THE FOLLOWING APPLIES ONLY IN THE U.S.A.

CAUTION:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Any unauthorized changes or modifications to this equipment would void the user's authority to operate this device.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

THE FOLLOWING APPLIES ONLY IN THE U.S.A. AND CANADA

**CAUTION**

**RISK OF ELECTRIC SHOCK
DO NOT OPEN**

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE SCREWS. NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

The laser product label has not been attached to products for U.S.A. and Canada.

IMPORTANT SAFETY INSTRUCTIONS

Read these operating instructions carefully before using the unit. Follow the safety instructions on the unit and the safety precautions listed below. Keep these operating instructions handy for future reference.

Safety

- Power source**—Connect the unit to a power source of the type described in these instructions or as marked on the unit.
- Polarization**—The unit is equipped with a polarized power plug where one blade is wider than the other. This safety feature ensures that the plug fits into your household AC outlet only one way. If the plug doesn't fit one way, try reversing it. If the plug still doesn't fit, contact an electrician to replace the obsolete outlet. Do not attempt to defeat the safety purpose of the plug.
- Power cord protection**—Route the AC power supply cord so that it will not be walked on or pinched by items placed on or against it. Never take hold of the plug or cord with wet hands. Always grasp the plug body firmly when connecting and disconnecting it.
- Overloading**—When connecting the AC power supply cord, be careful not to overload the household AC outlet, extension cord, or outlet from any other device as this can result in fire or electric shock.
- Nonuse periods**—Turn the unit off when it is not in use. Unplug the unit from the household AC outlet if it is not to be used for a long time. Unplug the unit during lightning storms.
- Attachments and accessories**—Use only the attachments and accessories recommended in these operating instructions.

Installation

Placement

- Ventilation**—Situate the unit so that it receives proper ventilation. Do not install in a confined space such as a bookcase or cabinet. Allow at least 10 cm (4 inches) clearance from the rear of the unit. To prevent the risk of electric shock or fire due to overheating ensure curtains and other materials do not obstruct the unit's ventilation.
- Foreign material**—Ensure objects and liquids do not get into the unit. Avoid exposing the unit to excessive smoke, dust, mechanical vibration, and shock.
- Magnetism**—Situate the unit away from equipment and devices that generate strong magnetic fields.
- Stacking**—Do not place heavy objects on top of this unit.
- Surface**—Place the unit on a flat, level surface.
- Carts and stands**—Use the unit only with carts and stands recommended by the manufacturer. Move carts with care. Sudden stops, excessive force, and uneven surfaces can cause carts to overturn.
- Wall and ceiling mounting**—Do not mount the unit on walls or ceilings unless specified in the instructions.

Do not place the unit on amplifiers or equipment that may become hot.

The heat can damage the unit.

Environment

- Water and moisture**—Do not use the unit near water, such as near a bathtub or swimming pool. Avoid damp basements.
- Heat**—Situate the unit away from heat sources, such as radiators. Do not situate where temperatures fall below 5°C (41°F) or rise above 35°C (95°F).

Maintenance

(See below for details.)

Unplug the unit from the household AC outlet before cleaning. Clean with a damp cloth. Do not use abrasive pads, scouring powders, or solvents.

Service

- Damage requiring service**—The unit should be serviced by qualified service personnel if:
 - The AC power supply cord or the plug has been damaged; or
 - Objects or liquids have gotten into the unit; or
 - The unit has been exposed to rain; or
 - The unit does not operate normally or exhibits a marked change in performance; or
 - The unit has been dropped or the cabinet damaged.
- Servicing**—Do not attempt to service the unit beyond that described in these operating instructions. Refer all other servicing to authorized servicing personnel.
- Replacement parts**—When parts need replacing ensure the servicer uses parts specified by the manufacturer or parts that have the same characteristics as the original parts. Unauthorized substitutes may result in fire, electric shock, or other hazards.
- Safety check**—After repairs or service, ask the servicer to perform safety checks to confirm that the unit is in proper working condition.

