## Safety Precautions

1. The design of this product contains special hardware and many circuits and components specially for safety purposes.

For continued protection, no changes should be made to the original design unless authorized in writing by the manufacturer. Replacement parts must be identical to those used in the original circuits. Service should be performed by qualified personnel only.

2. Alterations of the design or circuitry of the product should not be made. Any design alterations or additions will void the manufacturer's warranty and will further relieve the manufacturer of responsibility for personal injury or property damage resulting therefrom.
3. Many electrical and mechanical parts in the product have special safety-related characteristics. These characteristics are often not evident from visual inspection nor can the protection afforded by them necessarily be obtained by using replacement components rated for higher voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in the Parts List of the Service Manual. Electrical components having such features are identified by shading on the schematics and by (  $\Delta$  ) on the Parts List in the Service Manual. The use of a substitute replacement which does not have the same safety characteristics as the recommended replacement part shown in the Parts List of the Service Manual may create shock, fire, or other hazards.
4. The leads in the products are routed and dressed with ties, clamps, tubings, barriers and the like to be separated from live parts, high temperature parts, moving parts and/or sharp edges for the prevention of electric shock and fire hazard.

When service is required, the original lead routing and dress should be observed, and it should be confirmed they have been returned to normal, after re-assembling.

5. Leakage current check

(Electrical shock hazard testing)

After re-assembling the product, always perform an isolation check on the exposed metal parts of the product (antenna terminals, knobs, metal cabinet, screw heads, headphone jack, control shafts, etc.) to be sure the product is safe to operate without danger of electrical shock.

Do not use a line isolation transformer during this check.

- Plug the AC line cord directly into the AC outlet. Using a "Leakage Current Tester", measure the leakage current from each exposed metal part of the cabinet, particularly any exposed metal part having a return path to the chassis, to a known good earth ground. Any leakage current must not exceed 0.5 mA AC (r.m.s.).

- Alternate check method.

Plug the AC line cord directly into the AC outlet. Use an AC voltmeter having 1,000 ohms per volt or more sensitivity in the following manner. Connect a 1,500  $\Omega$  10 W resistor paralleled by a 0.15  $\mu$ F AC-type capacitor between an exposed metal part and a known good earth ground.

Measure the AC voltage across the resistor with the AC voltmeter.

Move the resistor connection to each exposed metal part, particularly any exposed metal part having a return path to the chassis, and measure the AC voltage across the resistor. Now, reverse the plug in the AC outlet and repeat each measurement. Any voltage measured must not exceed 0.75 V AC (r.m.s.). This corresponds to 0.5 mA AC (r.m.s.).

### CHECK THE VOLTAGE SELECTOR'S SETTING (Except for U.S.A., Canada, Australia, U.K. and Continental Europe)

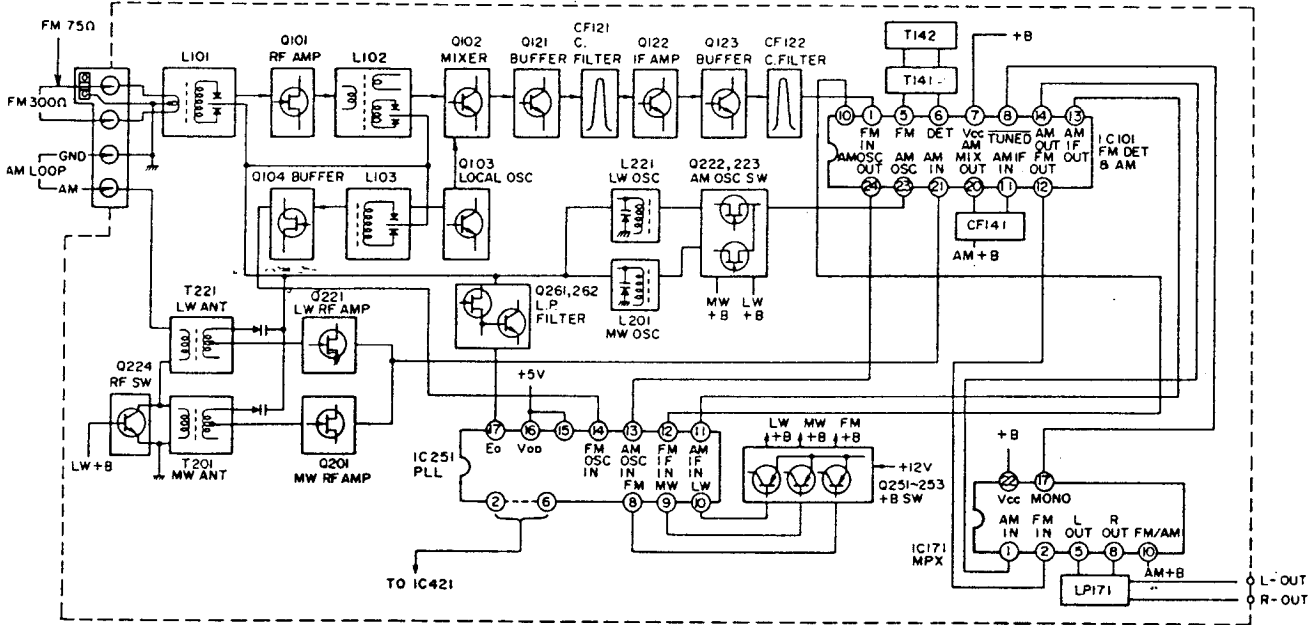

Before inserting the power plug, please check that the voltage selector's setting corresponds with the line voltage in your area. If it doesn't be sure to reset the voltage selector before operating this equipment.

The voltage selector may be located on the rear or bottom of the unit, or underneath the platter.

**CAUTION :** Before setting the voltage selector to the proper voltage, disconnect the power plug.

## 2. Removal Procedures

### 2-(1) Removal of Top Cover

1. Remove four screws on both sides.
2. Remove two screws on the rear panel.
3. Lift up the rear-end of the top cover and take it out.

### 2-(2) Removal of Front Panel

1. Put out three plastic rivets securing the front panel from the top.
2. Remove three screws securing the front panel from the bottom.

### 2-(3) Removal of Tuner PCB

1. Remove two screws securing the antenna terminal on the rear panel.
2. Loosen the screws securing the rear panel.
3. Pull out a plastic rivet ① securing the tuner PCB.
4. Pull up the tuner PC Board and take it out from the connector.

### 2-(4) Removal of Front Switch PCB

1. Remove the front panel. (See above item (2).)
2. Pull out two plastic rivets securing the front switch PCB from the front side.
3. Lift up the bottom-end of the front switch PCB and pull it out toward you from the connector. (See above figure.)

### 2-(5) Removal of LCD PCB

1. Remove the front switch PCB. (See above item (4).)
2. Pull out three plastic rivets ② securing the LCD PCB.

### 2-(6) Removal of Power Transistor

1. Demount the bottom cover by removing ten screws from the bottom.
2. Resolder the pins of power transistors.
3. Remove the screw securing the heat-sink by a bended screwdriver.

## 4. Power Amplifier Idling Current Adjustment

1. Turn R751 and R752 fully counterclockwise before the power switch "ON".
2. Allow the set warm up at least 5 minutes before adjustment.
3. Must keep the heat-sink to prevent overheating before adjustment.

4. Set the volume control to minimum during this adjustment.

5. Connect a digital voltmeter to R787 resistor's leads for left channel, or to R788's leads for right channel.

6. Adjust R751 for left channel, or R752 for right channel, so that the digital voltmeter reads 3 ~ 5 mV.

## 5. Function of ICs on the Pre-Amplifier PCB

RX-450BK  
RX-450LBK

IC371: TC9177P

IC371: TC9177P

Pin No.	Symbol	Terminal Function
1	Vss	(-)Power supply
2	L-Loudness1	Terminal for Loudness (L-ch)
3	L-Loudness2	Terminal for Loudness (L-ch)
4	L-OUT1	10 dB step attenuator output
5	L-IN1	10 dB attenuator input
6	A-GND	Ground (Power supply)
7	L-IN2	2 dB attenuator input
8	L-OUT2	2 dB step attenuator output
9	GND	Ground (Signal)
10	CK	Clock input
11	DATA	Data input
12	ST	Strobe input
13	R-OUT2	2 dB step attenuator output
14	R-IN2	2 dB attenuator input
15	A-GND	Ground (Power supply)
16	R-IN1	10 dB attenuator input
17	R-OUT1	10 dB step attenuator output
18	R-Loudness2	Terminal for Loudness (R-ch)
19	R-Loudness1	Terminal for Loudness (R-ch)
20	Vdd	(+)Power supply

RX-450BK  
RX-450LBK

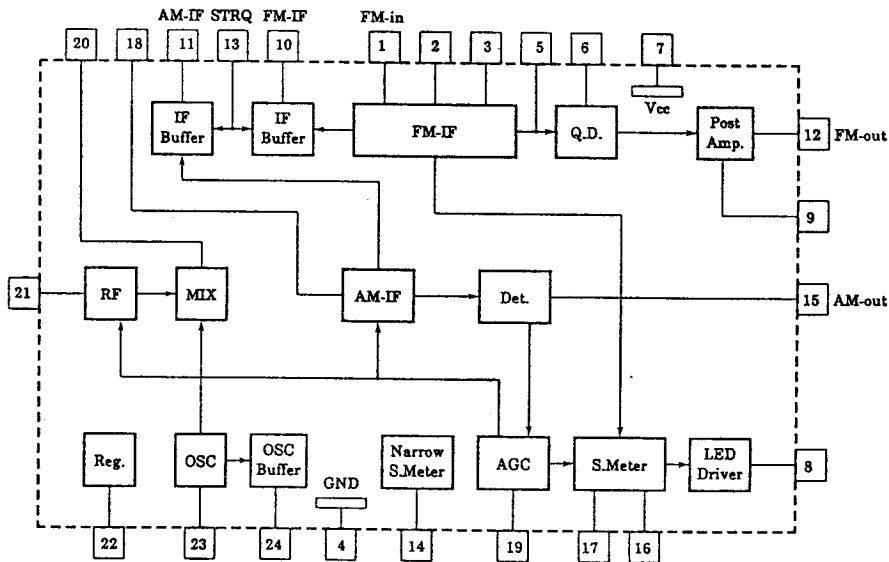

IC251: LM7000N

IC251: LM7000N

Terminal name	Terminal Function
SYC	Clock (400kHz) for controller
XIN, XOUT	Crystal oscillator (7.2 MHz) included the feedback resistor.
FMI, AMI	Local oscillator signal input
CE, CL, DATA	Data input
B01, B02, B03	Band data output
STRQ	Request of IF counter input
STOUT	Auto-search stop signal output
Vdd1, Vdd2, Vss	Power supply (Vdd2 : for back-up)
AMIF, FMIF	IF signal input
PD1, PD2	Charge pump output

