

2 **Enter the SEA Control Mode.**

   ENTER/SET

   `SEA CONT`
3 **Adjust the SEA pattern.**
   ① Select one of the tones—BASS or TRE (treble).

   `<`   `>`

   ② Adjust the level of the selected tone.
      • You can adjust the bass and treble level from –3 to +3.

   ③ Repeat steps ① and ② to adjust the level of the other tone.
   ④ Finish the SEA pattern setting.

   ENTER/SET

4 **Select one of the User Modes.**

   `<`   `>`

   `USER 1`

5 **Store the setting.**

4	25/06/06	001	0:07:19	children001-002

① ⑦ ⑧ ⑨ ⑤ ⑥

① List number
② Recording date
③ Recording source (TV station, the input terminal of the recording equipment, etc.)
④ Start time of recording
⑤ Title of the program/play list*
⑥ Highlight bar (current selection)
⑦ Creating date of play lists
⑧ Number of chapters
⑨ Playback time

* The title of the Program List or Play List may not be displayed depending on the recording equipment.

Control screen for MP3/WMA/MPEG-1/MPEG-2/ ASF/JPEG/DivX discs
The control screen automatically appears on the TV screen when you load an MP3, WMA, MPEG-1, MPEG-2, ASF*, DivX* or JPEG disc.

* Only for CA-MXDK5.

If files of different types are recorded on a disc, select the file type to play (see "FILE TYPE" on page 35).

Ex.: When an MP3 disc is loaded.
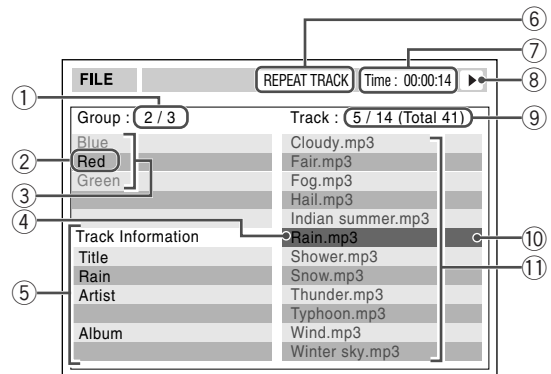

① Current group number/total group number
② Current group
③ Group list
④ Current track
⑤ Track information (ID3 Tag Version 1.0: only for MP3/WMA)
⑥ Repeat Play setting
⑦ Elapsed playing time of the current track (only for MP3/WMA/MPEG-1/MPEG-2/ASF)
⑧ Operation mode icon
⑨ Current track number/total number of tracks in the current group (total number of tracks on the loaded disc)
⑩ Highlight bar
⑪ Track list

To move the highlight bar between group list and track list (for MP3/WMA/MPEG-1/MPEG-2/ASF/DivX/ JPEG)

Moves the bar to the track list.

Moves the bar to the group list.
To select an item in the list

Move the highlight bar to a desired item.
• If you move the highlight bar while playing back a DVD-VR/ MP3/WMA/MPEG-1/MPEG-2/ ASF disc, the selected track starts playback automatically.

To start playback

For JPEG:	
ENTER/SET	The selected track (still picture) is displayed until you change it.
DVD/CD ▶	Slide-show playback starts. Each track (still picture) is shown on the screen for a few seconds, then changes one after another.

For the other discs:	
ENTER/SET	Playback starts with the selected track. • Pressing DVD/CD ▶ also starts playback.

• Once you start playing DVD-VR/MPEG-1/MPEG-2/ASF/ DivX/JPEG tracks, the control screen disappears.
• For JPEG discs, to cancel slide-show and display the current still picture, press ❙❙.

To stop playback

To repeat title/play list for DVD-VR

While playing a program in Program List

REPEAT A-B RPT → ↻CHAP → ↻PG → ↻ALL → ↻OFF ←
While playing an item in Play List

REPEAT A-B RPT → ↻CHAP → ↻PL → ↻OFF ←
CHAP	Repeats the current chapter.
PG/PL	Repeats the current title/play list.
ALL	Repeats all programs in the disc.

To repeat slide-show for JPEG

While playing or before playback...

