

KENWOOD

SPECTRUM 727M SYSTEM CONNECTIONS

Order of rack mounting

SPECTRUM 727M

Audio rack SRC-503

To insure the optimum performance from your new KENWOOD components, please follow these simple instructions.

1. Place the amplifiers on top of the other components. This will provide adequate ventilation and it will "anchor" the rest of the components.
2. The tuner should be the next components in the stack, followed by the cassette deck.

- For the antenna connection to the tuner, refer to the instructions provided with the tuner.

Be sure to insert the system control cord plugs fully into the SYSTEM CONTROL terminals.

This figure shows the SPECTRUM 727M.
