Larson Davis Industry Exclusive!

For community, traffic and aircraft noise monitoring

## Highlights

- Use with any electronic sound measurement system
- Free-field or random incidence response
- Rugged stainless steel construction
- Single channel power and signal conditioning
- Selectable A-, C- or Z-weighting
- 0 and 200 V microphone polarization voltage
- Selectable gain: 0 or 20 dB
- Electrostatic actuator for calibration check
- Internal temperature and humidity sensors<sup>+</sup> for desiccant status
- Bird spikes, rain hat and wind screen
- Instantaneous overload detection
- Ability to drive long cables
- Replaceable desiccant with indicator visible through window
- Easy access for desiccant change
- TEDS-IEEE 1451.4 compliant
- Rugged carrying case
- Fully supported by the Larson Davis Model 831 sound level meter

## Applications

- Unattended outdoor installations
- Environmental noise studies
- Airport and traffic noise monitoring
- Industrial and community noise monitoring
- Complaint investigations
- IEC 61672 Class 1 compliant outdoor sound measurement

Typical Model 426A12-FF airport noise monitoring installation.

Model 426A12

The Larson Davis Model 426A12 Outdoor Microphone has been designed for permanent outdoor use in any weather condition. It is constructed of stainless steel to resist corrosion, and its profile minimizes both wind resistance and acoustic reflections. It includes a rain hat, wind screen and bird spikes and an electrostatic actuator which can be controlled remotely for on-site calibration checks. With the proper choice of microphone, it can provide frequency response characteristics consistent with precision sound level meter requirements for free-field or random incidence measurements. Equipped with A, C and Z-weighting filters and a 20 dB gain, the 426A12 is ideal for use with any electronic sound measurement system.

A hydrophobic membrane vent and replaceable desiccant cartridges prevent moisture from reaching the microphone through the vent. The saturation status of the desiccant cartridges can be determined remotely using signals from internal temperature and humidity sensors, as well as visually through an observation window.

The Larson Davis Model 831 sound level meter is the ideal complement to the Model 426A12 Permanent Outdoor Microphone for Noise Monitoring Systems.

<b>Electrical Frequency</b>	Response

## Permanent Outdoor Microphone

Power Supply			
Voltage	External 12 Vdc Voltage Range: 10.5 to 18 Vdc Isolated from preamp circuitry for ground loop protection		
Power Consumption 0 V Microphone Bias 200 V Microphone Bias	85 mA at 12 Volt (110 mA with electrostatic actuator on) 120 mA at 12 Volt (160 mA with electrostatic actuator on)		
Environmental			
Operating Temperature Range	- 40 °C to 70 °C (- 40 °F to 158 °F)		
Operating Humidity Range	0 to 100% relative humidity, excluding internal condensing		
Temperature Sensitivity	< ± 0.05 dB @ 1 kHz from - 40 °C to 70 °C		
Electrostatic Actuator Temperature Sensitivity	- 0.0015 dB/°C typical		
Humidity Sensitivity	< ± 0.05 dB @ 1 kHz from 0 to 100% relative humidity, at 50 °C (122 °F)		
Physical			
Microphone Thread	11.7 mm - 60 UNS (.4606 - 60 UNS)		
Mounting Thread	G 1 1/2" (ISO 288-1) Cables pass through mounting pipe		
Maximum Housing Diameter	54 mm (2.125 in)		
Windscreen Diameter	101.6 mm (4 in)		
Height	587 mm (23.1 in)		
Weight	1.361 kg (3 lb.)		
Venting	Bottom of preamplifier through a membrane for protection of the microphone pressure equalization vent RNC famale center is the output signal and the RNC famale shell is connect.		
Output Connector	ed to the internal ground		
Control Connector	LEMO EXG.1B.307 7-pin Female		
Compliance			
IEC61632-1 EMC requirements for	electrical equipment for measurement, control and laboratory use		
IEC61672 (2002) Class 1 and ANSI	S1.40-1984 for A, C and Z Weight		
IEC60651 (R2001) and ANSI S1.4 (	R2001) "Sound Level Meter" Type 1 for A and C weight		
IEC60529 Protection provided by e	nclosure: IP54		
Accessories			
DSC004	Desiccant Pack (10 sets)		
EPS2110	Rainhat with built-in electrostatic actuator head 94 dB (re. 20µPa) @ 1 kHz typical Internal electrostatic actuator verifies complete system accuracy (including microphone) at 1 kHz		
Rugged case	Rugged case with space for 426A12, WS009, DSC004, Model 831 Sound level meter, CAL200 Calibrator, Microphone and certificates.		
Windscreen/Birdspikes (WS009)	Rugged construction for repelling birds; includes foam windscreen		
	Connecting pipe for TPR019/20. (1/2 In. X 27 In. ISO 228-1 to NP1 thread)		
CBI 152	426A12 to Model 831 signal cable 20 ft (9 m)		
CBI 152-XXX	426A12 to Model 831 signal cable, custom length up to 500 ft		
CBL153	426A12 to Model 831-INT-ET control cable. 20 ft (9 m)		
CBL153-XXX	426A12 to Model 831-INT-ET control cable, custom length up to 120 ft (36 m)		
CBL154	426A12 to Model 831 control cable,20 ft (9 m)		
CBL154-XXX	426A12 to Model 831 control cable, custom length up to 120 ft (36 m)		
Ordering Information			
The 426A12 is a preamplifier with	out a microphone. Packages including microphones are		
available as follows. The 426A12	with its selected microphone is subjected to an environmental test		
426A12-FF	426A12 Permanent Outdoor preamplifier 377B02 Free field 50 mV/Pa prepolarized microphone		
426A12-RI	426A12 Permanent Outdoor preamplifier 2565 Random incidence 50 mV/Pa 200V polarized microphone		
426A12	426A12 permanent outdoor preamplifier without microphone		
CER-426A12	Calibration and certification for 426A12 including testing for temperature and humidity stability. Replaces windscreen, o-ring, and desiccant cartridges.		
Model 831	Sound level mater for poise monitoring systems		

For environmental noise monitoring and building acoustics, **Larson Davis** offers a full line of instruments, accessories and software. For personal noise and vibration exposure monitoring, Larson Davis complements this with sound level meters, personal noise dosimeters, human vibration meters, audiometric calibration systems and hearing conservation programs.
