

KENWOOD

UNIVERSAL REMOTE CONTROL

RC-R0905

INSTRUCTION MANUAL

KENWOOD CORPORATION

About this remote control . . .

Compared to standard remote controls, this remote control has several operation modes. These modes enable the remote control to control other audio/video components. In order to effectively use the remote control, it is important to read the operating instructions and obtain a proper understanding of the remote control and how to switch its operation modes (etc.)

Using the remote control without completely understanding its design and how to switch the operation modes may result in incorrect operations.

2 Introduction

Thank you for purchasing the RC-R0905 universal remote control unit from KENWOOD.

This remote control unit is an optional unit designed for use with KENWOOD audio video receivers 1090VR and 1060VR.

For customers with the 1090VR, you can use this remote control specifically for ROOM B, allowing you to leave separate remote controls in each room. See the instruction manual supplied with your 1090VR for details.

For customers with the 1060VR, this remote control's FutureSet upgrade feature allows you to register and control components that could not be registered with the supplied remote control.

The input names and display information shown in this manual are those corresponding to the 1090VR audio video receiver. Likewise, the instructions regarding OSD operations are for 1090VR only. When using this remote control with the 1060VR, some of the input names and display information will be different. For details regarding the input names and display informations of the 1060VR, please refer to the instruction manual supplied with your receiver.

Precautions

Heat

- Avoid leaving the unit in direct sunlight or near a source of heat, such as a heater.

Water and moisture

- Avoid leaving the unit where it may be subject to high humidity.

Cleaning the unit

- When the unit becomes dirty, wipe it with a dry silicon cloth or a soft cloth. Do not use thinner, benzine, etc., as these could lead to discoloration.

Universal IR (InfraRed) remote control

In addition to the basic receiver operations, this remote control can also operate almost all of your remote controllable audio and video components. Just follow the simple setup procedure to register the components you have connected. → 6

Dual IR emitters

This remote control has two IR emitters: one to send commands in a straight line over long distances, allowing you to control the receiver and your other components from farther away; and one for wide dispersion of commands in a closer proximity, for near-field operation even when the remote control is not pointed directly at the respective component. → 5

MACRO play

The MACRO function lets you perform a series of operations automatically, like turning ON the power of the receiver and connected components, switching the input selectors, and starting playback. (Be sure to register your components before starting the macro set up procedure.) → 10

FutureSet, automatic update feature

This function lets you update the remote control so it can operate new components which do not appear in the setup code list at the end of the manual. Therefore, the remote control will always be compatible. → 14

For the U.S.A.

FCC WARNING

This equipment may generate or use radio frequency energy. Changes or modifications to this equipment may cause harmful interference unless the modifications are expressly approved in the instruction manual. The user could lose the authority to operate this equipment if an unauthorized change or modification is made.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment may cause harmful interference to radio communications, if it is not installed and used in accordance with the instructions. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

- 1 POWER key** — 6
Use to turn the receiver on and off.
Use in combination with the input selector (AUDIO, VIDEO, or TV) keys and SHIFT key to turn various components on and off.
- 2 MACRO key** — 10
Use in combination with the AUDIO, VIDEO, or TV keys to execute a series of commands automatically (MACRO PLAY).
- 3 VIDEO selector key** — 6
Selects the video inputs (VIDEO 1, VIDEO 2, VIDEO 3, VIDEO 4, AV/AUX) and sets the remote to operate the component registered at the respective input.
- 4 Multi control keys** — 24
Use to operate the selected component.
Use to operate the on-screen display (for 1090VR).
- 5 REC key** — 24
Use to operate the selected component.
- 6 TUNING/SKIP key** — 24
Use during the setup procedure to specify various settings. Use to operate the tuner or selected component.
- 7 SUBWOOFER key**
Use in combination with the VOLUME +/- keys to adjust the volume of the subwoofer.
- 8 FUNCTION SHIFT key** — 24
Use in combination with the numeric keys to execute alternate commands.

- 9 Numeric keys** — 24
Provide functions identical to those of the original remote supplied with the component you are controlling.
To access the functions printed above the keys, press within 3 seconds of pressing the FUNCTION SHIFT key. Function availability varies for each component.
- 10 SHIFT key** — 9
Use in combination with the AUDIO and VIDEO keys to change the remote control mode without changing the input selector or in combination with the POWER key to turn on and off components programmed into the remote.
- 11 TV selector key** — 6
Sets the remote to operate a TV or cable box (TV 1, TV 2, CABLE). This key does not change the input selector on the receiver.

