Three Important Reasons to Register Your Product Immediately!

1 Protect Your New Investment...

Register your new projection display for insurance purposes in case your new projection display is stolen.

2 Product safety notification...

Registering your product can help us to contact you in the unlikely event a safety notification is required under the Consumer Product Safety Act.

3 Improved Product Development...

Help us continue to design products that meet your needs.

Register online at www.panasonic.com/register

Important Safety Instructions

WARNING: To reduce the risk of electric shock, do not remove cover or back. No user-serviceable parts inside. Refer servicing to qualified service personnel.

This symbol warns the user that uninsulated voltage within the unit may have sufficient magnitude to cause electric shock. Therefore, it is dangerous to

This symbol alerts the user that important literature concerning the operation and maintenance of this unit has been included. Therefore, it should be read carefully in order to avoid any problems.

The pictorial representation of a hot surface within a triangle is intended to tell the user that parts inside the product are a risk of burns to persons.

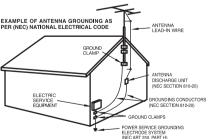

Note to CATV System Installer: This reminder is provided to call the CATV system installer's attention to Article 820–40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

Important Safety Instructions For Projection display

- 1. Read and apply the operating instructions provided with your projection display.
- 2. Read all of the instructions given here and retain them for later use.
- 3. Follow all warnings and instructions marked on the projection display.
- 4. Unplug this projection display from the wall outlet before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.
- 5. Do not use attachments / accessories not recommended by the projection display manufacturer as they may cause hazards.
- 6. Do not use this projection display near water. For example: Avoid placing it near a bathtub, washbowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool, etc.
- 7. Do not place this projection display on an unstable cart, stand or table. The projection display may fall, causing serious injury to a child or adult, and serious damage to the appliance. Use only with a cart or stand recommended by the manufacturer, or sold with the projection display.

- 7A. An appliance and cart combination shall be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.
- 8. Slots and openings in the cabinet and the back are provided for ventilation, to ensure reliable operation of the projection display and to protect it from overheating. These openings must not be blocked or covered. There shall be at least 10 cm of space from these openings. The openings shall never be blocked by placing the projection display on a bed, sofa, rug or other similar surface. This projection display shall never be placed near or over a radiator or heat register. This projection display shall not be placed in a built-in installation such as a bookcase unless proper ventilation is provided.
- 9. Operate only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied to your home consult your television dealer or local power company.
- 10. This projection display is equipped with a polarized alternating-current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.
- 11. Do not allow anything to rest and to pinch on the power cord. Do not locate this projection display where the power cord will walked on.
- 12. Do not overload wall outlets and extension cords as this can result in fire or electric shock.
- 13. Never push objects of any kind into this projection display through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projection display.

- 14. If an outside antenna is connected to the television equipment, be sure the antenna system is grounded so as to provide some protection against voltage surges and built up static charges. In the U.S.Selection 810 of the National Electrical Code provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See Figure.
- 15. For added protection for this projection display during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna. This will prevent damage to the receiver due to lightning and power-line surges.
- 16. An outside antenna system shall not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system extreme care shall be taken to keep from touching such power lines or circuits as contact with them might be fatal.

17. Unplug this projection display from the wall outlet, and refer servicing to qualified service personnel under the following conditions:

- a. When the power cord or plug is damaged or frayed.
- b. If liquid has been spilled into the projection display.
- c. If the projection display has been exposed to rain or water.
- d. If the projection display does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projection display to normal operation.
- e. If the projection display has been dropped or the cabinet has been damaged.
- f. When the projection display exhibits a distinct change in performance this indicates a need for service.
- 18. Do not attempt to service this projection display yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.
- 19. When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.
- 20. Upon completion of any service or repairs to this projection display, ask the service technician to perform routine safety checks to determine that the projection display is in safe operating condition.
- 21. WARNING: To prevent fire or shock hazard, do not expose this appliance to rain or moisture.
- **22. WARNING:** Because the temperature of the lamp unit is elevated immediately after its use, directly touching it may cause burns. After the lamp has cooled enough, replace the lamp unit.
- **23. CAUTION:** To prevent electric shock, match wide blade of plug to wide slot of AC outlet and fully insert. Do not use this (polarized) plug with a receptacle or other outlet unless the blade can be fully inserted to prevent blade exposure.

This product has a High Intensity Discharge (HID) lamp that contains a small amount of mercury. It also contains lead in some components.

Disposal of these materials may be regulated in your community due to environmental considerations. For disposal or recycling information please contact your local authorities, or the Electronics Industries Alliance: http://www.eiae.org.

Clean the air filter regularly. Not cleaning the air filter could shorten the life of the set.

The lamp has a maximum life of about 5 000 hours. If use exceeds this figure, the possibility of lamp damage becomes greater. The lamp should be changed as soon as possible once the lamp warning message appears. If the lamp is damaged, please contact your nearest dealer.

When VIEWING MODE is set to CINEMA, brightness will be reduced, but the life of the LCD panel can be prolonged. Therefore, the CINEMA setting is recommended when possible.

Dear Panasonic Customer

Welcome to the Panasonic family of customers. We hope that you will have many years of enjoyment from your new projection television set.

To obtain maximum benefit from your set, please read these Instructions before making any adjustments, and retain them for future reference.

Retain your purchase receipt also, and record the serial number of your set in the space provided on the rear cover of these instructions.

FCC STATEMENT:

- **NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- · Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio / TV technician for help.

FCC CAUTION:

To assure continued compliance and prevent undesirable interference, use only the provided shielded VGA cable with 2 ferrite cores while connecting the Projection display to a computer. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Advanced Operation

Before Using

Receiver Location

This unit is intended to be used with an optional stand or entertainment center. Consult your dealer for available options.

Locate for comfortable viewing. Avoid placing where sunlight or other bright light (including reflections) will fall on the screen.

Use of some types of fluorescent lighting can reduce remote control transmitter range.

Adequate ventilation is essential to prevent internal component failure. Keep away from areas of excessive heat or moisture.

Optional External Equipment

The Video / Audio connection between components can be made with shielded video and audio cables. For best performance, video cables should utilize 75 Ω coaxial shielded cables. Cables are available from your dealer or electronic supply house.

Before you purchase any cables, be sure you know what type of output and input connectors your various components require. Also determine the length of cable you'll need.

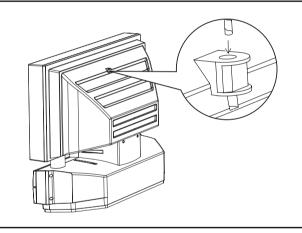

Safety Precaution

Please take safety precautions to prevent the unit from falling over.

The unit may fall over during earthquakes, or if someone stands on or shakes the projection display.

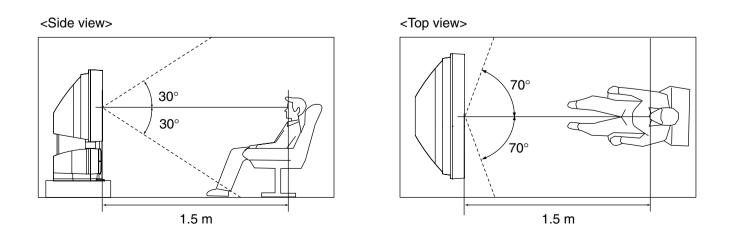

Fixing to a wall

Use a strong rope or a chain (not included) to fasten the projection display firmly to a strong support such as a wall or pillar.

Viewing position

To optimize your viewing comfort, please follow the viewing guidelines shown in the diagrams below. If viewing for an extended period of time, sit as far back from the screen as possible.

For assistance, please call : 1-888-VIEW PTV(843-9788)

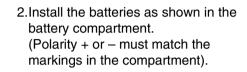

Accessories

- (1) Remote Control (EUR7603Z80)
- (2) Batteries 2 "AA"
- (3) RGB Cable (2 m) (LSJA0239-1 or LSJA0443)
- (4) Accessory Air Filter (LSYC0239)

Remote Control Battery Installation

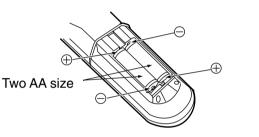

Requires two AA batteries (supplied).

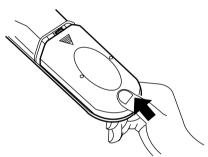

1.Turn the Transmitter face down. Remove top cover by pressing down on marking and sliding cover off in the direction indicated.

