

KENWOOD

SPECTRUM 717M SYSTEM CONNECTIONS

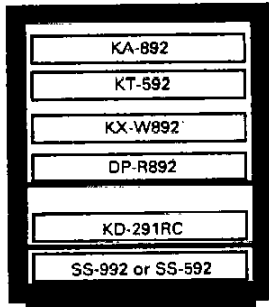

Order of rack mounting

SPECTRUM 717M

Audio rack SRC-502

SPECTRUM 717M + AV surround amplifier

To insure the option performance from your new KENWOOD components, please follow these simple instructions.

1. Place the amplifiers on top of the other components. This will provide adequate ventilation and it will "anchor" the rest of the components.
2. The tuner should be the next components in the stack, followed by the cassette deck.
3. When the turntable KD-291RC is used together with the AV surround amplifier SS-592, the power cord of the turntable should be connected to a wall AC outlet.

- For the antenna connection to the tuner, refer to the instructions provided with the tuner.

Be sure to insert the system control cord plugs fully into the SYSTEM CONTROL terminals.

This figure shows the SPECTRUM 717M equipped with optional AV surround amplifier.