- 12 AUDIO selector key** — 6
Selects the audio inputs (CD, TAPE1/MD, TUNER, PHONO) and sets the remote to operate the respective KENWOOD audio component.
If you connect audio components from KENWOOD and other makers to the TAPE1/MD or CD jacks, you can set the remote to operate these components by registering the appropriate setup code at the respective input.
- 13 GUIDE key** — 24
Use to activate the OSD menu functions of registered components.
- 14 VOLUME key**
Use to adjust the receiver volume.
- 15 MUTE key**
Use to temporarily mute the sound.
- 16 SOUND key**
Use to activate the Sound OSD and set the remote to OSD control mode (for 1090VR).
Use to adjust the bass, treble, and input level (for 1060VR).
- 17 LISTEN MODE key**
Use to select the desired surround mode.
- 18 SETUP key**
Use to activate the Setup OSD and set the remote to OSD control mode (for 1090VR).
Use to adjust the surround setup (for 1060VR).

Loading the batteries

① Remove the cover.

② Insert the batteries.

③ Close the cover.

• Insert four AAA-size (LR03) batteries as indicated by the polarity markings.

1. Replace all four batteries with new ones when you notice a shortening of the distance from which the remote control will operate or if the remote control blinks 5 times when you push a key. The remote control is designed to retain set up codes in memory while you change batteries.
2. Placing the remote sensor in direct sunlight, or in direct light from a high frequency fluorescent lamp may cause a malfunction. In such a case, change the location of the system installation to prevent malfunction.

Operating distance

This remote control has two IR emitters: one to send commands in a straight line over long distances, allowing you to control the receiver and your other components from farther away; and one for wide dispersion of commands in a closer proximity, for near-field operation even when the remote control is not pointed directly at the respective component.

6 The remote control supplied with this receiver is also capable of controlling components from a variety of manufacturers once you register the appropriate setup codes into the remote control unit.
Refer to "Remote operation of other components" for details about the operations available for each component. — 24

* When registering setup codes for KENWOOD audio components which are connected to this unit by system control cords, use the following codes to insure proper system control operation: Cassette: 7000, CD: 8099, MD: 9000.
 To control other KENWOOD components (VCRs, LD players, audio components not connected with system control cords, etc.) follow the procedure described below.

Low battery warning

Replace all four batteries with new ones when you notice a shortening of the distance from which the remote control will operate or if the remote control blinks 5 times when you push a key. The remote control is designed to retain set up codes in memory while you change batteries.

Registering setup codes for other components

1 Find the setup code of the component to be registered.

- Refer to the setup code lists to find the setup code for the component to be registered. — 17
 Example: To register a CD made by KENWOOD, you would enter "8037"
- If you own a new component that is not covered by the setup code list, you can use the FutureSet upgrade feature. — 14

2 Hold down the ENT key until the backlight flashes twice and remains lit.

3 Select the component to be registered.

Input	Component	Maker	Code	Key
(CD)	CD player	KENWOOD	8026, 8037	AUDIO
VIDEO 1				
VIDEO 2				
VIDEO 3				
VIDEO 4				
TAPE1/MD				
CD				
PHONO				
—	TV 1			
—	TV 2			
—	CABLE			

• At this time all inputs become available regardless of any earlier registration.

Perform each of the following steps within 5 seconds.

VIDEO key

- 1 VIDEO1 (SAT)
- 2 VIDEO2 (LD)
- 3 VIDEO3 (VCR)
- 4 VIDEO4 (DSS)

AUDIO key

- 1 CD (CD)
- 2 TAPE1/MD (TAPE)
- 3 PHONO

TV key

- 1 TV1
- 2 TV2
- 3 CABLE

• Example : To register the component connected to the VIDEO 1 jacks, select "VIDEO 1 (SAT)".

4 Enter the setup code.

- Example: Press 5258 to register a LD player made by KENWOOD.
- The backlight flashes once each time a number is entered.
- If an invalid setup code is entered the remote will output one long blink; disregard that code and return to the beginning of step 4.
- If you push an invalid key, the remote will exit the setup mode.

5 Press POWER, and check to see that the component you want to control turns on.

- **PLAY** or **TUNING/SKIP** (+/-) can also be used instead of **POWER**.
- If the component does not react, and there is more than one setup code, enter another setup code and try again.
- If the component is already on, pressing **POWER** will turn it off.

