Moxa EDS-SNMP OPC Server Pro Quick Installation Guide

Second Edition, June 2008

1. System Requirements

- Computer/Processor: 266 MHz or higher Pentium-compatible CPU
- Memory: 128 MB or greater
- Operating System: Windows XP, Windows 2000 and Windows NT with Administrator privileges (must use Professional or Server version)
- Disk space: 20 MB for basic installation and system use.

2. Hardware Support

Moxa EDS-SNMP OPC Server Pro can be integrated seamlessly with the leading HMI/SCADA software to create a comprehensive Ethernet Network Management Solution for all SNMP compatible devices. Moxa EDS-SNMP OPC Server Pro, which supports OPC Data Access 2.0 and ranks as a new generation of industrial software applications, was implemented using advanced programming concepts from the latest OPC specifications.

NOTE

Close all applications before installing the software. Be sure the cables between the server's Ethernet card and EDS are properly connected before configuring online devices. All installation steps and program startup procedures are the same for Windows XP, Windows 2000 and Windows NT.

3. Installing Moxa EDS-SNMP OPC Server Pro on Windows 2000/XP/NT

-1 -

STEP 1: Insert the Moxa EDS-SNMP OPC Server Pro CD into your computer's CD drive and wait for the installation program to start running. If the installation program does not start running automatically, run the setup program by double clicking on the **setup.exe** icon.

— 4 —

STEP 2: Click on Next to install EDS-SNMP OPC Server Pro.

STEP 3: Read the License Agreement carefully, and then click the **I accept the agreement** radio button. Click on **Next** to continue.

| License Agreement | | _ |
