

NetMate Release Notes

Version NM-09:

- Version NM-09 supports Windows 98, 98SE, 2000, ME, and XP!
- The driver in this release is identical to NM-06L-2K98ME (previous release). The difference between NM-06L-2K98ME and this version is only in this file indicating the addition for Windows XP support after completion of tests on Windows XP.

Version NM-06L-2K98ME:

- The current driver on CATC Website supports windows XP. Please uninstall the old driver before installing the new driver.
- The software driver is identical to the previous release (NM-06-2K), but with new cat file (netmate.cat) from Microsoft with a digital signature (WHQL approval) for Windows ME (Millennium).