6 Press the ENT key to store the code you have just input.

- This code replaces any previous setup codes entered for the respective component.

7 Repeat steps 3 to 6 for all components you want to control.

8 Hold down the ENT key until the backlight flashes twice.

- If you have components that are not remote controllable, like a record player (etc.), you will need to register a Non-IR code at the respective input. This keeps the respective input in the remote control's cyclic list so you can select it using the remote control. Please consult the owner's manual of the components you are connecting for information regarding remote controllability. The list of Non-IR codes is included at the beginning of the Set up code chart.

- This operation should take about 3 seconds.
- Once registered, the display on the receiver shows the component type instead of the default input name.
Example: if you register a VCR at the VIDEO 1 jacks, "VCR" appears instead of "VIDEO 1(SAT)".
- Both the default input name and the component type (i.e., "VIDEO1 'VCR'") are shown in the on screen display when the OSD mode is set to ON (for 1090VR).
- After initial setup, any VIDEO (VIDEO 1, 2, 3, 4) or TV (TV1, TV2, CABLE) inputs that have not been programmed with a setup code or Non-IR code are deleted from the cyclic list (except for the "AV AUX" VIDEO input). The PHONO input will be deleted if a Non-IR code was not registered.
- The **INPUT SELECTOR** on the front panel of the receiver always cycles through all inputs.

Although each setup code is designed to work with a number of different models, certain codes may not work with some models. (Also, certain codes may only operate some of the functions available on a given model.)

Keys or controls used in this operation

Operating other components

This operation lets you operate the registered components. KENWOOD audio components with system control turn on and off automatically with the receiver via the system control connections.

① Use the VIDEO, AUDIO, or TV keys to select the component you desire.

② Press the SHIFT key and then press the POWER key (within 3 seconds).

③ Press the operation keys you desire.

- Pressing the **VIDEO** or **AUDIO** key also changes the input selector on the receiver. If you do not want to change the current input, press the **SHIFT** key before step ①.

VIDEO key

- 1 VIDEO1 (VCR 1)
- 2 VIDEO2 (VCR 2)
- 3 VIDEO3 (LD)
- 4 VIDEO4 (DVD)
- 5 AV AUX

AUDIO key

- 1 CD (CD)
- 2 TAPE1/MD (TAPE)
- 3 TUNER
- 4 PHONO

TV key

- 1 TV1
- 2 TV2
- 3 CABLE

- Pressing the **SHIFT** key is only required when turning the selected component on or off. Pressing the **POWER** key directly turns the receiver on and off.

- See "Remote operation of other components" at the end of this manual for a list of keys available with each component.

The remote control mode remains in the set at the component selected in step ① mode until you select another component (etc.).

Be sure to point the remote control at the remote sensor on the receiver when you want to operate KENWOOD components connected by system control cards. Otherwise, point the remote control at the component you want to operate.

This operation lets you change the remote control operation mode without changing the input selector. You may find this useful when you want to control one component while using another. (For example, if you want to rewind the tape deck while listening to a CD.) This operation is also useful if you don't know the which mode the remote control is set to. Executing this operation allows you to change or reconfirm the operation mode you desire.

Keys or controls used in this operation.

Changing (confirming) the operation mode

1 Press SHIFT.

• To operate a TV, start from step 2.

Go to step 2 within 3 seconds.

2 Select the component to be controlled.

The component to be controlled is displayed in parenthesis

- Pressing any other keys after the **SHIFT** key cancels the shift function and sends the normal code associated with the respective key.
- The input selector does not change during this operation.
- The remote control mode is shown in the on screen display when the OSD mode is set to ON (for 1090VR).
- If you press **VIDEO** or **AUDIO** key more than 3 seconds after pressing the **SHIFT** key, the input selector changes together with the operation mode.

3 Execute the desired operations.

- See "Remote operation of other components" for a list of keys available with each component.

The operation mode remains set at the component specified in step 2.

To return control to the original component, press **SHIFT** and then press the **VIDEO** or **AUDIO** key to return to the original control mode.

10

The macro play function allows you to set the remote to control several components in succession. After completing this setup, you can perform a series of operations automatically. Enter the setup codes for the components you want to control beforehand.

Keys or controls used in this operation.

Preparing for automatic operations (MACRO play)

1 Make a plan of the macro play you want to set up.

The order of the operations may be fairly complex and you may not be remember all of the necessary commands during the setup procedure.

