Year 2000 Compliance

The OKIFAX 5700 and 5900 are Year 2000 Compliant. They contain information technology that accurately processes date and time data between the years 1999 and 2000, and carries no issue for the September 9, 1999 (9999) programming concern. These products, when used in combination with products purchased from other manufacturers, whose products properly exchange data and time information, will accurately process the date and time.

ENERGY STAR®

As an ENERGY STAR Partner, Okidata has determined that this product meets the ENERGY STAR guidelines for energy efficiency.

Limited Warranty

Limited Warranty: U.S. and Canada

Okidata, division of Oki America, Inc. (Okidata) warrants this OKIFAX to be free from defect in material and workmanship and will remedy any such defect according to the terms of this *Limited Warranty*. This *Limited Warranty* extends to the original purchaser only and does not extend to consumable items.

Okidata will, for a period of ninety (90) days from the date of purchase, repair (or replace at its option) on site at the original purchaser's facility and without charge any defective component(s) of the OKIFAX, provided that this warranty service is performed by an authorized OKIFAX service center or authorized third-party service organization. From expiration of the ninety (90) day parts and labor warranty until one (1) year from the date of purchase (five [5] years in

the case of the LED imaging array), Okidata will provide replacements for defective components at no charge provided that this warranty service is performed at an authorized OKIFAX service center or authorized third-party service organization.

To make request or claim for service under the ninety (90) day parts and labor coverage of this *Limited Warranty*, contact your OKIFAX Authorized Dealer, authorized third-party service provider, or Okidata.

To make request or claim for service under the parts-only portion of this *Limited Warranty* the original purchaser must return the Okidata product, shipping prepaid, in the original shipping container or equivalent, to Okidata or an authorized OKIFAX service center and assume the risk of loss or damage in transit. A written receipt for the product, showing

the date of purchase, dealer's name, and serial number of the OKIFAX facsimile machine, must accompany any request or claim for work to be performed under this *Limited Warranty*.

This *Limited Warranty* shall not apply if the product has been damaged due to abuse, misuse, misapplication, accident, or as a result of service or modification by any other than an authorized OKIFAX service center.

THERE ARE NO EXPRESS WARRANTIES OTHER THAN THOSE ON THE FACE HEREOF AND DESCRIBED ABOVE. NO WARRANTIES WHETHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, SHALL EXTEND BEYOND THE RESPECTIVE WARRANTY PERIOD DESCRIBED ABOVE. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

Okidata SHALL NOT BE RESPONSIBLE OR LIABLE FOR ANY SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES OR LOSS ARISING FROM THE USE OF THIS PRODUCT. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusion may not apply to you.

Additional information on obtaining service under this *Limited Warranty* is available by contacting the OKIFAX dealer from whom the product was purchased, by contacting Okidata directly at 1-800-OKIDATA [1-800-654-3282] (U.S. and Canada, English only) or at 1-609-222-5276 (Spanish only), or by contacting one of the listed service locations.

This *Limited Warranty* applies to all OKIFAX. However, the procedure for obtaining service may vary outside the continental United States. Contact your OKIFAX dealer for such warranty service information.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Limited Warranty: Latin America

Oki Data warrants this fax unit (hereinafter Product) to be free in defect in material and workmanship and will remedy any such defect according to the terms of this *Limited Warranty*. This *Limited Warranty* does not extend to consumable items, including but not limited to toner cartridges, fuses, etc.

Oki Data will repair (or at its option replace) at no charge, any defective component(s) of the printer for one (1) year from the date of purchase except for the printhead (LED imaging array), which is warranted for a period of five (5) years from date of purchase. This *Limited Warranty* extends to the original purchaser only.

To make a request or claim for service under this *Limited Warranty* the original purchaser must return the Oki Data Product to Oki Data or an authorized Oki Data service center within the country purchased. The purchaser returning the product for repair must pay for all transportation charges to

the repair center. A written receipt for the Product, showing the date of purchase, dealer's name, and both the model and serial numbers of the Oki Data Product must accompany any request or claim for work to be performed under this *Limited Warranty*.

This shall not apply if the Product has been damaged due to abuse, misuse, misapplication, accident, or as a result of service or modification by any other than an authorized Oki Data service center.

