# Warning

Please follow all the guidelines below

## Never insert objects into the cabinet openings!

- It may cause a fatal electric shock. Take care when children are near.

## Never place anything on the TV!

- Placing liquids, open flames, cloths, paper, etc. on the TV may cause a fire.

## Never expose to rain or moisture!

- To prevent fire or electric shock, never allow liquids to enter the unit.

## Do not allow the TV to fall!

- Do not rest your elbows on, or allow children to hang from the TV. There is a risk that the TV will fall and cause injuries.

## Never cut or damage the power cord!

- If the AC plug is not the right shape, or the power cord is not long enough, use an appropriate plug adapter or extension cable. (Consult your retailer.)

## Follow this manual regarding setup!

- Connect only to a 110-240V, 50/60Hz AC outlet.

## Never try to repair the TV yourself!

- ➔ If the problem cannot be solved in "Troubleshooting" (P. 20), unplug the power cord and contact your retailer.

## If the TV is damaged or behaving strangely, stop using it at once!

- ➔ Unplug the power cord and contact your retailer.

## Hold the TV so as not to scratch the screen!

- Do not touch the screen when carrying the TV.

## Do not hold by the screen frame when moving the TV!

- This could cause the screen frame to detach, causing the TV to fall. Hold the TV as illustrated on the right.

## Unplug the power cord when going out!

- The power buttons on the remote control and the TV unit cannot completely turn off the TV. (Make appropriate arrangements for bedridden people.)
- Make sure that the cooling process (P. 3) has completed before unplugging the power cord.

## Make enough room for inserting and removing the power plug!

## Place the TV as near as possible to the AC outlet

- The main power supply for this TV is controlled by inserting or removing the power plug.

## Ensure ample room to avoid overheating

- ➔ "Installation requirements" (P. 7)

## Never dismantle the rear panel!

- It may cause an electric shock.

## Never block the ventilation holes!

- It may cause overheating or a fire.

## Handle screen with care!

- Use a soft, dry cloth when cleaning.

## Never listen with headphones at high volume!

- It may damage your hearing.

- For more details on installation, usage and safety ➔ Consult your retailer

# Precautions

Please follow all the guidelines below

This TV uses a lamp to project the picture on the screen. Misoperations may shorten the lamp life or cause malfunction of the lamp. Before operating the TV, read all the instructions below.

## This TV has a fan to cool the lamp

- When the lamp is hotter, the fan works harder to cool the lamp. In such a case, the noise of the fan becomes louder but it is not malfunction.

## Do not place the TV too closely to wallpaper

- The warm air from the air ducts may change the colour of the wallpaper.

## Keep children or pets away from the air ducts

- Long exposure to the warm air from the ducts may cause a minor burn.

## The lamp is a consumable item

- When the lamp has blown, replace the lamp; otherwise, the picture cannot be displayed. For details ► "Replacing the lamp" (P. 4, 5)

## Follow the instructions on "Replacing the lamp" when replacing the lamp (P. 4)

- Handle the lamp carefully and correctly; otherwise, it may cause a burn or an electric shock. In addition, it may shorten lamp life or cause malfunction of the TV.

## Never open the lamp cover except when replacing the lamp

### ■ Exposing the lamp is dangerous because...

- The lamp becomes extremely hot while in use, it may cause a burn.
- Touching metallic portion of the lamp may cause electric shock.
- Ultraviolet rays are emitted from the lamp.

## Never replace the lamp immediately after use

- Since the lamp becomes extremely hot while in use, it may cause a burn.

## Never touch the lamp glass

- Dirt or oil from the finger may cause the lamp to break.

## When the power is turned on, the warming up commences

- Immediately after the TV is turned on, the picture is displayed only dimly. It takes about one minute for the lamp to warm up. Once the lamp has warmed up, you can enjoy the pictures at their normal brightness.
- During this warming-up period, the LAMP indicator blinks every 2 seconds.

## While the LAMP indicator is blinking, the TV cannot be turned off

## When the power is turned off, the cooling down is performed

- When the TV is turned off, the picture on the screen disappears gradually. Once the screen is dark, cooling down is performed for about 1 minute.
- During this cooling-down period, the LAMP indicator blinks every 2 seconds.
- Do not unplug the TV while the lamp is cooling down. This may cause the internal circuits and the lamp to overheat and shorten the lamp life.

## While the LAMP indicator is blinking, the TV cannot be turned on

- You can turn on the TV within 15 seconds after turning off.

## Condensation on the lamp and screen

- When the heater is turned on or the TV is moved from a cold place to a warm place, droplets of water may form on the lamp and screen. This is called condensation. If the TV is used while this condensation is still present, the picture may seem distorted, and the inside of the screen may become dirty. In this case, wait until the condensation has gone before using the TV.

## Do not turn the power on and off repeatedly in a short period

- It subjects the TV and the lamp to stress and may lead to malfunctions and shorten the lamp life.