3.Replace the cover and slide in reverse until the lock snaps.

Helpful Hint:

For frequent remote control users, replace old batteries with Alkaline batteries for longer life.

▲ Precaution on battery use

Incorrect installation can cause battery leakage and corrosion that will damage the remote control transmitter. **Observe the following precautions:**

- 1. Batteries should always be replaced as a pair. Always use new batteries when replacing the old set.
- 2. Do not mix battery types (example: "Zinc Carbon" with "Alkaline").
- 3. Do not attempt to charge, short-circuit, disassemble, heat or burn used batteries.
- 4. Battery replacement is necessary when the remote control acts sporadically or stops operating the projection display set.

Helpful Hint:

Whenever you remove the batteries, **you may need to reset the remote control infrared codes.** We recommend that you record the code on page 62, prior to setting up the remote.

Getting Started

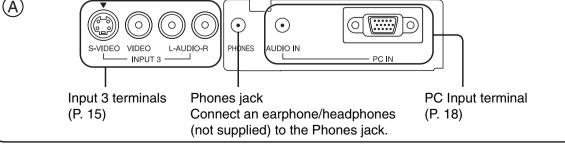

Location of Controls

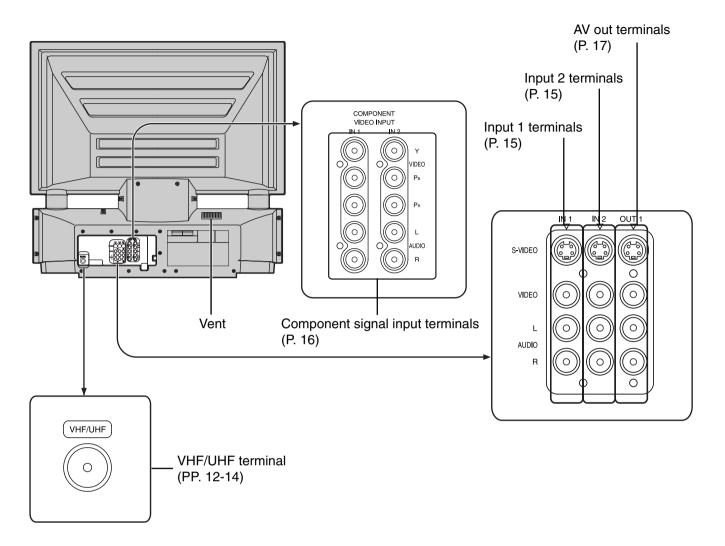

Controls and Terminals on the projection display

< FRONT >

< REAR >

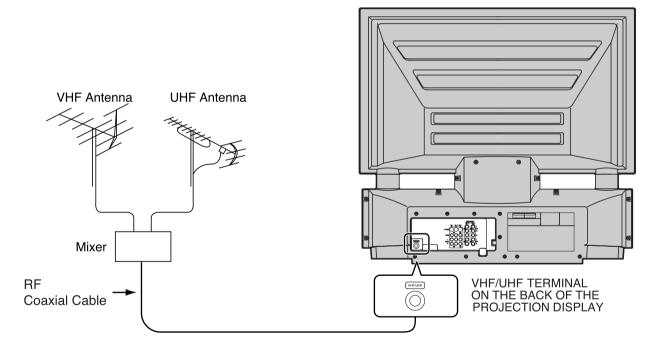

Notes on connections

- Turn off the power supply for all components before making any connections.
- If the cables necessary for connecting a component to the system are not included with the component or available as an option, you may need to fashion a cable to suit the component concerned.
- Read the instruction manual for each system component carefully before connecting it.
- If there is a lot of jitter in the video signal input from the video source, the picture on the screen may flicker. In this case, it will be necessary to connect a TBC (time base corrector).

Connecting the Antenna / Cable to the RF in Terminal (No VCR)

Antenna Connection

For proper reception of VHF / UHF channels, an external antenna is required. For best reception an outdoor antenna is recommended.

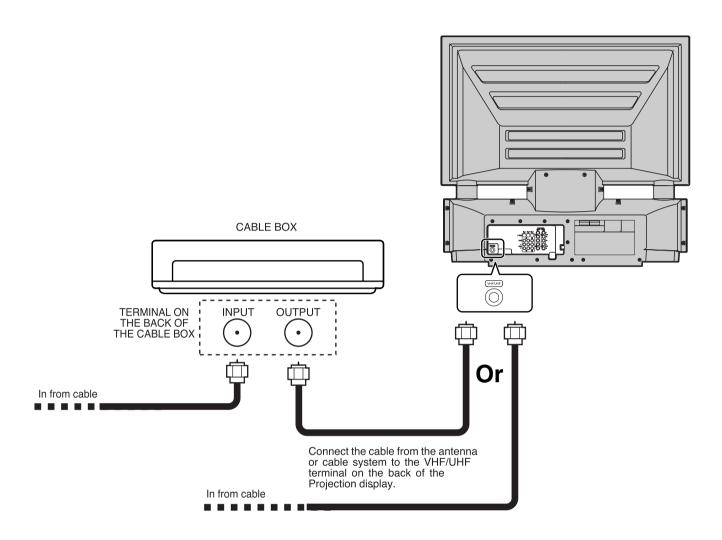

WARNING
 When using "Nut type" RF coaxial cables, tighten with fingers only. Overtightening may damage terminals.

For assistance, please call : 1-888-VIEW PTV(843-9788)

Cable Connection

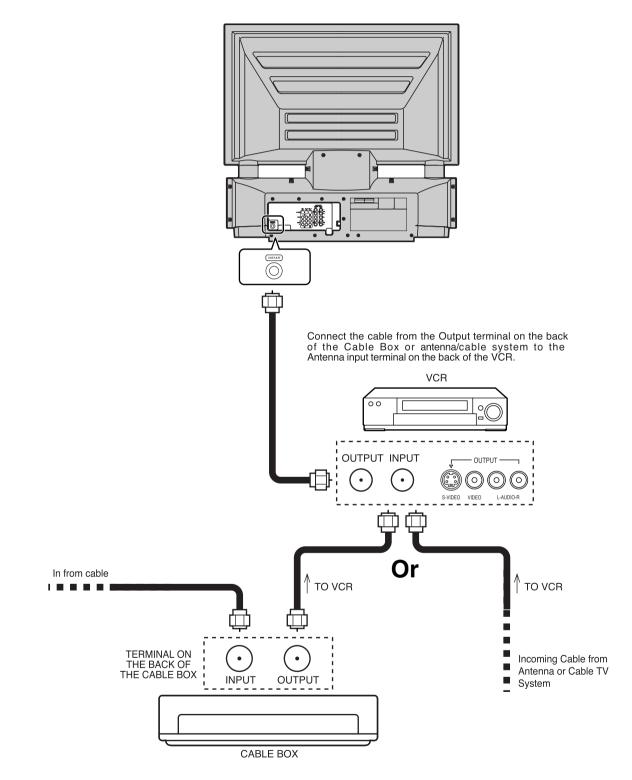

Use this configuration when connecting the projection display to a cable TV system.

- Certain cable systems offset some channels to reduce interference or have Premium (scrambled) channels. A cable converter box is required for proper reception. Check with your local Cable company for its compatibility requirements.
- For reception of cable channels (01 125) connect the cable supplied by your local cable company. Antenna Mode must be set to CABLE. (P. 24)

Connecting the Antenna / Cable to the RF in Terminal (VCR)

Use this configuration when connecting the projection display to a cable TV system using VCR.

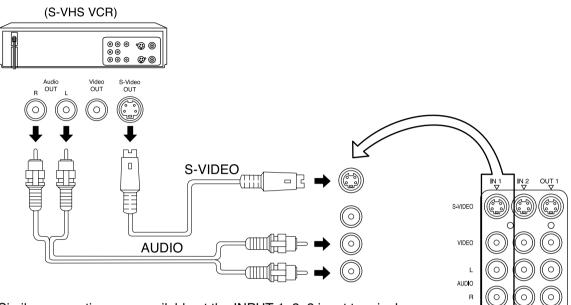

Notes:

 When the RF coaxial cable is connected to the projection display VHF/UHF terminal via a cable box or VCR, set the TV channel to CH3 or CH4. This does not apply when signal is input from VIDEO INPUT.

