

## Product Release Information

***A new generation of the popular GSM desktop telephone GDP-04 has been launched***

November 9, 2007

More than a year ago, JabloCOM launched the new product line of GSM Desktop Phones - GDP-04. The new phone has been taken very well by customers, who use it in their wireless offices as well as at their homes.

The main strategy of JabloCOM is continuous product innovations. We listen to our customers' feedback very carefully and today, we can introduce **a new generation of the GDP-04 phone as well as of the JabloSuite call management software**. What are the most important new features?

- ☛ MS Windows Vista compliance
- ☛ GPRS data connection or PC-fax transmission with operating JabloSuite at the same time
- ☛ Supports extended memory of the new HW - up to 500 names and 1000 phone numbers stored in the phonbook and up to 100 SMS stored in the phone memory
- ☛ Phone can store and dial phone numbers that contains brackets, spaces, hyphens, comas or other characters that appears in the PC format very often
- ☛ First name/Last name separation allows more reliable synchronisation with e-mail clients
- ☛ Stand-by screen shows icons for an active GPRS connection and for an active unconditional call divert
- ☛ Proactive STK commands support
- ☛ User can set up its own language set
- ☛ Automatic for date&time setting appears after switching the phone on if the time has not been correctly set yet.
- ☛ A new version of the integrated UpdateTool makes firmware updates much easier and more comfortable for users

The new generation extends the scope of using GDP-04 primarily in wireless office projects. Cooperation with the PC is very comfortable now. The **unlimited archive of calls and text messages** opens doors for completely new applications.

**The new SW version is available also for customers using the previous version.** The unique concept of updating the firmware by users directly from the JabloCOM's update server allows them to update their phone via Internet in few minutes. This update service is available **free of charge for all GDP-04 users**. The detail update information you can find on JabloCOM web site - [www.jablocom.com](http://www.jablocom.com).