Item 2 in "Safety" applies only in the U.S.A. and Canada.

Maintenance

To clean this unit, wipe with a soft, damp cloth.

- Never use alcohol, paint thinner or benzine to clean this unit.
- Before using chemically treated cloth, read the instructions that came with the cloth carefully.

Disc information

Discs that can be played

Disc type	Logo	Indication in these operating instructions
DVD-RAM		RAM Shown as "DVD-VR" on the display
DVD-Audio		DVD-A
DVD-Video		DVD-V
DVD-R		
Video CD		VCD
CD		CD Including CD-R/RW
	—	WMA • Discs recorded with WMA • For U.S.A. and Canada only
	—	MP3 Discs recorded with MP3

Do not use irregularly shaped discs (e.g. heart-shaped), as these can damage the unit.

Discs that cannot be played

PAL discs (the audio on DVD-Audio can be played)*, DVD-ROM, CD-ROM, CDV, CD-G, +RW, DVD-RW, CVD, SVCD, SACD, Divx Video Discs and Photo CD.

*For U.S.A. and Canada only

DVDs that can be played

You can play discs with these symbols.

Playing DVDs and Video CDs

The producer of these discs can control how they are played so you may not always be able to control play as described in these operating instructions. Read the disc's instructions carefully.

Video systems

(For Asia, Australia and N.Z. only)

- This unit can play PAL and NTSC, but your television must match the system used on the disc.
- PAL discs cannot be correctly viewed on an NTSC television.
- This unit can convert NTSC signals to PAL 60 for viewing on a PAL television (➔ page 21, Video—NTSC Disc Output).
- When playing PAL discs, the output will automatically be interlace (576I).

CD-R and CD-RW discs

This unit can play CD-R and CD-RW if they are formatted as CD-DA (digital audio) or video CD and finalized*.

DVD-R discs

Panasonic DVD-R recorded and finalized* on a Panasonic DVD video recorder are played as DVD-Video on this unit.

*A process that allows play on compatible equipment.

DVD-RAM discs

DVD-RAM discs must meet the following conditions for this unit to be able to play them.

Type	<ul style="list-style-type: none"> • Non-cartridge discs • Discs that can be removed from their cartridges (TYPE 2 and 4)
Capacity	<ul style="list-style-type: none"> • 12 cm (5") 9.4 GB (double-sided) and 4.7 GB (single-sided) • 8 cm (3") 2.8 GB (double-sided)
Recording format	Discs recorded with DVD video recorders, DVD video cameras, personal computers, etc., using Version 1.1 of the Video Recording Format (a unified video recording standard).

- Remove TYPE 2 and 4 discs from their cartridges before use, then return them when you are finished. Read the instructions for the disc carefully.

- Some parts of the disc, for example where one program ends and another begins, may not play smoothly.

Note

It may not be possible to play CD-R, CD-RW, DVD-R and DVD-RAM in all cases due to the type of disc or condition of the recording.

To clean discs

DVD-Audio, DVD-Video, Video CD, CD

Wipe with a damp cloth and then wipe dry.

DVD-RAM, DVD-R

- Clean only with the DVD-RAM/PD disc cleaner available as an optional accessory (part number LF-K200DCA1).
- Never use cloths or cleaners for CDs etc.

Handling precautions

- Do not write on the label side with a ball-point pen or other writing instrument.
- Do not use record cleaning sprays, benzene, thinner, static electricity prevention liquids or any other solvent.
- Do not attach labels or stickers to discs. (Do not use discs with exposed adhesive from tape or left over peeled-off stickers.)
- Do not use scratch-proof protectors or covers.
- Do not use discs printed with label printers available on the market.

Connection to a television

This page explains how to connect the unit to a television and set it up so you hear the audio through the television's speakers. To get the full benefit from the powerful multi-channel audio found on DVDs, you should connect an amplifier and speakers (➔ page 7).

Before connection

- Disconnect the AC power supply cord.
- Refer to the television's operating instructions.