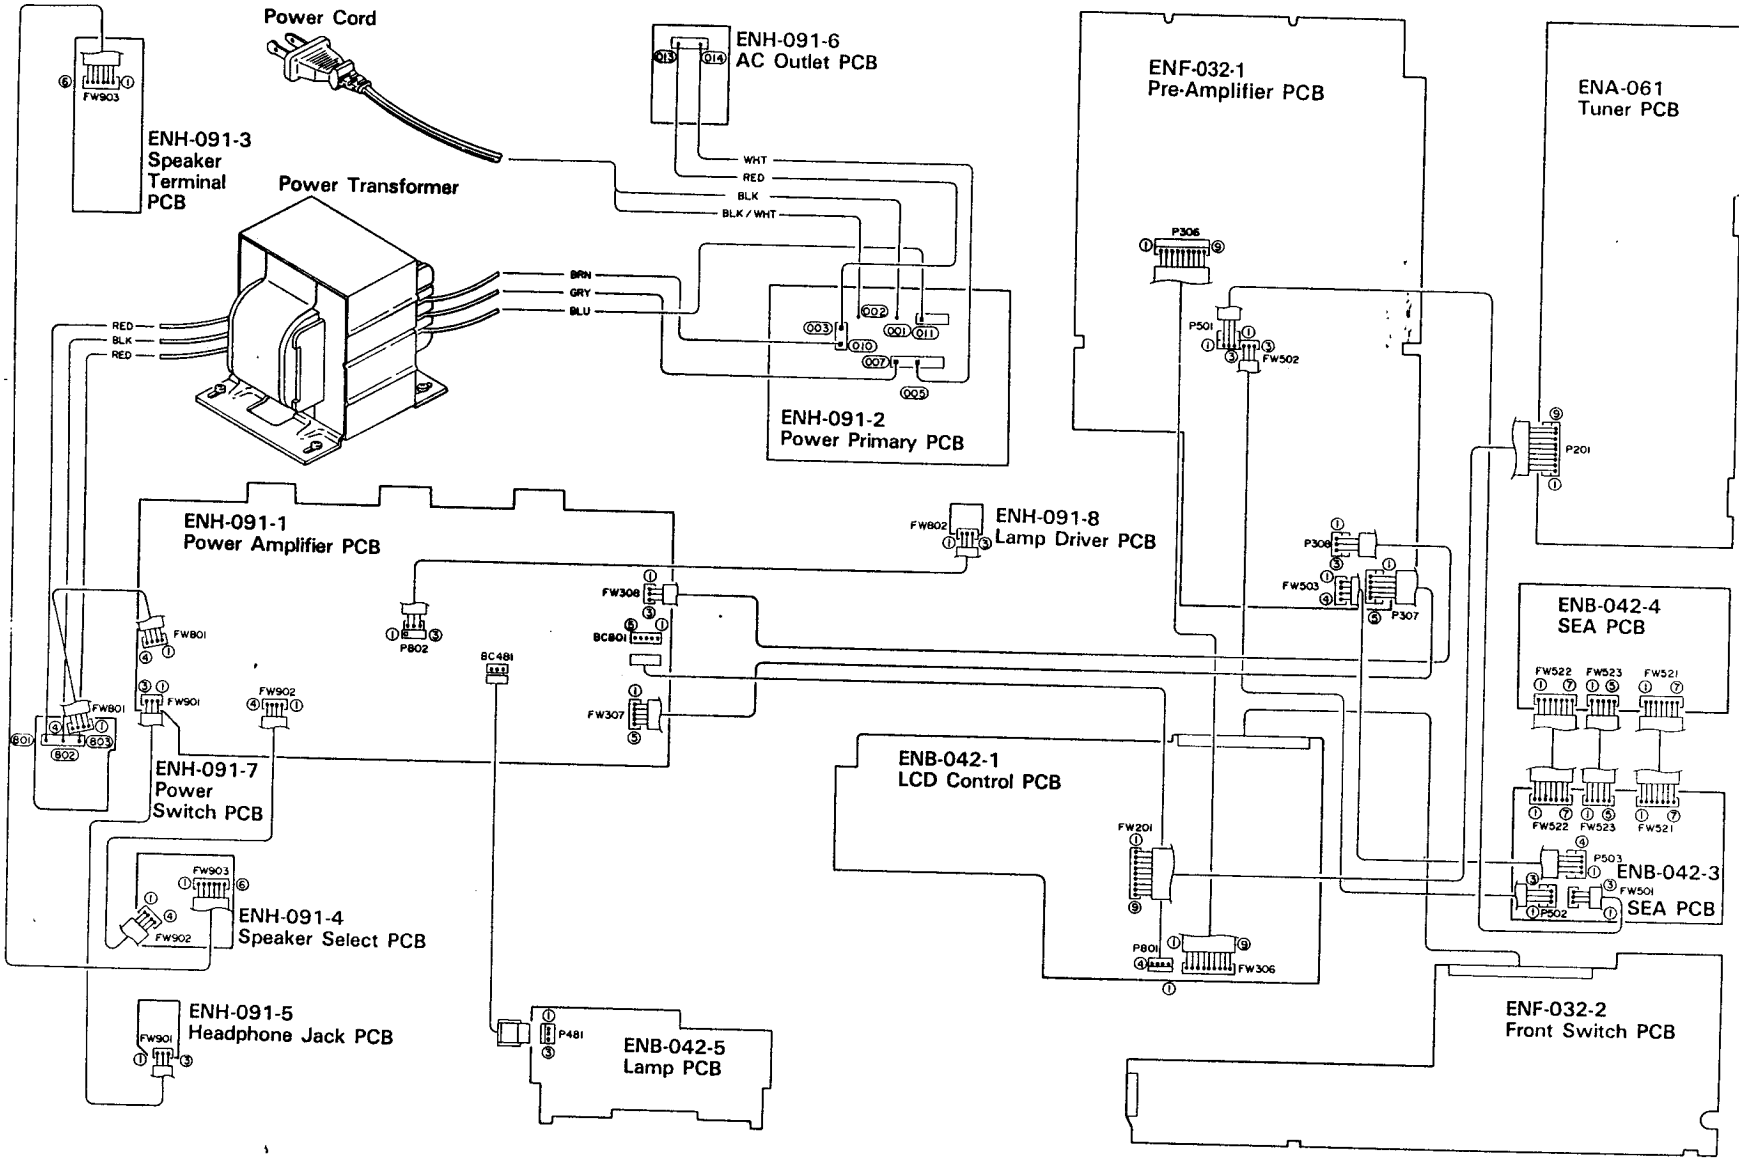

IC101: LA1266 A

IC441: MN17861JSF1

**Notes:**

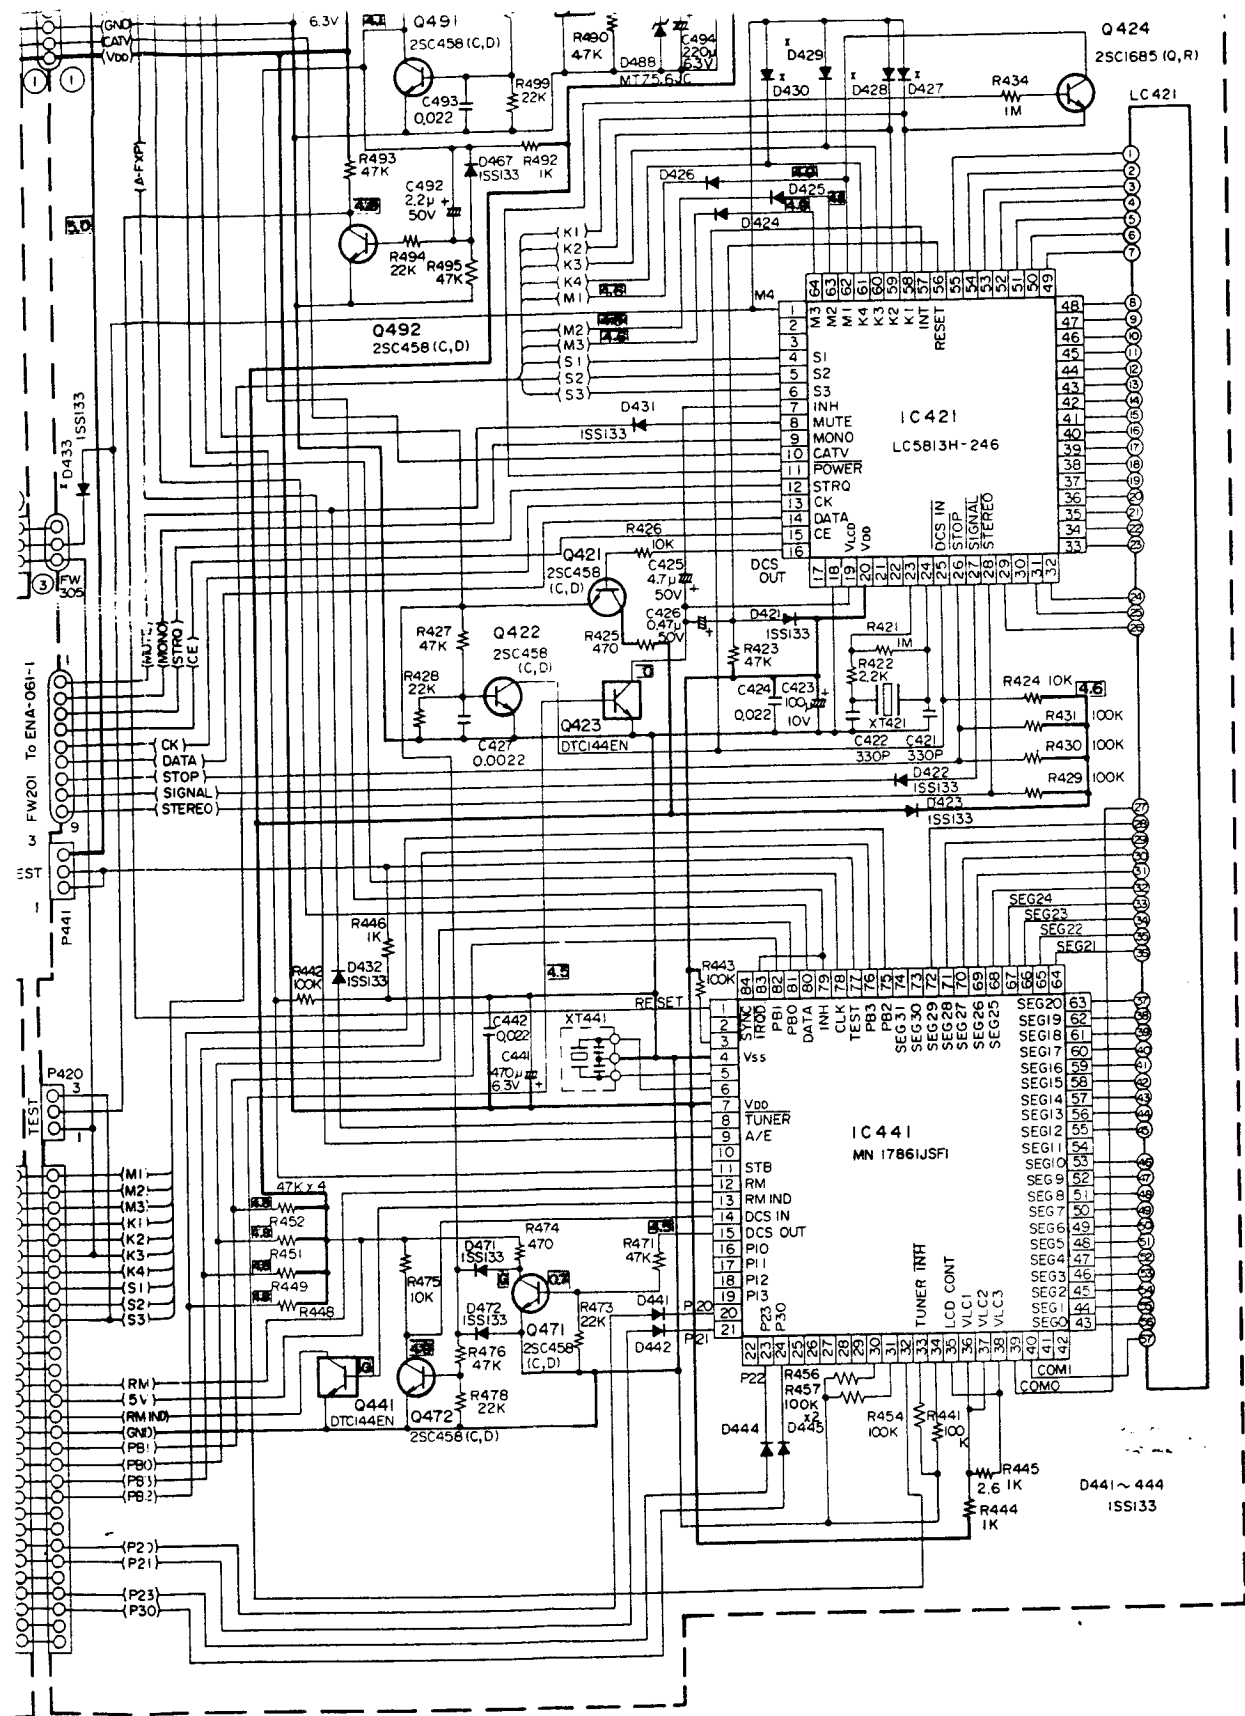

1. shows DC voltage to the chassis with no signal input.
2. indicates positive B power supply.
3. indicates negative B power supply.
4. indicates signal path.

