About this Manual

This manual is a reference guide to the “Automation” capabilities of LeCroy’s X-Stream™ DSOs.

The manual includes a complete list of all instrument controls that are available to a controlling application. In contrast to previously available remote control possibilities for LeCroy instruments, Automation enables the controlling application to run on the instrument itself.

Part One, “About Automation,” covers the principles of control via Automation and offers practical examples. It also presents the overall hierarchy of controls accessible via Automation.

Part Two, “Control Reference,” presents each of the controls in detail, including examples of use in many cases.

Part Three, “Math/Measure Control Reference,” presents controls available in each of the multitude of the Math/Measure ‘processors’ available in X-Stream DSOs.