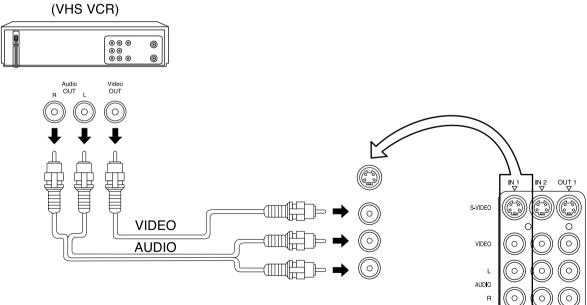

Installation

How to connect the "1, 2, 3" Input Terminals

Connects VCRs and other peripheral equipment

Similar connections are available at the INPUT 1, 2, 3 input terminals.

Similar connections are available at the INPUT 1, 2, 3 input terminals.

Notes:

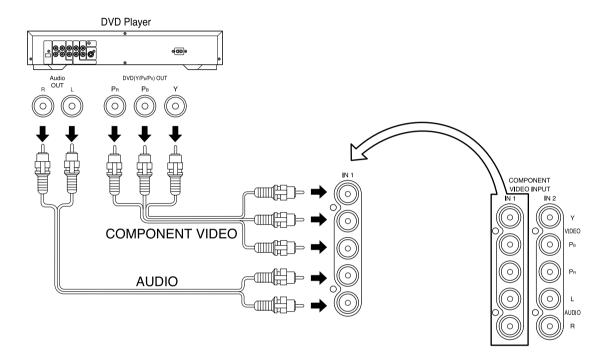

- Similar connections are available at the INPUT 1, 2, 3 input terminals.
- Input 3 is located on the front of the unit.
- Select the desired VIDEO input position by pressing the TV/VIDEO button. (P. 33)
- When connecting video cables, priority is given to the S-Video cable when the S-Video input terminal and the video input terminal are connected at the same time.

õ

How to connect the COMPONENT VIDEO Input Terminals

Because each Y, PB, and PR signal is input independently, the Component signal allows for more accurate color reproduction.

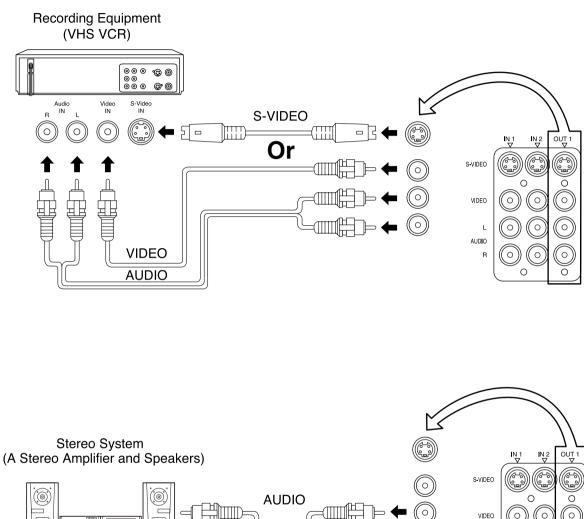

The Component signal output terminal indication will differ according to the output device (Y, PB / Cb, PR / Cr). Please read the operating instructions included with the output device.

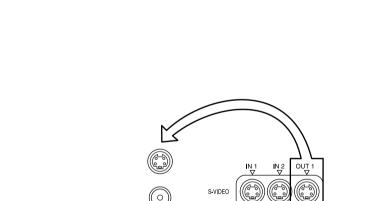

- Similar connections are available at the COMPONENT VIDEO INPUT 1, 2 Terminals.
- Select the desired COMPONENT VIDEO INPUT position by pressing the TV/VIDEO button. (P. 33)
- Component video signals that can be input are 480i, 480p, 720p, and 1080i.

How to connect the AV Out Terminals

The "AV Out" Terminals output the same signals as the main picture on the projection display screen and sound from the speaker at that time, e.g. TV programs or signals from INPUT 1, 2, 3 terminals.

VIDEO

L AUDIO

> R 0

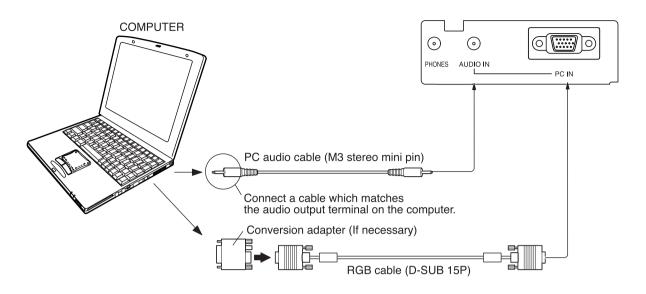

0 0

0

0 0

- Never connect the VIDEO IN and OUT terminals to the same video recorder, as this could cause incorrect operation.
- Even if TV is in Split or PIP mode, OUT terminals only output the main picture and sound signals. A sub-picture, including channel search, etc., will not be output.
- VIDEO OUT terminals will not output Y, PB, PR, or RGB signals.
- The S-Video OUT terminal outputs the same signal that is input from the S-Video IN terminal.

How to connect the PC Input Terminals

Signal Names for D-SUB 15P Connector

	Pin No.	Signal name	Pin No.	Signal name
	1	R	9	NC
10 9 8 7 6	2	G	10	Ground
	3	В	11	NC
	4	NC	12	NC
Pin Layout for PC Input	5	NC	13	HD/CSYNC
Terminal	6	Ground for R	14	VD
	7	Ground for G	15	NC
	8	Ground for B		•

NC: Not connected

- Some PC models cannot be connected to the set. A conversion adapter is required to use the RGB cable (D-SUB 15P) to connect a Macintosh computer to the set. There is no need to use an adapter for computers with PC / AT compatible D-SUB 15P terminal.
- The computer shown in the illustration is for example purposes only. Additional equipment and cables shown are not supplied with this set.
- The picture will become dark if an RGB signal with a vertical scanning frequency of 62 Hz is input. To obtain the optimum picture quality with the projection display, a vertical scanning frequency of 60 Hz is recommended.
- Do not set the horizontal and vertical scanning frequencies for PC signals which are above or below the specified frequency range.
- Select the desired RGB input position by pressing the TV/VIDEO button. (P. 33)

Analog RGB signals that can be input

The table below lists the different types of analog RGB signals that can be input. If a signal which differs greatly from any of the types listed below is input, the picture image may not be displayed correctly, or a black background may be displayed. At this time, "signal" will flash in the on-screen display for about 5 seconds.

Mode type					
		No. of dots (H x V)	Horizontal frequency (kHz)	Vertical frequency (Hz)	Information menu display
	VGA400 (70 Hz)	640 X 400	31.47	70.08	VGA400 70Hz
	VGA480 (60 Hz)	640 X 480	31.47	59.94	VGA 60Hz

bu	SVGA (60 Hz)	800 X 600	37.88	60.32	SVGA 60Hz
	SVGA (72 Hz)	800 X 600	48.08	72.19	SVGA 72Hz
ပြီ	SVGA (75 Hz)	800 X 600	46.88	75.00	SVGA 75Hz
	SVGA (85 Hz)	800 X 600	53.67	85.06	SVGA 85Hz
Personal	Macintosh 16"	832 X 624	49.73	74.55	MAC 16
Ls:	* XGA (60 Hz)	1 024 X 768	48.36	60.00	XGA 60Hz
L B	* XGA (70 Hz)	1 024 X 768	56.48	70.07	XGA 70Hz
	* XGA (75 Hz)	1 024 X 768	60.02	75.03	XGA 75Hz
	* Macintosh 19"	1 024 X 768	60.24	74.93	MAC 19
	* XGA (85 Hz)	1 024 X 768	68.68	85.00	XGA 85Hz
Jat	480 i	664 X 485	15.73	29.97	480 i
DTV Format Signals	480 p	720 X 483	31.47	59.94	480 p
V F Sigr	720 p	1 280 X 720	45.00	60.00	720 р
<u>Б</u> ″	*1080 i	1 920 X 1 080	33.75	30.00	1080 i

- Input signals, other than those listed with a * mark, will give you a beautiful, stable picture.
 The front D-SUB15P connector can accept RGB(H-V sync separate) and RGB(sync on green). However, it is not guaranteed to display stable color when using RGB(sync on green).
- When used with an external video processor/scaler, it must have RGB(H-V sync separate) output.