REPEAT A-B RPT → ↻(REPEAT) GROUP → ↻(REPEAT) ALL → ↻OFF (Canceled) ←
GROUP	Repeats the current group.
ALL	Repeats all files in the disc.

• For Repeat Play of MP3/WMA/MPEG-1/MPEG-2/ASF/ DivX, see page 20.

To zoom in the still picture (for JPEG)
• You cannot zoom in the still picture during slide-show.

1   While playback is paused...
SHIFT ZOOM 4 → ZOOM 1 → ZOOM 2 → ZOOM OFF

(While holding...)

As the number increases, magnification also increases.

2   Move the zoomed-in position.
To cancel zoom, while holding SHIFT, press ZOOM repeatedly until "ZOOM OFF" appears on the TV.

Dubbing Tapes ● ● ● ● ● ● ●

1 **Change the source to TAPE.**
2 **Insert the source cassette in deck A, and a recordable cassette in deck B.**

3 **Start dubbing.**

DUBBING

• When either tape playback or recording ends, both cassette decks stop at the same time.

To stop dubbing

Synchronized Disc Recording INFO

You can start and stop both disc play and tape recording at the same time.

1 **Load a disc and insert a recordable cassette in deck B.**
   • If the current playing source is not the disc player, press DVD/CD ►, then ■.

   For recording desired tracks from discs:
   You can program tracks to record with your preferred order.
   • Select Program Play (and make a program: see page 18) without starting playback.

2 **Start recording.**

DISC REC

The System automatically creates a 4-second blank between the tunes recorded on the tape.

• When either disc play or recording ends, both disc player and the cassette deck stop at the same time.

To record without creating a 4-second blank

1 **Press DVD/CD ►, then press Ⅱ.**
2 **Press ◄◄ to go back to the beginning of the track.**
3 **Press DISC REC to start recording.**

To protect your recording
Cassettes have two small tabs on the back to protect from unexpected erasure or re-recording.
To protect your recording, remove these tabs.

To re-record on a protected tape, cover the holes with adhesive tape.

TIMER

■

JVC
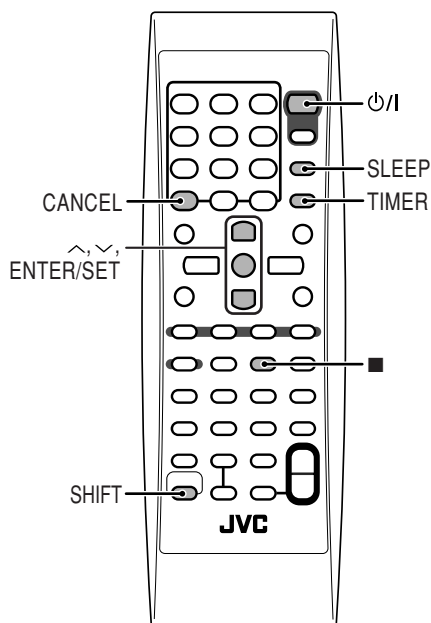

• You need to set the built-in clock before using timer functions (see page 14).

Setting the Timer `Remote ONLY` »⟩ ● ● ● ● `INFO`

Using Daily Timer, you can wake up with your favorite music. On the other hand, with Recording Timer, you can make a tape of a radio broadcast automatically.

• To go back to the previous step, while holding SHIFT, press CANCEL.

1 **Select one of the timer setting modes—ON for Daily Timer or Recording Timer.**

Daily Timer   Recording Timer

CLOCK/**TIMER**
DISPLAY

DAILYTIMER → ON (time) → REC TIMER ⌐

Canceled ← Clock setting ← ON (time) ↵
2 **Make the timer setting as you want.**

ENTER/SET
Repeat the procedure for the following settings until finished:

① **Set the hour then minute for on-time.**
② **Set the hour then minute for off-time.**
③ **Select the playback source.**
   • For Daily Timer, you can select from "TUNER FM," "TUNER AM," "DISC," "TAPE-A," "TAPE-B" and "AUX."
   • For Recording Timer, you can select from "TUNER FM" and "TUNER AM."