Connect your unit directly to your television.

Do not connect the unit through your video cassette recorder when setting up your home entertainment system, because the picture may not be played correctly due to the copy guard.

Conserving power

This unit consumes a small amount of power, even when it is turned off.

For U.S.A. and Canada : approx. 2 W

For others : approx. 4 W

To save power when the unit is not to be used for a long time, unplug it from the household AC outlet.

You can connect the audio cable to the 2-channel audio input terminals of an analog amplifier or system component to enjoy stereo or Dolby Pro Logic.

To household AC outlet

Enjoying higher picture quality

COMPONENT VIDEO OUT terminal

These terminals can be used for either interlace or progressive output and provide a purer picture than the S VIDEO OUT terminal. Connection using these terminals outputs the color difference signals (Pb/P_R) and luminance signal (Y) separately in order to achieve high fidelity in reproducing colors.

- The description of the component video input terminals depends on the television or monitor (e.g. Y/Pb/P_R, Y/B-Y/R-Y, Y/Cb/C_R). Connect to terminals of the same color.

For U.S.A. and Canada

- After making this connection, change the black level for a better picture. (➔ page 21, Video—Black Level Control)

S VIDEO OUT terminal

The S video terminal achieves a more vivid picture than the VIDEO OUT terminal by separating the chrominance (C) and luminance (Y) signals. (Actual results depend on the television.)

When making this connection, ensure you connect the audio cables to the corresponding audio input terminals on the television.

To enjoy progressive video

- Connect to the component video (480P) input terminals on a television compatible with this unit's copy guard system. (Video will not be displayed correctly if connected to an incompatible television.)
- In QUICK SETUP, set "Progressive Out" to "Enable" (➔ page 9).

For your reference

- All televisions manufactured by Panasonic and that have 480P input connectors are compatible. Consult the manufacturer if you have another brand of television.

Home Theater—Enjoying more powerful sound

Enjoy the powerful movie theater and hall-like sound available with multiple channel audio found on DVDs by connecting an amplifier and speakers. There are two types of connection, digital and analog.

A Digital—Connect an amplifier with Dolby Digital and DTS decoders to enjoy surround sound.

You can also enjoy high-quality stereo sound with sampling frequencies of 88.2 and 96 kHz if the material isn't copy-protected and the equipment you connect is compatible with these signals.

Note

- The equipment connections described are examples.
- Peripheral equipment and optional cables sold separately unless otherwise indicated.
- Before connection, turn off all equipment and read the appropriate operating instructions.

B Analog—Connect an amplifier with multi-channel audio input terminals to enjoy surround sound.

This unit can decode Dolby Digital and DTS and there are no limitations on sampling frequency with this kind of connection.

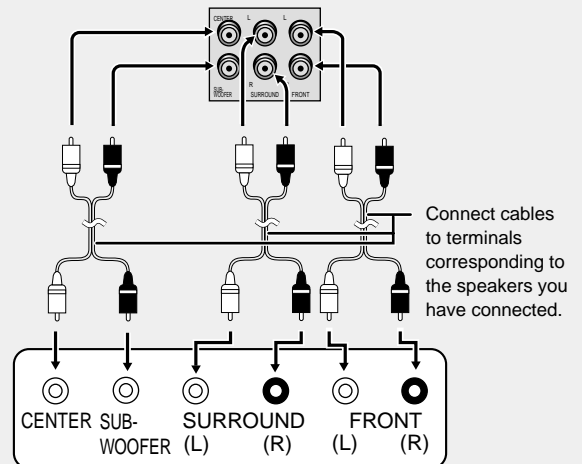

A Digital connection

Change "Digital output"
(⇒ page 23).

B Analog connection

Change "Speaker setting"
(⇒ page 23).

You can connect to a digital amplifier or system component to enjoy stereo or Dolby Pro Logic.

Note

- If you don't connect a subwoofer, it is advisable to connect front speakers (L/R) capable of producing bass of less than 100 Hz.
- You cannot use DTS Digital Surround decoders not suited to DVD-Video.