THERE ARE NO EXPRESS WARRANTIES OTHER THAN THOSE ON THE FACE HEREOF AND DESCRIBED ABOVE. NO WARRANTIES EXPRESS OR APPLIED, INCLUDING, BUT NOT LIMITED TO, ANY PARTICULAR PURPOSE, SHALL EXTEND BEYOND THE RESPECTIVE WARRANTY PERIODS NOTED ABOVE.

Okidata Service Centers

Specifications

General

	OKIFAX 5700	OKIFAX 5900
Protocol	ITU-T G3	
Modem speed	Maximum 33.6 Kbps	
Transmission speed	3 seconds per page (ITU-T Test Chart #1)	2.5 seconds per page (ITU-T Test Chart #1)
Print speed	Maximum 10 pages per minute	
Print resolution	600 dpi	
Communications	Half duplex	
Coding scheme	MH / MR / MMR with ITU-T ECM error correction	MH / MR / MMR / JBIG with ITU-T ECM error correction
Memory		
Standard	2.5 MB	4.5 MB
Optional	2 or 4 MB	2 or 4 MB

Scanning

	OKIFAX 5700	OKIFAX 5900
Scan speed	3 seconds per page	1.5 seconds per page
Scan resolution	300 dpi	
Scan width	8.5" (21.5 cm)	
Scan length	5" to 14" (12.8 to 35.6 cm)	
Gray scale	64 levels	

Dialing

	OKIFAX 5700	OKIFAX 5900
One Touch	40	80
Auto Dials	100	150
Dialing groups	20, up to 140 numbers each	20, up to 230 numbers each
Broadcast transmissions	150 locations	240 locations

Paper Handling

	OKIFAX 5700	OKIFAX 5900
Automatic Document Feeder	Letter, A4 • 50 sheets of 13 to 20-lb paper (49 to 75 g/m ²) • 30 sheets 21 to 28-lb paper (79 to 105.5 g/m ²) • single sheet of 32-lb paper (121 g/m ²)	
Universal tray	250 sheets maximum; letter, legal 13", legal 14", Executive, A4, A5 A6. 16 to 24 lb. (60 to 91 g/m ²)	
Manual feeder	Single sheet: letter, legal 13", legal 14", A4, Executive, A5, JIS B5, A6. 16 to 32 lb. (60 to 121 g/m ²) Envelopes (Monarch, COM-10, DL, C5, COM-9).	

Physical

	OKIFAX 5700	OKIFAX 5900
Dimensions (W x D x H)	14.2" x 18.6" x 13.8" (36 x 47.2 x 35.2 cm), excluding paper tray	
Weight	30.9 lbs (14 kg) with image drum	

Electrical

	OKIFAX 5700	OKIFAX 5900
Power	120 VAC +6%, -15%, 50/60 Hz ± 2% or 220/240 VAC ± 15% , 50/60 Hz ±2%	
Battery Backup	72 hours	
Power modes	Ready and energy-saving Standby	
Warmup Time	30 seconds, from Standby	

Environmental

	OKIFAX 5700	OKIFAX 5900
Temperature		
Operating	(50 to 90°F) 10 to 32°C	
Storage	(14 to 110°F) -10 to +43°C	
Humidity		
Operating	20 to 80%RH, non condensing	
Storage	10 to 90%RH, non condensing	

Safety Information

Installation Hints

- Install your OKIFAX 5700/5900 fax unit in a dust-free location away from direct sunlight.
- Do not plug your fax unit into a power source shared by equipment which produces electrical noise (i.e., air conditioners, etc.).
- Leave electronic adjustments to authorized service personnel.
- The LINE terminal connects your fax machine to a standard telephone line. To avoid damage to your telephone system or to the fax unit, do not plug your fax machine into anything other than a standard RJ-11C jack.
- Your fax unit is intended to be grounded electrically and is equipped with a three-wire grounded power cord. For your safety, do not attempt to defeat your power cord's grounding plug.
- The power outlet should be located near the equipment and should be easily accessible.
- The TEL port on the back of the unit is only suitable for 2-wire devices. Not all standard telephones will respond to incoming ringing when connected to an extension socket.
- This equipment may not necessarily provide for the effective hand-over of a call from a telephone connected to the same line.

