Drivers, Libraries, Examples, and More
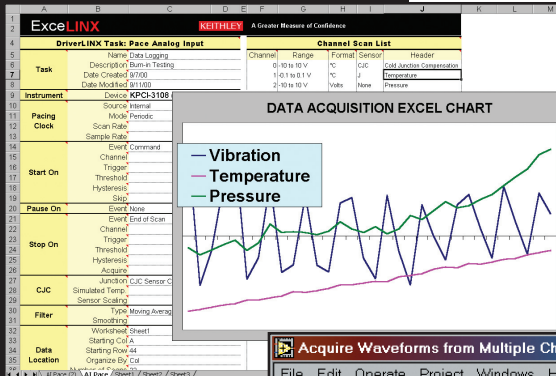

Keithley provides a variety of free software tools to help you get your test or data acquisition system "Up & Running" quickly. Our tools run under Windows and/or DOS, and support popular communications busses, including GPIB, Ethernet, RS-232, PCI, ISA, and PCMCIA. We have tools to support today's most popular programming languages and applications, including:

- IVI/VISA-based drivers

- VXI plug & play drivers

- Visual Basic, Visual C/C++ drivers
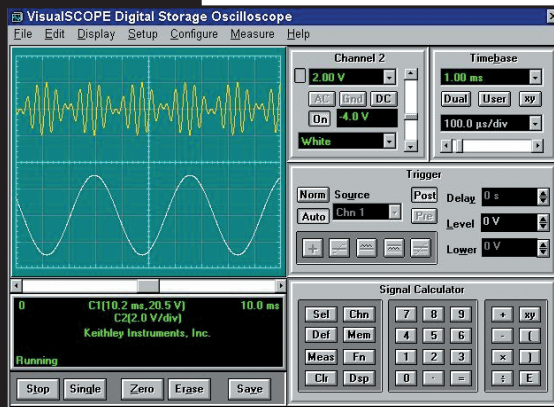

- TestPoint libraries
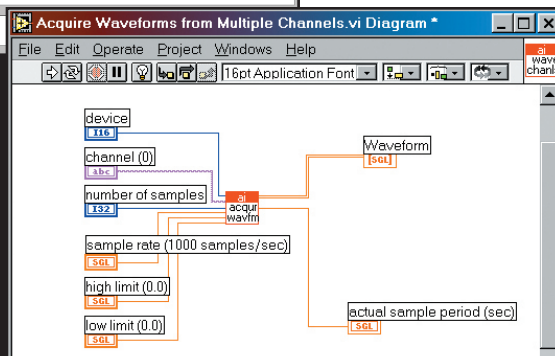

- 32-bit device drivers

- LabVIEW drivers and VIs

- LabWindows/CVI drivers

- Excel add-ins

- Startup software

- MATLAB, Delphi, Visual Studio.Net examples

- Diagnostic utilities

- Runtime applications software

- Code "snippets"

- Example programs for a variety of languages and applications
