IMPORTANT NOTES:

For best results, connect this product directly to a wall outlet.

This product may not function normally in certain electrical environments.

See page 5 for more information.

Please read this document before use and save this document for future reference.

Introduction

Thank you for purchasing a Panasonic HD-PLC product.

Main features

Flexible and stable network access anywhere in your home

The BL-PA100 offers the next generation in home networking: High Definition Power Line Communication (HD-PLC). High-speed internet access and high performance data transfers are now available in any room.

Every AC outlet becomes a home network access point

Because HD-PLC technology makes use of the existing electrical wiring in your home, there's no need to run cables between rooms.

Easy to expand

Up to 16 adaptors in all can be used, which means you can add additional adaptors whenever you need to add a network connection in another room of the house.

Simple network speed testing

You can confirm the speed of each adaptor's HD-PLC connection by simply pressing a button.

Fast, reliable, and secure

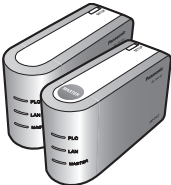

With speeds of up to 190 Mbps (PHY rate)^{*1}, advanced error correction, and AES 128-bit encryption, the BL-PA100 provides peace of mind at the speed of light.

For more information about how HD-PLC works, see page 7.

^{*1} This is the theoretical maximum data transmission speed of the HD-PLC standard. The actual maximum data transmission speed is about 70 Mbps for UDP and 42 Mbps for TCP. Results may vary depending on electrical conditions, network environment, and other factors. See the specifications for more information.

Included items

Confirm that the following items are included with this product.
Additional items can be ordered by calling 1-800-332-5368.

BL-PA100A 2 (1 Master and 1 Terminal) 	AC Cord 2 Order No.: PSJA1069Z 
- Getting Started 1	- Operating Instructions (this document) 1

Available accessories

You can add additional adaptors as necessary. Up to 16 adaptors in all (including the 2 adaptors included with this product) can be used.

BL-PA100A (Add-on Adaptor) 

Abbreviations

- This product is referred to as “the adaptor” in this document.

Trademarks

- Linux® is the registered trademark of Linus Torvalds in the U.S. and other countries.
- All other trademarks identified herein are the property of their respective owners.

IMPORTANT SAFETY INSTRUCTIONS

When using this product, basic safety precautions should always be followed to reduce the risk of fire, electric shock, or personal injury.

1. Read and understand all instructions. Keep this document for future reference.
2. Follow all instructions in this document and heed all warnings.
3. Do not install this product near any heat sources such as radiators, heat registers, stoves, or other devices (including amplifiers) that produce heat.
4. Protect the AC cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from this product.
5. The AC cord is used as the main disconnect device. Ensure that the AC outlet is located/installed near the product and is easily accessible.
6. Use only the included AC cord.
7. The AC cord must remain connected at all times. (It is normal for this product to feel warm during use.)
8. To prevent the risk of fire or electrical shock, do not expose this product to rain or any type of moisture.
9. Do not touch the product or the AC cord during lightning storms.
10. Unplug this product when unused for a long period of time.
11. Refer all servicing to qualified service personnel. Servicing is required when the unit has been damaged in any way, such as when the AC cord or plug is damaged, the unit does not operate normally, or after the unit has been dropped.
12. Do not use this product outdoors.
13. Unplug this unit from power outlets if it emits smoke, an abnormal smell or makes unusual noise. These conditions can cause fire or electric shock. Confirm that smoke has stopped and contact an authorized service center.

SAVE THESE INSTRUCTIONS

Electrical environment information

HD-PLC adaptors send data to and from each other over the existing electrical wiring in your home, and may be affected by electrical noise or the length of your home's wiring. Keep the following in mind when placing each adaptor.

AC outlets

For best results, we recommend connecting the adaptors directly to a wall outlet. Avoid connecting high power-consuming appliances to the same wall outlet. Additionally, connecting an adaptor to a uninterruptible power supply (UPS) or backup power supply device is not recommended.