Recording

- **Digital recording** (⇒ Connection **A** above)
You can record the digital signal directly to digital recording equipment.

Note

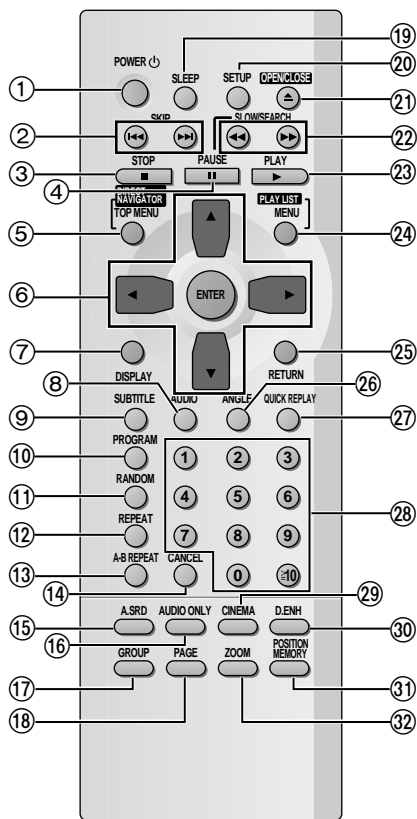

- With DVD, the following conditions must be met: ① the disc doesn't have protection preventing digital recording, and ② the recording equipment can handle signals with a sampling frequency of 48 kHz.
- You cannot record WMA/MP3.

When recording DVDs, make the following settings.

- ADVANCED SURROUND: OFF (⇒ page 16)
 - Digital Audio Output: On (RE-MASTER Off) (⇒ page 21)
 - PCM Down Conversion: Yes
- Dolby Digital/DTS Digital Surround/MPEG*: PCM
(⇒ page 23)
*MPEG: for Australia and N.Z. only

- **Analog recording** (⇒ Connection **B** above)

You can record to a cassette deck or other recording equipment. There are no limitations on recording analog signals as there are with digital signals.

- Buttons such as 2 function the same as the buttons on the remote control.
- The actual marking of the standby/on switch depends on the area. Illustrations in these operating instructions use the markings shown in the above illustration.

The remote control

■ Batteries

- Insert so the poles (+ and -) match those in the remote control.
- Do not use rechargeable type batteries.

Do not:

- mix old and new batteries.
 - use different types at the same time.
 - heat or expose to flame.
 - take apart or short circuit.
 - attempt to recharge alkaline or manganese batteries.
 - use batteries if the covering has been peeled off.
- Mishandling of batteries can cause electrolyte leakage which can damage items the fluid contacts and may cause a fire.

Remove if the remote control is not going to be used for a long period of time. Store in a cool, dark place.

■ Use

Aim at the sensor ($\text{\textcircled{\u25b6}}$ above, Control reference guide), avoiding obstacles, at a maximum range of 7 m (23 feet) directly in front of the unit.

The **QUICK SETUP** screen appears when you press [SETUP] the first time after purchase and assists you to make necessary settings. You can access this screen again later if you need to (➔ page 21, Others—QUICK SETUP).

Preparation

Turn on the television and select the appropriate video input on the television to suit the connections for the player.

- 1** Press [POWER ] to turn on the unit.
- 2** Press [SETUP] to show the **QUICK SETUP** screen.
e.g. for U.S.A. and Canada
- 3** Press [, , , ] to select the menu language and press [ENTER].
- 4** Press [, ] to select “Yes” to continue and press [ENTER].
- 5** Press [, , , ] to select the item and press [ENTER].
 - Audio Language (➔ page 21)
 - Subtitle Language (➔ page 21)
 - TV Aspect (➔ right)
 - Progressive Out (➔ page 21)

- 6** Press [ENTER] and then [SETUP] to end the settings.

To return to the previous screen
Press [RETURN].