Use the space provided below to write down the operations in the order you are going to enter them.

1			
2			
3			
4			
5			
6			
7			
8			
9			
10			

- Up to 20 steps can be memorized for each macro
- The example below shows the plan for step 4 (which occupies a total of 9 steps) :

1	TV + SHIFT + POWER	3 steps
2	FUNCTION SHIFT + 4	2 steps
3	VIDEO + VIDEO	2 steps
4	SHIFT + POWER	2 steps

Total 9 steps

- If you attempt to store more than 20 steps, the remote will output one long blink and exit the macro programming mode.
- Enter channel numbers (for the monitor TV, etc.) exactly as you would using the original remote.

2 Activate the macro program mode.

Press and hold the MACRO key until the backlight flashes twice.

MACRO

Perform each of the following steps within 5 seconds.

3 Select where the macro should be stored.

Press the VIDEO, AUDIO, or TV key to select the macro location. (MACRO1, 2, and 3 respectively)

- You can store up to 3 different macros, one at each key: VIDEO → "MACRO 1", AUDIO → "MACRO 2", TV → "MACRO 3"
- The backlight flashes once when you select the macro location.
- Pressing a button other than VIDEO, AUDIO, or TV cancels the macro program mode.

When VIDEO is pressed

4 Press the keys to be operated in order.

EXAMPLE:

- 1 Press TV > SHIFT > POWER to turn on the TV.
- 2 Press FUNCTION SHIFT > "4" (TV/SAT./VIDEO) to set the TV to the appropriate video input.
- 3 Press VIDEO twice to select the LD player registered at VIDEO 2.
- 4 Press SHIFT and POWER to turn on the LD player.

- This example shows you how to create a macro that: turns on the TV, sets the TV to the appropriate input, selects the receiver's input selector to LD, and turns on the LD player. All you have to do is insert the laser disc!
- In order to allow verification of the remote control mode, the name of the selected input appears in the receiver's display when the VIDEO, AUDIO or TV key is pressed. When the VIDEO or AUDIO key is pressed the receiver's input also changes.

5 Terminate the macro program mode.

Press the MACRO key so that the backlight flashes twice.

- The macro is stored at the locations specified in step 3. If another macro was previously stored at the same location, it is erased.

Repeat steps 3 through 5 to program up to 3 macros.

Keys or controls used in this operation.

Executing an automatic operation

1 Press the **MACRO** key.

Go to step 2 within 3 seconds.

2 Execute the macro play.

Press the **VIDEO**, **AUDIO**, or **TV** key to execute the corresponding macro play.

- "MACRO" appears in the front panel and on-screen display and the programmed macro is performed:
VIDEO → "MACRO 1", **AUDIO** → "MACRO 2", **TV** → "MACRO 3"
- The remote control flashes once for each command output.
- The remote control will output OSD information to tell you the status of the macro (for 1090VR).
- Some devices take up to 1 second to power on. The macro function has an automatic delay after any power function output.
- Pressing a button other than **AUDIO**, **VIDEO**, or **TV** cancels the macro program mode.

When **VIDEO** is pressed

If you make connections to another room, you can use the remote control to select source components and to adjust the volume (etc.) output to the other room.

Keys or controls used in this operation.

Controlling the sound in another room (ROOM B) (for 1090VR)

1 Select a speaker system.

* Audio and video signals are output from the **SECOND ROOM PRE OUT** jacks regardless of the setting of the SP. A/B and ROOM A/B indicators.

A ON : Select to output sound to ROOM A from the speaker connected to the SPEAKERS A terminals. This setting allows you to enjoy surround playback in ROOM A while outputting sound to ROOM B via the SECOND ROOM PRE OUT jacks.

B ON : Select to output sound to ROOM B via the speakers connected to the SPEAKERS B terminals. Be sure to turn off the subwoofer in ROOM A if one is connected.

A+B ON : Select to output sound to ROOM A from the speakers connected to the SPEAKERS A terminals and output sound to ROOM B from the speakers connected to the SPEAKERS B terminals. ROOM A automatically switches to stereo playback (surround playback is not possible).

A+B OFF : No sound from the speakers. Use this setting when listening with headphones in ROOM A for stereo sound in all playback modes or to listen in ROOM B via the SECOND ROOM PRE OUT jacks.

2 Set the remote control to the ROOM B operation mode.

• The **MUTE** and **VOLUME +/-** keys let you control the sound level in ROOM B.