While connecting the adaptors to a wall outlet is recommended, keep the following in mind if you must connect an adaptor to a power strip:

- Make sure the power strip does not have a noise filter or a surge protector, as these features may interfere with the performance of your adaptors.
- Do not connect the adaptor to a power strip that receives power from another power strip.
- Use a power strip with an AC cord that is as short as possible.

Electrical interference

Certain electrical devices emit electrical noise. If this noise is passed on to the electrical wiring in your home, it may interfere with the performance, speed, and reliability of your adaptors. For best results, we recommend connecting an electrical noise filter to noise emitting appliances.

The following appliances are more likely to produce noise:

- Battery chargers (including cell phone chargers)
- Hair dryers
- Vacuum cleaners
- Lights or lamps which have a dimmer switch or a touch-sensitive on/off feature
- Power drills

Additionally, this product may interfere with the following appliances:

- Short wave radios
- Lights or lamps which have a touch-sensitive on/off feature

Electrical wiring

HD-PLC adaptors send data to and from each other over the existing electrical wiring in your home. If 2 wall outlets are separated by a great length of electrical wiring, the adaptors connected to those outlets may not be able to communicate with each other.

For more information, refer to the troubleshooting section (see page 15) or access the Panasonic PLC Support Site at: <http://panasonic.co.jp/pcc/products/en/plc/>

After you have placed the adaptors where you plan to use them and plugged them into the wall outlets, test the terminal's network speed (see page 11).

Security information

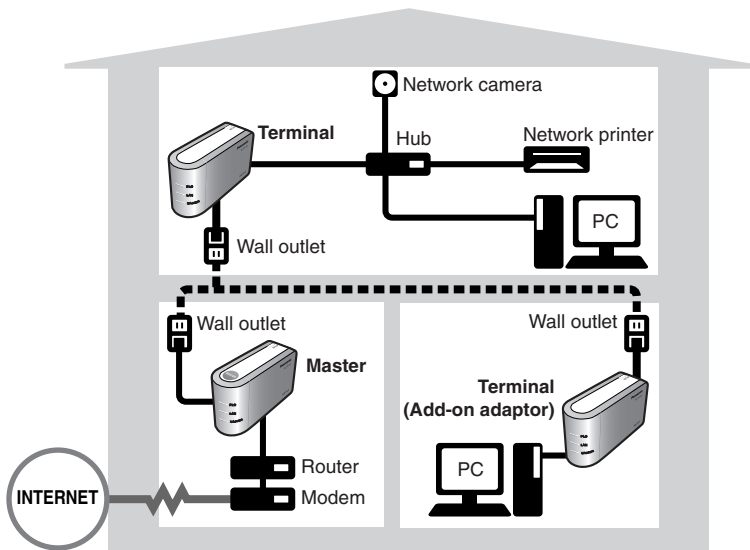

1. With any network connection, security is a concern. The BL-PA100A provides security to prevent unauthorized access to your network.
 - Only terminals that are registered to the master adaptor can communicate with the network.
 - A terminal may be registered to the master only if the **SETUP** buttons on the master and terminal are pressed within 5 seconds of each other.
2. Data sent and received over the PLC network employs AES 128-bit encryption, however we cannot guarantee that data will not be intercepted by a third party.
3. For security, we recommend resetting your adaptors (see page 13) in the following situations.
 - If for some reason you are concerned that another adaptor may have been accidentally registered to your master (for example, the adaptor of someone who lives in the same apartment building as you), reset each of your adaptors and register them again.
 - If you discard an adaptor, give an adaptor to someone else to use, or have an adaptor serviced, reset the adaptor first.
 - If you lose an adaptor, reset each of your adaptors and register them again.

How does it work?

Each HD-PLC adaptor has an AC cord that plugs into a wall outlet. This connection not only powers the adaptor, but also allows the adaptor to send data to and from the other adaptors in your home using your existing electrical wiring. Each adaptor also has a LAN jack, which connects each adaptor to your broadband router, hub, computer, network printer, network camera, etc.

Once your adaptors are registered, simply plug them into the wall outlets around your home. (The included adaptors are already registered. To register additional adaptors, see page 14.) Finally, connect the master adaptor to your broadband internet router or modem, and then connect the other adaptors to your network devices (computers, network printers, network cameras, etc.). When you're finished, each network device will be able to access the internet as well as each other.

