#### **Before Use**

#### AWARNING

English

#### To prevent injury and/or fire, take the following precautions:

- Ensure that the unit is securely installed. Otherwise it may fly out of place during collisions and other jolts.
  - When extending the ignition, battery or ground wires, make sure to use automotive-grade wires or other wires with an area of 0.75mm<sup>2</sup> (AWG18) or more to prevent cable deterioration and damage to the cable coating.
  - To prevent short circuits, never put or leave any metallic objects (e.g., coins or metal tools) inside the unit.
  - If the unit starts to emit smoke or strange smells, turn off the power immediately and consult your Kenwood dealer.
  - Do not touch the liquid crystal fluid if the LCD is damaged or broken due to shock. The liquid crystal fluid may be dangerous to your health or even fatal.
     If the liquid crystal fluid from the LCD contacts your body or clothing, wash it off with soap immediately.

#### **ACAUTION**

#### To prevent damage to the machine, take the following precautions:

- Make sure to ground the unit to a negative 12V DC power supply.
- Do not open the top or bottom covers of the unit.
- Do not install the unit in a spot exposed to direct sunlight or excessive heat or humidity. Also avoid places with too much dust or the possibility of water splashing.
- Do not subject the faceplate to excessive shock, as it is a piece of precision equipment.
- When replacing a fuse, only use a new one with the prescribed rating. Using a fuse with the wrong rating may cause your unit to malfunction.
- To prevent short circuits when replacing a fuse, first disconnect the wiring harness.
- Do not use any screws except for the ones provided. The use of improper screws might result in damage to the main unit.
- You cannot view video pictures whilst the vehicle is moving. To enjoy TV/video pictures, find a safe place to park and engage the parking brake.

#### NOTE

- If you experience problems during installation, consult your Kenwood dealer.
- If the unit does not seem to be working right, try pressing the reset button first. If that does not solve the problem, consult your Kenwood dealer.

Reset button

#### Screen brightness during low temperatures

When the temperature of the unit falls such as during winter, the liquid crystal panel's screen will become darker than usual. Normal brightness will return after using the monitor for a whilst.

#### Audio units you can control from the KVT-815DVD/745DVD/715DVD Receiver (in November of 2003):

KDC-CX89, KDC-CX87, KDC-CX85, KDC-C719, KDC-C717, KDC-C715, KDC-C669, KDC-C667, KDC-C665, KDC-C469, KDC-C467, KDC-C465, KDC-D301, KTC-9090DAB, KDV-C830, KDV-C840, KDV-C860, KTC-SR901/SR902, KPA-CP100, KTC-WB100, KTC-V500N/P/E (Set the "O-N" switch to "N" position if provided.)

#### Navigation units you can control from the KVT-815DVD/745DVD/715DVD Receiver (in November of 2003):

KNA-DV2100, KNA-DV3100

#### Loading and Replacing the battery

Use one lithium battery (CR2025). Insert the batteries with the  $\oplus$  and  $\bigcirc$  poles aligned properly, following the illustration inside the case.

#### **AWARNING**

Store unused batteries out of the reach of children. Contact a doctor immediately if the battery is accidentally swallowed.

- $\hfill \Delta$  Do not set the remote on hot places such as above the dashboard.
- The provided batteries are intended for use in operation checking, and their service life may be short.

 When the remote controllable distance becomes short, replace both of the batteries with new ones.

#### Cleaning the panel and monitor

When the operator panel and monitor panels are dirty, wipe and clean them using a soft cloth (such as a commercially available silicon coated cloth). When contaminated excessively, clean them using a cloth dipped in a neutral detergent first, then remove the detergent using a dry cloth

Do not use a hard cloth and a volatile chemical (such as an alcohol). If used, the panel surface may be scratched or printed letters may be erased.

#### Cleaning the disc slot

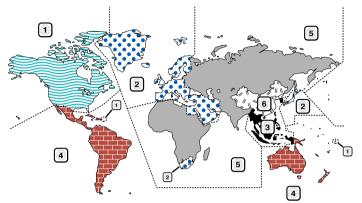

As dust can accumulate in the disc slot, clean it occasionally. Your discs can get scratched if you put them in a dusty disc slot.