Power ON and OFF

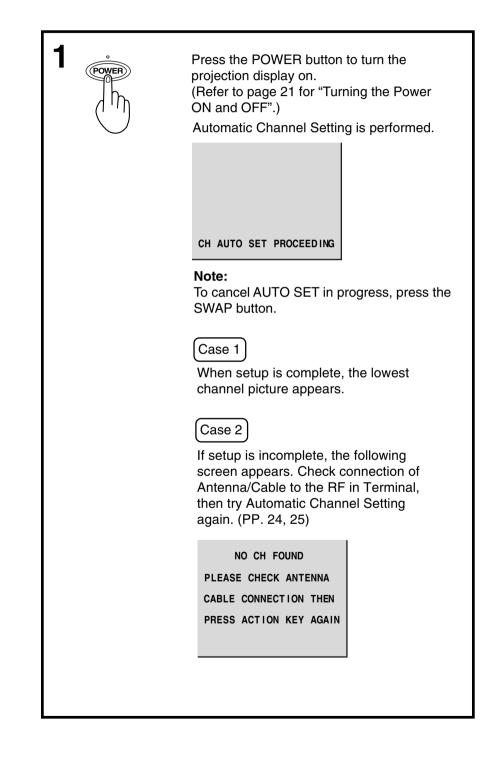

Initial Setup

First, check the connection of the Plug to the Wall Outlet and the Antenna/Cable to the RF in Terminal. (PP. 12-14.)

If using Cable Box, DSS Receiver, or VCR,

- Turn on Cable Box.
- Turn off DSS Receiver, or VCR.

Note:

When the unit is turned on for the first time, Automatic Channel Setting is performed.

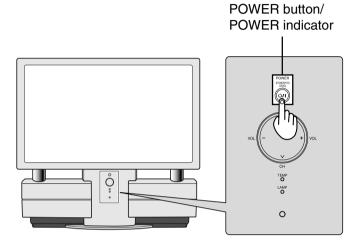

Turning the Power ON and OFF

Always be sure to follow the procedure given below to turn the projection display power ON and OFF.

• The lamp cooling fan will continue to operate for approximately 1 minute after the power is turned off. At the same time, the POWER indicator will blink Red.

Do not disconnect the power cord from the power outlet and do not open any circuit breakers while the cooling fan is still operating.

Do not disconnect the power cord from the power outlet while the power indicator blinks Red.

Power ON

Press the POWER button on the projection display or the remote control to turn the power on.

The Power Indicator will become Green and blink for approximately 10 seconds, and then turn solid Green.

Power OFF

Press the POWER button on the projection display or the remote control to turn the power off. Confirming message will appear.

POWER OFF
YES
NO

The Power Indicator

Press the POWER button again.

If the POWER button is accidentally pressed, select NO with the ▲, ▼ buttons, then press the ACTION button.

The Power Indicator will become Red and blink for approximately 1 minute, and then turn solid Red.

Note:

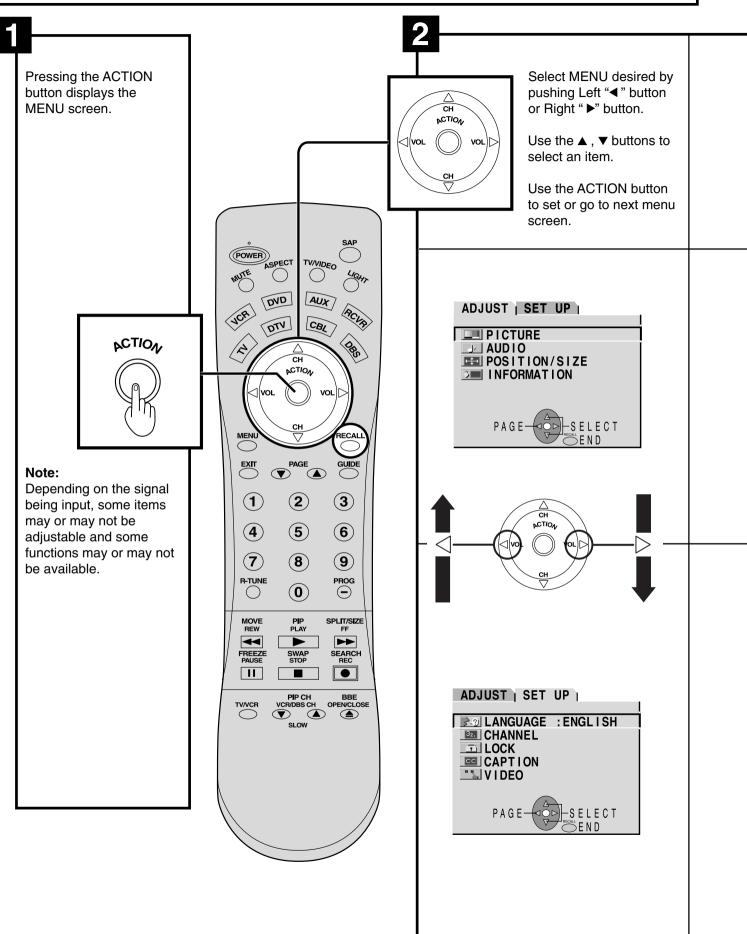

POWER

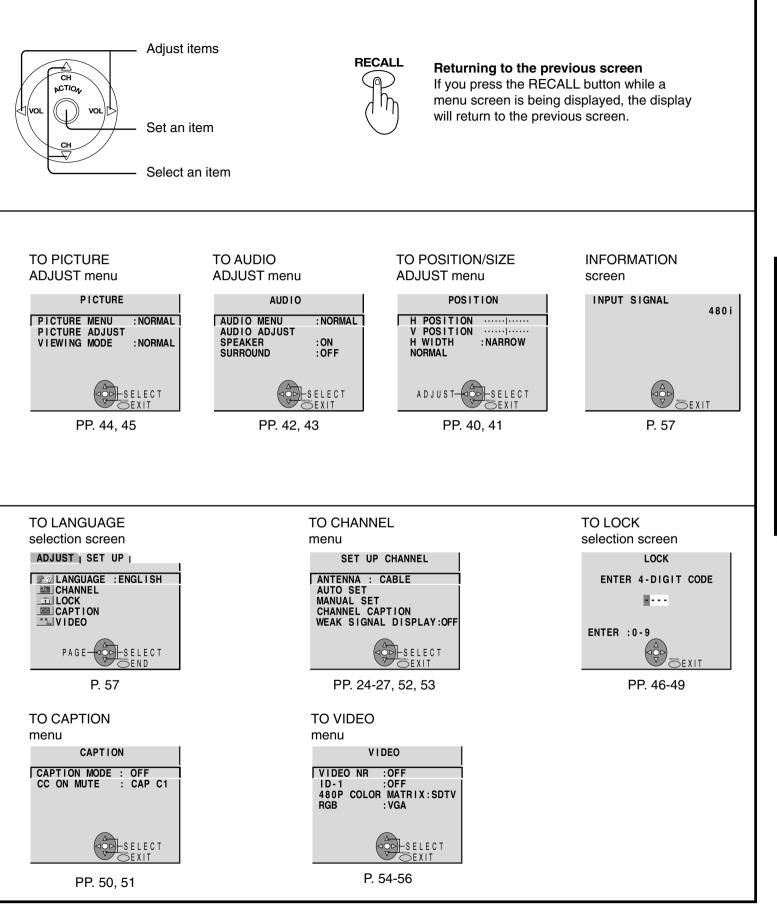

When the AC Cord is unplugged, the internal cooling fan stops operating. In this case, the lamp will be insufficiently cooled and will take a while to turn ON again.

LED	ACTION	
Red	Power – OFF (Standby mode)	
Red blink	Power – OFF (Now cooling)	
Green	Power – ON	
Green blink	Power – ON (Preparing to light lamp)	

- If the POWER button is accidentally turned off during use, after power is turned back on, it may take a short period before the lamp automatically comes on.
- After the unit is turned on, maximum picture brightness will be achieved in 5-10 minutes. This is normal.

