DA–19 Docking Adapter

The DA–19 Docking Station Adapter is used only with JBV-1 Docking Station. It has been designed for calibration and soft ware update use. The Docking Station Adapter makes signal connections to the phone.

DA–19 main electric functions include:

– adjustable VBATT calibration voltage, current measurement limit voltage "VCHAR", current measurement calibration current "ICHAR"

– adjustable ADC calibration voltage via BTEMP and BSI signal

– BTEMP and BSI calibration resistor

– signals from FBUS to the phone via parallel jig

– control via FBUS or USB

– Flash OK/FAIL indication

In calibration mode DA–19 is powered by external power supply 11–16V DC. In flashing power for the phone can be taken from FPS-8 or external power supply 11–16V DC.

DA–19 main electric functions are:

– phone recognizing from BTEMP

– filters of FBUS signals

MJS–38 Module Test Jig

Module Testg Jig MJS-38 is designed for regional Central Services for WV8 module testing. It can be used for flashing and RF-, battery-, system-, radio- and SIM reader testing.

Product Code

MJS-38 Module Test Jig: 0770416

View of MJS–38

Note: The nominal supply voltage for MJS-38 is +4.2 V.

The supply voltage must not exceed +5.0 V (min 3V).

(MJS-38 includes overvoltage, overcurrent and reversed polarity protection).

For flashing with FPS-8, it is possible to bypass the regulator

(jumper).

FPS–8 Flash Prommer (Sales Pack)

The Flash Prommer FPS-8 is used with e.g. DA-19 and JBV-1. Power is supplied to FPS-8 from the Universal Power Supply.
The sales pack includes:

– FPS–8 Flash Prommer   0750123

– FPS–8 Activation Sheet   9359289

– Universal Power Supply   0680032

– AXS-4 Service Cable (D9-D9)0730090

– Printer cable   0730029

FLA–27 POS (Point Of Sale) Flash Loading Adapter

FLA-27 POS Flash Loading Adapter is used in place of the phone's normal battery during service, to supply a controlled operating voltage.

Product Code

FLA-27 POS Flash Loading Adapter: 0770492

Note! The following instructions must be followed when using Service Accessories designed for Nokia NPL-3 product.

*Otherwise, the sensitive parts may damage, and the accessory becomes useless.*

FLA–27, POS Flash Adapter

1   Hold the Flash Adapter in one hand and the phone in the other.

2   Put the Battery connector side into its place, and then press the Test probe side and the phone together.

Note! If proceeding in reverse order, the Test probes may be damaged.

FLC–2 DC Cable
The FLC–2 is used to supply a controlled operating voltage.

SW Security Device PKD-1

SW security device is a piece of hardware enabling the use of the service software when connected to the parallel (LPT) port of the PC. Whithout the dongle present it is not possible to use the service software. Printer or any such device can be connected to the PC through the dongle if need ed.
> *Caution:*   *Make sure that you have switched off the PC and the printer before making connections!*

> *Caution:*   *Do not connected the PKD-1 to the serial port. You may dam age your PKD-1!*