#### Lens Fogging

Right after you turn on the car heater in cold weather, dew or condensation may form on the lens in the disc player of the unit. Called lens fogging, discs may be impossible to play. In such a situation, remove the disc and wait for the condensation to evaporate. If the unit still does not operate normally after a whilst, consult your Kenwood dealer.

#### Region codes in the world

The DVD players are given a region code according to the country or area it is marketed, as shown in the following map.

#### lcons on the DVD discs

lcon	Description
All	Indicates the region code where the disc can be played.
8))	Number of voice languages recorded with the audio function. The number in the icon indicates the number of voice languages. (Max. 8 languages)
32	Number of subtitle languages recorded with the subtitle function. The number in the icon indicates the number of subtitle languages. (Max. 32 languages)
	Number of angles provided by the angle function. The number in the icon indicates the number of angles. (Max. 9 angles)
16:9 LB	Aspect ratios that can be selected. "LB" stands for Letter Box and "PS" for Pan/Scan. In the example on the left, the 16:9 video can be converted into letter box video.

#### Unplayable discs

This player cannot play back any of the following discs.

- DVD-ROM/DVD-RAM discs
   HQ-VCD discs
- CDV discs (Only the audio part can be reproduced) CD-G/CD-EG/CD-EXTRA discs (Only the audio can be reproduced)
- Photo CD discs
   DVD-Audio
- Also, you cannot play back the DVD-R/RW and DVD+R/RW discs if not recorded in the DVD-Video format

#### Restrictions due to difference between discs

Some DVD and VCD discs can be played only in certain playback modes according to the intentions of the software producers. As this player plays discs according to their intentions, some functions may not work as intended by you. Please be sure to read the instructions provided with each disc. When an inhibition icon is displayed on the monitor, it indicates that the disc being played is under the restriction as described above.

The illustrations of the display and the panel appearing in this manual are examples used to explain more clearly how the controls are used. Therefore, what appears on the display in the illustrations may differ from what appears on the display on the actual equipment, and some of the illustrations on the display may represent something impossible in actual operation.

 Explanation of icons used on this manual

 Image: Indicates the key operation on the receiver.

 Image: Indicates the button you must touch.

 Image: Indicates the key or joystick operation on the remote controller.

 Image: Indicates the key or joystick operation on the remote controller.

 Image: I

Time is displayed on each control screen in the 12 hour clock display type (with AM/PM displayed) or in the 24 hour clock display type (without AM/PM displayed) depending on the sales area. The display type cannot be changed. In this instruction manual, screens of the 24 hour display type are used as examples.

#### About discs

#### Handling discs

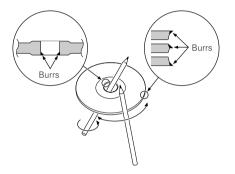

Don't touch the recording surface of the disc.

- CD-R/RW, DVD-R/RW, and DVD+R/RW are easier to damage than a normal music CD. Use a CD-R/RW, DVD-R/RW, or DVD+R/RW after reading the caution items on the package etc.
- Don't stick tape etc. on the disc. Also, don't use a disc with tape stuck on it.

#### When using a new disc

If the disc center hole or outside rim has burrs, use it after removing them with a ball pen etc.

#### Disc accessories

Don't use disc type accessories.

#### Disc cleaning

Clean from the center of the disc and move outward.

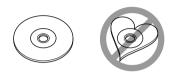

#### Removing discs

When removing discs from this unit pull them out horizontally.

#### Discs that can't be used

• Discs that aren't round can't be used.

- Discs with coloring on the recording surface or that are dirty can't be used.
- A CD-R or CD-RW that hasn't been finalized can't be played. (For the finalization process refer to your CD-R/CD-RW writing software, and your CD-R/CD-RW recorder instruction manual.)

#### Disc storage

- Don't place them in direct sunlight (On the seat or dashboard etc.) and where the temperature is high.
- Store discs in their cases.

#### Notes on playing MP3/WMA

This unit can play MP3 (MPEG1, 2 Audio Layer 3)/WMA. Note, however, that the MP3/WMA recording media and formats acceptable are limited. When writing MP3/WMA, pay attention to the following restrictions.

#### Acceptable media

The MP3/WMA recording media acceptable to this unit are CD-ROM, CD-R, and CD-RW. When using CD-RW, do full format not quick format to prevent malfunction.

