

# Does your phone have a **TEL/CEL** button?

Ours does ...

See it at CES  
Memorex Booth #717  
South Hall (Main Floor)

MCD900DS

## **DOCKING** STATION

Switching between landline and cellular service has never been easier. Simply place your cell phone in the docking station and it automatically switches to cellular service. Push the TEL/CEL button and you can talk on either line using your cordless phone. With a wide range of adapters, it can work with most leading manufacturer's cellular phones and most cellular services. It's the kind of smart technology that makes communication easier. "For a closer look, visit [memcorpinc.com](http://memcorpinc.com) or talk to your Memcorp representative."

- 900 Mhz Digital Spread Spectrum technology. (2.4Ghz with multi-handset capability is also available.)
- Eliminates the need for a traditional landline.
- Allows true hands-free cellular calls via speakerphone.
- CID Type II for both landline and cellular service.
- 4-line dot matrix LCD display.
- Use a regular cordless handset for cellular calls.
- Recharges your cellular phone while docked.
- Dual keypad with speakerphone base.