5. When replacing the parts in the darkened area (those marked with  $\Delta$ ), be sure to use the designation ensure safety.
6. This is the standard circuit diagram. The design and contents are subject to change with

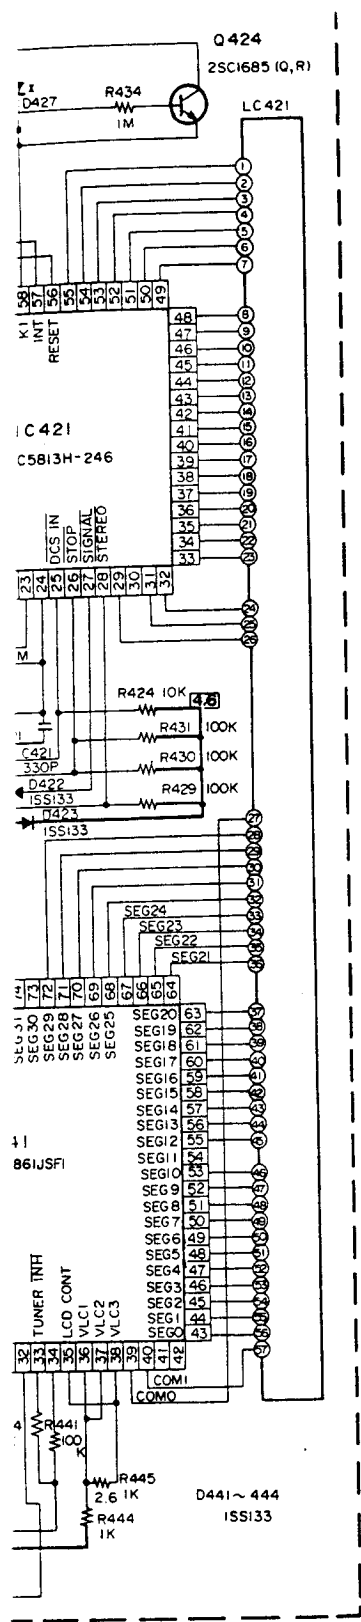

the parts in the darkened area ( ) and  
 with  $\Delta$ , be sure to use the designated parts to

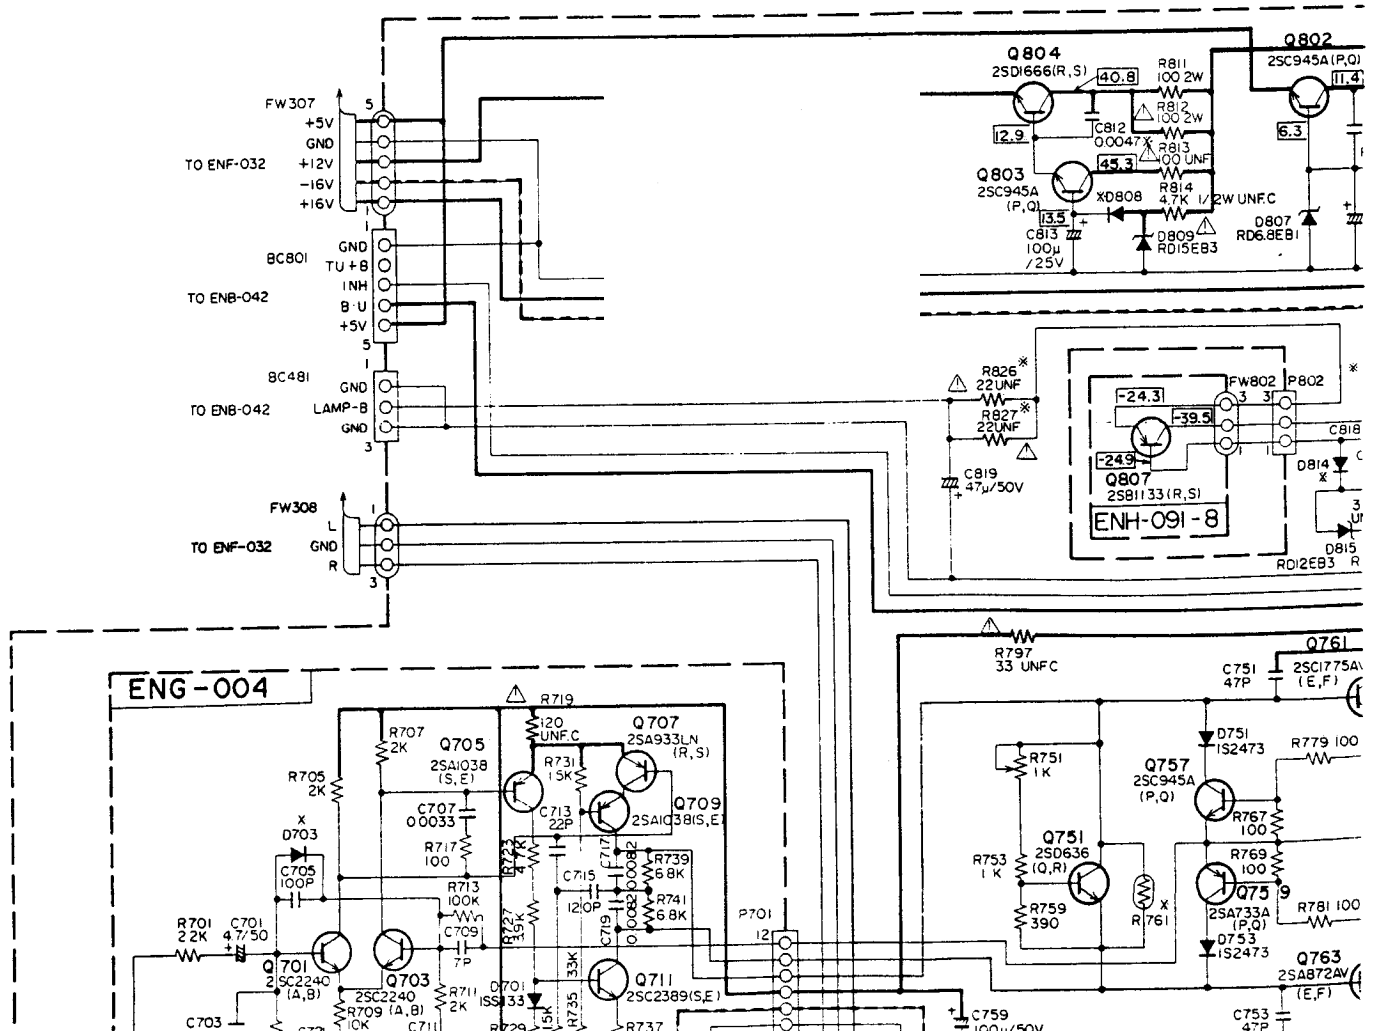

standard circuit diagram.  
 contents are subject to change without notice.

**When using 2 FM antennas**  
**Verwendung von 2 UKW-Antennen**  
**Utilisation de 2 antennes FM**  
**Bij gebruik van 2 FM-antennes**  
**Cuando utilice 2 antenas de FM**

- CATV antenna control unit can also be used as a switching unit for 2 FM antennas.
- Die Kabel-TV-Antennensteuereinheit kann auch als Umschalter für 2 UKW-Antennen verwendet werden.
- Le boîtier de commande d'antenne CATV peut aussi être utilisé comme un commutateur pour 2 antennes FM.
- De CATV-antenneregeleenheid kan ook gebruikt worden als een schakeleenheid tussen twee FM-antennes.
- También puede utilizarse la unidad de control de antena CATV como unidad de conmutación para 2 antenas de FM.

**Antennes AM (Fig. 8, 9)**

- Montage de l'antenne à boucle AM (Fig. 8)  
Dresser l'antenne à boucle sur le support, puis la glisser comme montré jusqu'à ce qu'elle tienne bien en place.
- Si trop de bruit est produit (Fig. 9)  
Changer la direction de l'antenne à boucle ou la réinstaller dans une position où la réception est meilleure.
- Antenne AM externe (Fig. 10)  
Si la réception AM n'est pas bonne, raccorder une antenne AM externe (antenne à fil simple) à la borne AM ANTENNA.

**Remarques:**

- Si l'antenne à boucle fournie n'est pas en place et que ses fils sont fixés ou que les fils d'antenne touchent le panneau arrière, il sera impossible de recevoir les émissions AM.
- Lors de l'installation d'une antenne AM externe, laisser l'antenne à boucle AM raccordée.
- Si l'antenne à boucle AM est trop près des bornes de haut-parleurs, il y a risque de bruit et elle doit être éloignée du panneau arrière.

**Antennes FM**

- Antenne de 75 ohms avec conducteur co-axial (Fig. 11)  
Desserrer les vis sur le collier et insérer le câble dans la bague depuis le dessous. Raccorder ensuite le fil dénudé sur la borne supérieure. La bague du collier sert de borne de mise à la terre.
  - Antenne à câble plat (Fig. 12)  
La raccorder à la borne de 300 ohms.  
Attention à ce que les fils de l'antenne à câble.
- Pour l'Allemagne de l'Ouest (Fig. 13)**
- L'antenne à câble FM fournie peut être raccordée temporairement à la prise co-axiale de 75 ohms.
  - Antenne de 75 ohms avec prise de type co-axial (DIN 45 332)  
La raccorder à la borne de 75 ohms.

**AM-antenne's (Afb. 8, 9)**

- Monteren van de AM-raamantenne (Afb. 8)  
Klik de raamantenne op de standaard en schuif hem daarna zoals dit wordt aangegeven, totdat de antenne stevig op zij plaats vastgehouden wordt.
- Wanneer overmatige storing optreedt (Afb. 9)  
De antenne bijstellen of verplaatsen naar een positie waar ontvangst het best is.
- Am-buitenantenne (Afb. 10)  
Sluit een AM-buitenantenne (enkeldraadsantenne) aan op de AM ANTENNA aansluiting wanneer de AM-ontvangst niet voldoende is.

**Opmerkingen:**

- Het is onmogelijk AM-uitzendingen to ontvangen, wanneer de bijgeleverde AM-raamantenne niet aangesloten en opgesteld is of wanneer de antennedraden het achterpaneel aanraken.
- Laat tevens de AM-raamantenne aangesloten bij aansluiting van een AM-buitenantenne.
- Als de AM-raamantenne zich te dicht bij de luidsprekeransluitingen bevindt, kan deze ruis veroorzaken en dient dan uit de buurt van het achterpaneel geplaatst te worden.

**FM-antenne's**

- 75 Ohm antenne met coaxiale draad (Afb. 11)  
Draai de schroeven op de beugel los en steek de kabel van onderen in de ring. Verbind dan de ontblootte kerndraad met de bovenste aansluiting. De beugeling funktioneert als aardaansluiting.
  - Voedingsantenne (Afb. 12)  
Sluit deze aan op de 300 Ohm aansluiting.  
Zorg ervoor dat de draden van de voedingsantenne de andere aansluiting niet aanraakt.
- Voor Westduitsland (Afb. 13)**
- De meegeleverde FM-draadantenne kan tijdelijk aangesloten worden op de coaxiale aansluiting van 75 Ohm.
  - FM antenne van 75 Ohm met coaxiale aansluiting (DIN 45332)  
Aansluiten op de 75 Ohm aansluiting.

**Antenas de AM (Fig. 8 y 9)**

- Cómo montar la antena de cuadro de AM (Fig. 8)  
Coloque la antena en el soporte y deslicela como se ilustra hasta que quede firmemente fijada en su lugar.
- Cuando hay demasiado ruido (Fig. 9)  
Cambie la dirección de la antena o instálela nuevamente en una posición que permita la mejor recepción.
- Antena externa AM (Fig. 10)  
Si la recepción de AM no es buena, conecte una antena externa de AM (antena monofilar) al terminal AM ANTENNA.

**Notas:**

- Si la antena de cuadro provista no está instalada o los cables de la misma tocan el panel trasero, será imposible captar radiodifusiones en AM.
- Cuando instale una antena externa, deje conectada la antena de cuadro de AM.
- Si la antena de cuadro AM está demasiado cerca a los terminales del altavoz, puede producirse ruido y se la deberá alejar del panel trasero.

**Antenas FM**

- Antena de 75 ohmios con cable coaxil (Fig. 11)  
Afloje los tornillos en la ménsula e inserte el cable en el aro desde abajo. Luego conecte el extremo pelado al terminal superior. El aro de la ménsula trabaja como terminal de conexión a tierra.
  - Alimentador de antena (Fig. 12)  
Conecte al terminal de 300 ohmios.  
Tenga cuidado de que los alambres del alimentador de antena no toquen ningún otro terminal.
- Para Alemania Occidental (Fig. 13)**
- La antena de cable suministrada puede conectarse temporalmente al terminal coaxil de 75 ohmios.
  - Antena de 75 ohmios con conector tipo coaxil (DIN 45 332)  
Conecte al terminal de 75 ohmios.

RX-450BK  
RX-450LBK

FRONTPLATTE  
PANNEAU AVANT  
VOORPANEEL  
PANEL DELANTERO

**1 POWER**

**ON** (☰): Press to turn the power on. To turn the power off, press it again.

**STAND BY** (⏏): Even when all of the indicators are turned off, the memory circuit operates and the preset stations and the source selectors are not subject to cancellation or accidental alteration as long as the power cord is plugged into an AC outlet. This situation is called the STAND BY mode. The preset data and the source select data are maintained even in the case of a power failure or when the power cord is disconnected, if the period power is not applied does not exceed a couple of days.

**Note:**

- Even in the STAND BY mode, this receiver consumes a small amount of electricity (5 watts). To shut the power completely off, disconnect the power cord.

**2 SEA LEVEL**

The built-in graphic equalizer divides the audio spectrum into seven frequency bands with center frequencies from 63 Hz to 16 kHz at intervals of 4/3 octave.

When the S.E.A. level is set to '0' (center position), frequency response is flat. The response can be varied by  $\pm 10$  dB by raising or lowering the knob.

**1 Netztaete (POWER)**

**ON** (☰): Betätigen, um die Spannungsversorgung einzuschalten. Nochmals Betätigen, um diese abzuschalten.

**STAND BY** (⏏): Auch nach Erlöschen aller Anzeigen ist der Speicherschaltkreis in Betrieb, so daß Senderspeicher und Signalquellenwahl nicht gelöscht oder unbeabsichtigt geändert werden, solange das Netzkabel angeschlossen bleibt. Dieser Status wird als Betriebsbereitschaft bezeichnet (STAND BY). Die Speicherungen für Sender und Signalquelle werden auch nach Unterbrechung der Spannungsversorgung (abgezogenes Netzkabel, Stromausfall) beibehalten, wenn diese Unterbrechung auf einige Tage beschränkt ist.

