## Seven Scene modes for every situation

**Party/Indoor**  
Captures the details of dimly lit scenes. Automatically fires the COOLPIX 775's built-in Speedlight, if necessary.

**Back Light**  
Fires the built-in Speedlight to keep subjects in backlit settings from turning out too dark.

**Portrait**  
Emphasises the subject by creating a soft, pleasant background.

**Night Portrait**  
Fires the built-in Speedlight to light the subject while keeping the shutter open long enough to show the background.

**Landscape**  
Captures distant scenes with postcard-sharp clarity.

**Beach/Snow**  
Captures the clean, bright sparkle of sea or snow backgrounds.

**Sunset**  
Preserves the exquisite, natural splendour of beautiful sunsets.

## All-in-one package

Everything you need to get started – from rechargeable battery and battery charger to computer cable and software – it's there in the COOLPIX 775 box.

Movie mode

Select Auto mode for everyday, anytime photography, or pick one of the seven scene modes for greater versatility and creativity. The COOLPIX 775 digital camera makes taking pictures easy, and even captures simple movies of up to 15 seconds.

Once you've turned the Mode dial and set up the camera, just press the shutter release button. The COOLPIX 775 does all the rest – focus, exposure control, and flash if necessary. Capture the moment – just point and shoot!

Quick Review lets you view each picture in the LCD monitor with your friends as soon as you've taken it. And you can delete photos that you've taken at any time, keep on shooting until you get the image you want.

Connect the COOLPIX 775 to your computer with the USB cable (supplied), then push the TRANSFER button. The pictures in your COOLPIX 775 – all or just selected pictures – will be transferred automatically to your computer\*. It's never been easier to share your photos with friends or family through e-mail and the internet!

\*Requires Nikon View 4 software installation.