#### Acceptable medium formats

The following formats are available for the media used in this unit. The maximum number of characters used for file name including the delimiter (".") and three-character extension are indicated in parentheses.

- ISO 9660 Level 1 (12 characters)
- ISO 9660 Level 2 (31 characters)
- Joliet (64 characters)
- Romeo (128 characters)

Up to 170 characters can be displayed in the long file name format. For a list of available characters, see the instruction manual of the writing software and the section Entering file and folder names below.

The media reproducible on this unit has the following limitations:

- Maximum number of directory levels: 8
- Maximum number of files per folder: 255
- Maximum number of characters for folder name: 64
  Maximum number of folders: 100

MP3/WMA written in the formats other than the above may not be successfully played and their file names or folder names are not properly displayed.

#### Settings for your MP3/WMA encoder and CD writer

Do the following setting when compressing audio data in MP3/WMA data with the MP3/WMA encoder.

• Transfer bit rate: MP3: 8 —320 kbps

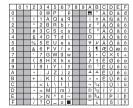

WMA: 48 —192 kbps • Sampling frequency: MP3: 32, 44.1, 48 kHz WMA: 32, 44.1, 48 kHz

When you use your CD writer to record MP3/WMA up to the maximum disc capacity, disable additional writing. For recording on an empty disc up to the maximum capacity at once, check Disc at Once.

Play mode may not be possible when portions of the functions of Windows Media Player 9 or higher are used.

#### Entering ID3 tag

The Displayable ID3 tag is ID3 version 1.x. For the character code, refer to the List of Codes.

#### Entering file and folder names

The code list characters are the only file names and folder names that can be entered and displayed. If you use any other character for entry, the file and folder names are not displayed correctly. They may neither be displayed correctly depending on the CD writer used. The unit recognizes and plays only those MP3/WMA which have the MP3/WMA extension (.MP3/.WMA).

A file with a name entered with characters not on the code list may not play correctly.

#### Writing files into a medium

When a medium containing MP3/WMA data is loaded, the unit checks all the data on the medium. If the medium contains a lot of folders or non-MP3/WMA files, therefore, it takes a long time until the unit starts playing MP3/WMA. In addition, it may take time for the unit to move to the next MP3/WMA file or a File Search or Folder Search may not be performed smoothly.

 $\bigoplus$  Loading such a medium may produce loud noise to damage the speakers.

 Do no attempt to play a medium containing a non-MP3/WMA file with the MP3/WMA extension.
 The unit mistakes non-MP3/WMA files for MP3/WMA data as long as they have the MP3/WMA extension.

• Do not attempt to play a medium containing non MP3/WMA.

#### MP3/WMA playing order

When selected for play, Folder Search, File Search, or for Folder Select, files and folders are accessed in the order in which they were written by the CD writer. Because of this, the order in which they are expected to be played may not match the order in which they are actually played. You may be able to set the order in which MP3/WMA are to be played by writing them onto a medium such as a CD-R with their file names beginning with play sequence numbers such as "01" to "99", depending on your CD writer.

#### **Opening/Closing the Monitor and Power Switch**

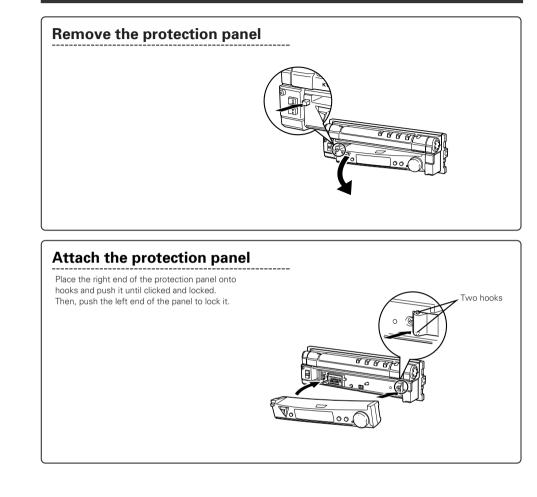

• You can automatically open or close the monitor when you turn on or off the ignition key (see page 58).

If the monitor movement is stopped by the shift lever or another obstacle when the monitor is opened, this movement is canceled by the safety function. If an obstacle is pinched by the monitor when closed, the monitor movement is also canceled by the safety function. If it has occurred, remove the obstacle and press the [OPEN/CLOSE] key again.