**Hinweis:**

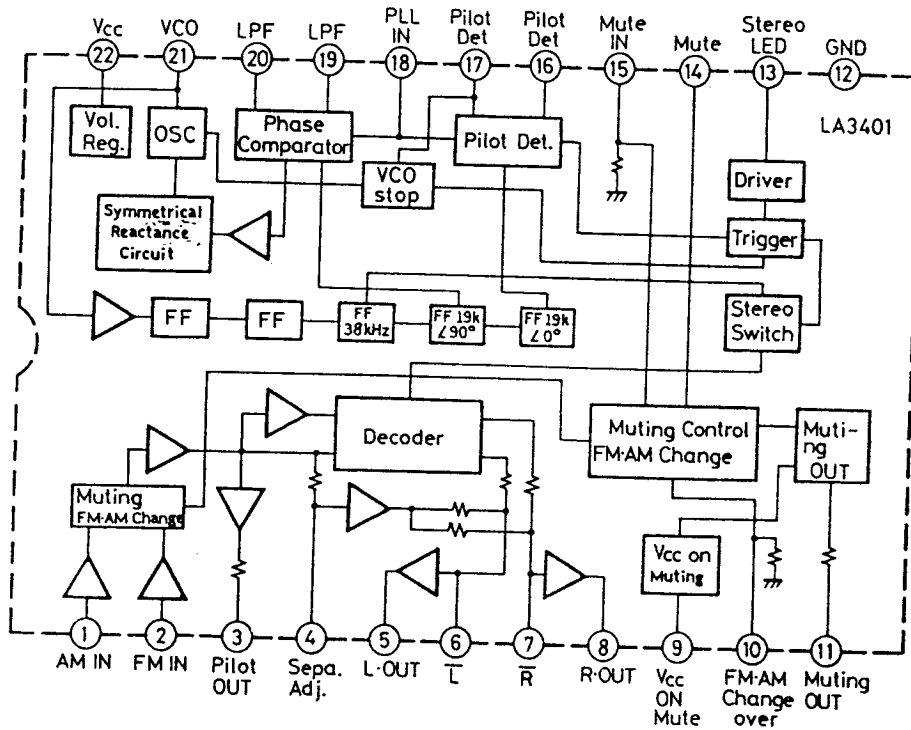

- Auch bei STAND BY-Betriebsart wird eine geringe Leistung (5 Watt) vom Receiver aufgenommen. Zur kompletten Abschaltung das Netzkabel abziehen.

**2 SEA-Pegeltasten (SEA LEVEL)**

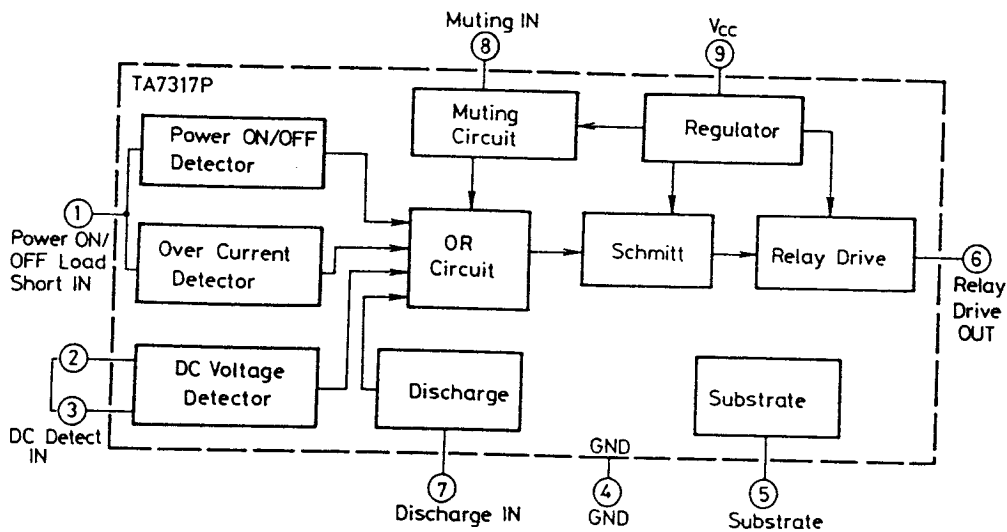

Der eingebaute Mehrbereichsklangregler teilt das Audiospektrum in sieben Frequenzbereiche auf mit Mittenfrequenzen von 63-Hz bis 16 kHz in Abständen einer 4/3 Oktave.

Wenn die SEA-Pegelregler auf '0' (Mittelposition) eingestellt sind, ist der Frequenzgang linear. Der Verlauf kann durch Heben oder Senken des Reglers um  $\pm 10$  dB verändert werden.

IC171: LA3401

IC901: TA7317P

**[AUDIO]** ...For audio signal connection

- ④ PHONO terminals

Fig. 6  
Abb. 6  
Afb. 6

AM-Antennen (Abb. 8, 9)

• Anbringung der AM-Rahmenantenne (Abb. 8)

Die Rahmenantenne am Halter festdrücken und dann wie gezeigt verschieben, um sicheren Sitz zu gewährleisten.

• Wenn zu viele Störgeräusche empfangen werden (Abb. 9)

Die Richtung der Rahmenantenne verändern oder in einer Position anbringen, die einen besseren Empfang ergibt.

• MW-Außenantenne (Abb. 10)

Wenn der MW-Empfang nicht gut ist, eine MW-Außenantenne (Einzeldrahtantenne) an den AM ANTENNA-Anschluß anschließen.

Hinweise:

• Wenn die mitgelieferte Rahmenantenne nicht angebracht und angeschlossen ist oder die Antennendrähte die Rückplatte berühren, ist MW-Empfang nicht möglich.

• Die MW-Rahmenantenne muß auch angeschlossen bleiben, wenn eine MW-Außenantenne angeschlossen wird.

• Wenn die MW-Rahmenantenne sich zu nahe an den Lautsprecheranschlüssen befindet, können Störgeräusche auftreten. Daher die Rahmenantenne möglichst weit von der Rückplatte entfernt anbringen.

UKW-Antennen

• 75-Ohm-Antenne mit Koaxialkabel (Abb. 11)

Die Schrauben an der Halterung lösen und das Kabel von unten in den Ring einführen. Dann den abgeschirmten Innenleiter an die obere Klemme anschließen. Der Halterungsring dient als Erdungsklemme.

• Speiseantenne (Abb. 12)

An die 300-Ohm-Klemme anschließen. Darauf achten, daß die Kabel der Speiseantenne die anderen Anschlüsse nicht berühren.

Für BRD (Abb. 13)

• Die mitgelieferte UKW-Drahtantenne kann zeitweilig an die 75-Ohm-Koaxialbuchse angeschlossen werden.

• 75-Ohm-Antenne mit Koaxialstecker (DIN 45 332)  
An den 75-Ohm-Anschluß anschließen.

AM antennas (Fig. 8, 9)

• How to assemble the AM loop antenna (Fig. 8)

Snap the loop antenna onto the stand, then slide it as shown until firmly held in place.

• When too much noise occurs (Fig. 9)

Change the direction of the loop antenna or reinstall it in a position that gives best reception.

• AM external antenna (Fig. 10)

If AM reception is not good, connect an external AM antenna (single-wire antenna) to the AM-ANTENNA terminal.

Notes:

• If the provided loop antenna is not set up and its wires attached, or the antenna wires touch the rear panel, it will be impossible to receive AM broadcasts.

• When installing an AM external antenna, leave the AM loop antenna connected.

• If the AM loop antenna is too close to the speaker terminals, it may cause noise and should be moved away from the rear panel.

FM antennas

• 75-ohm antenna with coaxial lead (Fig. 11)

Loosen the screws on the bracket and insert the cable into the ring from below. Then connect the stripped core to the upper terminal. The bracket ring works as the ground terminal.

• Feed antenna (Fig. 12)

Connect to the 300-ohm terminal.

Take care that the wires of the feeder antenna do not touch any other terminal.

For W. Germany (Fig. 13)

• The FM wire antenna provided can be connected to the 75-ohm coaxial jack temporarily.

• 75-ohm antenna with coaxial type connector (DIN 45 332)

Connect to the 75-ohm terminal.

DIAGRAMA DE CONEXIONES

Open the speaker terminal with the lever and insert the stripped end of the cord.  
Die Lautsprecherbuchse mit dem Hebel öffnen, und das abisolierte Ende des Kabels einführen.  
Ouvrir la borne de haut-parleur avec le levier et insérer l'extrémité défundée du câble de haut-parleur.  
Open de luidsprekeraansluiting m.b.v. de hendel en steek het blootliggende uiteinde van het luidsprekersnoer in de aansluiting.  
Abra el terminal del altavoz con la palanquita, e inserte el extremo pelado del cordón.

Clamp the wire by resetting the lever.  
Den Draht durch Umiegen des Hebels festklemmen.  
Pincer le câble en replaçant le levier.  
Bevestig het luidsprekersnoer door de hendel terug te zetten.  
Fije el cable soltando la planquita.

Abb. 1  
Afb. 1

- 1 External ANTENNA terminals
- 2 GND terminal
- 3 CATV CONTROL terminal\*\*  
Connect the optional CATV antenna control unit.  
To connect, refer to the instruction book of the CATV antenna control unit.

- 1 Antennenanschlüsse (ANTENNA)
- 2 Erdungsanschluß (GND)
- 3 Gemeinschaftsantennen-Steuerungsanschluß (CATV CONTROL)\*\*  
Die Gemeinschaftsantennen-Steuerungseinheit (Sonderzubehör) anschließen. Zum Anschließen siehe die Bedienungsanleitung der CATV-Antennen-Steuerungseinheit.

① Bornes d'antenne externe (ANTENNA)  
② Borne de mise à la terre (GND)  
③ Borne de contrôle CATV (CATV CONTROL)\*\*  
Raccorder un appareil de contrôle d'antenne CATV optionnel. Pour le raccordement, se référer au manuel d'instructions de l'appareil de contrôle d'antenne CATV.

① Aansluitingen voor een buitenantenne (ANTENNA)  
② Aardaansluiting (GND)  
③ CATV CONTROL aansluiting (CATV regeling)\*\*  
Sluit de los verkrijgbare CATV-antenne-regeleenheid aan. Zie de gebruiksaanwijzingen van de CATV-antenneregeleenheid voor het aansluiten.

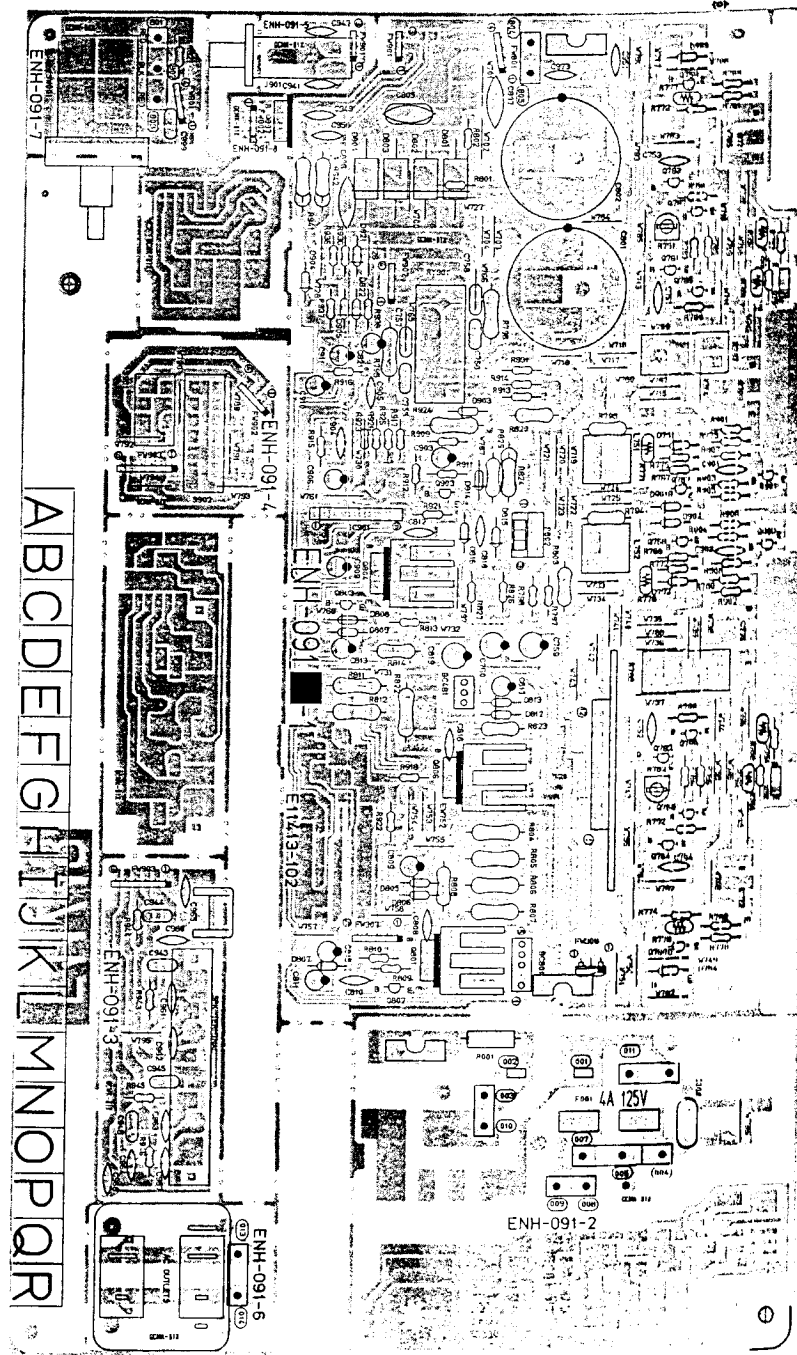

① Terminales de antena externa (ANTENNA)  
② Terminal de puesta a tierra (GND)  
③ Terminal de control CATV (CATV CONTROL)\*\*  
Conecte la unidad de control de antena CATV opcional. Para la conexión, refiérase al manual de instrucciones de la unidad de control de antena CATV.