TV Aspect

Select “4:3” (regular) or “16:9” (widescreen) to suit your television. If you have a regular 4:3 television, you can also select how video on some discs is shown (➔ page 21, Video—TV Aspect).

4:3 Pan&Scan (Factory preset)

Widescreen software is expanded to fill the screen of a 4:3 aspect television (unless prohibited by the producer of the disc).

4:3 Letterbox

Widescreen software is shown in the letterbox style on a 4:3 aspect television.

Viewing 4:3 aspect pictures on a 16:9 widescreen television using progressive output

16:9 aspect pictures are shown correctly, but 4:3 aspect pictures are stretched horizontally to fill the screen.

- If your television can change the aspect when input is progressive
Use the television to change the aspect to the correct one.
- If your television cannot change the aspect when input is progressive
Press [PROGRESSIVE OUT] so the indicator goes out. Output will now be interlace and 4:3 aspect picture is shown in the middle of the screen.

Group and track names are displayed on the television. Press [SUBTITLE] to turn the display on or off.

To stop play

Press [■] (⇒ page 11, Resume function).

To pause play

Press [⏸].

Press [▶] (PLAY) to restart play.

Note

• If “⏻” appears on the television

The operation is prohibited by the unit or disc.

- Discs continue to rotate while menus are displayed even after playing an item. Press [■] when you finish to preserve the unit's motor and your television screen.
- Volume may be lower when playing DVDs than when playing other discs or during television broadcasts. Reduce the volume before playing other sources so that a sudden increase in output does not occur.

- Progressive output is not possible if the “Progressive Out” setting is left as “Disable” in the QUICK SETUP menus.
- If the unit is connected to the TV through VIDEO OUT or S VIDEO OUT, or playing PAL discs, output will be interlace only (even when “Progressive Out” enabled in the QUICK SETUP menu and the progressive out indicator lights up when pressed.)

- When progressive output is on, closed captions will not be displayed.

When a menu screen appears on the television

Improving CD sound—RE-MASTER

CD

Main unit only

Re-master digitally converts standard 44.1-kHz/16-bit CD signals to 88.2-kHz/24-bit so sound quality approaches that of DVD-Audio.

There are 3 modes, each suited for a different music type.

Press [RE-MASTER].

The indicator on the main unit lights.

Each time you press the button:

- 1: Sharp acoustic imaging. Best suited for pop and rock.
- 2: High clarity sound. Best suited for jazz.
- 3: Smooth and full sound. Best suited for classical music.
- OFF: Original audio quality.

Note

If you have connected equipment digitally, ensure your equipment can handle digital signals with sampling frequencies of 88.2 kHz and Digital Audio Output is set to "On (RE-MASTER On)" (⇒ page 21, Audio—Digital Audio Output). Some equipment cannot handle sampling frequencies of 88.2 kHz, even if they can handle 96 kHz. Read your equipment's operating instructions for details.

Using menus to play WMA/MP3 discs and CD text

WMA **MP3** : This unit can play WMA (Windows Media Audio) and MP3 files recorded on CD-R/RW with a computer. Files are treated as tracks and folders are treated as groups.

CD (CD text) : This unit reads and displays the information on CD text discs. You can display disc titles, artist names and track titles.

1 Press [TOP MENU].

2 Press [▲, ▼] to select the track and press [ENTER].

Play continues to the last track in the last group.
 "☞" indicates the track currently playing.

To show other pages

Press [▲, ▼, ◀, ▶] to select "Prev" or "Next" and press [ENTER].

After listing all the tracks in one group, the list for the next group appears.

To exit the file list

Press [TOP MENU].

Note

- Discs must conform to ISO9660 level 1 or 2 (except for extended formats).
- This unit is compatible with multi-session but if there are a lot of sessions it takes more time for play to start. Keep the number of sessions to a minimum to avoid this.
- If you play an WMA/MP3 track that includes still picture data, it will take some time before the music itself starts playing and the elapsed time will not be displayed during this time. Even after the track starts, the correct play time will not be displayed.