3 Select the desired component.

- The setting of the ROOM B input selector also appears in the on screen display (for 1090VR).
- The component selected for ROOM B can also be operated using the keys on the remote control. See "Remote operation of other components" for a list of keys available with each component.

4 Execute the desired operations.

The remote remains in the ROOM B operation mode until you switch back to the ROOM A operation mode.

To return to the ROOM A operation mode, press the **FUNCTION SHIFT** key and then press the **+10 (ROOM A)** key within 3

14

FutureSet allows you to update the remote control so it can operate new components which do not appear in the setup code list at the end of the manual.

This function allows you to register new setup codes for any or all of the following command positions: VIDEO1, VIDEO2, VIDEO3, VIDEO4, TV1, TV2, CABLE, CD, TAPE1/MD.

FutureSet codes are stored in memory. Each time a FutureSet upgrade is performed, any previous information in the FutureSet memory location is erased. Please inform your customer service representative if FutureSet has been previously used.

FutureSet upgrade option

- 1** Write down the brand name and model number of your component in the space provided before you call.
- 2** Call our Free-Phone Consumer Help-Line and explain which components you would like to add to your remote control.

USA: 1-800-753-9860

Canada: 1-800-644-0673

* This number is designed specifically for FutureSet upgrades. Questions about system operation should be first addressed to your place of purchase.

- 3** Hold down the ENT key until the backlight flashes twice.

- 4** Enter the 3 digit code "997".

Keys or controls used in this operation.

	Type	Brand	Model No.	Remote Model No.
	TV	KENWOOD	KV7-7777	RC-7777
1				
2				
3				

- After our customer service representative records the brand name and model number of your component, he/she will ask you to hold the remote to the speaker portion of your telephone as shown below. Your remote control is KENWOOD model number: RC-R0905
- The hours for customer service in USA and Canada currently are:
 - Monday-Thursday 9:00 am - 7:00 pm EST
 - Friday 9:00 am - 5:30 pm EST
 - Saturday 12:00 pm - 4:00 pm EST

Complete steps 3 and 4 before holding the remote to the speaker portion of your telephone.

- At this time all inputs become available regardless of any earlier registration.

Go to step 4 within 5 seconds.

- The backlight flashes twice.
- The remote is now in the upgrade mode. The remote will wait for 30 seconds for a valid telephone download signal. If nothing is received within this time, it will revert to normal operation.

Go to step 5 within 30 seconds.

5 Hold your remote to the speaker portion of your telephone.

- For each setup code the operator can supply a setup code number. Should you ever need to change your input configuration, this number can be used. Please record for your future reference. If for some reason this information is lost, see "Checking a setup code" in the "Setup code correlation" section for further information.

Code selection after mode download

After successful completion of the download, step 5 above, the remote control automatically enters a special set-up mode which works as described below.

1 Select the component for which you want to register the information downloaded above.

VIDEO key

- 1 VIDEO1 (VCR 1)
- 2 VIDEO2 (VCR 2)
- 3 VIDEO3 (LD)
- 4 VIDEO4 (DVD)

AUDIO key

- 1 CD (CD)
- 2 TAPE1/MD (TAPE)
- 3 PHONO

TV key

- 1 TV1
- 2 TV2
- 3 CABLE

- Example 1 : To register a code at the component connected to the VIDEO 1 jacks, select "VIDEO 1 (VCR)".

Perform each of the following steps within 5 seconds.

2 Press a numeric key.

- Press the 1 key to output the POWER code of the first component on your list in step 1 of the previous page. Continue to push buttons 2 through 9 (and 0) until the component you want to register turns on.
- Though the FutureSet memory in your remote control is quite large, only 10 setup POWER codes can be put on the 10 keypad at any one time. If you require a larger download, the standard setup procedure can be used. See "Registering setup codes for other components", your customer service representative can supply you with the downloaded setup code numbers.

3 Repeat steps 1 and 2 to register all of the downloaded information.

4 Hold down the ENT key until the backlight flashes twice.

- The setup code for the last POWER code to be sent in step 2 is automatically registered at the location selected in step 1.

- At this time, the remote exits the special set-up mode and returns to its normal operation mode.

Keys or controls used in this operation.

Setup code correlation

Deleting a setup code

- ❶ Hold down the ENT key until the backlight flashes twice.
- ❷ Select the component to be deleted.
Press the VIDEO, AUDIO, or TV key repeatedly to select the desired component.
- ❸ Enter the 3 digit code "991".
- ❹ Hold down the ENT key until the backlight flashes twice.

