

QUICK INSTALLATION GUIDE

Welcome!

Congratulations on your decision to purchase one of LeCroy's QualiPHY software products. We hope the software meets your testing needs. You should receive an email with the corresponding QPHY Keycode used to activate the program.

Once you have your keycode, run the software installer by either locating it on your instrument or downloading it from the LeCroy Website.

Locating the Installer on Your Instrument

1. Find the installer at **Start → Programs → LeCroy → QualiPHY → QualiPHYInstaller.zip**.
2. Open the .zip file by double-clicking it. When opened, locate the Readme.txt file and the QualiPHY manual for further installation instructions.

Downloading Installer from the LeCroy Website

In the event that the installer is not found on your instrument, you can download it from our website at www.lecroy.com/tm/Library/Software. When the file is downloaded from the site, proceed as explained in **Locating the Installer on Your Instrument** (previous).

Note: Find more QualiPHY documentation at www.lecroy.com/tm/options/software/QualiPHY.
