It includes screw terminals for connections, and is punched for the card guides supplied with Monroe's Circuit Cards.

Description

Monroe Electronics 900 series enclosures are specifically designed to house 3" X 5" plug in circuit boards, and provide wall or panel mounting.
The 900 series enclosures will accept from 1 to 6 cards, depending upon the model. Circuit board models such as the 3137B, 3138C, and others holding transformers, occupy the equivalent of two card slots
