FAN REPLACEMENT KIT

1. DESCRIPTION

This kit provides a fan assembly which replaces fan motor, Kepco part number 148-0026. The kit includes a fully assembled fan motor with fan blade and mounting bracket.

2. MATERIAL SUPPLIED (SEE TABLE 1.)

Table 1 lists the contents of this kit and a description of each component.

TABLE 1. MATERIAL SUPPLIED

ITEM	DESCRIPTION	KEPCO PART NO.	QUANTITY
Fan Motor	Replaces fan motor, installed on fan mounting bracket	148-0050	1
Fan Mounting Bracket	Attaches fan to chassis	128-1864	1
Fan Blade	Installed on fan motor shaft	149-0034	1
Instruction Sheet	Contains instructions for installing KIT 219-0525 components	228-1623	1

3. FAN REPLACEMENT

1. Tag and disconnect fan wires.
2. Remove fan assembly 148-0026 from unit by removing two (2) screws Kepco P/N 101-0132 (8-16 x 3/4.ST, THPH) (save hardware for reassembly).
3. Install fan assembly from this kit using hardware saved from step 2.
4. Connect fan wires as noted during step 1.