EX.: When "TUNER FM" is selected for Daily Timer.

④ **Select a preset station for "TUNER FM" and "TUNER AM," or select a group and track number for "DISC."**
⑤ **For Daily Timer: Select the volume level.**
   • You can select the volume level ("VOLUME 5," "VOLUME 10," "VOLUME 15" and "VOLUME --"). If you select "VOLUME --," the volume is set to the last level when the System has been turned off.

32

3 Turn off the System (on standby) if you have set the timer with the System turned on.

⏻/I AUDIO

How Daily Timer works

Once the Daily Timer has been set, the timer indicator (◔) and DAILY indicator are lit on the display. Daily Timer is activated at the same time everyday until the timer is turned off manually (see below).

When the on-time comes

The System turns on, starts playing the specified source (except "AUX"), and increases the volume level gradually to the preset level for about 30 seconds.

When the off-time comes

The System stops playback, and turns off (standby) automatically.
• The timer setting remains in memory until you change it.

How Recording Timer works

When Recording Timer has been set, the timer indicator (◔) and the REC indicator are lit on the display. Recording Timer works only once.

When the on-time comes

The System turns on, tunes in to the specified station, sets the volume level to "VOLUME MIN," and starts recording.

When the off-time comes

The System stops recording, and turns off (standby).
• The timer setting remains in memory until you change it.
Recording Timer will start working even if the System has been turned on.

To turn off the Timer after the setting is done

You can turn off the timer after it has been set.
• Since Daily Timer is activated at the same time everyday, you may need to cancel it on some particular days.

1 Select the timer you want to cancel (DAILYTIMER or REC TIMER).

CLOCK/ TIMER DISPLAY

Daily Timer | Recording Timer
→ DAILYTIMER → ON (time) → REC TIMER ⌐
⌐ Canceled ← Clock setting ← ON (time) ←
2 Turn off the selected timer.
SHIFT ⇒ CANCEL 10
(While holding...)

The timer indicator (◔) goes off.

To turn on the timer again, repeat step **1** and press ENTER/SET in step **2**.

ENTER/SET

SET OK
Turning Off the Power Automatically *Remote ONLY* ≫ —Sleep Timer

With Sleep Timer, you can fall asleep listening to music.

1 Specify the time (in minutes).

SLEEP DIMMER

→ SLEEP 10 → SLEEP 20 → SLEEP 30 → SLEEP 60 ⌐
⌐ Canceled ← SLEEP 150 ← SLEEP 120 ← SLEEP 90 ←

SLEEP

SLEEP 10
2 Wait until the set time goes off.

To check the time remaining until the shut-off time

SLEEP DIMMER

• If you press the button repeatedly, you can change the shut-off time.

Additional Information

Learning More about This System ● ● ●

Introduction (see pages 1 and 2)

Playable Disc Types:
- If you play back an NTSC disc with the scan mode set to "PAL (PRG)," you can watch the playback picture (the disc will be reproduced using "PAL 60" format), but the TV screen may not display properly.
- If you play back a PAL disc with the scan mode set to "NTSC (PRG)," you can watch the playback picture, but the following symptoms may occur:
  – The items on the disc menu will be blurred, and be shown slightly shifted when highlighted.
  – The aspect ratio of the picture may differ from the original aspect ratio.
  – The picture movement is not smooth.
- **About audio format**
  – **Linear PCM:** Uncompressed digital audio, the same format used for CDs and most studio masters.
  – **Dolby Digital:** Compressed digital audio, developed by Dolby Laboratories, which enables multi-channel encode to create the realistic surround sound.
  – **DTS (Digital Theater Systems):** Compressed digital audio, developed by Digital Theater Systems, Inc., which enables multi-channel like Dolby Digital. As the compression ratio is lower than for Dolby Digital, it provides wider dynamic range and better separation.
  – **MLP:** Compressed digital audio which enables lossless compression of DVD Audio.

Connections (see pages 3 to 6)

Changing the Color System and Scanning Mode:
- Do not change to progressive scanning mode in the following cases:
  – When your TV does not support the progressive video input.
  – When you have not connected your TV to the unit using a component video cord.
- When you play back an NTSC disc in progressive scanning mode, the System outputs the NTSC signal regardless of color system settings.