Example of an integrated HD-PLC network

Master and terminal adaptors

Before using your adaptors, it is important to understand the concept of a “master” adaptor and a “terminal” adaptor.

An HD-PLC network contains at least 2 adaptors. One (and only one) adaptor must be configured as the master. All other adaptors are configured as terminals. (A maximum of 15 terminals per network is recommended.) An adaptor is configured as either a master or a terminal during registration (see page 14). For simplicity, we recommend configuring the adaptor that is directly connected to one of your router’s LAN ports as the master.

Main unit

- (1) **MASTER Seal (master adaptor only)**
Indicates which adaptor is pre-configured as the master adaptor.
- (2) **PLC Indicator**
Lights to indicate that the adaptor is connected to the HD-PLC network. For more information, see page 12.
- (3) **LAN Indicator**
Lights when a LAN cable is connected to the adaptor, and flashes when data is being sent or received. For more information, see page 12.
- (4) **MASTER Indicator**
Lights when the adaptor is configured as the master. For more information, see page 12.
- (5) **SETUP Button**
Used to register the adaptor (see page 14) or test the terminal's network speed (see page 11).
- (6) **Mode Selector**
The position of this selector during registration (see page 14) determines whether the adaptor is used as the master or as a terminal.
- (7) **AC IN**
Connects the adaptor to AC power as well as to the HD-PLC network.
- (8) **FACTORY DEFAULT RESET Button**
Used to reset the adaptor and erase its registration (see page 13).
- (9) **LAN Jack**
Connects the adaptor to a network device, such as a broadband router, hub, computer, etc. (see page 10).

Placing the adaptors

Refer to the information on page 5 when selecting a location to place your adaptors.

Note

- If you have purchased additional adaptors, make sure you have registered them to the master (see page 14) before placing them where you plan to use them.
- 1. Connect the AC cord of each adaptor to a wall outlet near where you plan to use it.
- 2. Confirm that the **PLC** indicator of each adaptor lights in blue when you plug the adaptors into the wall outlets.
 - If the **PLC** indicators do not light in blue, see page 15.

After you have placed the adaptors where you plan to use them and plugged them into the wall outlets, test the terminal's network speed (see page 11).

Connecting adaptors to network devices

Once you have placed the adaptors where you plan to use them and are satisfied with the network speed test results for your terminals (see page 11), follow the procedure below to connect your adaptors to your network devices (broadband router, hub, computer, network printer, network camera, etc.). This will integrate your HD-PLC network with your home network.

1. Confirm that each adaptor's AC cord is connected to the adaptor and plugged into a wall outlet.
2. Connect a LAN cable (sold separately) to each adaptor's **LAN** jack.

- The **LAN** indicator of each adaptor turns green.
 - If an adaptor's **LAN** indicator does not turn green, see page 15.
3. Connect the other end of each LAN cable to a network device.
 - Avoid connecting more than one adaptor to the same hub or router.
 - Refer to illustration on page 7 for an example of what your integrated HD-PLC network may look like.

You are now ready to use your computers, network printers, network cameras, etc.

Testing a terminal's network speed

Once you have connected the adaptors where you plan to use them, use the procedure below to test the speed of each terminal's network connection to the master. Make sure that the terminal has already been registered to a master (see page 14).

- Press and hold the terminal's **SETUP** button for about 1 second.
 - The indicators on the terminal light one at a time in succession for a few seconds.

PLC			
LAN			
MASTER			

- The indicators light for a few seconds. This indicates the network speed test result.
- Refer to the chart below to determine the network speed.

PLC				
LAN				
MASTER				
Network speed	No link	Good Less than 10 Mbps ^{*1}	Better 10 Mbps to 30 Mbps ^{*1}	Best More than 30 Mbps ^{*1}

*1 Approximate data transmission speed when transmitting data using the UDP protocol.

- If you are not satisfied with the speed test result, connect the terminal to a different wall outlet and repeat the test.

Note

- At least one indicator ("Good" network speed) must be lit in order to use the terminal.
- If you are not satisfied with the speed test result and have tried connecting the terminal to different wall outlets, refer to the troubleshooting section (see page 15).
- If the electrical conditions in your home changes after performing the speed test, network speed may also change.