Flow Chart of Main menu

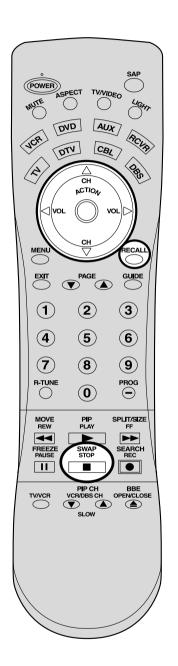

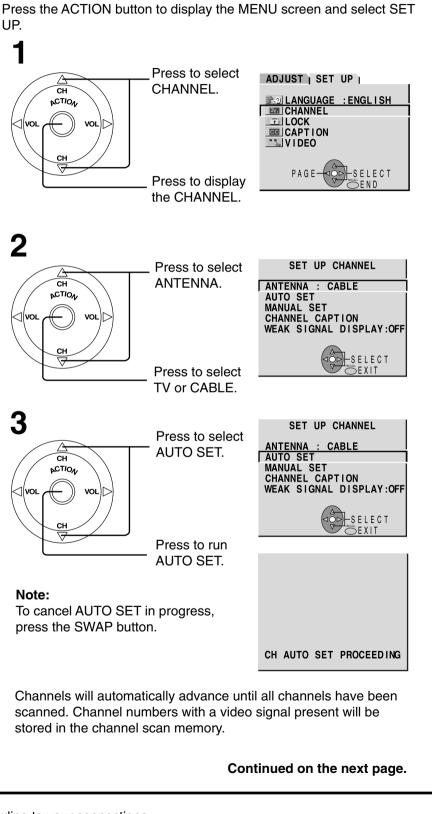

Tuning channels

Automatic channel setting

Automatically searches and adds receivable channels to memory.

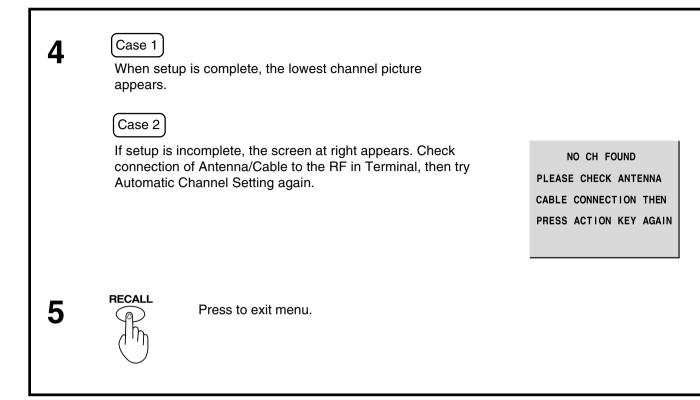

Note:

TV or Cable Tuning mode must be set according to your connections.

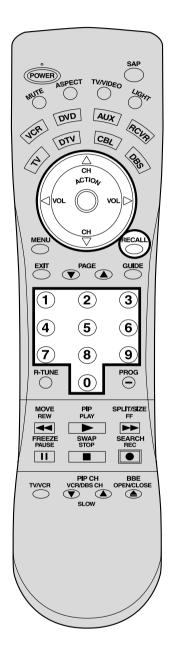

For assistance, please call : 1-888-VIEW PTV(843-9788)

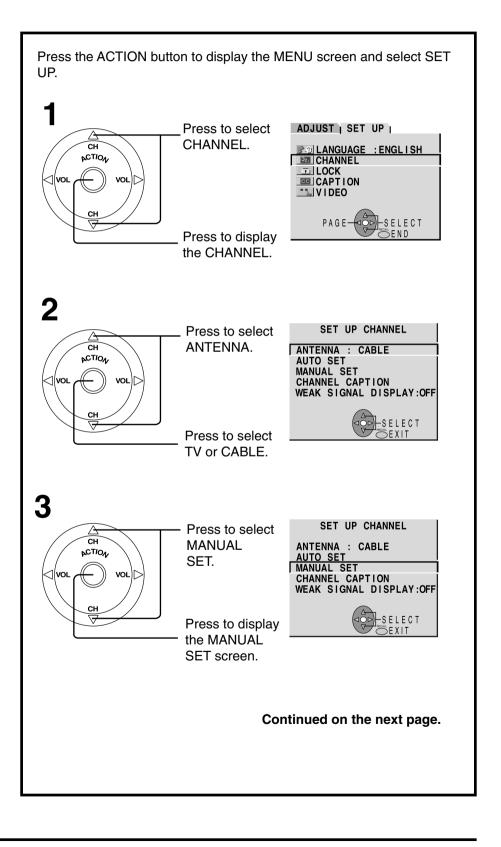

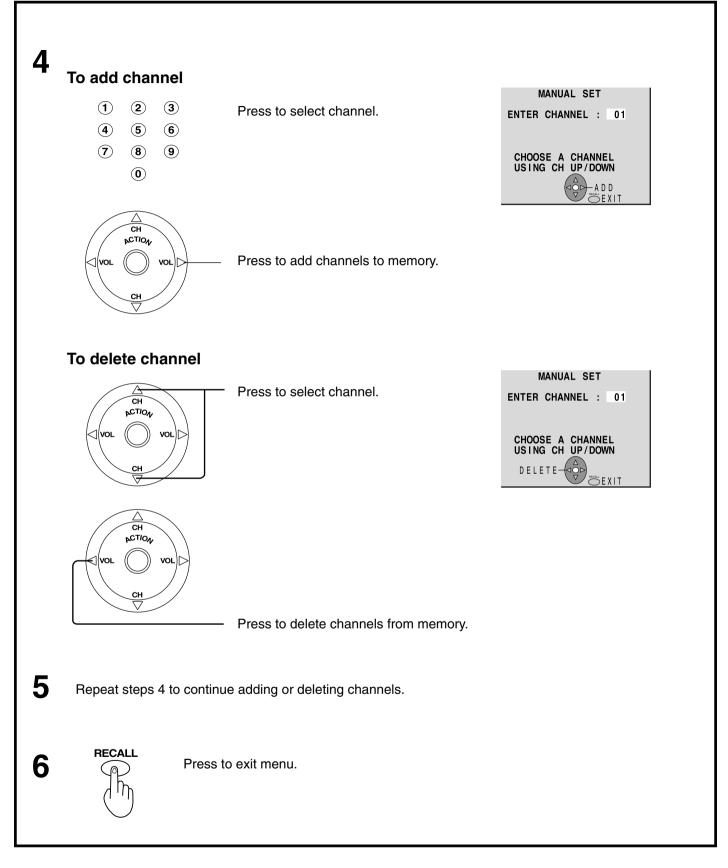

- After AUTO SET is finished, the lowest channel number added will be received.
- Some channels with very weak signals may be locked into memory. It desired, these channels can be deleted manually using the MANUAL SET feature.

Manual channel setting

Use this setting when changing setting of receiving channels or changing the channel display.

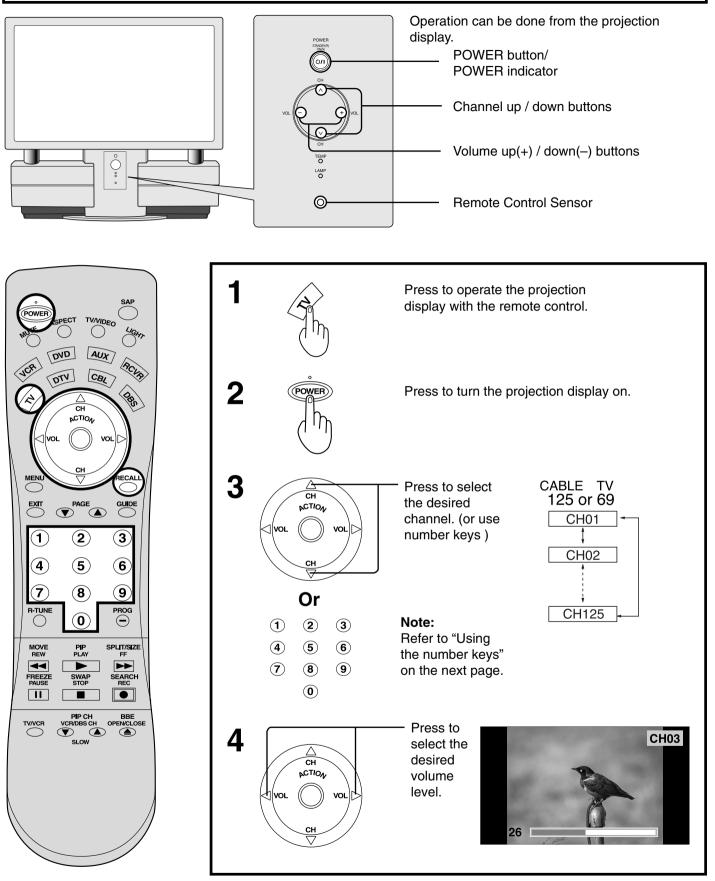

Note:

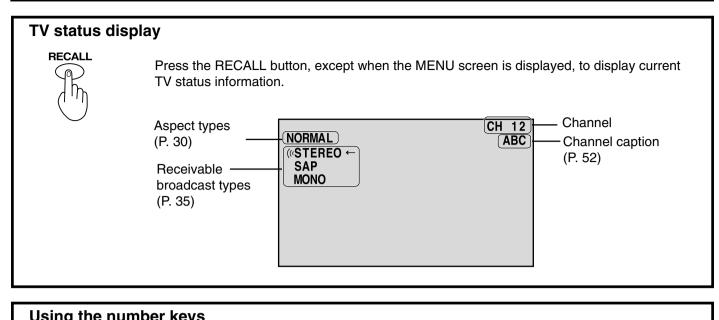

Some channels with very weak signals may be locked into memory. It desired, these channels can be deleted manually using the MANUAL SET feature.

