For your safety

QUALIFIED SERVICE

Only qualified personnel may install or repair phone equipment.

ACCESSORIES AND BATTERIES

Use only approved accessories and batteries. Do not connect incompatible products.

CONNECTING TO OTHER DEVICES

When connecting to any other device, read its user's guide for detailed safety instructions. Do not connect incompatible products.

ESD Protection

Nokia requires that product service points have sufficient ESD protection (against static electricity) when servicing cellular phones.

Any product of which the covers are removed must be handled with ESD protection. The SIM card and battery can be replaced in normal conditions of use.

To replace the covers ESD protection must be applied.

All electronic parts of the product, are susceptible to ESD. Resistors, too, can be damaged by static electricity discharge.

All ESD sensitive parts must be packed in metallized protective bags during shipping and handling outside any ESD Protected Area.

Every repair action involving opening the product or handling the product components must be done under ESD protection.

ESD protected spare part packages MUST NOT be opened/closed out of an ESD Protected Area.

For more detailed information and local requirements about ESD protection and ESD Protected Area, contact your local Nokia After Market Services representative.

Care and Maintenance

The product is a product of superior design and craftsmanship and should be treated with care.

Keep the product dry. Precipitation, humidity and all types of liquids or moisture can contain minerals that will corrode electronic circuits.

Do not use or store the product in dusty, dirty areas. Its moving parts can be damaged.

Do not store the product in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics.

Do not store the product in cold areas. When it warms up (to its normal temperature), moisture can form inside, which may damage electronic circuit boards.

Do not drop, knock or shake the product. Rough handling can break internal circuit boards.

Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the product.

Do not paint the product, Paint can clog the moving parts and prevent proper operation.
