

PAPIS

Panasonic Product Information System

What is PAPIS ?

Panasonic Service Deutschland, a division of Panasonic Deutschland has developed a new information system called "PAPIS" to provide Company Information, Product Information and Service Information.

What does PAPIS contain ?

Among the PAPIS features are :

- Product photo, specifications and accessories
- Product operation and basic technical data
- Repair (technical) information with photos and drawings
- Product index, glossary and operation guide
- German and English language versions
- Search function and printing of displayed page
- Service parts master and analysis
- Update of information via the Internet
- Displayed page can be printed out
- Memo (note pad) function as "user input area"
- Simple, user friendly and visible operation
- Networking or Standalone versions

See pages 2 to 4 for sample pages of PAPIS information.

How to obtain PAPIS

For more details contact your local Panasonic company.