Basic Operation

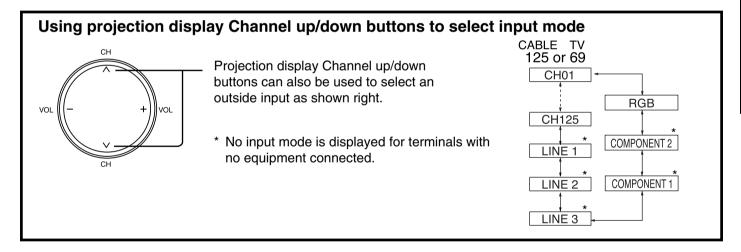

Projection display operation

- The channel number and volume level are stored even after the projection display is turned off.
- Power consumption can be reduced if the volume level is lowered.

1 2 3 4 5 6	When selecting CABLE channels 100 to 125 with the number keys, first press the 1 key, and then enter the remaining two digits.
7 8 9 0	Example 1: To select channel 125, first press the 1 key, then 2, then 5.Example 2: To select channel 12, press the 1 key, then 2. Channel 12 appears momentarily.Example 3: To select channel 8, press the 8 key. Channel 8 appears momentarily.

Auto shut off

To extend lamp life, if there is no signal to the set's tuner for 5 minutes, the lamp will shut off automatically.

Invalid operation notice feature

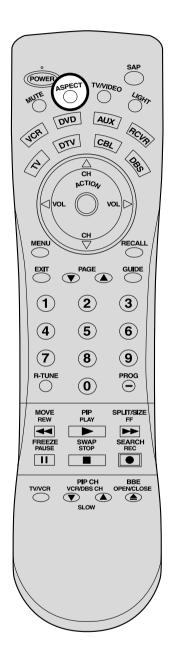

If an invalid operation is attempted, the mark shown right is displayed.

Basic Operation

ASPECT Controls

The color monitor will allow you to enjoy viewing the picture at its maximum size, including wide screen cinema format picture.

ASPECT	The aspect mode changes each time the ASPECT button is pressed.
	FULL COM
	FULL
NORMAL, Z • When a 108 FULL, and a	p signal is being received, the mode switches between 200M, and FULL only. 30i and 720p signal is being received, the mode is set to aspect switching is not possible. 30put, the mode switches between NORMAL, TRUE and
[→ NORMAL → FULL → TRUE →
• When XGA and FULL of	and Mac 19 signal is input, the aspect will be NORMAL nly. NORMAL> FULL

- However, if the mode selected does not match the aspect ratio of the input signal, the original picture quality may be affected.
- If using this Projection display in places, such as cafes or hotels, with the aim of displaying programs for a commercial purpose or for public presentation, please note that by using the aspect ratio (16:9) selection function to change the aspect ratio, you may be infringing on the rights of the original copyright owner of that program under copyright protection laws.
- If a normal (4:3) picture is projected in wide screen, distortion may occur around the edges so that part of the picture may no longer be visible. We recommend viewing in 4:3 mode so you can enjoy the picture as it was intended to be seen.

ASPECT Controls

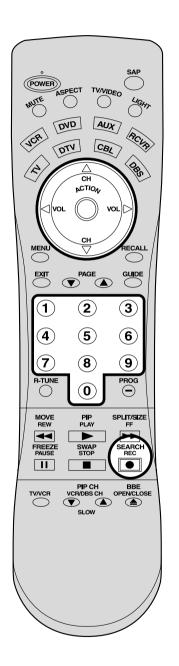

Mode	Picture	Explanation
NORMAL		NORMAL will display a 4:3 picture at its standard 4:3 size.
JUST		JUST mode will display a 4:3 picture at maxi- mum size but with aspect correction applied to the center of the screen so that elongation is only apparent at the left and right edges of the screen. The size of the picture will depend on the original signal.
ZOOM		ZOOM mode magnifies the central section of the picture.
FULL		FULL will display the picture at its maximum size but with sight elongation.
TRUE		You can reduce the image and adjust it to the original image quality. (Except XGA)

Notes:

• The screen size changes if ID-1 is detected. (P. 55)

Searching for the desired channel (Channel search)

Channel search displays each channel, in order, as a paused image. Channels are displayed from the left top to the right bottom in order. When it reaches the right bottom, the next channel is displayed at the left top, overwriting the previously displayed channel.

When the SEARCH/REC button is pressed during single screen. CH03 02 **CH03** Or RGB (PC input) When a channel button is pressed during channel search. Number keys: Example: When 6 is pressed, channel 6 is displayed in single screen. · Channel up and down buttons: When \blacktriangle or \triangledown button is pressed, the next channel up or down is displayed in single screen. Ex. Select channel 6 Sound from the left screen is CH06 output from the speakers on the projection display set.

Notes:

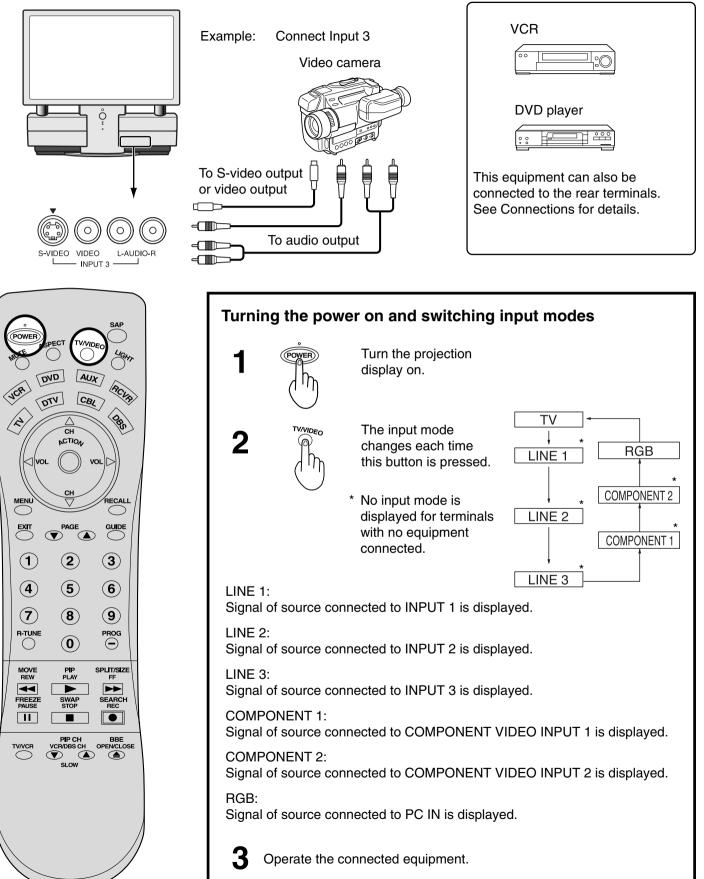

- To end channel search, press SEARCH/REC.
- While using the PIP feature, Channel search is not available.

For assistance, please call : 1-888-VIEW PTV(843-9788)

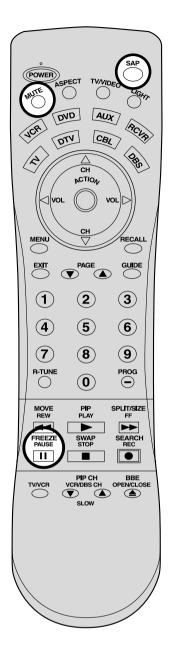

Playing peripheral equipment

Confirming connections

A video camera uses the Input 3 terminal on the front of the projection display.