**Ⓢ BALANCE (LEFT/RIGHT)**

Use to adjust the balance between the left and right speakers. Press the LEFT button once to adjust the balance to the left by one step and the RIGHT button to adjust to the right. Holding them pressed changes the balance continuously. The BALANCE indicator is shown on the display.

**Ⓢ SPEAKERS-1/SPEAKERS-2**

Press to switch the speakers connected to the SPEAKERS 1 and/or 2 terminals on and off.

**Note:**

• When speakers are connected to only one system of the SPEAKERS terminals, press only the SPEAKERS button of the system connected; if both buttons are pressed, sound will not be heard from either speaker system. When two pairs of speakers are connected and either or both SPEAKERS buttons is/are pressed, sound will be heard from either or both speaker system(s).

**Ⓢ Headphone jack (PHONES)**

Plug stereo headphones into this jack for private listening and recording monitoring. If you want to listen to sound from the headphones only, press the SPEAKERS buttons to OFF.

**Ⓢ SEA REC**

Press this button to record S.E.A.-compensated signals.

**Ⓢ AUDIO**

**CD:** Press this button to listen to a compact disc player connected to the CD terminals.

**PHONO:** Press to listen to a turntable connected to the PHONO terminals.

**FM:** Press this button to listen to an FM broadcast.

**AM(RX-450BK), AM(MW/LW)(RX-450LBK):** Press this button to listen to an AM (MW/LW) broadcast.

**TAPE 1:** Press to listen to the tape deck connected to the TAPE 1 terminals.

**TAPE 2/VIDEO SOUND:** Press to listen to the tape deck connected to the TAPE 2/VIDEO SOUND terminals.

**Note:**

• Press this button to monitor the recorded sound (listening to the sound just recorded) when using a three-head tape deck.

**Ⓢ Balance-Links/Rechts-Tasten (BALANCE LEFT/RIGHT)**

Diese Tasten dienen zum Einstellen der Balance zwischen den rechten und linken Lautsprechern. Durch Drücken der LEFT-Taste wird der linke Lautsprecher um eine Stufe lauter, durch Drücken der RIGHT-Taste der rechte Lautsprecher. Wird eine der Tasten gedrückt gehalten, ändert sich die Balance fortlaufend. Auf dem DISPLAY erscheint die BALANCE-Anzeige.

**Ⓢ Lautsprecheranlage-1/Lautsprecheranlage-2-Tasten (SPEAKERS-1/SPEAKERS-2)**

Hiermit läßt sich die an die Klemmen SPEAKERS 1 bzw. SPEAKERS 2 angeschlossene Lautsprecheranlage zu- und wegschalten.

**Hinweis:**

• Wenn nur ein Lautsprecherpaar an eine der SPEAKERS-Klemmenfelder angeschlossen wurde, darf nur die dem angeschlossenen Lautsprecherpaar entsprechende Taste gedrückt werden. Wenn in diesem Fall beide Tasten gedrückt sind, wird der Ton stummgeschaltet. Solange zwei Lautsprecherpaare angeschlossen sind, können beide bzw. eine der beiden Tasten beliebig gedrückt werden, wobei der Ton von beiden bzw. dem einzeln angewählten Paar zu hören ist.

**Ⓢ Kopfhörerbuchse(PHONES)**

Diese Buchse dient zum Anschließen eines Stereo-Kopfhörers für ungestörtes Hören oder Aufnahmeüberwachung. Soll nur über Kopfhörer gehört werden, die SPEAKERS-Taste auf OFF drücken.

**Ⓢ SEA-Aufnahmetaste (SEA REC)**

Diese Taste drücken, um das SEA-geregelte Signal aufzunehmen.

**Ⓢ AUDIO**

**CD:** Betätigen, um vom an den CD-Buchsen angeschlossenen CD-Player wiederzugeben.

**PHONO:** Betätigen, um vom an den PHONO-Buchsen angeschlossenen Plattenspieler wiederzugeben.

**FM:** Betätigen, um eine UKW-Sendung wiederzugeben.

**AM(RX-450BK), AM(MW/LW)(RX-450LBK):** Betätigen, um eine AM (MW/LW)-Sendung wiederzugeben.

**TAPE 1:** Betätigen, um vom an den TAPE 1-Buchsen angeschlossenen Cassettendeck wiederzugeben.

**TAPE 2/VIDEO SOUND:** Betätigen, um vom an den TAPE 2/VIDEO SOUND-Buchsen angeschlossenen Cassettendeck wiederzugeben.

**Hinweis:**

• Bei Verwendung eines mit Hinterbandkontrolle ausgestattete Bandgeräts diese Funktion verwenden, um bei Aufnahme des Hinterbandsignal überwachen zu können.

**7 TUNING UP/DOWN**

**DOWN:** Press to tune to lower frequencies.

**UP:** Press to tune to higher frequencies.

**Manual tuning**

**RX-450BK:** Tapping these buttons changes the frequency in single steps of 9 or 10 kHz in AM, and 50 or 100 kHz in FM.

**RX-450LBK:** Tapping these buttons changes the frequency in single steps of 9 or 10 kHz in MW, 1 kHz in LW, and 50 or 100 kHz in FM. This machine is designed so that MW and LW frequencies can be automatically switched by the tuning button.

When raising the frequency for LW, 353 kHz will automatically change to MW 522 kHz. Conversely, when lowering the frequency for MW, 522 kHz will switch to 353 kHz.

**Auto tuning**

Holding either button pressed for more than one second and then releasing it starts auto tuning; when a broadcast is received, tuning will stop. But if either button is kept held in, scanning continues even when a broadcast is received. In auto tuning, pressing either button again stops scanning.

**Note:**

- When one of these buttons is being tapped, the frequency causes to change at the upper or lower limit of the frequency band. In auto tuning, the frequency scanning reverses direction when the upper or lower limit is reached.

**8 MEMORY**

Press this button, and the MEMORY indicator will light to show that it is ready to receive a memory setting. Pressing the station select button while the MEMORY indicator is lit (for about five seconds) makes it possible to store the station in the specified memory. At this time, the channel number is shown in the display.

**9 REMOTE SENSOR**

While infrared signals are being received from the remote control unit, the RECEIVED indicator lights.

**10 LOUDNESS**

Press this button to compensate for the ear's lower sensitivity at low listening levels.

**11 CATV (only for the U.S.A. and Canada)**

Use this button along with the separate CATV antenna control unit. When connecting the CATV cable to enjoy CATV programs or connecting the FM antenna to "CATV IN" of CATV antenna control unit to listen to an FM broadcast. Push this button to illuminate the CATV indicator. When the CATV indicator does not light, you can listen to the broadcast through the antenna connected to the EXT. FM IN of CATV antenna control unit. Also, the CATV button functions can also be stored in each preset station along with frequency.

**12 Abtimm-Aufwärts/Abwärts-Tasten (TUNING UP/DOWN)**

**DOWN:** Zum Vermindern der Empfangsfrequenz diese Taste drücken.

**UP:** Zum Erhöhen der Empfangsfrequenz diese Taste drücken.

**Manuelle Abstimmung**

**RX-450BK:** Durch antippen dieser Tasten wird die Empfangsfrequenz in einzelnen Schritten von 9 oder 10 kHz bei MW-Empfang und 50 oder 100 kHz bei UKW-Empfang geändert.

**RX-450LBK:** Durch Antippen dieser Tasten wird die Frequenz für MW in 9- bzw. 10-kHz-Schritten, für LW in 1-kHz-Schritten und für UKW in 50- bzw. 100-kHz-Schritten abgestimmt. MW- und LW-Frequenz werden bei diesem Modell automatisch umgeschaltet. Bei Erhöhung der KW-Frequenz wird von 353 kHz automatisch auf MW 522 kHz umgeschaltet. Umgekehrt erfolgt bei Absenkung der MW-Frequenz automatisch die Umschaltung auf 353 kHz.

**Automatische Abstimmung**

Die automatische Abstimmung startet, wenn eine der Tasten länger als eine Sekunde gedrückt gehalten und dann losgelassen wird. Die Abstimmung stoppt, wenn ein Sender empfangen wird. Wird eine der Tasten gedrückt gehalten, wird die Abstimmung auch fortgesetzt, wenn ein Sender empfangen wird. Wird bei der automatischen Abstimmung eine der Tasten gedrückt, stoppt die Sendersuche.

**Hinweis:**

- Beim Antippen dieser Tasten wird die Frequenzrichtung an der Ober- oder Untergrenze des Frequenzbereiches geändert. Bei der automatischen Abstimmung wird die Suchrichtung bei Erreichen der Ober- oder Untergrenze des Frequenzbandes geändert.

**13 Speicher-Taste (MEMORY)**

Durch Drücken dieser Taste leuchtet die MEMORY-Anzeige. Dann kann ein Sender gespeichert werden, während die MEMORY-Anzeige leuchtet (für etwa fünf Sekunden). Dabei wird die Kanalnummer auf dem Display angezeigt.

**14 Fernbedienungssensor(REMOTE SENSOR)**

Die RECEIVED-Anzeige leuchtet beim Empfang von Infrarotsignalen von der Fernbedienungseinheit.

**15 Lautstärkekontur-Taste (LOUDNESS)**

Diese Taste drücken, um die verminderte Empfindlichkeit des menschlichen Gehörs bei niedriger Lautstärke auszugleichen.

**16 CATV-Taste (nur für die USA und Kanada)**

Diese Taste zusammen mit der separaten CATV-Antennensteuerungseinheit verwenden. Wenn das CATV-Kabel zum Empfang von CATV-Programmen angeschlossen ist oder eine UKW-Antenne an den "CATV IN"-Anschluß der CATV-Antennensteuerungseinheit zum Empfang von UKW-Sendern angeschlossen ist, diese Taste drücken, so daß die Anzeige leuchtet. Wenn die CATV-Anzeige nicht leuchtet, können Radiosender durch die mit EXT. FM IN der CATV-Antennensteuerungseinheit verbundenen Antenne empfangen werden. Die CATV-Tastenfunktionen können auch zusammen mit den Frequenzen in den Stationstasten gespeichert werden.

15 Operation buttons for the tape deck/VCR/DA tape deck selected by the TAPE CONTROL, VCR CONTROL or DA TAPE CONTROL.

⏸ (PAUSE/STILL): Press this button to pause during playback or recording. To release this function, press the PLAY button.

⏹ (STOP): Press this button to stop operation.

⏻ (REC): While holding this button pressed, press the PLAY (▶) button to record. When this button is pressed with the PAUSE/STILL (⏸) button, REC-PAUSE mode is activated.

⏮ : Press to fast wind the tape from right to left.

▶ (PLAY): Press this button to play a tape.

⏭ : Press to fast wind the tape from left to right.

16 MUTE

Press this button to instantly mute the sound. To return the volume to its original level, press this button again, or press the BALANCE or VOLUME button.

17 VOLUME

Press the "+" button to increase the volume and the "-" button to decrease it.

18 SEA LEVEL

When the SEA CONTROL button has been pressed, these buttons can be used to adjust the S.E.A. level of the frequency band selected by the S.E.A. frequency band select buttons.

15 Bedientasten für Kassettendeck/DAT-Kassettendeck/Videorekorder, gewählt mit Taste TAPE CONTROL, VCR CONTROL oder DA TAPE CONTROL.

⏸ (PAUSE/STILL): Für Pause während Wiedergabe oder Aufnahme diese Taste drücken. Zum Freigeben der Pause die PLAY-Taste drücken.

⏹ (STOP): Diese Taste zum Stoppen des Bandlaufs drücken.

⏻ (REC): Zum Aufnahmestart diese Taste gedrückt halten und die PLAY (▶) Taste betätigen. Wenn diese Taste zusammen mit der PAUSE/STILL-Taste (⏸) gedrückt wird, wird auf Aufnahmepause geschaltet.

⏮ : Zum schnellen Spulen des Bandes von rechts nach links diese Taste drücken.

▶ (PLAY): Für Wiedergabe diese Taste drücken.

⏭ : Zum schnellen Spulen des Bandes links nach rechts diese Taste drücken.

16 Dämpfungstaste (MUTE)

Durch Drücken dieser Taste wird die Lautstärke augenblicklich gedämpft und durch erneutes Drücken dieser Taste oder der BALANCE-oder VOLUME-Taste die vorige Lautstärke wieder hergestellt.

