

## Application Note APNT-0018 Timed Switching of Multiple VCR's with Automatic Video Sensing

### NOTES:

Timer switches are grouped as Lower 8 and Upper 8 each enabled as 1 of 8. Start pulses are from one bank and Stop pulses are from the other. An R153 timer can control up to 8 machines where Stop pulses are used. Only 4 are shown here for clarity. If no Stop pulses are used, an R153 timer can control up to 16 machines.

If an R149 timer is used with full expansion capabilities utilized, up to 80 machines could be controlled from one timer.
