SERVICE MANUAL Level 1&2

RM-43 /RM-158

Transceiver characteristics:

Band:

- RM-43: GSM/GPRS/EDGE 900/1800/1900MHz +2100 WCDMA
- RM-158: GSM/GPRS/EDGE 900/1800/1900MHz
- Camera: 2 Megapixel, 20x stepless digital zoom
- Display: Active matrix color display with 262.144 colors,
 - resolution 176 x 208 pixel

Bluetooth

WLAN (only RM-43)

USB

Visual Radio + Media Player

Memory Capacity: about 16 MB internal memory + 4 GB Hard Drive

Enhanced music features: 8-band Equalizer, Stereo Widening Loudness, Balance

Transceiver with BL-5C 970 mAh Li-Ion battery pack

Talk time	Standby	Note
up to 4h (GSM)	up to 190h (GSM)	Depends on network parameters

Environmental characteristics:

Lead-free soldered

1. INTRODUCTION

The purpose of this document is to help NOKIA service levels 1 and 2 workshop technicians to service NOKIA products. This Service Manual must be used only by authorized NOKIA service suppliers. The content of it is confidential. Please note that NOKIA also provides other guidance documents (e.g. Service Bulletins) for service suppliers. Follow these regularly and comply with the given instructions.

While every effort has been made to ensure the accuracy of this document, some errors may exist. If you find any errors or if you have further suggestions, please notify NOKIA using the address below: mailto:cc-ts-rc.documentation@nokia.com

Please keep in mind also that this documentation is continuously being updated and modified, so always watch out for the newest version.

Warnings and Cautions

Please refer to the phone's user's guide for instructions relating to operation, care, and maintenance, which include important safety information. Note also the following:

Warnings:

- 1. CARE MUST BE TAKEN ON INSTALLATION IN VEHICLES FITTED WITH ELECTRONIC ENGINE MANAGEMENT SYSTEMS AND ANTI-SKID BRAKING SYSTEMS. UNDER CERTAIN FAULT CONDITIONS, EMITTED RF ENERGY CAN AFFECT THEIR OPERATION. IF NECESSARY, CONSULT THE VEHICLE DEALER/MANUFACTURER TO DETERMINE
- 2. THE IMMUNITY OF VEHICLE ELECTRONIC SYSTEMS TO RF ENERGY. THE CELLULAR TELEPHONE MUST NOT BE OPERATED IN AREAS LIKELY TO CONTAIN POTENTIALLY EXPLOSIVE ATMOSPHERES, EG PETROL STATIONS (SERVICE STATIONS), BLASTING AREAS ETC.
- 3. OPERATION OF ANY RADIO TRANSMITTING EQUIPMENT, INCLUDING CELLULAR TELEPHONES, MAY INTERFERE WITH THE FUNCTIONALITY OF INADEQUATELY PROTECTED MEDICAL DEVICES. CONSULT A PHYSICIAN OR THE MANUFACTURER OF THE MEDICAL DEVICE IF YOU HAVE ANY QUESTIONS. OTHER ELECTRONIC EQUIPMENT MAY ALSO BE SUBJECT TO INTERFERENCE.

Cautions:

- 1. Servicing and alignment must be undertaken by qualified personnel only.
- 2. Ensure all work is carried out at an anti-static workstation and that an anti-static wrist strap is worn.
- 3. Use only approved components as specified in the parts list.
- 4. Ensure all components, modules, screws, and insulators are correctly re-fitted after servicing and alignment.
- 5. Ensure all cables and wires are repositioned correctly.

Electrostatic discharge can easily damage the sensitive components of electronic products. Therefore, every Service Supplier must observe the precautions, mentioned in the appropriate "Service Partner Requirements", available on NOKIA Online. Also see ESD Protection Requirements in this Service Manual. CONFIDENTIAL

2. GENERAL REPAIR INFORMATION

This section provides useful repair information how to carry out repairs:

- Make sure your testing equipment is functioning properly before beginning repair work.
- To familiarize yourself with the NOKIA product read the tutorials or user's guide on <u>www.nokia.com</u> -->Support--> Phones, by selecting the Phone Model.
- Before starting repairs you must observe ESD precautions such as being in your ESD Protected Area and connecting your wristband.
- Use gloves to avoid corrosion and fingerprints.
- Cover windows and displays with a protective film to avoid dust and scratches.
- Use a lint-free cloth (e.g. Micro-Fibre cloth) to clean the LCD.
- When cleaning the pads use a soft cloth/ESD brush and Isopropanol. Do not use a glass fiber pencil: this scratches the surface and will corrosion.
- Non-faulty mechanical parts (except shielding lids and bent parts or soldered components), may be reused if they are not soldered.
- When removing the shielding lids make sure to replace them with new ones, otherwise the high-frequency leakage can affect the device.
- Always use original NOKIA spare parts.
- Check the soldering joints of the parts concerned with regard to the fault symptom (e.g. soldered connectors or switches) and resolder them if necessary (Level 2 only).
- Remove excess soldering flux after repair.
- Observe the torque requirements when assembling the unit.
- Preferably use your own equipment for testing. E.g. if the customer complains about charger function, please test the phone with your own charger to determine if the malfunction is being caused by phone or charger causes the malfunction.
- A SIM card is needed for all GoNoGo tests.
- When doing the fault log entries, always note the Item code of the part that caused the malfunction. Also, fill in the appropriate part code from the assembly if needed.
- Please be aware that some malfunctions may be software related and solved by an update.
- There are several documents available on NOL which must be followed:
- •
- First, pay attention to the latest content pages of Service Bulletins, which are always available for each folder on NOKIA Online. Make sure your documentation is up to date.
- •
- The service level indicator at the bottom of each document displays the appropriate target group.