Once you are satisfied with the terminal's speed test result, you are ready to connect each adaptor to a network device (broadband router, hub, computer, network printer, network camera, etc.; see page 10).

Understanding the indicators

PLC	Blue, lit	The adaptor is successfully connected to the HD-PLC network.
	Blue, flashing	The terminal is being registered to the master.
	Blue, flashes once every 5 or 10 seconds	The adaptor is registered to the master, but it is not connected to the HD-PLC network.
	Blue, turns off once every 10 seconds	The master has detected another master adaptor. In this situation, performance will be affected by the presence of the other master adaptor.
	Red, lit for 5 seconds	There was an error during registration. Try again.
	Red, lit	The adaptor is not functioning properly and cannot communicate over the HD-PLC network. Contact an authorized Panasonic service center.
	Off	The adaptor is not plugged in. The adaptor is not connected to the HD-PLC network (no other adaptors found, not configured, etc.).
LAN	Green, lit	A LAN cable is connected to the adaptor.
	Green, flashing	Data is being sent/received.
	Orange, lit	There is no network device connected to the adaptor via the LAN cable, or the network device is not turned on.
	Off	The adaptor is not plugged in.
MASTER	Green, lit	The adaptor is configured as the master.
	Green, flashes for 10 seconds	A terminal has been successfully registered to the master.
	Off	The adaptor is not configured as the master.

Resetting an adaptor

Normally an adaptor does not need to be reset, however, you may need to reset an adaptor if:

- You are concerned that another adaptor may have been accidentally registered to your master. (For example, the adaptor of someone who lives in the same apartment building as you.)
- An error occurs while registering a terminal to the master.
- You are registering an adaptor

Note

- Resetting a terminal erases its registration to the master. It must be registered to the master again in order to be used.
- If the master is reset, all terminals must be registered to the master again in order to be used.

Follow the procedure below to reset an adaptor.

1. Press the **FACTORY DEFAULT RESET** button on the adaptor for about 3 seconds.
 - The adaptor's indicators will begin flashing.
2. Once the adaptor's indicators stop flashing, the adaptor has been reset.
 - Do not disconnect or unplug the AC cord for 30 seconds.

Registration

Use the procedure below when you want to:

- Add an additional terminal to your HD-PLC network.
 - Re-register the master and terminal after resetting the master.
1. Confirm that the mode selector of the master adaptor is set to **MASTER**.
 2. Confirm that the mode selector of the terminal adaptor that you want to register is set to **TERMINAL**.
 3. Connect the AC cord of each adaptor to each adaptor's **AC IN** jack.

4. Plug the AC cord of each adaptor to the same wall outlet.
 - Registration may not be successful if the adaptors are connected to different wall outlets during registration.

5. Reset the terminal by pressing the **FACTORY DEFAULT RESET** button on the terminal for about 3 seconds (see page 13).
 - Check the position of the adaptor's mode selector (see page 8) and make sure that you reset the terminal adaptor (not the master).
6. Press the **SETUP** button on both adaptors for about 1 second. The order in which they are pressed does not matter.
 - The **PLC** indicator of each adaptor will begin to flash in blue.
 - Make sure you press the **SETUP** button on each adaptor within 5 seconds of each other.
 - If you are registering an additional terminal, communication between all other adaptors may be disrupted for about 10 seconds.
7. When the **PLC** indicator of each adaptor lights in blue, registration was successful.
 - If the **PLC** indicators do not light in blue, see page 15.
8. Wait 30 seconds, then unplug the AC cords from the wall outlet and place the adaptors where you plan to use them (see page 9).

Troubleshooting

Performance issues

The troubleshooting notes in this section are provided to resolve the following types of performance issues.

- Inability to transmit data over the HD-PLC network
- Slow data transmission speeds (interrupted video or audio, slow download speeds, etc.)
- Intermittent or varied performance (faster at certain times, slower at others)
- Interference caused by an adaptor
- The **PLC** indicator is not lit in blue even though you have registered the adaptor.