WMA

- When creating a WMA disc, ensure the copyright feature is off.
- WMA files must have the extension ".WMA" or ".wma".
- Noise may occur when playing WMA files.
- There are some files this unit cannot play (e.g., copyright protected). "TRACK PROTECTED" or "CANNOT PLAY THIS TRACK" appear on the unit's display to indicate such tracks.

MP3

- MP3 files must have the extension ".MP3" or ".mp3".
- This unit is not compatible with ID3 tags.
- This unit is not compatible with files with a sampling rate of 32 kHz.

Naming folders and files

At the time of recording, prefix folder and file names with 3-digit numbers in the order you want to play them (this may not work at times).

CD (CD text)

When making your own CD text discs

The unit plays the tracks in the order you record them so you do not have to prefix the titles with numbers.

Digital output

DVD-A DVD-V

Change the settings when you have connected equipment through this unit's DIGITAL AUDIO OUT terminal (OPTICAL or COAXIAL).

PCM Down Conversion

Select how to output audio with a sampling frequency of 96 kHz or 88.2 kHz.

•Select "Yes" if the equipment you connect cannot process signals with a sampling frequency of 96 kHz or 88.2 kHz.

Also make the appropriate "Digital Audio Output" setting. (→ page 21)

No (Factory preset): Output as 96 kHz or 88.2 kHz

Yes: Converted to 48 kHz or 44.1 kHz

Note

•Signals are converted to either 48 kHz or 44.1 kHz despite the above settings if the signals have a sampling frequency of over 96 kHz, or the disc has copy protection.

•Some equipment cannot handle sampling frequencies of 88.2 kHz, even if they can handle 96 kHz. Read your equipment's operating instructions for details.

Dolby Digital, DTS Digital Surround and MPEG*

Bitstream (Factory preset for Dolby Digital):

Select if the equipment you connected can decode the signal.

PCM (Factory preset for DTS Digital Surround and MPEG*):

Select if the equipment you connected cannot decode the signal.

*For Australia and N.Z. only

IMPORTANT

If the equipment you connected cannot decode the signal, the setting must be changed to PCM. If not, signals the equipment cannot process will be output by this unit, causing high levels of noise which can damage your hearing and the speakers.

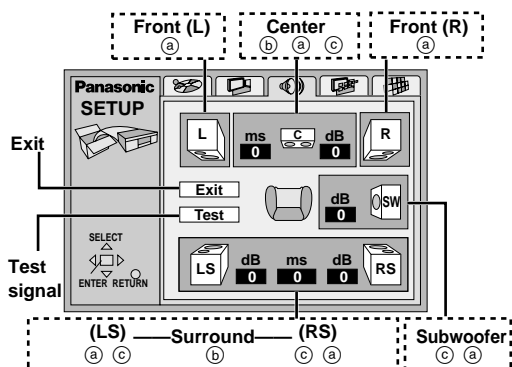

Speaker setting

Change speaker presence and size (a), delay time (b), and channel balance (c) to suit the speakers you have connected.

These settings are not necessary when you select "2-channel" (only two speakers are connected).

Note

This feature works only for analog connection (→ page 7).

Speaker presence and size (a)

- Press [**▲**, **▼**, **◀**, **▶**] to select the item and press [**ENTER**].
- Press [**▲**, **▼**] to select the setting and press [**ENTER**].

Icon examples:

Surround speaker (LS)

No

Large

Small

•**Large**: When the speaker supports low-frequency (under 100 Hz) reproduction.

•**Small**: Select when the speaker does not support low-frequency reproduction.

If the subwoofer set to No, the front speakers will automatically be set to Large.