Operation and Maintenance

- Use a dry cloth to clean the control panel and the main body of the unit.
 - *Aside from replacing the toner and image drum cartridge, do not disassemble or attempt to service this unit yourself. Refer to a qualified technician for service. See the “Service and Support” section of your User’s Handbook.*
 - Disconnect the power cord before trying to remove any objects that may have fallen into the machine.
 - When relocating your fax unit, always disconnect the telephone line before disconnecting the power cord, then reconnect the power cord first.
 - This unit is not intended to be used in parallel with any other telephone devices.
- If anything happens that indicates that the fax unit is not working properly or has been damaged, unplug it immediately and follow the instructions in the “Service and Support” section of your User’s Handbook for having your fax unit serviced. These are some of the things to look for:
 - The power cord or plug is frayed or damaged.
 - Liquid has been spilled into the printer, or it has been exposed to water.
 - The fax unit has been dropped, or the cabinet is damaged.
 - The fax unit does not function properly when you’re following the operating instructions.

Toner Cartridge and Image Drum Unit Handling

- Leave unused toner cartridges and image drum units in their packages until needed. When replacing a toner cartridge or image unit, re-use the packaging to dispose of the old toner cartridge or image drum unit. Be sure to dispose of it in an environmentally sound manner.
- Do not expose these components to light for more than five minutes. Never expose the green drum (inside the image drum unit) to direct sunlight.
- Always hold the image drum unit by the ends-never by the middle. Never touch the surface of the green drum inside the image drum unit.
- Exercise care when removing the toner cartridge. Do not let it touch your clothing or porous materials. The toner powder causes permanent stains.
- Small amounts of toner spilled on skin or clothing can be readily removed with soap and cold water. Using heated water will make removing the stain much more difficult.

Emergency First Aid

- *If toner is swallowed:* Dilute by giving two glasses of water and induce vomiting by administering Syrup of Ipecac (follow manufacturer's instructions). Seek medical attention. Never attempt to induce vomiting or give anything by mouth to a person who is unconscious.
- *If toner is inhaled:* Take person to an open area for fresh air. Seek medical attention.
- *If toner gets in the eyes:* Flush eyes with large quantities of cool water for 15 minutes, keeping eyelids open with fingers. Seek medical attention.
- See the *Material Safety Data Sheet* in the back of this booklet for more information.

Regulatory Information

Federal Communications Commission Requirements for End Users

This device has been granted a registration number by the Federal Communications Commission, under Part 68 rules and regulations for direct connection to the telephone lines. In order to comply with these FCC rules, the following instructions must be carefully read and applicable portions followed completely.

- 1 This equipment complies with Part 68 of FCC rules. On the back of the equipment is a label that contains, among other information, the FCC registration number and ringer equivalence number (REN) for this equipment. If requested, this information must be provided to the telephone company.
- 2 The following USOC jacks may be used with this equipment: RJ11C.
- 3 The REN is used to determine the quantity of devices which may be connected to the telephone line. Excessive REN's on the telephone line may result in the devices not ringing in response to an emergency call. In most, but not all areas, the sum of the REN's should not exceed five (5.0). To be certain of the number of devices that may be connected to the line, as determined by the total REN's, contact the telephone company to determine the maximum REN for your calling area.
- 4 If the equipment causes harm to the telephone network, the telephone company will notify you in advance. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

- 5 The telephone company may make changes in its facilities, equipment, operations, or procedures that could affect the operation of the equipment. If this happens, the telephone company will provide advance notice in order for you to make the necessary modifications to maintain uninterrupted service.
- 6 If trouble is experienced with this equipment, please contact the following for repair and/or warranty information:
 - Okidata
 - 2020 Bishops Gate Blvd.
 - Mount Laurel, N.J. 08054-4620
 - Telephone: (609) 235-2600 or
 - (800)-OKIDATA (800-654-3282)
- 7 This equipment contains no user serviceable parts. Please contact Okidata for service.
- 8 This equipment cannot be used on public coin service provided by the telephone company. Connection to Party Line Service is subject to state tariffs. Contact your state Public Utility Commission, Public Service Commission, or Corporate Commission for information.
- 9 This equipment is hearing-aid compatible.