Troubleshooting notes

In most cases, performance issues such as those listed above can be resolved by performing the following troubleshooting notes. Each note contains several steps. After you perform each step, test the terminal's network speed (see page 11) to see if the issue has been resolved. For more information, access the Panasonic PLC Support Site at: <http://panasonic.co.jp/pcc/products/en/plc/>

Troubleshooting note #1:

Adaptor issues

Perform each step until the performance issue is solved.

1. Confirm that the AC cords of both the master and terminal adaptor are connected to the wall outlet. If an adaptor's **LAN** indicator is not lit, the adaptor is not receiving power.
2. Confirm that all LAN cables are securely connected to each adaptor. Use quality LAN cables. Also confirm that other network devices (routers, hubs, etc.) are turned on as well as properly connected and configured.
3. Disconnect the AC cord from the master and/or terminal adaptor, then connect it again to restart the adaptor.
4. Try connecting the master and/or terminal adaptor to a different wall outlet.
5. If you are not able to connect an adaptor's AC cord directly to a wall outlet and must use a power strip, make sure the power strip is plugged directly into a wall outlet and not to another power strip.
6. Make sure the power strip does not have a noise filter or a surge protector, as these features may interfere with the performance of your adaptors.
7. Use a power strip with an AC cord that is as short as possible.
8. Re-register the terminal following the procedure on page 14.

If you are still experiencing performance issues, continue to the next troubleshooting note.

Useful Information

Troubleshooting note #2:

Eliminating interference caused by other appliances

Perform each step until the performance issue is solved.

1. Identify potential electrical noise emitting appliances, and unplug them (if possible) briefly while you test the adaptor's network speed.
The following appliances are more likely to produce noise:
 - Battery chargers (including cell phone chargers)
 - Hair dryers
 - Vacuum cleaners
 - Lights or lamps which have a dimmer switch or a touch-sensitive on/off feature
 - Power drills
2. If unplugging a device seems to resolve the adaptor's performance issue, connect the device to a different wall outlet.
3. If connecting the device to a different wall outlet does not resolve the performance issue, connect the device to a noise filtering power strip with an AC cord that is at least 3 m (about 10 ft.) long.

Troubleshooting note #3:

Eliminating interference caused by an adaptor

This product may interfere with the following appliances:

- Short wave radios
- Lights or lamps which have a touch-sensitive on/off feature
- Other PLC adaptors which do not use the HD-PLC standard

Perform each step until the performance issue is solved. If the following steps do not resolve the issue, refer to the Panasonic PLC Support Site at:

<http://panasonic.co.jp/pcc/products/en/plc/> or call our customer call center at 1-800-272-7033.

1. Make sure that the appliance is not plugged into the same wall outlet as an adaptor.
2. Move the appliance away from any nearby adaptors.
3. Connect the appliance to a power strip.
4. For short wave radios, place the radio near a window.

Specifications

All specifications are subject to change without notice.

Power Line Communication interface

Standard	HD-PLC
Actual transmission speed*1	UDP: Max. 70 Mbps TCP*2: Max. 42 Mbps
Maximum recommended no. of adaptors per network*3	16 (including the master)
Maximum recommended no. of network devices connected to an adaptor*4	8

*1 Results may vary depending on electrical conditions, network environment, and other factors. For information on how transmission speed is measured, access the Panasonic PLC Support Site at: <http://panasonic.co.jp/pcc/products/en/plc/>

*2 Using Linux FTP.

*3 Performance may be affected as more adaptors are added to the network.

*4 Connecting more network devices to an adaptor may increase network traffic and affect performance.