Mute / Freeze / SAP

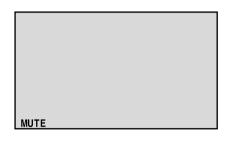

Sound mute

Useful when answering the phone or receiving unexpected visitors

Press this button to mute the sound. Press again to reactivate sound. Sound is also reactivated when power is turned off or volume level is changed.

Note:

The audio output from AV OUT is not muted.

Freezing pictures

Projection can be switched between a frozen (still) picture and a moving picture each time the FREEZE button on the remote control unit is pressed. Press FREEZE button again to resume motion.

FREEZE

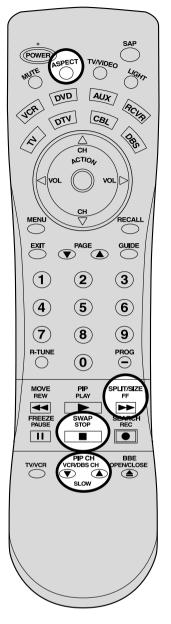

Note:

The video output from AV OUT is not frozen.

Receivable Broadcast Types	
The following are possible broadcast types with their accompanying on-scree received is indicated with a " (" mark while the selected audio mode is indicated audio mode for these broadcasts, follow the "Select Audio Mode for TV View	ated with an arrow. To change the

Split screen

Notes:

- Sound from the Left screen is output from the speakers on the projection display set.
- When the screen is split, signals of the Left screen are output from the rear monitor output terminal.
- The left and right screens are processed by individual circuits and, therefore, may slightly vary in image quality.
- Split screen returns to single screen when the projection display is turned off.
- With the Left screen, as with a single screen, you can change the input, change channels, and adjust the volume.
- The right and left screens cannot display the same picture at the same time.
- A split screen which includes an RGB signal from a PC is fixed as SPLIT SCREEN NORMAL (PC input).

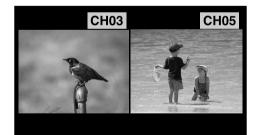

Selecting the screen mode for split screen.

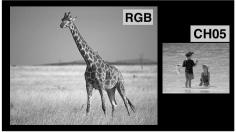

Press to select modes.

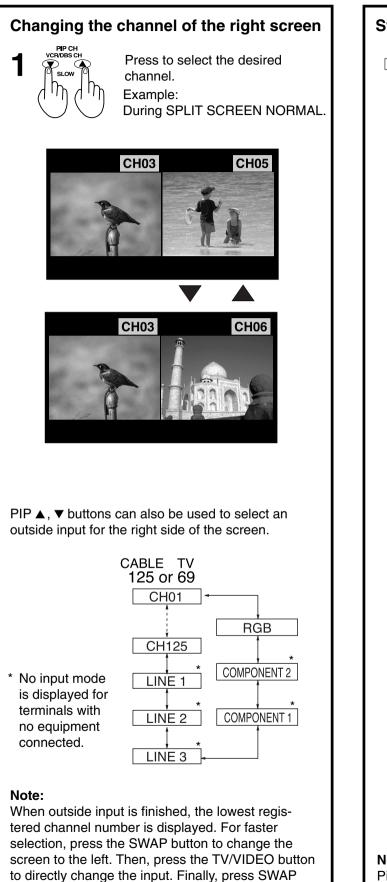

SPLIT SCREEN FULL

SPLIT SCREEN NORMAL

SPLIT SCREEN NORMAL (PC input)

button again to change the screen back to the right.

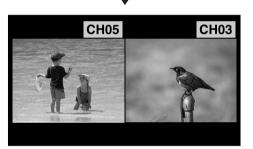

Swapping left and right screens

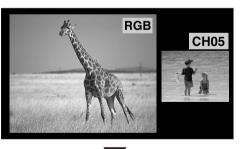

Press to swap.

Example: During SPLIT SCREEN NORMAL.

Example: During SPLIT SCREEN NORMAL (PC input)

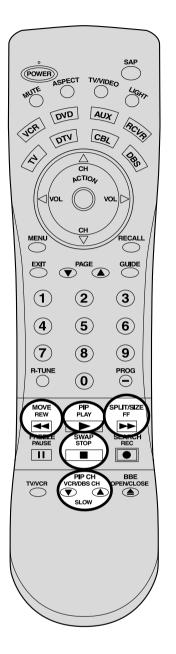

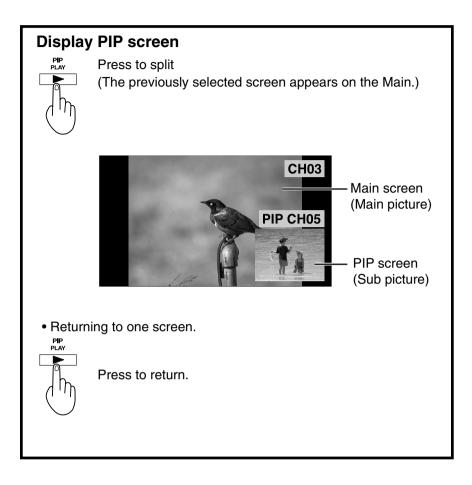

Note:

Picture quality may change according to the combination of signals input to the left and right screens.

Picture in Picture (PIP) Screen

You can view two pictures simultaneously using two tuners and picture in picture (PIP) display function.

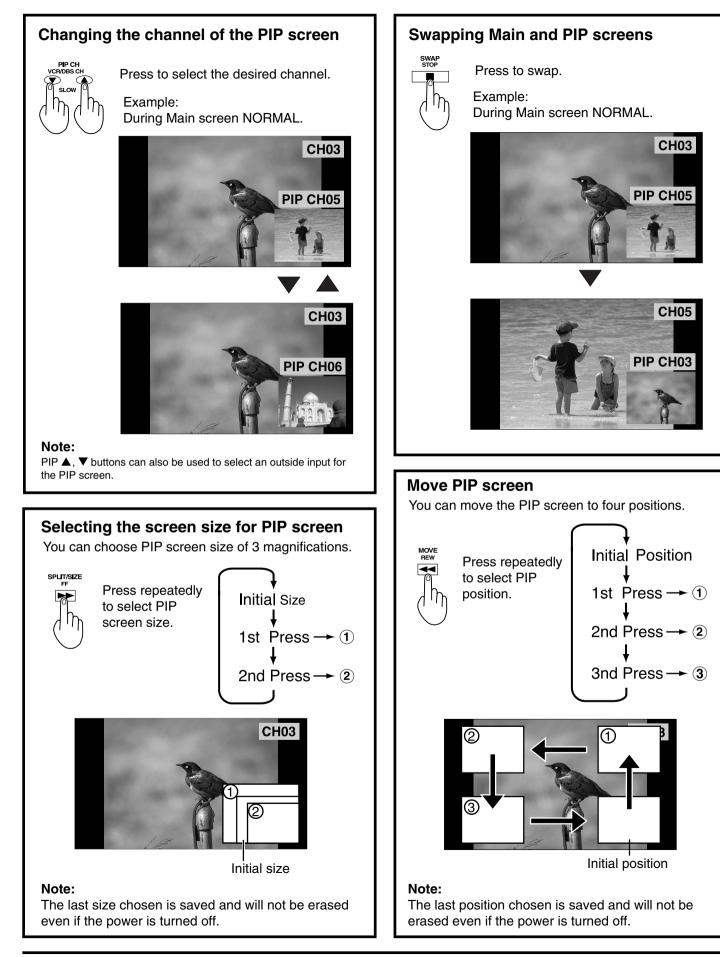

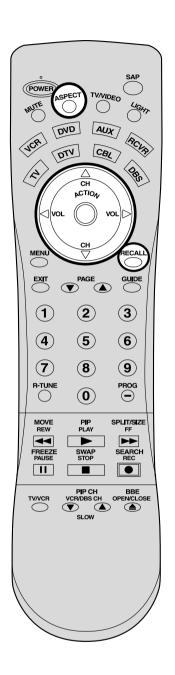

Notes:

