

talk.

communications: 900MHz Cordless Telephone System
with Cellular Phone Docking Station

MCD900DS

Switching between landline and cellular service has never been easier. Simply place your cell phone in the docking station and it automatically switches to cellular service. Push the TEL/CEL button and you can talk on either line using your cordless phone. With a wide range of adapters, it can work with most leading manufacturer's cellular phones and most cellular services.

900Mhz Digital Spread Spectrum Technology | Eliminates the need for a traditional landline | Allows true hands-free cellular calls via speakerphone | Caller ID Type II for both landline and cellular service | 4-line dot matrix LCD display | Recharges cellular phone while docked | Dual keypad
