

Application Note APNT-0004 Cue Tone Decoder With Telephone Override

OPERATION:

Normal audio path is from receiver providing "automatic" operation of contacts.
For remote operation, UAD connects to phone line after prescribed number of rings.
Operator enters correct code for manual override.
System disconnects from phone line per selection (time, loop current interrupt or both).

NOTE * Only one set of Normally Open contacts are shown connected. Additional NO and NC contacts are available on the 3185D card.
