Repair Place Cable SCD-2A

This cable is used between JBD-2 and CD949

Product Code : 0730171

View

Flash Update Cable SCD-5

This cable is used between CD949 and FLA-5 or FLA-7

Product Code : 0730170

View

Adapter DAU-9S

DAU-9S is connected between the phone and the serial (COM) port of the PC. It matches the M2BUS data bus signals to the serial data bus of the computer.

Product Code: 0730108

View

SW Security Device "Dongle" PKD-1

SW security device "Dongle" is a piece of hardware enabling the use of the service software when connected to the parallel (LPT) port of the PC. Without the dongle present it is not possible to use the service software. Printer or any such device can be connected to the PC through the dongle if needed.

Caution: Make sure that you have switched off the PC and the printer before making connections!

Caution: Do not connected the PKD-1 to the serial port. You may damage your PKD-1!

Product Code: 0750018