Delay time (b)

DVD-V (Dolby Digital, center and surround speakers only)

For optimum listening with 5.1-channel sound, all the speakers, except for the subwoofer, should be the same distance from the seating position. If you have to place the center or surround speakers closer to the seating position, adjust the delay time to make up for the difference.

d Center speaker

Difference	Setting
Approx. 50 cm (1 1/2 feet)	1.3 ms
Approx. 100 cm (3 feet)	2.6 ms
Approx. 150 cm (5 feet)	3.9 ms
Approx. 200 cm (6 feet)	5.3 ms

f Surround speakers

Difference	Setting
Approx. 200 cm (6 feet)	5.3 ms
Approx. 400 cm (12 feet)	10.6 ms
Approx. 600 cm (18 feet)	15.9 ms

If distances (d) (from the center speaker) and (f) (from the surround speakers) are the same as or greater than (e) (from the front speakers), leave the delay time as "0", the factory preset.

If either distance (d) or (f) is less than (e), find the difference in the relevant table and change to the recommended setting.

Changing the delay time

- Press [**▲**, **▼**, **◀**, **▶**] to select the delay time box and press [**ENTER**].
- Press [**▲**, **▼**] to adjust the delay time and press [**ENTER**].

Channel balance (c)

- Press [**▲**, **▼**, **◀**, **▶**] to select "Test" and press [**ENTER**].

A test signal is output from one speaker at a time, starting with the front left speaker and proceeding clockwise.

- While listening to the test signal, press [**▲**, **▼**] to adjust the volume of the center and surround speakers so they are the same apparent volume as the front speakers (-6 to +6). (The front speakers cannot be adjusted here.)
- Press [**ENTER**].

The test signal stops.

•No signal is output for the subwoofer. To adjust its volume, play something, then return to this screen to adjust to suit your taste.

To finish the speaker setting

Press [**▲**, **▼**, **◀**, **▶**] to select "Exit" and press [**ENTER**].

Note

The unit may be unable to output as set here due to limitations imposed by the unit itself or the disc being played. (The display's "D.MIX" indicator goes out in these cases.)

Troubleshooting guide

Before requesting service, make the below checks. If you are in doubt about some of the check points, or if the remedies indicated in the chart do not solve the problem:

In the U.S.A., contact the Panasonic Customer Call Center at 1-800-211-7262, or e-mail consumerproducts@panasonic.com, or web site (<http://www.panasonic.com>).

In Canada, contact Panasonic Canada Inc. Customer Care Centre at 1-800-561-5505, web site (www.panasonic.ca), or an authorized Servicentre closest to you.

In other areas, consult your dealer.

Glossary

Bitstream

This is the digital form of multi-channel audio data (e.g., 5.1 channel) before it is decoded into its various channels.

Decoder

A decoder restores the coded audio signals on DVDs to normal. This is called decoding.

Dolby Digital

This is a method of coding digital signals developed by Dolby Laboratories. Apart from stereo (2-channel) audio, these signals can also be multi-channel audio. A large amount of audio information can be recorded on one disc using this method.

Dolby Pro Logic

A surround system where a 4-channel audio track is recorded as 2 channels and then is restored to 4 channels for play. The surround channel is monaural and can reproduce up to 7 kHz.

DTS (Digital Theater Systems)

This surround system is used in many movie theaters around the world. There is good separation between the channels, so realistic sound effects are possible.

Dynamic range

Dynamic range is the difference between the lowest level of sound that can be heard above the noise of the equipment and the highest level of sound before distortion occurs.

Film and video

DVD-Videos are recorded using either film or video. Usually, film is recorded at 24 frames per second, the rate movies are filmed at, while video is recorded at 30 frames per second.

Frame still and field still

Frames are the still pictures that go together to make a moving picture. There are about 30 frames shown each second. One frame is made up of two fields. A regular television shows these fields

one after the other to create frames.

A still is shown when you pause a moving picture. A frame still is made up of two alternating fields, so the picture may appear blurred, but overall quality is high. A field still is not blurred, but it has only half the information of a frame still so picture quality is lower.

Interlace and progressive output

NTSC, the video signal standard, has 480 interlaced (I) scan lines, whereas progressive scanning uses twice the number of scan lines. This is called 480P. The video signals output from this unit’s COMPONENT VIDEO OUT terminals (Y, P_B, P_R) allow you to enjoy higher quality pictures than if the signals were output from the VIDEO OUT terminal or S VIDEO OUT terminal.