Daily Operations—Playback (see pages 8 to 11)

Listening to the Radio:
- If you store a new station into an occupied preset number, the previously stored station in that number will be erased.
- When you unplug the AC power cord or if a power failure occurs, the preset stations will be erased in a few days. If this happens, preset the stations again.

Playing Back a Disc:
- On some DVD, SVCD, or VCD discs, the actual operations may be different from what is explained in this manual, due to the programming and disc structure; such differences are not a malfunction of this System.

- This System can recognize up to 4 000 files in a disc. Also, the System can recognize up to 150 files per group and up to 99 groups in a disc.
  – If there are any unplayable files in a folder, those files are also counted in the total file number.
  – Playable files which do not belong to any groups are handled as Group 1.
- CA-MXDK5 only: Some DVD Audio discs prohibit downmix. When you play back such a disc, "LR ONLY" appears on the display and the System plays back the left front and right front signals.
- CA-MXDK5 only: When playing back a DVD Audio disc recorded in MLP (Meridian Lossless Packing; a lossless audio compression system that can completely recreate the PCM signals), the signals are recognized as the linear PCM signals, however, no indicator lights up in the display window.
- For DVD-VR playback...
  – When making a disc, use the UDF-Bridge format.
  – For details about DVD-VR format and playlist, refer to the manual of the recording equipment.
  – You cannot use reverse Slow-motion playback, Program Play or Random Play.
- For MP3/WMA playback...
  – This System can play back MP3/WMA files with the extension code <.mp3> or <.wma> (regardless of the letter case—upper/lower).
  – MP3 discs require a longer readout time than regular CDs depending on the complexity of the group/file configuration.
  – Some MP3/WMA files cannot be played back and will be skipped. This results from their recording processes and conditions.
  – When making MP3/WMA discs, use ISO 9660 Level 1 or Level 2 for the disc format.
  – It is recommended that you make each MP3/WMA file at a sampling rate of 44.1 kHz and at bit rate of 128 kbps. This System cannot play back files made at a bit rate of less than 64 kbps.
- For MPEG-1/MPEG-2 playback...
  – The stream format should conform to MPEG system/program stream.
  – 720 x 576 pixels (25 fps)/720 x 480 pixels (30 fps) is recommended for the highest resolution.
  – This System also supports the resolutions of 352 x 576/480 x 576/352 x 288 pixels (25 fps) and 352 x 480/480 x 480/352 x 240 pixels (30 fps).
  – The file format should be MP@ML (Main Profile at Main Level)/SP@ML (Simple profile at Main Level)/MP@LL (Main Profile at Low Level).
  – Audio streams should conform to MPEG1 Audio layer-2 or MPEG2 Audio Layer-2.

- For ASF playback... (CA-MXDK5 only)
  – This System can play back ASF files with the extension code <.asf> (regardless of the letter case–upper/lower).
  – This System supports ASF files whose resolution is 352 x 288 pixels or less.
  – Some recorded files may not be able to be played back depending on file characteristics, kind of digital still/ video cameras, or recording conditions.
  – You cannot use the following functions—Slow-motion playback, A-B Repeat, Program Play and Random Play.
- For DivX playback... (CA-MXDK5 only)
  – This System can play back DivX files with the extension code <.divx> <.div> <.avi> (regardless of the letter case–upper/lower).
  – When making a disc, use the UDF-Bridge format. "Multi-border" is not supported.
  – The System supports the DivX files whose resolution is 720 x 480 pixels or less (30 fps), and 720 x 576 pixels or less (25 fps).
  – Audio stream should conform to MPEG 1 Audio Layer-2 or MPEG Audio Layer-3 (MP3).
  – The System does not support GMC (Global Motion Compression).
  – The file encoded in the interlaced scanning mode may not be played back correctly.
  – You cannot use the following functions—Slow-motion playback, A-B Repeat, Program Play and Random Play.
- For JPEG files playback...
  – This System can play back JPEG files with the extension code <.jpg> or <.jpeg> (regardless of the letter case–upper/lower).
  – It is recommended that you record a file at 640 x 480 resolution. (If a file has been recorded at a resolution of more than 640 x 480, it will take a long time to be shown.)
  – This System can play only baseline JPEG files*. Progressive JPEG files* or lossless JPEG files* cannot be played.
    * Baseline JPEG format: Used for digital cameras, web, etc.
      Progressive JPEG format: Used for web.
      Lossless JPEG format: An old type and rarely used now.
  – This System may not play back JPEG files properly if they are recorded on devices other than digital still camera.