#### **Removing/Attaching the Protection Panel**

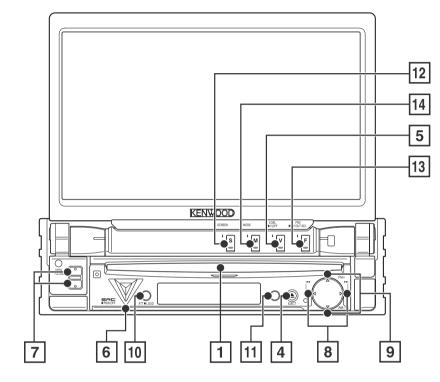

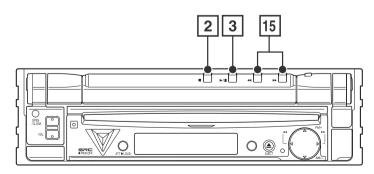

Close the monitor first, then remove or attach the protection panel.After you have removed the protection panel, you cannot operate the receiver.

• After you have removed the protection panel, you can flash the burglar alarm lamp (see page 74).

#### When the monitor is open

#### When the monitor is closed

#### 1 Play Disc

[Disc insertion slot] A disc is played when you insert it.

2 Stop to Play
 [■] key

Stops to play.

3 Play/Pause [►II] key

Pauses and replays a disc.

Eject Disc
 [EJECT] key
 The disc is ejected.

5 Switch Video Sources

[V.SEL] key The video sources are switched each time you press the key.

Navigation\*

Clears the video image when pressed more than one second. When pressed again, the original image is redisplayed.

6 Switch Audio Source/Power Supply [SRC] key

The audio sources are switched each time you press the key.

Hold down more than 1 second to turn the power supply Off. Push it again to turn power supply On. 7 Volume Controls[+]/[-] key

⑧ Track/Station Selectors [I◄◀]/[►►] key Selects a music or chapter, track, or frequency

9 Band/Folder Selectors

- [FM]/[AM] key Press the [FM] key to switch to the FM1/2/3 band or the next folder/disc. Press the [AM] key to switch to the AM band or the previous folder/disc.
- 10 Attenuator/Loudness [ATT]/[LOUD] key

Attenuates the volume. Press it again to cancel muting. Press it for more than one second to turn the Loudness function on or off. If turned on, high and low tones are enhanced during low volume.

11 KVT-815DVD Small Display [DISP] key

Switches to the Small Display. (see page 14)

#### Equalizer screen

1 4 Rudio Menu«	Tone	1
3 set up 2 src ← 5 Natural	5	
System Q-Ex	0 ff 6	
Equalizer	v	1

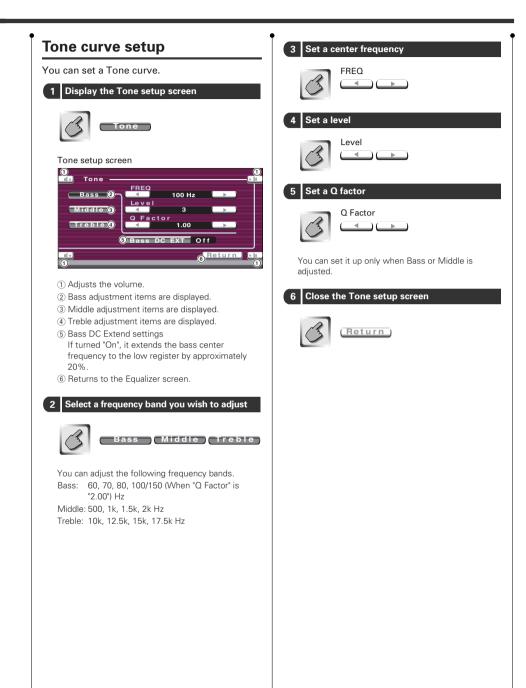

1 Adjusts the volume.

2 Returns to the Control screen of the previous source.

- 3 Calls the Setup Menu. (see page 59)
- [4] Calls the Sound Effects Menu.
- 5 Selects an equalizer curve type. You can select any of the following equalizer curves.
  - "Natural"
  - "Rock"
  - "Pops""Easy"
  - Easy
     "Top40"
  - "Jazz"

6 Selects items to be adjusted for tone curve setup. If turned "Off", only Level can be setup for tone curves.

7 Displays the Tone curve setup screen. (see page 83)

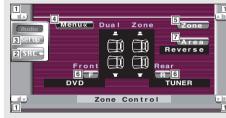

#### **Zone Control**

You can set the front and rear audio source.

