

Introduction

This document contains information on the 4500-QIVC-TLS Test Lead Set. These test lead sets are short, 6-inch cables used to adapt from the male 15 dsUB connectors on the 4500-CQIV-* cables (* = -0.5A, -1A, -2A, -3A for 0.5m, 1m, 2m or 3m lengths) to alligator clips.

WARNING Take care not to contact exposed leads and terminals to avoid possible electric shock.

Test lead designations

Table 1 lists connections for the test lead set. See Section 2 of the relevant QIVC card manual for complete connection details.

Table 1
4500-QIVC test lead connector pinout

Connector pin	Wire color	Signals
1	Yellow	V Bias HI
2	Orange	Guard
3	Red	I Source HI (with 11)
