

Follow these steps to configure your GDP-04 GPRS internet connection:

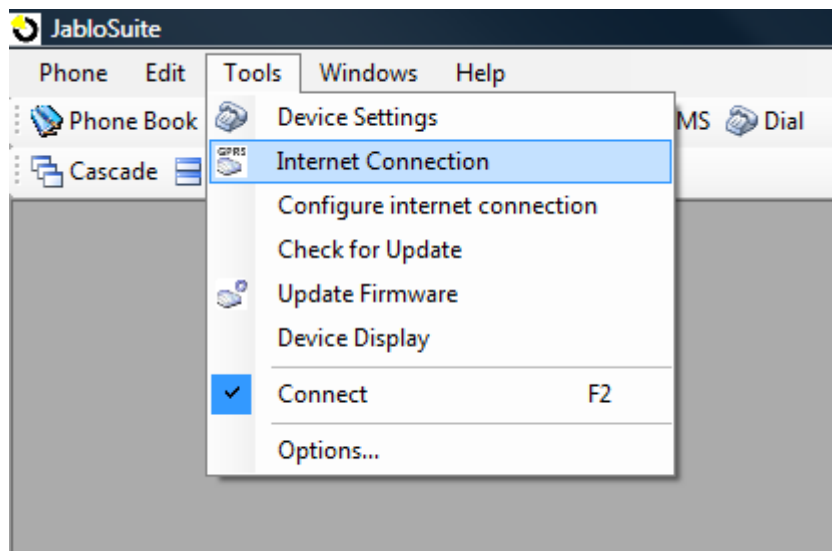

1. Run JabloSuite from menu *Start* ⇒ *Programs* ⇒ *JabloCom* ⇒ *JabloSuite* ⇒ *JabloSuite* or open it from the icon on your desktop.
2. Synchronization dialog will appear - click **Yes** or **No** to continue.
3. "Check for updates" window may appear - click **No**.
4. Start Internet connection tool from the *Menu* ⇒ *Tools* ⇒ *Configure internet connection*.

5. Select your Country and GSM provider and click **Apply**. If the Country or GSM provider is not in listed, contact your GSM provider to get the APN, Name and Password settings. Fill in these settings to the form and click **Apply**.

6. You can connect your PC to the Internet through GDP-04 from JabloSuite now.

7. A standard dial-up network connection screen appears. Press Dial to connect to the Internet.

8. GDP-04 screen indicates GPRS connection by displaying a "G" icon in the top of the screen.