### Displaying the Zone Control screen

Zone Control screen

1 Adjusts the volume.

2 Returns to the Control screen of the previous source.

3 Calls the Setup Menu. (see page 59)

- 4 Calls the Sound Effects Menu.
- Turns the Zone Function (that sets different source sounds for front and rear speakers) On or Off. When turned On, C and C are shown.
- Sets the front and rear audio source separately.(This button appears when the Zone function is On.)
- When the rear speaker sound is switched, the audio source that is output at the AV OUTPUT terminal is also switched to the same source. However, if you have set the "Area" to "Reverse", the audio source that is output at the AV OUTPUT terminal is switched depending on the front sound source.
- Switches the front and rear audio sources. (This button appears when the Zone function is On.) Use "Reverse" to change over the front and rear audio sources.

If the zone function is turned on, the (E) /(B) button appears on each source control screen, with which you can adjust the volume balance between the front and rear sources.

#### Glossary

#### **DVD: Digital Versatile Disc**

A type of disc which contains recording of audio/video packaged media with high video and audio quality, such as a movie, featuring large recording capacity and digital signal processing capability.

#### VCD: VIDEO CD

A type of CD which contains the recording of moving images. It compresses image information by about 1/120 and audio information by about 1/6 and accommodates up to 74 minutes of recording in a disc with the same diameter as ordinary music CD of 12 cm.

Some VCDs do not have the P.B.C. compatibility and are capable of playback only, while some are P.B.C.-compatible and are capable of various special playback control operations. This player can play both of these VCDs.

#### MPEG: Moving Picture Expert Group (DVD, VCD)

This is an international standard for digital video and audio compression and decompression in media.

#### Dolby Digital

This is a digital audio compression technology developed by Dolby Laboratories. It is compatible with 5.1-channel surround audio as well as normal stereo (2-channel) audio and can accommodate a large amount of audio data efficiently in a disc.

#### DTS

Name of a digital surround system developed by Digital Theater Systems, Inc.

#### Top menu/menu (DVD)

Some DVDs display more than one title in a screen. This screen is referred to as the top menu.

The menu is the item display (menu screen) for use in setting operations. The menu can be recalled any time during playback to perform settings according to the current software, including the audio switching between Dolby Digital and PCM, switching of language used in the subtitles and spoken voice.

#### Title number (DVD)

The title is the largest unit of video and audio recorded in a DVD. It usually corresponds to a single movie of video software or an album (sometimes a piece of music) of music software. The numbers assigned to individual titles are referred to as the title numbers.

#### Chapter number (DVD)

The chapter is a section of video and audio recorded in a DVD. A title is composed of several chapters. The numbers assigned to individual chapters are referred to as the chapter numbers.

#### Subtitles (DVD)

Some DVD discs contains the recording of more than one subtitle language. This player allow you to select one of the recorded subtitle languages during playback.

#### Track number (CD, VCD)

A track is also a section of video and audio recorded in a disc. The numbers assigned to individual tracks are referred to as the track numbers.

With most of music CDs, a track is assigned to a piece of music. However, with a VCD, the sections of the contents do not always correspond to the assigned tracks. As (special) playback functions such as skipping and programming of ordinary CDs are based on track number data, such playback functions are sometimes impossible with some VCDs.

#### P.B.C.: Play-Back Control (VCD)

When a VIDEO CD carries "Play Back Control capable" or similar message on the disc or jacket, desired scenes and information can be played back in an interactive manner using a hierarchical structure while viewing the menu screens displayed on the TV screen.

#### FCC WARNING

This equipment may generate or use radio frequency energy. Changes or modifications to this equipment may cause harmful interference unless the modifications are expressly approved in the instruction manual. The user could lose the authority to operate this equipment if an unauthorized change or modification is made.

#### NOTE

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment may cause harmful interference to radio communications, if it is not installed and used in accordance with the instructions. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- · Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

#### NOTE

This Class B digital apparatus complies with Canadian ICES-003.