Daily Operations—Sound & Other Adjustments (see pages 12 to 14)

Creating 3-dimensional Sound Field—3D Phonic:
- While you use the headphones, 3D Phonic mode is canceled temporary.
- When you activate the mic mixing, 3D Phonic mode is canceled temporary.
- 3D Phonic setting is also applied to the optical digital output signals through the OPTICAL DIGITAL OUTPUT terminal.

Creating Your Own Sound Modes —User Mode:
- When you unplug the AC power cord or if a power failure occurs, the User Mode settings will be erased in a few days. If this happens, set the User Mode again.

Setting the Clock:
- "0:00" will flash on the display until you set the clock.
- The clock may gain or lose 1 to 2 minutes per month. If this happens, reset the clock.

Unique DVD/VCD Operations (see pages 15 to 17)

Selecting the Sound Track:
- On some DVD Video discs, you cannot change audio languages while playing back.

Playing Back a Bonus Group (CA-MXDK5 only):
- You cannot select a track in the bonus group for Program Play.

Special Picture Playback:
- During slow-motion playback, no sound will be reproduced.
- While zoomed in, the picture may look coarse.

Advanced Disc Operations (see pages 18 to 20)

Programming the Playing Order—Program Play:
- While programming steps...
  Your entry will be ignored if you have tried to program an item number that does not exist on the disc (for example, selecting track 14 on a disc that only has 12 tracks).

Playing Repeatedly:
- A-B Repeat cannot be used on some DVDs.
- A-B Repeat is possible only within the same title or within the same track.

On-Screen Disc Operations (see pages 21 to 25)

Operations Using the On-screen Bar:
- For DVD-R/-RW in the VR format, "PG" or "PL" appears instead of "TITLE" on the on-screen bar.

Recording Operations (see pages 26 and 27)

Recording on a Tape:
- The recording level is automatically set correctly. Thus, you can adjust the sound you are actually listening to without affecting the recording level.
- There is leader tape which cannot be recorded onto at the start and the end of cassette tapes. Thus, when recording discs or radio broadcasts, wind the leader tape first to ensure that the recording will be made without any music part lost.
- If no cassette or a protected tape is inserted, "NO REC" appears on the display.
- You cannot change the source during recording.

Synchronized Disc Recording:
- While recording, you cannot use ▶▶/◀◀, ▶▶/◀◀, DVD LEVEL, 3D PHONIC and source buttons.
- You can adjust volume control, sound setting (Active Bass Extension and Sound Turbo) and sound mode but the settings do not affect the recording sound.
- Everything on the disc goes onto the tape in the order on the disc, or according to the order you have made for Program Play.
- You cannot use Repeat Play during synchronized recording (Repeat Play will be canceled).

Enjoying Karaoke (see pages 28 to 31)

Singing Along (Karaoke)
- CA-MXDK5 only: Key control cannot be activated while DVD Audio is played.

Singing Along Using Stereo Discs—Vocal Masking:
- Vocal Masking Mode setting is also applied to the optical digital output signals through the OPTICAL DIGITAL OUTPUT terminal.
- On some music, Vocal Masking does not provide the correct effect.

Reserving Karaoke Songs—Karaoke Program Play
- If DVD Audio (CA-MXDK5 only) or DVD-VR is loaded, you cannot use Karaoke Program Play.