LAN interface

Standard	IEEE 802.3/IEEE 802.3u
Interface	10 Base-T 100 Base-TX Auto MDI/MDI-X
Protocol	IPv4, IPv6, TCP, UDP
Access method	CSMA/CD

User interface

Indicators	PLC (blue, red) LAN (green, orange) MASTER (green)
Other	Mode Selector (MASTER or TERMINAL switch) SETUP button FACTORY DEFAULT RESET button

Useful Information

General

Operational environment	0–40 °C (32–104 °F) 20%–85% humidity (without condensation)
Dimensions (W x D x H)	Approx. 121 mm x 40 mm x 70 mm (4 3/4" x 1 9/16" x 2 3/4")
Weight	240 g (0.53 lb.)
Power supply	Input 120 V, 60 Hz
Power consumption	4 W

HD-PLC interface

Frequency band	4–28 MHz
Modulation	Wavelet OFDM (16 PAM–2 PAM)
Transmission PHY rate	Max. 190 Mbps*1
Access method	CSMA/CA TDMA
Error correction	Reed-Solomon encoder/decoder Convolutional encoder/Viterbi decoder
Encryption	AES 128-bit encryption
Communication distance	Approx. 150 m (490 ft.)*2

*1 This is the theoretical maximum data transmission speed of the HD-PLC standard.

*2 Varies depending on the electrical environment. For more information, see page 5.

FCC and other information

This equipment has been tested and found to comply with the limit for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television, reception, which can be determined by tuning the equipment off and on, the user is encouraged to try to correct the interference by one or more the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CAUTION

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this device.

NOTICE

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

Responsible Party

Panasonic Corporation of North America
One Panasonic Way, Secaucus, New Jersey 07094
Phone number: 1-800-211-PANA (7262)

Environment

Do not place the unit in a room where the temperature is less than 0° C (32° F) or greater than 40° C (104° F). Allow 10 cm (4 in.) clearance around the unit for proper ventilation. Avoid excessive smoke, dust, mechanical vibration, shock, or direct sunlight.

Routine Care

Wipe the unit with a soft cloth. Do not use benzine, thinner, or any abrasive powder. When you leave the unit unused for a long period of time, unplug the AC cord from the outlet.

In the Event of Trouble

Consult an authorized Panasonic Factory Service Center.

This library is free for commercial and non-commercial use as long as the following conditions are adhered to. The following conditions apply to all code found in this distribution, be it the RC4, RSA, lhash, DES, etc., code; not just the SSL code. The SSL documentation included with this distribution is covered by the same copyright terms except that the holder is Tim Hudson (tjh@cryptsoft.com).

Copyright remains Eric Young's, and as such any Copyright notices in the code are not to be removed.

If this package is used in a product, Eric Young should be given attribution as the author of the parts of the library used. This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

3. All advertising materials mentioning features or use of this software must display the following acknowledgement: "This product includes cryptographic software written by Eric Young (ey@cryptsoft.com)"

The word 'cryptographic' can be left out if the routines from the library being used are not cryptographic related :-).

4. If you include any Windows specific code (or a derivative thereof) from the apps directory (application code) you must include an acknowledgement:

"This product includes software written by Tim Hudson (tjh@cryptsoft.com)"

Useful Information

THIS SOFTWARE IS PROVIDED BY ERIC YOUNG "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE AUTHOR OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

The licence and distribution terms for any publically available version or derivative of this code cannot be changed. i.e. this code cannot simply be copied and put under another distribution licence [including the GNU Public Licence.]

=====
Copyright (c) 1987, 1988, 2000 Regents of the University of California.
All rights reserved.

Redistribution and use in source and binary forms are permitted provided that: (1) source distributions retain this entire copyright notice and comment, and (2) distributions including binaries display the following acknowledgement: "This product includes software developed by the University of California, Berkeley and its contributors" in the documentation or other materials provided with the distribution and in all advertising materials mentioning features or use of this software. Neither the name of the University nor the names of its contributors may be used to endorse or promote products derived from this software without specific prior written permission. THIS SOFTWARE IS PROVIDED "AS IS" AND WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

Please note that in some of the above alternate licenses, there is a statement regarding that acknowledgement must be made in any advertising materials for products using the code. This restriction no longer applies due to the following license change:

<ftp://ftp.cs.berkeley.edu/pub/4bsd/README.Impt.License.Change>

In some cases the defunct code has been removed in modified newlib code and in some cases, the clause has been left as-is.