I/P/B

MPEG 2, the video compression standard adopted for use with DVD-Video, codes frames using these 3 picture types.

I: Intra coded picture

This picture has the best quality and is the best to use when adjusting the picture.

P: Predictive coded picture

This picture is calculated based on past I or P-pictures.

B: Bidirectionally-predictive coded picture

This picture is calculated by comparing past and future I and P-pictures so it has the lowest volume of information.

Linear PCM (pulse code modulation)

These are uncompressed digital signals, similar to those found on CDs.

Playback control (PBC)

If a Video CD has playback control, you can select scenes and information with menus (called menu play in these instructions).

Panasonic DVD Player/Recorder Limited Warranty

Limited Warranty Coverage

If your product does not work properly because of a defect in materials or workmanship, Panasonic Consumer Electronics Company or Panasonic Sales Company (collectively referred to as "the warrantor") will, for the length of the period indicated on the chart below, which starts with the date of original purchase ("warranty period"), at its option either (a) repair your product with new or refurbished parts, or (b) replace it with a new or a refurbished product. The decision to repair or replace will be made by the warrantor.

Product or Part Name	Parts	Labor
DVD Player	One (1) Year	Ninety (90) Days
DVD Recorder	One (1) Year	One (1) Year
Rechargeable Batteries, DVD-RAM Disc (in exchange for defective item)	Ten (10) Days	Not Applicable

During the "Labor" warranty period there will be no charge for labor. During the "Parts" warranty period, there will be no charge for parts. You must carry-in or mail-in your product during the warranty period. If non-rechargeable batteries are included, they are not warranted. This warranty only applies to products purchased and serviced in the United States or Puerto Rico. This warranty is extended only to the original purchaser of a new product which was not sold "as is". A purchase receipt or other proof of the original purchase date is required for warranty service.

Carry-In or Mail-In Service

For Carry-In or Mail-In Service in the United States call 1-800-211-PANA(7262) or visit Panasonic Web Site: <http://www.panasonic.com>
For assistance in Puerto Rico call Panasonic Sales Company (787)-750-4300 or fax (787)-768-2910.

Limited Warranty Limits And Exclusions

This warranty ONLY COVERS failures due to defects in materials or workmanship, and DOES NOT COVER normal wear and tear or cosmetic damage. The warranty ALSO DOES NOT COVER damages which occurred in shipment, or failures which are caused by products not supplied by the warrantor, or failures which result from accidents, misuse, abuse, neglect, mishandling, misapplication, alteration, faulty installation, set-up adjustments, misadjustment of consumer controls, improper maintenance, power line surge, lightning damage, modification, or commercial use (such as in a hotel, office, restaurant, or other business), rental use of the product, service by anyone other than a Factory Servicenter or other Authorized Servicer, or damage that is attributable to acts of God.

THERE ARE NO EXPRESS WARRANTIES EXCEPT AS LISTED UNDER "LIMITED WARRANTY COVERAGE". THE WARRANTOR IS NOT LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT, OR ARISING OUT OF ANY BREACH OF THIS WARRANTY. (As examples, this excludes damages for lost time, travel to and from the servicer, loss of media or images, data or other recorded content. The items listed are not exclusive, but are for illustration only.) **ALL EXPRESS AND IMPLIED WARRANTIES, INCLUDING THE WARRANTY OF MERCHANTABILITY, ARE LIMITED TO THE PERIOD OF THE LIMITED WARRANTY.**

Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the exclusions may not apply to you.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state. If a problem with this product develops during or after the warranty period, you may contact your dealer or Servicer. If the problem is not handled to your satisfaction, then write to the warrantor's Consumer Affairs Department at the addresses listed for the warrantor.

PARTS AND SERVICE WHICH ARE NOT COVERED BY THIS LIMITED WARRANTY ARE YOUR RESPONSIBILITY.