17 Lautstärke-Taste (VOLUME)

Zum Erhöhen der Lautstärke die Seite "+" und zum Vermindern der Lautstärke die Seite "-" drücken.

18 SEA-Pegel (SEA LEVEL)

Nach Betätigen der SEA CONTROL-Taste kann mit diesen Tasten das über die SEA-Frequenzband-Wahltasten bestimmte Band eingestellt werden.

#### Battery

• How to install the batteries (Fig. 16)

- Slide the cover of the battery case in the direction of the arrow to remove it.
- Install the provided batteries (AA, SUM-3, R6; 1.5 V), with their polarities properly placed.
- Re-install the cover of the battery case.

• Battery life

The batteries can be used for about one year.

• Battery replacement time

When the distance at which the remote control unit functions begins to decrease, replace both batteries.

#### Notes:

- When the remote control is operated too near the receiver during AM reception, it may cause interference.
- The remote control can be used up to about 8 m (26 ft) from the receiver.

• How to use the provided connection bar (Fig. 17)

When using the RM-SR450 with a compatibly-designed remote control unit of a TV or other component, connect the two units with the connection bar.

#### Notes:

- For safety, remove the bar when the units are separated.
- To protect yourself from the connection bar's exposed edges, remove the bar from the unit after draping it with a cloth.

#### Batterie

• Einsetzen der Batterien (Abb. 16)

- Den Batteriefachdeckel in Pfeilrichtung abschieben.
- Die mitgelieferten Batterien (AA, SUM-3, R6; 1,5 V) unter Beachtung der Polarität einsetzen.
- Den Batteriefachdeckel wieder anbringen.

• Lebensdauer der Batterien

Die Lebensdauer der Batterien beträgt etwa ein Jahr.

• Zeitpunkt zum Auswechseln der Batterien

Wenn die Entfernung, in der die Fernbedienungseinheit arbeitet, abnimmt, müssen beide Batterien ausgewechselt werden.

#### Hinweise:

- Wenn die Fernbedienungseinheit bei MW-Empfang zu nahe am Empfänger verwendet wird, kann sie Interferenzstörungen bewirken.
- Die Fernbedienung kann bis zu einer Entfernung von etwa 8 m vom Empfänger verwendet werden.

• Verwendung der mitgelieferten Verbindungsschiene (Abb. 17)

Bei Gebrauch der RM-SR450 zusammen mit einer anderen Fernbedienung mit kompatibel Design (TV-Gerät etc.) die beiden Einheiten mit Hilfe der Verbindungsschiene verbinden.

#### Hinweise:

- Aus Sicherheitsgründen die Verbindungsschiene bei Nichtgebrauch abnehmen.
- Zum Schutz vor Verletzungen die Verbindungsschiene vor Abnahme mit einem Tuch etc. abdecken.

When the TV CH button has been pressed, these buttons can be used to select a TV channel.

When the CD 10 KEY button has been pressed, these buttons can be used to select CD track NO.

When the VCR CH button has been pressed, these buttons can be used to select TV channel of the VCR.

**Note:**

- Before operating the television by remote control, be sure to carefully read the television instruction manual.

**1 CONTROL**

**TV CH:** Press this button then use the FM, AM, TV channel select buttons. (10)

**CD 10 KEY:** Press this button then use the CD track NO operation. (10).

**2 PRESET CHANNEL**

When the FM, AM, VCR CH or TV CH button has been pressed, a preset station or TV channel can be selected by using these buttons to sequentially scan the preset stations or channels in either direction.

**3 CD CONTROL**

**Stop [ ]:** Press this button to stop play. The standby mode is engaged.

**SKIP [ ]:** Press this button to move the pickup to the beginning of the current song while in the middle of play. Then, each time it is pressed, the pickup will skip to the beginning of the previous selection. Keeping this button pressed causes the pickup to skip back continuously.

**SKIP [ ]:** Press this button to move the pickup to the beginning of the next song. After this, each time this button is pressed, the pickup moves forward by one selection. Keeping it pressed causes it to skip forward continuously.

**SEARCH [ ] (backward):** Press to search for the required tune by moving the sensor back.

**SEARCH [ ] (forward):** Press to search for the required tune by moving the sensor forward; sound can be heard at reduced volume level while search is taking place in the play mode.

**10:** Use this button to designate track numbers over 10 or establish the time interval.

**4 TAPE 1 CONTROL**

**Stop [ ]:** Press this button to stop play. The standby mode is engaged.

**MUSIC SCAN [ ]:** Press one of these buttons to briefly play the beginning of each selection.

**DIRECTION [ ]:** Press this button to change the direction of tape travel.

**Note:**

- Tape decks, such as Model TD-X501BK and TD-X301BK, are not designed to change the direction of tape travel by this button.

Nach Drücken der TV CH-Taste dienen diese Tasten zum Wählen eines Fernsehkanals.

Bei gedrückter CD-Zehntertastatur-Taste können über diese Tasten die CD-Titel-Nr. angewählt werden.

Bei gedrückter VCR CH-Taste lassen sich mit diesen Tasten die Fernsehkanäle am Videorecorder anwählen.

**Hinweis:**

- Vor Bedienung des Fernsehers mit Fernbedienung die Bedienungsanleitung des Fernsehers sorgfältig durchlesen.

**5 REGLER (CONTROL)**

**TV CH:** Diese Taste drücken, dann die FM-, AM- und Fernsehkanal-Wahltasten betätigen. (10)

**CD-10-Taste:** Diese Taste drücken, dann die Titel-Nr. mit der Zehntertastatur anwählen.

**6 FESTSENDER (PRESET CHANNEL)**

Nach Drücken der FM-, AM-, VCR CH oder TV CH-Taste dienen diese Tasten zum sequentiellen Absuchen der verfügbaren Radiosender oder Fernsehkanäle in beide Richtungen, um einen gespeicherten Radiosender oder Fernsehkanal abzurufen.

**7 CD-STEUERUNG (CD CONTROL)**

**STOP [ ]:** Betätigen um die Wiedergabe zu stoppen. Es wird auf Betriebsbereitschaft geschaltet.

**SKIP [ ]:** Betätigen, um den Abnehmer zum Anfang des jeweiligen Wiedergabelitels rückzusetzen. Mit jedem weiteren Antippen wird der Abnehmer zum jeweils vorherigen Titelanfang rückgesetzt. Bei gedrückt gehaltener Taste erfolgt die Rücksetzung kontinuierlich.

**SKIP [ ]:** Betätigen, um den Abnehmer zum Anfang des jeweils nachfolgenden Titels zu setzen. Mit jedem weiteren Antippen wird der Abnehmer zum jeweils nächsten Titel weitergesetzt. Bei gedrückt gehaltener Taste erfolgt die Weitersetzung kontinuierlich.

**Suchtaste (SEARCH [ ] (rückwärts):** Diese Taste betätigen, um den Abnehmer für Suchlauf bis zu einem gewünschten Titel in Rückwärtsrichtung bewegen.

**Suchtaste (SEARCH [ ] (vorwärts):** Diese Taste betätigen, um den Abnehmer für Suchlauf in Vorwärtsrichtung zu bewegen. Bei Durchführung des Suchlaufs während der Wiedergabe bleibt der Ton bei reduzierter Lautstärke eingeschaltet.

**10:** Mit dieser Taste die Titel-Nummern zuordnen.

**+10:** Diese Taste zur Eingabe von Titelnummern über 10 oder zur Feststellung der Aufnahmezeitspanne benutzen.

**8 STEUERUNG BAND 1 (TAPE 1 CONTROL)**

**Stopptaste [ ]:** Betätigen um die Wiedergabe zu stoppen. Es wird auf Betriebsbereitschaft geschaltet.

**Musiksuchlauf (MUSIC SCAN [ ]:** Eine dieser Tasten betätigen, um Titelanfänge kurzzeitig anzuspüren.

**RICHTUNG (DIRECTION [ ]:** Zum Wechseln der Bandlaufrichtung drücken.

**Hinweis:**

- Die Laufrichtung läßt sich bei Kassettendecks, wie z.B. Modell TD-X501BK und TD-X301BK, nicht mit dieser Taste umstellen.

## REMOTE CONTROL UNIT(RM-SR450)

## FERNBEDIENUNGS- EINHEIT(RM-SR450)

Fig. 15  
Abb. 15  
Afb. 15

- 1 **FM**  
Press this button to listen to an FM broadcast.
- 2 **AM**  
Press this button to listen to an AM broadcast.
- 3 **VCR CH**  
Press this button then use the TV channel select buttons for VCR (10).
- 4 **PHONO**  
Press to listen to a turntable connected to the PHONO terminals.
- 5 **CD**  
Press to listen to a compact disc player connected to the CD terminals.
- 6 **TAPE 1**  
Press to listen to a tape deck connected to the TAPE 1 terminals.
- 7 **TAPE 2**  
Press to listen to a tape deck connected to the TAPE 2/VIDEO SOUND terminals.

**Note:**  
• Press this button to monitor the recorded sound (listening to the sound just recorded) when using a three-head tape deck.

- 8 **ACOUSTIC EXPANDER**  
Press this button to switch the acoustic expander function on or off.
- 9 **CONTROL**  
**VCR CONTROL:** Press this button to operate the VCR connected to the TAPE 2/VIDEO SOUND terminals.  
**TAPE 1 CONTROL:** Press this button to operate the tape deck connected to the TAPE 1 terminals.  
**DA TAPE:** Press this button to operate the Digital audio tape deck connected to the TAPE-2/VIDEO SOUND terminals.

**Note:**  
• Press the TAPE 2 button to listen to a DA tape.

- 10 **TV channel select buttons for VCR/Buttons for direct access to FM/AM presets or TV channels/Buttons for CD track NO operation.**  
When the FM or AM button has been pressed, these buttons can be used to select the preset station by pressing the preset station number as follows.
  - 1) For channels one to nine: push the "0" button, then the desired channel number, e.g., "0" — "1" (channel 1), "0" — "2" (channel 2).
  - 2) For channels ten and above: push the buttons in the order the digits of the channel number appear, e.g., "1" — "0" (channel 10), "1" — "1" (channel 11).

- 1 **UKW-Taste (FM)**  
Diese Taste für UKW-Empfang drücken.
- 2 **MW-Taste (AM)**  
Diese Taste für MW-Empfang drücken.
- 3 **VCR CH**  
Diese Taste drücken, dann die Fernsehkanal-Wahl Tasten für den Videorecorder (10) verwenden.
- 4 **PHONO**  
Betätigen, um vom an den PHONO-Buchsen angeschlossenen Plattenspieler wiederzugeben.
- 5 **CD**  
Betätigen, um von dem an den CD-Buchsen angeschlossenen CD-Player wiederzugeben.
- 6 **TAPE 1**  
Betätigen, um von dem an den TAPE 1-Buchsen angeschlossenen Kassettendeck wiederzugeben.
- 7 **TAPE 2**  
Betätigen, um vom an den TAPE 2/VIDEO SOUND-Buchsen angeschlossenen Cassettendeck wiederzugeben.

**Hinweis:**

• Bei Verwendung eines mit Hinterbandkontrolle ausgestattete Bandgeräts diese Funktion verwenden, um bei Aufnahme das Hinterbandsignal überwachen zu können.

- 8 **Akustikerweiterung-Taste (ACOUSTIC EXPANDER)**  
Durch Drücken dieser Taste wird die Akustikerweiterung-Funktion ein- und ausgeschaltet.
  - 9 **STEUERUNG (CONTROL)**  
**VCR CONTROL:** Diese Taste für Bedienung des an den TAPE 2/VIDEO SOUND-Anschlüssen angeschlossenen Videorekorders drücken.  
**TAPE 1 CONTROL:** Diese Taste für Bedienung des an den TAPE 1-Anschlüssen angeschlossenen Kassettendecks drücken.  
**DAT-Magnettonband (DA TAPE):** Diese Taste drücken, um ein an die TAPE-2/VIDEO SOUND-Buchsen angeschlossenes Digital-Audio-Kassettendeck (DA) zu betreiben.
- Hinweis:**  
• Zum Abspielen eines DAT-Magnettonbands Taste TAPE 2 betätigen.

- 10 **Fernsehskanal-Wahl Tasten für Videorecorder/Direktzugriffstasten für FM/AM-Senderspeicher und TV-Kanäle/Tasten für CD-Titel-Nr.-Betrie**  
Nach Drücken der FM- oder AM-Taste dienen diese Tasten zum Wählen eines gespeicherten Senders durch Drücken der Nummer des gespeicherten Senders.
  - 1) Für Kanäle eins bis neun: die Taste "0" und dann die gewünschte Kanalnummer drücken. Z.B. "0" — "1" (Kanal 1), "0" — "2" (Kanal 2).
  - 2) Für Kanäle zehn und höher: die Tasten in der Reihenfolge der Stellen der Kanalnummer drücken. z.B. "1" — "0" (Kanal 10), "1" — "1" (Kanal 11).

**⑤ ACOUSTIC EXPANDER**

When this button is pressed, the ACOUSTIC EXPANDER indicator lights and the sound image is expanded; a monaural signal will be given a stereo effect and a stereo signal sounds better.