Downloads > Support Library >

- 1. Instructions
- 2. General Service Bulletins
- 3. Product related documents
- 4. Spare Part Service Bulletins
- 5. Service Tools Service Bulletins
- 6. Common Software Service Bulletins etc...

Use General SB-217 as a reference or overview.

Please also check NOKIA Online (NOL) for latest news and files on a regular basis.

Approved 3.0 MGR 27.Apr.2006

CONFIDENTIAL

3. PATHFINDER FOR WORKSHOP STAFF

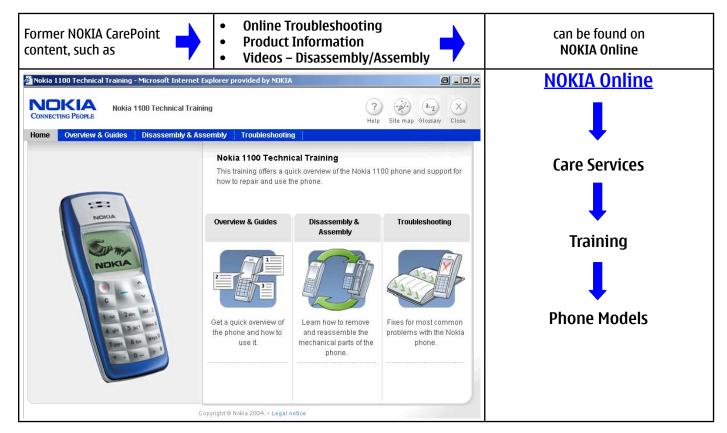

In addition to the information in this Service Manual, there are other instructions and data, which must be followed. Main documentation database is <u>NOKIA Online</u> with the purpose of serving different multimedia content, like video clips or interactive tutorials.

It is mandatory to watch for newest technical and organizational information on a daily basis to be updated as required (see **"Latest files in Support Library"**). New information must be processed and implemented as soon as possible. When logged into NOL you can also find needed information in different folders like:

Support Library Phones

Service Manuals Service Bulletins Software Repair Information

Level 1&2 e-learning (former NOKIA CarePoint) on NOKIA Online

Level 1&2 e-learning courses offer a quick overview of the NOKIA phone and support on repair and testing.

Overview & Guides	Disassembly & Assembly	Troubleshooting
Basic information about the phone,	Instructions on disassembling and as-	Step-by-step instructions on locating
features, and technologies	sembling the phone	and repairing the most common prob-
		lems with the phone

To reduce the server traffic we recommend downloading the newest version of large files like videos, Phoenix packages, or Service Manuals only once to distribute it internally for further use.

6. SPARE PARTS LIST

Please replace this page (placeholder) with the latest corresponding Service Bulletins (spare parts, SWAP units and service tools) from NOL!

This will ensure that you are using up-to-date order codes only.

Therefore, Service Bulletins on NOL have to be checked on daily basis.

Unlock the Keypad •

- Press the red receiver button to reach the Home Menu •
- Press the Menu Key **I** and select **Cameras** •
- Press down the Joystick to take a photo • This Image will be saved to Gallery into the Photos folder automatically. Test was successful, if the Image appears on your Display. The camera is ok.
- Select Options
- Select Go to Media gallery .
- Select the picture you want to delete
 - Select Options
 - Select Delete
 - Select Yes

If the test is failed see Quick Trouble Shooter.

18.BLUETOOTH GONOGO TEST

Bluetooth test

You need another Bluetooth device (e.g. 6230) to do a GoNoGo test.

Make sure that Bluetooth is activated in the reference unit. The distance of the devices should be not more than 5m from each other.

Test unit

Reference unit; Bluetooth activated

Settings on the test unit:

- Press the red End key to reach the Home Menu
- Press the Menu Key **Wesself** and select **Phonebook** If phone and SIM memory is empty, create one new entry.
- Select an entry
- Select Options
- Select Send

.

• Select Bluetooth

Search window appears and shows all Bluetooth units in range.

Choose one unit and press Select

Test was successful, if you get the message "Business card received" on the Reference unit.

• Press red **End** key of the Test unit to reach the Home Menu

Note: If the Bluetooth is activated, switch it off!

Page 34 (34)

Approved 3.0 MGR 27.Apr.2006

19.GONOGO TEST

After the optical check, a GoNoGo test has to be carried out if the unit has been unscrewed to guarantee the functionality of the phone.

Please refer to the actual information on NOKIA Online. When using delivered tester support files, take care of the right setup according to the tester type and product type.

Please refer to "Recommended Service Equipment" on NOKIA Online.

Mobile Phone Tester

20.BATTERY TEST

A battery tester lets you test the capacity of NOKIA batteries.

Please refer to the actual information on NOKIA Online.
