

## SATracer 3G Version 4.02 Release Notes

**IMPORTANT:** This release of SATracer software supports the new SATracer analyzer and SATrainer Exerciser option designed for the UPAS 10K. Changing the SATracer configuration from analyzer only to SATrainer exerciser option requires updating the SATracer BusEngine. Each time you exchange plugin modules, the software will automatically update the BusEngine and Firmware to the appropriate release when you click the record button in the SATracer application.

This release also contains the following components, which are necessary for SATracer/Trainer Analyzer & Exerciser to function correctly with this release:

- CATC SATracer Firmware Version 2.07
- CATC SATrainer Exerciser Firmware Version 2.07
- Analyzer only (Pod PN#SAS001MA & PN#SAS002MA) BusEngine Version 1.11
- Analyzer plus Exerciser (Pod PN#SAS001MG) BusEngine Version 2.21

Changes in SATracer version 4.02

- Fixing some problems with connecting to certain SATA drives

Additional Notes about SATracer version 4.02

- Several bugs fixed and performance improvements added