**Notes:**

- When a TV or VCR is monaural, use the L and R distributor (mono — L and R) for connecting the left and right terminals.
- The ACOUSTIC EXPANDER sound effect cannot be recorded.

**⑥ VOLUME (DOWN/UP)**

Adjust the volume of speakers or headphones. Press the UP button once to increase the volume by one step, and the DOWN button once to decrease it by one step; this level is shown by the VOLUME indicator. Holding down one of these buttons will cause the volume to progressively rise or fall.

**⑦ MUTE**

Press this button, and the MUTE indicator will light and the sound will be instantaneously muted. To return the volume to its original level, press this button again, or press the BALANCE or VOLUME buttons.

**⑤ Akustikerweiterung-Taste (ACOUSTIC EXPANDER)**

Wenn diese Taste gedrückt wird, leuchtet die ACOUSTIC EXPANDER-Anzeige. Dann wird das Klangbild erweitert, Monosignale erhalten einen Stereoeffekt und Stereosignale klingen noch besser.

**Hinweise:**

- Bei Verwendung eines Mono-Fernsehers oder -Videorekorders den linken und rechten Verteiler (Mono-L and R) zum Anschließen der rechten und linken Anschlüsse verwenden.
- Der Klangeffekt mit Akustikerweiterung kann nicht aufgenommen werden.

**⑥ Lautstärke-Aufwärts/Abwärts-Tasten (VOLUME DOWN/UP)**

Diese Tasten dienen zur Einstellung der Lautstärke der Lautsprecher und des Kopfhörers. Durch Drücken der UP-Taste wird die Lautstärke um eine Stufe erhöht und durch Drücken der DOWN-Taste um eine Stufe gesenkt. Die Lautstärke wird von der VOLUME-Anzeige angezeigt. Wird eine dieser Tasten gedrückt gehalten, wird die Lautstärke fortlaufend erhöht bzw. gesenkt.

**⑦ Dämpfung-Taste (MUTE)**

Durch Drücken dieser Taste leuchtet die MUTE-Anzeige, und der Klang wird augenblicklich gedämpft. Durch erneutes Drücken dieser Taste oder der BALANCE- oder VOLUME-Taste wird der vorige Lautstärkepegel wieder hergestellt.

② **PRESET SCAN**

This button permits scanning of the preset stations. When this button is pressed, preset station 1 is tuned in, and its number flashes for about five seconds. This continues for each of the other stations, until all 16 (in the AM or FM band) have been scanned. When the desired station is received, pressing the PRESET SCAN button stops the scanning and the RX-450BK/RX-450LBK remains tuned to the station. If no stations were selected during this function, the frequency tuned to before this function was initiated is tuned to again.

② **PRESET SELECT**

Press to set to preset channels 1 — 8 or 9 — 16, 1 — 8 or 9 — 16 PRESET SELECT indicator lights. Up to 16 stations for each band (FM 16, AM 16) can be preset as required. Even when you pushed MEMORY button and then changed 1 — 8 and 9 — 16 by pressing this button, it is possible to accomplish preset memory by pressing the TUNER PRESET STATIONS button.

② **AUTO MEMORY**

Press this button and one of the TUNER PRESET STATIONS buttons to scan and preset broadcasts automatically. Starting from the frequency being displayed, the tuner tunes into increasingly higher frequencies, until a broadcast is tuned in. Then, the TUNED indicator lights and the channel number you have pressed earlier flickers for three seconds. If you don't wish to store this station in memory, press this button within four seconds, and the scan function will start again. Otherwise, the MEMORY indicator and channel number light together and the frequency is stored in that channel. Then, up-scanning continues. This process continues until the highest numbered channel preset station has a frequency stored in its memory. If the frequency reaches its upper limit, the auto memory function stops and the channel number in which the highest frequency is stored in memory is shown. If the upper limit of the frequency band is reached before this happens, the upper limit frequency is shown. Otherwise, when this process ends, the last frequency tuned to and its corresponding channel number are displayed.

**Note:**

- To cancel the auto memory function, press one of the buttons in the tuner section other than the AUTO MEMORY or PRESET SELECT button.

② **Speicherabtastung-Taste (PRESET SCAN)**

Diese Taste ermöglicht Absuchen der gespeicherten Sender. Wenn diese Taste gedrückt wird, wird Senderspeicher 1 eingestellt, und die Nummer blinkt für etwa fünf Sekunden. Dies wird für alle anderen gespeicherten Sender fortgesetzt, bis alle 15 (im UKW- oder MW-Wellenband) abgesucht wurden. Wenn der gewünschte Sender empfangen wird, stoppt der Suchvorgang durch Drücken der PRESET SCAN-Taste, und der RX-450BK/RX-450LBK empfängt diesen Sender. Wird während dieses Suchvorgangs kein Sender gewählt, wird wieder der Sender empfangen, der vor Durchführung dieser Speicherabtastung empfangen wurde.

② **Speichervorwahl-Taste (PRESET SELECT)**

Diese Taste drücken, um die Vorwahlkanäle 1 — 8 oder 9 — 16 einzustellen. Die 1 — 8 oder 9 — 16 PRESET SELECT-Anzeige leuchtet. Bis zu 16 Sender können für jedes Wellenband (UKW 16, MW 16) gespeichert werden. Auch wenn die MEMORY-Taste gedrückt und dann durch Drücken dieser Taste 1 — 8 und 9 — 16 geändert wurde, ist es möglich, durch Drücken der TUNER PRESET STATIONS-Taste Vorwahlspeicherung durchzuführen.

② **Auto-Speichertaste (AUTO MEMORY)**

Zum automatischen Absuchen und Speichern von Radiosendern diese Taste und eine der TUNER PRESET STATIONS-Tasten drücken. Die Empfangsfrequenz wird beginnend mit der angezeigten Frequenz automatisch erhöht, bis ein Sender gefunden ist. Dann leuchtet die TUNED-Anzeige und die zuvor gedrückte Kanalnummer blinkt für drei Sekunden. Soll dieser Sender nicht in den Speicher eingegeben werden, diese Taste innerhalb von 4 Sekunden drücken, und die Absuchfunktion beginnt erneut. Ansonsten leuchten die MEMORY-Anzeige und Kanalnummer zusammen, und die Frequenz wird in diesem Kanal gespeichert. Danach wird das Absuchen in Aufwärtsrichtung fortgesetzt, bis die höchste Kanalnummer der Stationstasten eine Frequenz gespeichert hat.

Wenn die Frequenz die obere Grenze erreicht hat, stoppt die automatische Speicherfunktion, und die Kanalnummer, in der die höchste Frequenz gespeichert ist, wird angezeigt. Wenn die obere Grenze des Frequenzbereiches erreicht wird, bevor dies geschieht, wird die obere Frequenzgrenze angezeigt. Ansonsten werden nach Beendigung des Vorgangs die letzte abgestimmte Frequenz und der entsprechende Kanal angezeigt.

**Hinweis:**

- Zur Abschaltung der Automatikspeicherfunktion eine Taste des Tunerteils (mit Ausnahme von AUTO MEMORY- und PRESET SELECT-Taste) betätigen.

- 10 FM/AM indicator**  
"FM" is displayed during FM reception and "AM" during AM reception.
- 11 Frequency indicator**  
The tuned-in frequency is displayed digitally. Four digits (kHz) are displayed during AM reception, five digits (MHz) (for Europe, U.K., Australia, and other countries) or four digits (MHz) (for U.S.A. and Canada) are displayed during FM reception.
- 12 CATV indicator (only for the U.S.A. and Canada)**  
When the CATV button is pressed to on, this indicator lights to show that this unit receives CATV programs.
- 13 TUNER PRESET indicator**  
When the one of the TUNER PRESET STATIONS buttons is pressed, this indicator shows its preset station number.
- 14 PRESET SELECT indicator**  
Each time the PRESET SELECT button is pressed, this indicator shows "1 — 8" or "9 — 16" to show the group of preset stations to be selected.
- 15 STEREO indicator**  
When an FM stereo broadcast is being received, this indicator lights. When the MODE indicator shows "MONO", this indicator will not light even if a stereo FM broadcast is being received. In that case, press the FM MODE/MUTE button so that "AUTO" is shown.
- 16 AUTO MEMORY indicator**  
Lights when the AUTO MEMORY button is set to on.
- 17 FM MODE/FM MUTE indicators**  
These indicators show AUTO/ON or MONO/OFF according to the setting of the FM MODE/MUTE button.
- 18 MEMORY indicator**  
Lights for about five seconds when the MEMORY button is pressed to on, or for one second when a frequency is stored in memory during auto memory.
- 19 TUNED indicator**  
When a broadcast is being received, this indicator lights.
- 20 TUNER PRESET STATIONS**  
These buttons are used to select one of the preset stations or to store a frequency in memory. When one of these buttons is pressed, the preset number is shown by the TUNER PRESET indicator.  
If one of these buttons is pressed when the MEMORY button has been pressed, the frequency which is being received will be stored in memory.
- 21 FM MODE/MUTE**  
For normal FM reception and automatic elimination of interstation noise, press this button so that FM MODE's "AUTO" and FM MUTE's "ON" light in the display.  
When receiving a weak or noisy FM stereo broadcast, press this button so that "MONO" of FM MODE and "OFF" of FM MUTE light; the broadcast will be heard in mono but the clarity of reception will be improved.
- 10 UKW/MW-Anzeige (FM/AM)**  
Bei UKW-Empfang wird "FM" und bei MW-Empfang "AM" angezeigt.
- 11 Frequenz-Anzeige**  
Die Empfangsfrequenz wird digital angezeigt. Bei MW-Empfang werden vier Stellen (kHz) und bei UKW-Empfang fünf Stellen (MHz) (Europa, Großbritannien, Australien und andere Länder) bzw. vier Stellen (MHz) (USA und Kanada) angezeigt.
- 12 CATV-Anzeige (nur für die USA und Kanada)**  
Wenn die CATV-Taste gedrückt ist zeigt diese leuchtende Anzeige, daß CATV-Programme empfangen werden.
- 13 Stationstasten-Anzeige (TUNER PRESET)**  
Wenn eine der TUNER PRESET STATIONS-Tasten gedrückt wird, zeigt diese Anzeige die Nummer der Stationstaste.
- 14 Speichervorwahl-Anzeige (PRESET SELECT)**  
Mit jedem Drücken der PRESET SELECT-Taste zeigt diese Anzeige mit "1 — 8" oder "9 — 16" die Gruppe der gewählten Stationstasten.
- 15 Stereo-Anzeige (STEREO)**  
Diese Anzeige leuchtet, wenn ein UKW-Stereosender empfangen wird. Wenn die MODE-Anzeige "MONO" anzeigt, leuchtet diese Anzeige nicht, auch wenn ein UKW-Stereosender empfangen wird. In diesem Fall die FM MODE/MUTE-Taste drücken, so daß "AUTO" auf der Anzeige erscheint.
- 16 Auto-Speicherung-Anzeige (AUTO MEMORY)**  
Diese Anzeige leuchtet, wenn die AUTO MEMORY-Taste auf ON steht.
- 17 UKW-Empfangsart/UKW-Dämpfung-Anzeigen (FM MODE/FM MUTE)**  
Diese Anzeigen zeigen entsprechend der Einstellung der FM MODE/MUTE-Taste "AUTO"/"ON" oder "MONO"/"OFF" an.
- 18 Speicher-Anzeige (MEMORY)**  
Leuchtet für etwa fünf Sekunden, wenn die MEMORY-Taste gedrückt wird, oder für eine Sekunde, wenn bei der automatischen Speicherung eine Frequenz gespeichert wird.
- 19 Abstimm-Anzeige (TUNED)**  
Diese Anzeige leuchtet, wenn ein Radiosender empfangen wird.
- 20 Tunervorwahl-Tasten (TUNER PRESET STATIONS)**  
Diese Tasten dienen zum Abrufen oder zum Speichern von Sendern.  
Wird eine dieser Tasten gedrückt, wird die Vorwahlnummer auf der TUNER PRESET-Anzeige angezeigt. Wird eine dieser Tasten nach Drücken der MEMORY-Taste gedrückt, wird die empfangene Frequenz gespeichert.
- 21 UKW-Empfangsart/Dämpfung-Taste (FM MODE/MUTE)**  
Für normalen UKW-Empfang und automatische Unterdrückung der Störgeräusche zwischen den Sendern diese Taste drücken, so daß "AUTO" für FM MODE und "ON" für FM MUTE auf dem Display leuchten.  
Beim Empfang eines schwachen oder verrauschten UKW-Stereosenders diese Taste drücken, so daß "MONO" für FM MODE und "OFF" für FM MUTE leuchten, dann wird der Sender in Mono gehört, aber der Empfang ist viel klarer.

### 3. FM/MW/LW Tuner Alignment Procedures

#### 3-(1) Front-end Section

FM oscillator coil : L103

1. Set the frequency display to "108.0 MHz" and the FM MODE switch to "MONO" position.
2. Confirm that the noise occurs in the condition of no signal input.
3. Adjust L103 so that the output of test point "TP251" becomes  $8.3 \text{ V} \pm 0.1 \text{ V}$ .
4. Set the frequency display to "87.5 MHz" and confirm that the output of test point "TP251" is  $1.8 \text{ V} \pm 0.3 \text{ V}$ .