## Do not keep the TV on for more than 24 hours consecutively

- The lamp life may be shortened.

## Do not project a still picture for a long time

- Because of the ILA characteristics, still picture may stick on the screen. (The picture will disappear over time.)

■ For more details on installation, usage and safety ► Consult your retailer

# Replacing the lamp

Before replacing the lamp, read all the instructions.

The TV uses a lamp to project the picture onto the screen. When the lamp has blown or when the picture becomes dark, replace the lamp. Before replacing the lamp, read all the instructions carefully.

■ If you feel unsure about replacing the lamp yourself → Consult your retailer

## Preparation

### Prepare the Replacement Lamp Kit

- For purchasing the Replacement Lamp Kit, consult your retailer.

#### ⚠ Use only the specified Replacement Lamp Kit!

This lamp is for use with JVC model televisions. Using the lamp with a different television or other product could cause a malfunction and/or damage to the television or lamp.

Replacement Lamp Kit:  
TS-CL110C  
• High-pressure mercury lamp

### When the lamp is near to its end...

- The following message appears on the screen.

Lamp needs to be replaced.  
Refer to instructions book for replacement instructions.

After replacing the Lamp, please reset timer in the TV menu.

Press OK, if you do not want to see this message again.

■ To make the message disappear

After the usage time of the lamp has reached to 6500 hours, this message appears every time you turn on the TV.

#### ■ Possible causes of shortened lamp life

- Turning on/off the TV repeatedly in a short amount of time
- Keeping the TV turned on for more than 24 hours consecutively

1

Turn the TV off

Wait until the LAMP indicator stops blinking

- LAMP indicator and Power lamp are referred as "LAMP LED" and "POWER LED" on the Instructions of Replacement Lamp Kit TS-CL110C.

Unplug the TV

2

Wait for at least 1 hour until the lamp has fully cooled

3

Remove the lamp unit

#### ⚠ Never replace the lamp before it has fully cooled!

The lamp becomes extremely hot while in use, which may cause a burn. After turning off the TV, wait for at least 1 hour.

#### ⚠ Never attempt to replace the lamp with the TV plugged in!

Attempting to replace the lamp with the TV plugged in could lead to a severe electrical shock.

1 Remove the lamp cover

2 Remove the lamp unit  
Loosen

Remove

Do not drop the lamp!

● HD-Z70RF7 is used for explanation on the illustrations on this Instructions.

## 4 Install the NEW lamp unit

1 Unpack

**Do not drop the lamp!**  
**Do not shock the glass surface of the lamp!**

It may shatter the lamp causing injuries.

Re-tighten

2 Insert

- Make sure the lamp sits securely and flat in the housing area.

3 Reinstall the lamp cover

- Tighten the screw.

## 5 Plug in the TV

Turn the TV on

- If the lamp unit is not installed securely (e.g. flat in the lamp housing area), the TV won't turn on. In this case, reinstall the lamp unit.

## 6 Reset the lamp timer

1 Display the menu bar

2 Select "Set Up"

3

Select "Lamp Timer Reset"

4

Finish

## 7 Finally, the lamp has been replaced!

**! Never dispose of the lamp with normal trash!**

The lamp contains a small amount of mercury. For disposal or recycling information, please contact your local authorities or consult your retailer.

Dispose of it in the same way as disposing of fluorescent lamps.

# Connecting external devices

VCR / DVD / other devices

You can connect many devices to the rear panel of the TV.  
Please read the user manuals of each device before setup. (Connecting cables are not supplied with this TV.)

## AV COMPULINK

This feature makes playing video tapes or DVDs totally automatic. Simply insert a pre-recorded media into your JVC brand VCR or DVD player and the device will automatically turn on and begin playback. At the same time, using the AV Compulink, the VCR or DVD player sends a signal to the television telling it to turn on and switch to the proper video input.

- Refer to your DVD or VCR's instruction book for detailed connection information.

# Troubleshooting

## Severe noise or snow

- Is the TV connected correctly to the aerial?
- Change the direction of the aerial.
- Is the aerial or its cable damaged?  
➔ Consult your retailer

## Patterns, stripes or noise

- Is the aerial receiving interference from high-voltage power lines or wireless transmitters?  
➔ Consult your retailer
- Are connected devices too close to the TV?  
➔ Insert the minimum distance between the aerial and the cause of interference until no interference

## Ghosting

(Doubling of images)

- Are you receiving interference from signals reflected off mountains or buildings?  
➔ Adjust the direction of your aerial, or change to a good-quality directional aerial

## I can't turn it on!

- Is the power cord connected to the AC outlet correctly?

## The remote control doesn't work!

- Are the batteries flat?
- Are you more than 7 metres away from the TV?
- Is the "MODE (TV, VCR/DVR, DVD, AUDIO)" set to "TV"?
- When viewing teletext, the TV menu bar does not appear.
- Depending on the stability of the signal, there may be a time lag when changing channels.