If the trouble is causing harm to the telephone network, the telephone company may request that you remove the equipment from the network until the problem is resolved.

FCC Telephone Consumer Protection Act

The Federal Communications Commission Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device to send any message via a telephone fax machine unless such message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity, or other individual sending the message, and the telephone number of the sending machine or such business, other entity, or individual.

To comply with this law, you must enter the following information in your fax unit:

- Date and time: see “Setting the Date and Time” under Basic Features in the User’s Handbook for instructions on doing this.
- Name and telephone number which identify the source of your fax transmission: see “Setting Your Fax Machine’s ID” under Basic Features in the User’s Handbook for instructions on doing this.

Industry Canada (IC) Requirements for End Users

The Industry Canada label identifies certified equipment. This certification means that the equipment meets certain telecommunications network protective, operational and safety requirements. The Department does not guarantee the equipment will operate to the user’s satisfaction.

Before installing this equipment, users should ensure that it is permissible to be connected to the facilities of the local telecommunications company. The equipment must also be installed using an acceptable method of connection. In some cases, the company’s inside wiring associated with a single line individual service may be extended by means of a certified connector assembly (telephone extension cord). The customer should be aware that compliance with the above conditions may not prevent degradation of service in some situations.

Repairs to certified equipment should be made by an authorized Canadian maintenance facility designated by the supplier. Any repairs or alterations made by the user to this equipment, or equipment malfunctions, may give the telecommunications company cause to request the user to disconnect the equipment.

Users should ensure for their own protection that the electrical ground connections of the power utility, telephone lines and internal metallic water pipe system, if present, are connected together. This precaution may be particularly important in rural areas.

- Users should not attempt to make such connections themselves, but should contact the appropriate electric inspection authority, or electrician, as appropriate.

The Load Number assigned to each terminal device denotes the percentage of the total load to be connected to a telephone loop which is used by the device, to prevent overloading. The termination of a loop may consist of any combination of devices subject only to the requirement that the total of the Load Numbers of all the devices does not exceed 100.

FCC Radio Frequency Interference Statement for 120-Volt Models

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Plug the unit into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio television technician for help.

A properly shielded interface cable must be used in order to ensure compliance of this equipment with FCC regulations.

Changes or modifications not expressly approved by Okidata may void your authority to operate this device.

IC Interference Statement for 120-Volt Models

This OKI apparatus complies with Class B limits for radio interference as specified in the Industry Canada Radio Interference Regulations.

FCC Radio Frequency Interference Statement for 230/240-Volt Models

WARNING: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

It is the responsibility of the user to obtain the required shielded cable in order to ensure compliance of this equipment with FCC regulations.

Changes or modifications not expressly approved by Okidata may void your authority to operate this device.

IC Radio Interference Statement for 230/240-Volt Models

This OKI apparatus complies with the Class A limits for radio interference as specified in the Industry Canada Radio Interference Regulations.

European Union Council of the European Communities Statements of Electromagnetic Conformance for 230/240-Volt Models

This product complies with the requirements of the Council Directive 89/336/EEC on the approximation of the laws of the member states relating to electromagnetic compatibility.

This product is in conformity with Directive 73/23/EEC on the harmonization of the laws of Member States relating to electrical equipment designed for use within certain voltage limits.

Emergency Information:

Call 1-800-OKIDATA (1-800-654-3282), U.S. and Canada only

Emergency First Aid Procedures

Toner swallowed (ingested)

Dilute by giving two glasses of water and induce vomiting by administering Syrup of Ipecac (follow manufacturer's

instructions). Seek medical attention. *NEVER give anything by mouth or attempt to induce vomiting in a person who is unconscious.*

Toner inhaled

Remove person to fresh air. Seek medical attention.

Toner gets in the eyes

Flush eyes with large quantities of cool water for 15 minutes, keeping the eyelids open with fingers. Seek medical attention.