Timer Operations (see pages 32 and 33)

Setting the Timer:
- If you do not specify the preset station or track number correctly while setting a timer, the currently selected station or the first track will be played when the timer is activated.
- When you unplug the AC power cord or if a power failure occurs, the timer will be canceled. You need to set the clock first, then the timer again.
- Without stopping the recording, you cannot change the source after Recording Timer starts recording.
- If you set DVD Video/MPEG-1/MPEG-2/ASF/DivX as the source, Daily Timer will not work correctly.

Timer Priority:
- If you set the Sleep Timer after Daily Timer starts playing the selected source, Daily Timer is canceled.
- If you set the Sleep Timer after Recording Timer starts recording, Recording Timer is canceled, but recording continues until Sleep Timer shuts off the power.

Setup Menu Operations (see pages 34 and 35)

How to set the Initial Settings:
- If the upper and lower parts of the menu are cut off, adjust the picture size control of the TV.

LANGUAGE menu:
- When the language you have selected for MENU LANGUAGE, AUDIO LANGUAGE, or SUBTITLE is not recorded on a disc, the original language is used as the initial language.

PICTURE menu—MONITOR TYPE:
- Even if "4:3 PS/4:3 MULTI PS" is selected, the screen size may become 4:3 letter box with some DVD Video discs. This depends on how the discs are recorded.
- When you select "16:9/16:9 MULTI" for a picture whose aspect ratio is 4:3, the picture slightly changes due to the process for converting the picture width.

AUDIO menu—DOWN MIX:
- This setting is not effective when DTS multi-channel software is played back.

OTHERS menu—ON SCREEN GUIDE:
- The setup menu and on-screen bar will be displayed (and recorded) even though this function is set to "OFF." Subtitles and the information for zoom-in always appear on the display regardless of this setting.

Troubleshooting ● ● ● ● ● ● ● ● ●

If you are having a problem with your System, check this list for a possible solution before calling for service.

General:

Adjustments or settings are suddenly canceled before you finish.
⇨ There is a time limit. Repeat procedure again.

Operations are disabled.
⇨ The built-in microprocessor may malfunction due to external electrical interference. Unplug the AC power cord and then plug it back in.

Unable to operate the System from the remote control.
⇨ The path between the remote control and the remote sensor on the System is blocked.
⇨ The batteries are exhausted.

No sound is heard.
⇨ Speaker connections are incorrect or loose.
⇨ Headphones are connected.

No picture appears on the screen.
⇨ The video cord connections are incorrect or loose.

No picture is displayed on the TV screen, the picture is blurred, or the picture is divided into two parts.
⇨ CA-MXDK5 only: The System is connected to a TV which does not support progressive video input.
⇨ Incorrect color system is selected (see "Changing the Color System and Scanning Mode" on page 6).

The left and right edges of the picture are missing on the screen.
⇨ Select "4:3 LB/4:3 MULTI LB" for "MONITOR TYPE" (see page 34).

Radio Operations:

Hard to hear broadcasts because of noise.
⇨ Antennas connections are incorrect or loose.
⇨ The AM loop antenna is too close to the System.
⇨ The FM antenna is not properly extended and positioned.

Disc Operations:

The disc does not play.
⇨ You have inserted a disc whose Region Code is not correct. ("REGION ERR" appears on the display.)
⇨ The disc is placed upside down. Place the disc with the label side up.

ID3 Tag on an MP3 disc cannot be shown.
⇨ There are two types of ID3 Tag—Version 1 and Version 2. This System can only show ID3 Tag Version 1.

Groups and tracks are not played back as you expect.
⇨ The playing order is determined when the disc was recorded. It depends on the writing application.

MP3, WMA, MPEG-1, MPEG-2, ASF*, DivX* or JPEG files are not played back (*only for CA-MXDK5).
⇨ The inserted disc may include multiple types of tracks (ex. MP3/WMA files and JPEG files). In this case, you can only play back the files selected by the "FILE TYPE" setting (see page 35).
⇨ You have changed the "FILE TYPE" (see page 35) setting after you inserted a disc. In this case, reload the disc.

"NO AUDIO" appears.
⇨ This System cannot play back illegally produced DVD Audio discs.

"LR ONLY" appears.
⇨ Some DVD Audio discs prohibit downmixed output. When you play back such a disc, this System plays back the left front and right front signals only.

