Traffic Generator Version 2.21 Release Notes

Bug fix for 16-bit application for the following problem:

- With a RESET packet that is larger than 32,000 FS bits in length, the computer hangs (dead loop and create a huge temporary file DPOS.OUT/DNEG.OUT)

This bug affected only the 16-bit application (Win 3.1, 95, 98). The 32-bit application (Windows NT) has not been modified and remains at Version 2.2.