- At this time all inputs become available regardless of any earlier registration.
- Example 1: To delete the registration of the component connected to the VIDEO 1 jacks, select "VIDEO 1".

Perform each step within 5 seconds.

- To resume the factory settings, proceed step 1, then enter "981".

Checking a setup code

- ❶ Hold down the ENT key until the backlight flashes twice.
- ❷ Select the component with setup code you want to check.
Press the VIDEO, AUDIO, or TV key repeatedly to select the desired component.
- ❸ Enter the 3 digit code "990".
- ❹ Press the 1 key and count the number of times the backlight blinks. This is the first number of the 4 digit setup code.
- ❺ Press the 2 key and count the number of times the backlight blinks. This is the second number of the 4 digit setup code.
- ❻ Press the 3 key and count the number of times the backlight blinks. This is the third number of the 4 digit setup code.
- ❼ Press the 4 key and count the number of times the backlight blinks. This is the fourth number of the 4 digit setup code.

- The backlight flashes twice immediately after the "0" is input to confirm input.
- If the backlight does not blink, the first digit in the setup code is 0.
- If the backlight does not blink, the second digit in the setup code is 0.
- If the backlight does not blink, the third digit in the setup code is 0.
- If the backlight does not blink, the fourth digit in the setup code is 0.

Perform each step within 5 seconds.

Symptom	Cause	Remedy
The backlight flashes five times during normal operation.	<ul style="list-style-type: none"> The batteries are nearing exhaustion. 	<ul style="list-style-type: none"> Replace with new batteries to preserve the currently registered setup information. → 5.
Certain inputs cannot be selected using the remote control.	<ul style="list-style-type: none"> No preset codes registered at for the respective input(s). 	<ul style="list-style-type: none"> Register a preset code or Non-IR code at the respective input(s). → 6.
Remote control operation is not possible.	<ul style="list-style-type: none"> The remote control is set to a different operation mode. Batteries are exhausted. The remote control unit is too far away from the main system, controlling angle is too large, or there is an obstacle between the receiver and the remote. The audio cords and system control cords are not connected properly No software is loaded in the source component An attempt is made to play a tape which is being recorded in the cassette deck. The remote control has not been set to the operation mode for the component you wish to control. The remote control is in the Room B (A) operation mode. The microprocessor of the remote control malfunctions 	<ul style="list-style-type: none"> Press VIDEO, AUDIO, or TV to select the appropriate operation mode. Replace with new batteries. If the backup is exhausted before you can replace the batteries, redo the setup procedure. → 5, → 6. Operate the remote control unit within the controllable range. Connect properly. Place software in the source component you want to play. Wait until recording has completed. Press the VIDEO, AUDIO, or TV key to activate the operation mode for the component you want to control before operation. → 9. Change the operation mode. → 13. Reset the microprocessor. → 16.

Do not use contact cleaning agents because they could cause a malfunction. Be specifically careful against using contact cleaning agents containing oil, since they may deform the plastic components

Specifications

Remote control system	Infrared
Transmitter power supply	6 V DC
Dimensions	W : 62 mm (2-7/16")
	H : 227 mm (8-15/16")
	D : 37 mm (1-7/16")
Weight (Excluding batteries)	170 g (0.4 lb)

KENWOOD follows a policy of continuous advancements in development. For this reason specifications may be changed without notice.

Remote operation of other components

Refer to the following for the type of remote control operations available for each component. The setup code for each component must be entered beforehand.

- 1 Use the AUDIO, VIDEO, or TV keys to select the component you want to control.
- 2 Press the keys corresponding to the operations you desire. Refer to the following sections for details.

- When pressing keys in succession, press each key firmly and be sure to wait at least 1 second before pressing the next key.
- Numeric keys function the same as the numeric keys on the original remote.
- To execute a FUNCTION SHIFT command, press the **FUNCTION SHIFT** key, then press the corresponding key within 3 seconds.

1. Although each setup code is designed to work with a number of different models, certain codes may not work with some models. (Also, certain codes may only operate some of the functions available on a given model.)
2. The charts below show the typical functions available for each component. Some manufacturers use different key combinations to perform similar functions. For that reason, we have programmed extra functions on some of the unused number keys to help you control your equipment. To find if your component has extra functions, press the **FUNCTION SHIFT** key, then press a number key. Repeat this procedure for each number key.
