Installing Nikon View 5 on a Macintosh — Overview

Insert the Nikon View 5 CD into the CD-ROM. If you are using Mac OS 9.0, 9.1, or 9.2, the **Select Language** dialog box appears automatically. If you are using Mac OS X, the dialog box will appear when you double-click the **Nikon View 5** icon on the desktop, and then double-click the **Welcome** icon. After you select the desired language the **Install Center** window will appear, allowing you to select and install the desired software.

Step 1: Install the software

Select and install the desired software from the list in the **Software** tab. The selected software will be installed in the order shown below.

1. PanoramaMaker

2. Nikon View 5

3. Quick Time 5.0.2[*1]

4. FotoStation Easy

[*1] If you are using Mac OS X, Quick Time 5.0.2 will not be available for selection.

Step 2 : Install the Plug-in

The **Other Software** tab allows you to install the Cumulus Plug-in. You will only need this plug-in if you wish to use Canto Cumulus as your image database software.

Cumulus Plug-in[*2]

[*2] If you are using Mac OS X, Cumulus Plug-in will not be available for selection.

Existing versions of Nikon View and Nikon Capture

If an older version of Nikon View 5, or a version of Nikon Capture 1.x is installed on your computer, it must be uninstalled before installing Nikon View 5.

Cameras that are not supported by Nikon View 5

Nikon View 5 does not support connection of COOLPIX950, 910, 900, 800, or 700 digital cameras. Nikon View 5 can however be used to view photographs taken with these cameras if the camera memory card is inserted into a digital camera that Nikon View 5 supports.
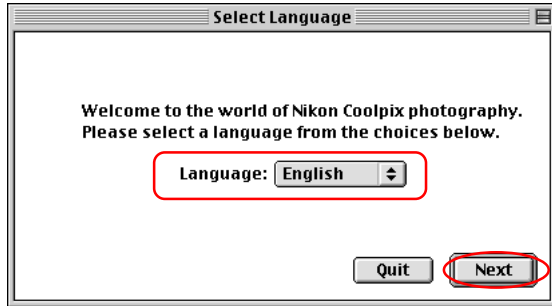

Mac OS X

Log on as Administrator when installing Nikon View 5 under Mac OS X.

i — Select a language

Select the language of your choice from the pull-down menu. After you select a language, click **Next** to display the **Install Center** window.
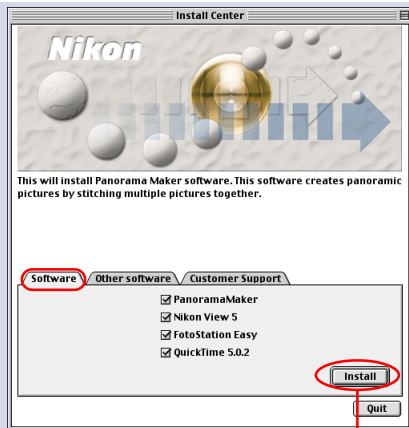

iii — Select the software you wish to install

The **Install Center** window contains three tabs; **Software**, **Other Software**, and **Customer Support**. Note that if you are using Mac OS X, the **Other Software** tab is not available and the **Install Center** window contains only two tabs.

Click **Quit** if you want to close the **Install Center** window and cancel installation.

| Software	Other Software	Customer Support
Install button	**Install** Cumulus Plug-in button	
The **Software** tab gives you a choice of programs to install. Select the check box next to each of the programs you wish to use, then click **Install**.	The **Other Software** tab allows you to install the Cumulus Plug-in. You will only need this plug-in if you wish to use Canto Cumulus as your image database software. If you are using Mac OS X, the plug-in will not be available for selection.	Click the button for your area to view one of the Nikon technical support Web sites (your computer must be configured for connection to the Internet).
Click here to install the desired software.	Click here to install the plug-in.	Click **Read Me** to open the Read Me file. Be sure to read it before installation.