FM antenna coil : L101, L102

5. Adjust L101 and L102 to obtain the maximum sensitivity at 89.9 MHz.

FM antenna trimmer : TC101, TC102

6. Adjust TC101 and TC102 to obtain the maximum sensitivity at 105.9 MHz.
7. Repeat the above adjustments of L101, L102, TC101 and TC102.

#### 3-(2) IF, Detection and MPX

FM detector coil : T141, T142

1. Connect a center-meter or a digital voltmeter to test point "TP141", and tune in a 100.1 MHz signal (1 kHz modulation, 75 kHz or 40 kHz deviation) in the condition of SSG ATT 70dB.
2. Adjust T141 so that the center-meter indicates "0" or the digital voltmeter reads  $0 \text{ mV} \pm 1.5 \text{ mV}$ .
3. At the same time, adjust T142 so that the distortion of audio output is minimized.

Stereo Separation : VR171 (for Continental Europe, U.K. and Australia)

1. Tune in a 98.1 MHz stereo signal.
2. Adjust VR171 so that the channel separation becomes maximum.

#### 3-(3) LW Section

LW oscillator coil : L221

1. Set the frequency display to 144 kHz.
  2. Adjust L221 to obtain  $1.0 \text{ V} \pm 0.1 \text{ V}$  at test point "TP251".
  3. Set the frequency display to 353 kHz and confirm that the output of test point "TP251" is  $7.2 \text{ V} \pm 1.2 \text{ V}$ .
- Note: If its output is over 9 V at 353 kHz, adjust L221 to obtain 9.0 V.

LW antenna coil : T221

4. Connect a loop antenna to the "AM LOOP" terminal on the rear panel.
5. Adjust T221 to obtain the best receiving sensitivity on 164 kHz.

LW antenna trimmer : TC221

6. Adjust TC221 to obtain the best receiving sensitivity on 353 kHz.
7. Repeat the above adjustments of T221, TC221.

Note: After this alignment, confirm the MW section alignment

#### 3-(4) MW Section

MW oscillator coil : L201

1. Set the frequency display to (522 kHz or 530 kHz) and confirm that the output of test point "TP251" is  $1.1 \text{ V} \pm 0.2 \text{ V}$ .
2. Set the frequency display to 1710 kHz (for U.S.A. only) and confirm that the output of test point "TP251" is  $8.2 \text{ V} \pm 0.8 \text{ V}$ .
3. Set the frequency display to 1629 kHz or 1630 kHz (except for U.S.A.) and confirm that the output of test point "TP251" is  $7.5 \text{ V} \pm 0.8 \text{ V}$ .

MW antenna coil : T201

4. Connect a loop antenna to the "AM LOOP" terminal on the rear panel.
5. Adjust T201 to obtain the best receiving sensitivity on (603 kHz or 600 kHz).

MW antenna trimmer : TC201

6. Adjust TC201 to obtain the best receiving sensitivity on (1404 kHz or 1400 kHz).
7. Repeat the above adjustments of T201, TC201.

**63 Hz:** Raise to emphasize the very low bass response of organs, drums, and contrabass. It produces stable and solid sound with emphasis and eliminates the unclear sound response of low frequencies with de-emphasis.

**160 Hz:** Emphasize to obtain a more expanded low sound. De-emphasize to eliminate unclear sound caused by large or nearly empty listening rooms.

**400 Hz:** This frequency range is the base on which music is constructed. Emphasize to really put a punch in your music.

**1 kHz:** Most effective in emphasizing or de-emphasizing the human voice. Emphasize to cause the vocalist to be brought to the foreground, or de-emphasize to cause it to recede into the background.

**2.5 kHz:** This frequency stimulates the human ear. If the music sounds hard or metallic, de-emphasize.

**6.3 kHz:** Boost to add clarity to winds and strings. This frequency band varies the tonal expression, influencing the subtleties of the music.

**16 kHz:** Boosting this frequency range properly adds to the delicacy of highs, with cymbals and triangles resounding in a more ear-pleasing manner, and provides a feeling of extension. This frequency band can also be used to compensate for cartridge response since most moving-magnet cartridges have their resonance peaks in the frequency range from 10 kHz to 20 kHz.

**3 SOURCE INDICATOR**

This shows which audio signal has been selected with the source selectors, for listening to or recording.

**4 LOUDNESS indicator**

When the LOUDNESS button has been pressed, this indicator lights.

**5 MUTE indicator**

This indicator lights when the MUTE button has been pressed. Press it again returns the volume to its original level. Pressing the VOLUME UP/DOWN buttons also cancels the muting.

**6 VOLUME/BALANCE indicator**

This indicator is used as the VOLUME or BALANCE indicator. Normally, "VOLUME" lights and this indicator shows the level of sound going to the speakers or headphones. When the BALANCE buttons are pressed, "BALANCE", the center bar, "L" and "R" light and the balance between the right and left speakers is shown.

The display continues in the BALANCE indication mode for about five seconds, and then returns to the VOLUME indication mode.

**7 TAPE-2 MONITOR**

When the TAPE 2/VIDEO SOUND button has been pressed, this indicator lights.

**8 ACOUSTIC EXPANDER indicator**

This indicator lights when the ACOUSTIC EXPANDER button has been pressed to ON.

**9 SEA REC indicator**

When the SEA REC button is pressed, the REC lights to show that the S.E.A. is processing the signals output from the REC OUT terminals.

**63 Hz:** Erhöhen, um die sehr tiefen Bässe von Orgel, Trommel und Kontrabass hervorzuheben. Erhöhung erzeugt einen stabilen und soliden Klang, Senkung unterdrückt die unklare Klangreproduktion von niedrigen Frequenzen.

**160 Hz:** Erhöhen, um einen weiteren tiefen Klang zu erhalten. Durch Senken wird der unklare Klang durch große oder fast leere Räume beseitigt.

**400 Hz:** Dieser Frequenzbereich bildet die Grundlage jeder Musik. Durch Erhöhung kann die Musik besonders betont werden.

**1 kHz:** Dieser Bereich ist am wirkungsvollsten zum Hervorheben oder Dämpfen der menschlichen Stimme. Durch Erhöhung werden Stimmen in den Vordergrund und durch Senkung in den Hintergrund gebracht.

**2,5 kHz:** Diese Frequenz regt das menschliche Ohr an. Wenn die Musik hart oder metallisch klingt, diesen Bereich senken.

**6,3 kHz:** Erhöhen, um die Streich- und Blasinstrumente klarer zu machen. Dieser Frequenzbereich variiert den tonalen Ausdruck und beeinflusst die Nuancen der Musik.

**16 kHz:** Durch Erhöhen dieses Frequenzbereiches werden die Höhen delikater, Becken und Triangel klingen angenehmer, wodurch ein Gefühl der Erweiterung entsteht. Dieser Frequenzbereich kann auch zum Kompensieren der Frequenzgänge von Tonabnehmern verwendet werden, da die meisten magnetischen Tonabnehmer ihre Resonanzspitzen im Bereich von 10 kHz bis 20 kHz aufweisen.

**3 Signalquellen-Indikator (SOURCE INDICATOR)**

Diese Anzeige zeigt, welches Audiosignal mit den Signalquellenwählern für Wiedergabe oder Aufnahme gewählt wurde.

**4 Lautstärkekontur-Anzeige (LOUDNESS)**

Diese Anzeige leuchtet, wenn die LOUDNESS-Taste gedrückt wurde.

**5 Dämpfungsanzeige (MUTE)**

Diese Anzeige leuchtet nach Betätigen der MUTE-Taste. Durch nochmaliges Betätigen wird wieder auf die ursprüngliche Lautstärke geschaltet; ebenfalls durch Betätigen der VOLUME UP/DOWN-Taste.

**6 Lautstärke/Balance-Anzeige (VOLUME/BALANCE)**

Diese Anzeige dient als VOLUME oder BALANCE-Anzeige. Normalerweise, leuchtet "VOLUME", und diese Anzeige zeigt den Klangpegel, der den Lautsprechern oder dem Kopfhörer zugeführt wird. Werden die BALANCE-Tasten gedrückt, leuchten "BALANCE", der Mittelbalken, "L" und "R", und die Balance zwischen dem rechten und linken Lautsprecher wird angezeigt. Die Anzeige zeigt die BALANCE-Einstellung für fünf Sekunden an und kehrt dann zur VOLUME-Anzeigefunktion zurück.

**7 TAPE-2 MONITOR**

Bei Drücken der Taste TAPE 2/VIDEO SOUND leuchtet die entsprechende Anzeige auf.

**8 Akustikerweiterung-Anzeige (ACOUSTIC EXPANDER)**

Diese Anzeige leuchtet, wenn die ACOUSTIC EXPANDER-Taste auf ON gedrückt wurde.

**9 SEA REC-Anzeige (SEA REC)**

Wenn die SEA REC-Taste gedrückt wird, leuchtet die REC-Anzeige. Dann werden die Signale, die von den REC OUT-Anschlüssen kommen, im S.E.A. geregelt.

Fig. 14

Afb. 14

1 Alimentation (POWER)

ON (⏻): Appuyer pour mettre l'alimentation. Pour couper l'alimentation, appuyer une nouvelle fois.

STAND BY (⏻): Même quand tous les indicateurs sont coupés, le circuit de mémoire fonctionne et les stations pré-réglées et les sélecteurs de source ne sont pas annulés ou modifiés par accident tant que le cordon secteur est branché sur une prise de courant CA. Cet état est appelé le mode STAND BY. Les informations pré-réglées et les sélections de source sont maintenues même en cas de panne de courant ou quand le cordon secteur est débranché à condition que la période d'absence d'alimentation n'excède pas deux jours.

Remarque:

• Même dans le mode STAND BY, cet amplificateur consomme une faible quantité d'électricité (5 watts). Pour couper complètement l'alimentation, débrancher le cordon secteur.

2 Niveau SEA (SEA LEVEL)

L'égaliseur graphique incorporé divise le spectre audio en sept gammes de fréquences dont les fréquences centrales vont de 63 Hz à 16 kHz à des intervalles de 4/3 octave.

Quand le niveau S.E.A. est réglé sur '0' (position centrale), la réponse en fréquence est uniforme.

La réponse peut être variée de  $\pm 10$  dB, en élevant ou abaissant cette commande.

1 Spanning toets (POWER)

ON (⏻): Indrukken om de spanning in te schakelen. Nogmaals indrukken om de spanning weer uit te schakelen.

STAND BY (⏻): Zelfs wanneer alle indicatoren uit zijn werkt het geheugencircuit en worden de voorkeuzesenders en bronkeuzeschakelaars niet uitgewist of onverhoeds gewijzigd zolang de stekker in het stopcontact gestoken is. Deze situatie wordt de STAND-BY-toestand genoemd. De voorkeuzedata en de data voor bronkeuze worden zelfs bij uitvallen van de spanning of wanneer de stekker uit het stopcontact gehaald wordt, in het geheugen vastgehouden mits die periode niet langer dan enkele dagen bedraagt.

Opmerking:

• Zelfs wanneer de STAND BY-functie van dit toestel ingeschakeld is, verbruikt deze versterker een kleine hoeveelheid stroom (5 Watt). Haal de stekker uit het stopcontact om de spanning volledig uit te schakelen.

2 SEA niveau toets (SEA LEVEL)

De ingebouwde grafische equalizer verdeelt het audiospectrum in zeven frequentiebanden met middenfrequenties van 63 Hz tot 16 kHz met intervallen van 4/3 oktaaf.

De frequentie karakteristiek is ongecompenseerd wanneer het SEA niveau op '0' (middenstand) gezet wordt. Het karakteristiek kan met  $\pm 10$  dB worden gevarieerd door de regelaars naar boven of beneden te schuiven.

1 POWER

ON (⏻): Presione para encender la unidad y vuelva a presionar para apagarla.

STAND BY (⏻): Aun cuando todos los indicadores estén apagados, el circuito de la memoria funciona y las estaciones presintonizadas y los selectores de fuentes no están expuestos a anulaciones o alteraciones accidentales mientras el cordón de alimentación esté enchufado en un tomacorriente de alterna. Esta condición es llamada "modo de espera" (STAND BY). Los datos preajustados y los de selección de fuente se mantienen aun en el caso de una falla de alimentación o desconexión del cordón, siempre que el periodo de falta de energía eléctrica no se prolongue por más de dos días.

Nota:

• Aun en el modo STAND BY, este receptor consume una pequeña cantidad de electricidad (5 vatios). Desenchufe el cordón de alimentación para desconectar completamente la alimentación.

2 Nivel SEA (SEA LEVEL)

El ecualizador gráfico incorporado divide el espectro de audio en siete bandas de frecuencia, con frecuencias centrales de 63 Hz a 16 kHz en intervalos de 4/3 de octavas.

Cuando el nivel S.E.A. se ajusta a '0' (posición central), la respuesta de frecuencia es plana. Dicha respuesta puede variar en  $\pm 10$  dB subiendo o bajando la perilla.