The disc sound is discontinuous.
⇨ The disc is scratched or dirty.

The disc playback sounds strange.
⇨ Cancel Key Control (see page 29).

No subtitle appears on the display though you have selected the initial subtitle language.
⇨ Some DVDs are programmed to always display no subtitle initially. If this happens, press SUB TITLE after starting play (see page 16).

Audio language is different from the one you have selected as the initial audio language.
⇨ Some DVDs are programmed to always use the original language initially. If this happens, press AUDIO/MPX after starting play (see page 15).

The disc tray does not open or close.
⇨ The AC power cord is not plugged in.
⇨ Child Lock is in use. "LOCKED" appears in the display window (see page 20).

Tape Operations:

The cassette holder cannot be opened.
⇨ Power supply from the AC power cord has been cut off while the tape was running. Turn on the System.

Recording Operations:

Impossible to record.
⇨ Small tabs on the back of the cassette are removed. Cover the holes with adhesive tape.

Timer Operations:

Daily Timer does not work.
⇨ The System has been turned on when the on-time comes. Timer starts working only when the System is turned off.

Maintenance ●●●●●●●●●●

To get the best performance of the System, keep your discs, tapes, and mechanism clean.

Handling discs
• Remove the disc from its case by holding it at the edge while pressing the center hole lightly.
• Do not touch the shiny surface of the disc, or bend the disc.
• Put the disc back in its case after use to prevent warping.
• Be careful not to scratch the surface of the disc when placing it back in its case.
• Avoid exposure to direct sunlight, extreme temperatures, and moisture.

To clean the disc:
Wipe the disc with a soft cloth in a straight line from center to edge.

Handling cassette tapes
• If the tape is loose in its cassette, take up the slack by inserting a pencil in one of the reels and rotate it.
  – If the tape is loose, it may get stretched, cut, or caught in the cassette.
• Be careful not to touch the tape surface.

• Avoid the following places to store the tape—in dusty places, in direct sunlight or heat, in moist areas, on a TV or speaker, or near a magnet.

To keep the best recording and playback sound quality:
• Use a cotton swab moistened with alcohol to clean the heads, capstans, and pinch rollers.
• Use a head demagnetizer (available at electronics and audio shops) to demagnetize the heads (when the System is turned off).

Cleaning the System
• Stains should be wiped off with a soft cloth. If the System is heavily stained, wipe it with a cloth soaked in water-diluted neutral detergent and wrung well, then wipe clean with a dry cloth.
• Since the System may deteriorate in quality, become damaged or get its paint peeled off, be careful about the following:
  – DO NOT wipe it with a hard cloth.
  – DO NOT wipe it forcefully.
  – DO NOT wipe it with thinner or benzine.
  – DO NOT apply any volatile substance such as insecticides to it.
  – DO NOT allow any rubber or plastic to remain in contact for a long time.

Specifications ●●●●●●●●●●●●●●●●●●●●●●●●●●●●●●●●●●

Amplifier section

Output Power:
CA-MXDK1/CA-MXDK15:
    90 W per channel, min. RMS, driven into 6 Ω at 1 kHz with no
    more than 10% total harmonic distortion.
CA-MXDK5/CA-MXDK3:
    MAIN SPEAKERS: 100 W per channel, min. RMS, driven into
    6 Ω at 1 kHz with no more than 10% total harmonic distortion.
    SUBWOOFERS: 100 W per channel, min. RMS, driven into
    6 Ω at 63 Hz with no more than 10% total harmonic distortion.

