

## Specifications

**Input:** USB 1.0 or better

**Output:** RS485, simplex

## Unit Power Requirement

Power supplied by USB connection

# USB to RS485

model

R184/97

## Features

- Includes USB-RS485 Converter
- Wiring and Connectors Included
- Installation CD and Software included for all supported devices.
- Supported devices include R184 switch, R165 switch and R174 switch

## Description

This device allows the local control of a model R184 16X1 RF switch, both as a single unit and in a multiple matrix configuration, from any Windows based computer. The device connects to an available USB port. Through the included software, the operator can control in real time - with options for scanning input ports - all aspects of the R184.

Control of one or more R165 or R174 A/V switch panels is also accomplished with this device.