- ! *Small amounts of toner on skin or clothing can easily be removed with soap and cold water. Hot water makes toner harder to remove.*

Current as of 6/30/99

Hazardous Ingredients

Styrene-Butyl Acrylate Copolymer (91% by weight)

CAS# 25767-47-9

OSHA TWA 15 mg/m³ for total dust

ACGIH TLV 10 mg/m³ for total dust

Carbon Black (5-7% by weight)

CAS# 1333-86-4

OSHA TWA 3.5 mg/m³

ACGIH TLV 3.5 mg/m³

Polypropylene (less than 3% by weight)

- *SARA, Title III.*

Physical Data

Melting Point: 110°C (230°F)

Boiling Point: Not applicable

Vapor Pressure: Not applicable

Vapor Density (Air=1): Not applicable

Evaporation Rate (Butyl Acetate=1): Not applicable

Specific Gravity (H₂O=1): 1.15

Solubility in water: Negligible

Appearance and odor: Black granules, no odor

Fire and Explosion Hazard Data

Flash Point (Method Used): Not applicable

Flammable Limits

Lower Explosive Limit: Not applicable

Upper Explosive Limit: Not applicable

Extinguishing Media: Water, CO₂, Dry Chemical, or Foam

Special Fire Fighting Procedures: Do not use methods that may create a dust cloud, such as high pressure water and/or steam

Unusual Fire and Explosion Hazards:

- Organic components decompose at 200-455°C (392-851°F).
- Material may explosively combust when finely suspended in air.
- Thermal decomposition of organic components may result in release of oxides of carbon and nitrogen.

Health Hazards Data

Routes of Entry: Inhalation, Ingestion, Eyes, Skin.

1 Styrene-Butyl Acrylate Copolymer

Subcutaneous implantation of polymeric styrene powder in rats has induced tumors at the site of implantation.

2 Carbon black

(Group 2B “Possible Carcinogen”; IARC)

Overexposure to carbon black is associated with causing irritation, conjunctivitis, and corneal hypoplasia of the eyes; minor irritation and eczema of the skin; and irritation and bronchitis. Long-term inhalation exposure may be associated with causing lung cancer.

3 Polypropylene

(Group 3 “Not Classifiable”; IARC)

Subcutaneous implantation of polypropylene powder in rats has induced tumors at the site of implantation.

4 Amorphous Fumed Silica

(Group 3 “Not Classifiable”; IARC)

Overexposure to amorphous silica has been associated with causing irritation of the lungs and pneumoconiosis. Long-term inhalation exposure may be associated with producing tumors in laboratory animals.

Reactivity Data

Stability: Stable

Polymerization: Will not occur.

Hazardous Decomposition Products: Thermal decomposition may result in release of oxides of carbon and nitrogen.

Temperature: Do not expose to temperatures above 200°C (392°F).

Incompatibility: Avoid exposure to strong oxidizers.

Spill Cleanup and Disposal

Spill Cleanup

Small Spills

- 1 Remove sources of ignition.
- 2 Clean up spill with wet cloth.

Large Spills

- 1 Remove sources of ignition.
- 2 Wear protective gear: respirator, rubber gloves, goggles (see below)
- 3 Clean up spill with scoop, being careful not to generate a lot of dust.

Waste Disposal

Follow appropriate federal, state and local regulations.

Safe Handling and Use

Respiratory Protection: Not normally required. For large spills, use NIOSH-approved full face-piece respirator with HEPA cartridge during cleanup.

Protective Gloves and/or Eye Protection: Not normally required. For large spills, use rubber gloves and chemical worker's goggles during cleanup.

Ventilation: Outside of normal ventilation, not normally required.

Other Protective Equipment and/or Hygienic Practices:
None

Special Precautions

Precautions for Handling or Storage: Protect from high heat. Avoid making dust.

Other Precautions: None

The information contained in this MSDS is based on data considered accurate; however, no warranty is expressed or implied regarding the accuracy of these data or the results to be obtained from the use thereof. Vendor assumes no responsibility for injury to vendee or third person party proximately caused by the product if reasonable safety procedures are not adhered to as stipulated in the MSDS. Furthermore, vendor assumes no responsibility for injury to vendee or third person party proximately caused by abnormal use of the product even if reasonable safety procedures are followed. Additionally, vendee assumes the risk of his use of the product.