Digital output:
OPTICAL DIGITAL OUTPUT:
                    –21 dBm to –15 dBm (660 nm ±30 nm)

Audio input sensitivity/Impedance
(Measured at 1 kHz, with tape recording signal 400 mV)
AUX: 400 mV/47 kΩ
MIC 1/2:   3.0 mV/50 kΩ

VIDEO OUT:
Color system: NTSC/PAL selectable
VIDEO (composite):   1 V(p-p)/75 Ω
S-VIDEO: Y (luminance)   1 V(p-p)/75 Ω
              C (chrominance, burst) 0.286 V(p-p)/75 Ω
COMPONENT (Interlace/Progressive: CA-MXDK5 only):
              (Y)   1 V(p-p)/75 Ω
              (PB/PR)   0.7 V(p-p)/75 Ω

Speaker Terminals: 6 Ω – 16 Ω (Main speakers)
                         6 Ω – 16 Ω (Subwoofers)

Tuner section
FM tuning range: 87.50 MHz – 108.00 MHz
AM (MW) tuning range: 531 kHz – 1 710 kHz (at 9 kHz)
                       530 kHz – 1 710 kHz (at 10 kHz)
    For Saudi Arabia only: 531 kHz – 1 602 kHz (at 9 kHz)
                       530 kHz – 1 600 kHz (at 10 kHz)

Disc player section
Playable disc: DVD Video/DVD Audio*/CD/VCD/SVCD
               CD-R/-RW/-ROM (CD/VCD/SVCD/MP3/WMA/
               MPEG-1/MPEG-2/ASF*/JPEG/DivX* format)
               DVD-R/-RW (DVD Video/DVD Video Recording
               (VR)/MP3/WMA/MPEG-1/MPEG-2/ASF*/JPEG/
               DivX* format)
               +R/+RW (DVD Video format)
                                        *CA-MXDK5 only

Dynamic range: 90 dB
Horizontal resolution: 500 lines
Wow and flutter: Immeasurable

Cassette deck section
Frequency response
    Normal (type I):   50 Hz – 14 000 Hz
Wow and flutter: 0.15% (WRMS)

General
Power requirement: AC 110 V / AC 127 V / AC 220 V /
                     AC 230 V – AC 240 V ⁓ , (adjustable
                     with the voltage selector), 50 Hz / 60 Hz
Power consumption: at operation: 165 W (CA-MXDK5)
                                   160 W (CA-MXDK3)
                                    95 W (CA-MXDK1/
                                           CA-MXDK15)
                     on standby: 20 W (CA-MXDK5/
                                           CA-MXDK3)
                                    17 W (CA-MXDK1/
                                           CA-MXDK15)

Dimensions (approx.): 265 mm x 337 mm x 370 mm (W/H/D)
Mass (approx.):   CA-MXDK5/CA-MXDK3: 8.4 kg
                      CA-MXDK1/CA-MXDK15: 7.9 kg

Speaker section (except for MX-DK5)

Main speakers (SP-MXDK3F/SP-MXDK1F/SP-MXDK15F)
Type: 3-Way 3-Speaker Bass Reflex Type
                      (Magnetically-Shielded Type)
Speakers: Woofer: 16 cm cone x 1
                      Midrange: 5 cm cone x 1
                      Tweeter: 2 cm dome x 1
Power handling capacity: 100 W (SP-MXDK3F)
                         80 W   (SP-MXDK1F/SP-MXDK15F)
Impedance: 6 Ω
Frequency range: 45 Hz – 20 000 Hz
Sound pressure level: 85 dB/W•m
Dimensions (approx.): 215 mm x 337 mm x 259 mm (W/H/D)
Mass (approx.):   3.7 kg each

Subwoofer (SP-MXDK3W) (only for MX-DK3)
Type: 1-Way Bass Reflex Type
                      (Magnetically-Shielded Type)
Speaker: 16 cm cone x 1
Power handling capacity: 100 W
Impedance: 6 Ω
Dimensions (approx.): 215 mm x 337 mm x 259 mm (W/H/D)
Mass (approx.):   3.5 kg

Mains (AC) Line Instruction (not applicable for Europe, U.S.A., Canada and U.K.)

CAUTION for mains (AC) line

BEFORE PLUGGING IN, do check that your mains (AC) line voltage corresponds with the position of the voltage selector switch provided on the outside of this equipment and, if different, reset the voltage selector switch, to prevent from a damage or risk of fire/electric shock.

When your mains (AC) line voltage is 230-240 V

When your mains (AC) line voltage is 220 V
When your mains (AC) line voltage is 110 V

When your mains (AC) line voltage is 127 V

The illustration above is for CA-MXDK5.