Limited warranty

PANASONIC CONSUMER
ELECTRONICS COMPANY,
DIVISION OF PANASONIC
CORPORATION OF NORTH AMERICA
One Panasonic Way
Secaucus, New Jersey 07094

PANASONIC PUERTO RICO, INC.
San Gabriel Industrial Park,
Ave. 65 de Infantería, Km. 9.5,
Carolina, Puerto Rico 00985

Panasonic HD-PLC Ethernet Adaptor Limited Warranty

Limited Warranty Coverage

If your product does not work properly because of a defect in materials or workmanship, Panasonic Consumer Electronics Company or Panasonic Puerto Rico, Inc. (collectively referred to as "the warrantor") will, for the length of the period indicated on the chart below, which starts with the date of original purchase ("warranty period"), at its option either (a) repair your product with new or refurbished parts, or (b) replace it with a new or a refurbished product. The decision to repair or replace will be made by the warrantor.

Parts	Labor
One (1) year	One (1) year

During the "Labor" limited warranty period there will be no charge for labor. During the "Parts" limited warranty period, there will be no charge for parts. You must carry-in or mail-in your product pre-paid during the limited warranty period. This limited warranty excludes both parts and labor for batteries, antennas and cosmetic parts (cabinet). This limited warranty only applies to products purchased and serviced in the United States or Puerto Rico. This limited warranty is extended only to the original purchaser and only applies to products purchased as new. A purchase receipt or other proof of the original purchase date is required for limited warranty service.

Carry-In or Mail-In Service

For Carry-In or Mail-In Service in the United States, call 1-800-272-7033 or visit the Panasonic web site: <http://www.panasonic.com>

For assistance in Puerto Rico, call Panasonic Puerto Rico, Inc. (787)-750-4300 or fax (787)-768-2910.

The warrantor or authorized service is not responsible for the removal or re-installation of this product.

Limited Warranty Limits And Exclusions

This limited warranty ONLY COVERS failures due to defects in materials or workmanship, and DOES NOT COVER normal wear and tear or cosmetic damage. The limited warranty ALSO DOES NOT COVER damages which occurred in shipment, or failures which are caused by products not supplied by the warrantor, or failures which result from accidents, misuse, abuse, neglect, bug infestation, mishandling, misapplication, alteration, faulty installation, set-up adjustments, misadjustment of consumer controls, improper maintenance, power line surge, lightning damage, modification, rental use of the product, or service by anyone other than a Factory Servicenter or other Authorized Servicer, or damage that is attributable to acts of God.

THERE ARE NO EXPRESS WARRANTIES EXCEPT AS LISTED UNDER "LIMITED WARRANTY COVERAGE". THE WARRANTOR IS NOT LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT, OR ARISING OUT OF ANY BREACH OF THIS WARRANTY. (As examples, this excludes damages for lost time, cost of removal or re-installation of this product, travel to and from the servicer, or loss of images, data or other memory content. The items listed are not exclusive, but are for illustration only.) ALL EXPRESS AND IMPLIED WARRANTIES, INCLUDING THE WARRANTY OF MERCHANTABILITY, ARE LIMITED TO THE PERIOD OF THE LIMITED WARRANTY.

Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the exclusions may not apply to you.

This limited warranty gives you specific legal rights and you may also have others rights which vary from state to state. If a problem with this product develops during or after the warranty period, you may contact your dealer or Servicenter. If the problem is not handled to your satisfaction, then write to the warrantor's Consumer Affairs Department at the addresses listed for the warrantor.

PARTS AND SERVICE WHICH ARE NOT COVERED BY THIS LIMITED WARRANTY ARE YOUR RESPONSIBILITY.

Carolina, Puerto Rico 00985

Phone (787)750-4300, Fax (787)768-2910

For product service

- Panasonic Servicenters are listed in the servicenter directory.
- Call 1-800-272-7033 for the location of an authorized servicenter.
- This product is designed for use in the United States of America.
Sale or use of this product in other countries/areas may violate local laws.

When you ship the product

- Carefully pack your unit, preferably in the original carton.
- Attach a letter, detailing the symptom, to the outside of the carton.

Symptom _____

- Send the unit to an authorized servicenter, prepaid and adequately insured.
- Do not send your unit to the Panasonic Consumer Electronics Company listed below or to executive or regional sales offices. These locations do not repair consumer products.

The information in this document is subject to change without notice.