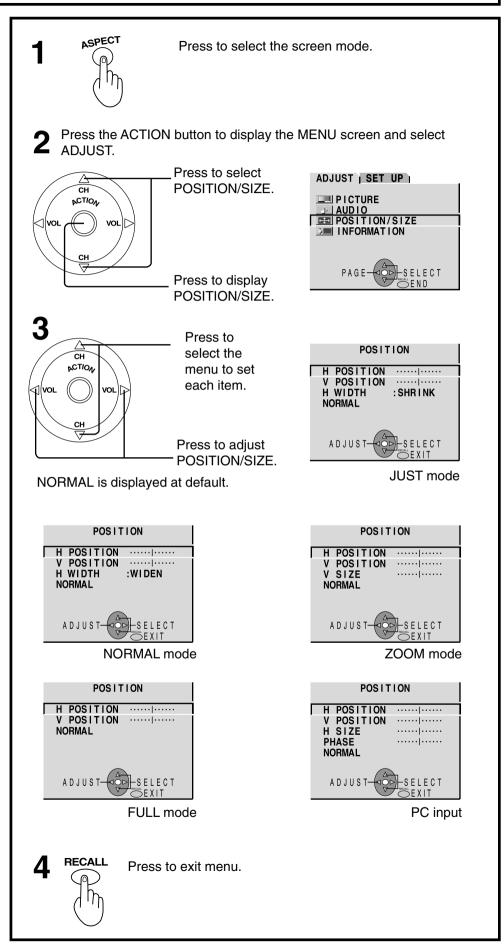

- Sound from the Main screen is output from the speakers on the projection display set.
- In PIP mode, the Main screen signal is output from the rear monitor output terminal.
- Because Main and PIP screens are processed by individual circuits, image quality may vary slightly.
- PIP mode returns to single screen when the projection display is turned off.
- The Main and PIP screens cannot display the same picture at the same time.
- An RGB signal cannot be displayed on a PIP screen or a Main screen.
- A component signal cannot be displayed on a PIP screen. Thus, when a component signal is displayed on the Main screen, the SWAP button becomes invalid.
- With the Main screen, as with a single screen, you can change the input, change channels, and adjust the volume.

Notes:

- This projection display is equipped with various screen modes. If a screen mode with a different aspect from the broadcast program is selected, image will appear differently. Select the proper screen mode with this in mind.
- Be careful when using this projection display for commercial purposes or for public use, such as in cafes and hotels.
- Shrinking and enlarging images by using screen mode switching function (zoom, etc.) may violate copyright laws.
- Images displayed on a wide screen TV will be cut off or distorted at the edges, when viewing normal aspect images of 4:3 in ZOOM, JUST or FULL mode. Display in NORMAL mode to view the original image intended by the producer.
- For 1080i and 720p input images, screen size cannot be adjusted.
- The adjusted setting will be kept even when the projection display is turned off.
- The signals output from the monitor output terminal on the back of the projection display is not affected when the screen size and position is adjusted.

Audio Adjustments

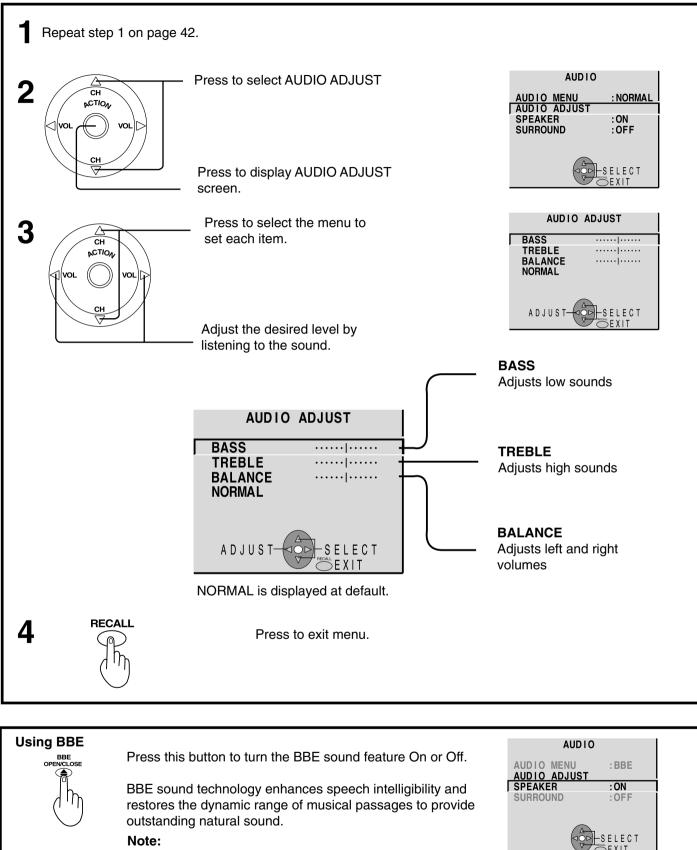

Notes:

- · Sound signals are output from the rear AUDIO OUT terminal.
- When volume is adjusted or the mute button is pressed from the remote control, a message will be displayed.

Lock Feature

This unit has a built-in V-Chip Control which allows you to block unwanted TV usage based on US MOVIES and US TV PROGRAMS ratings.

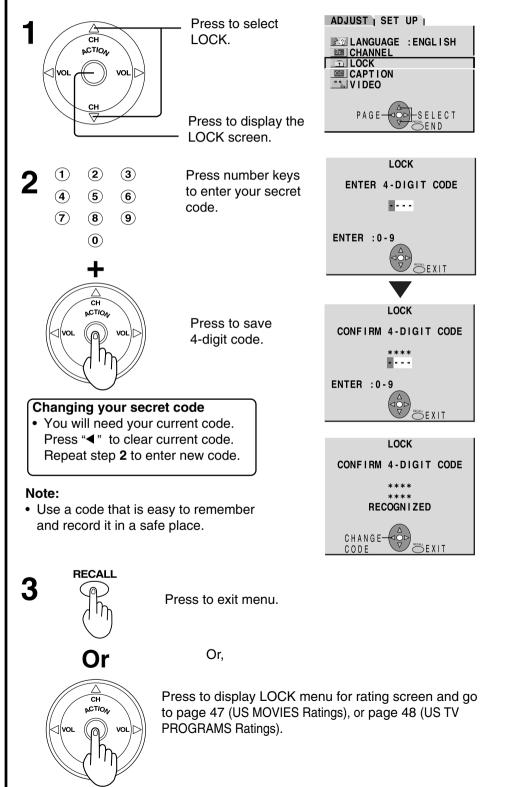

Notes:

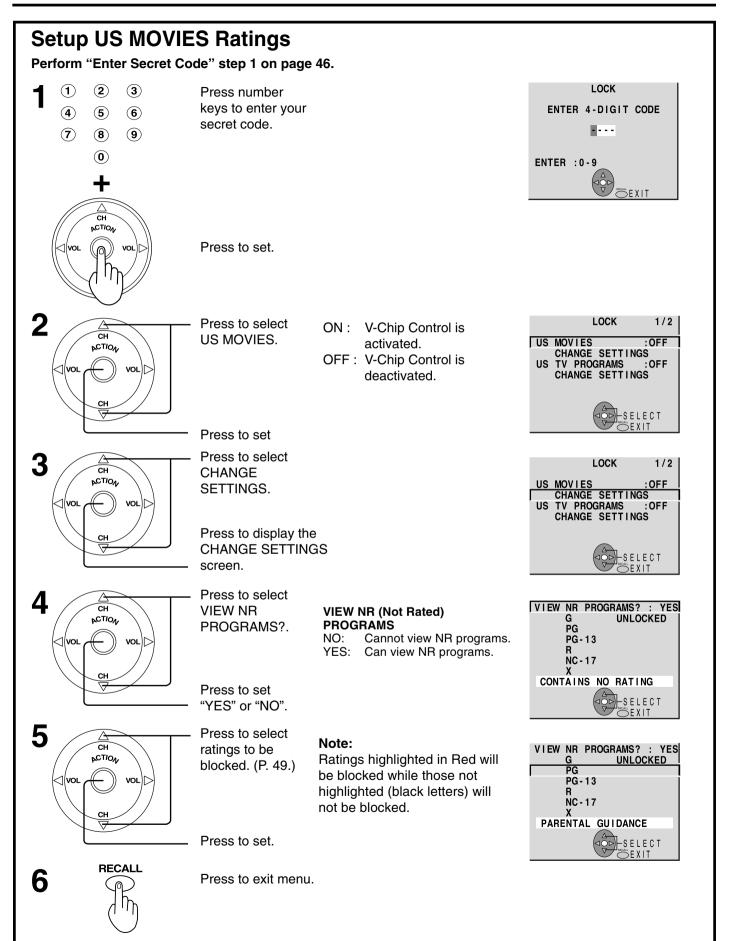

- Once ratings are set, restricted tapes or programs cannot be accessed unless the secret code is entered.
- If you forget your secret code, refer to "Reset User's Memory Functions" on page 49.

Enter Secret Code

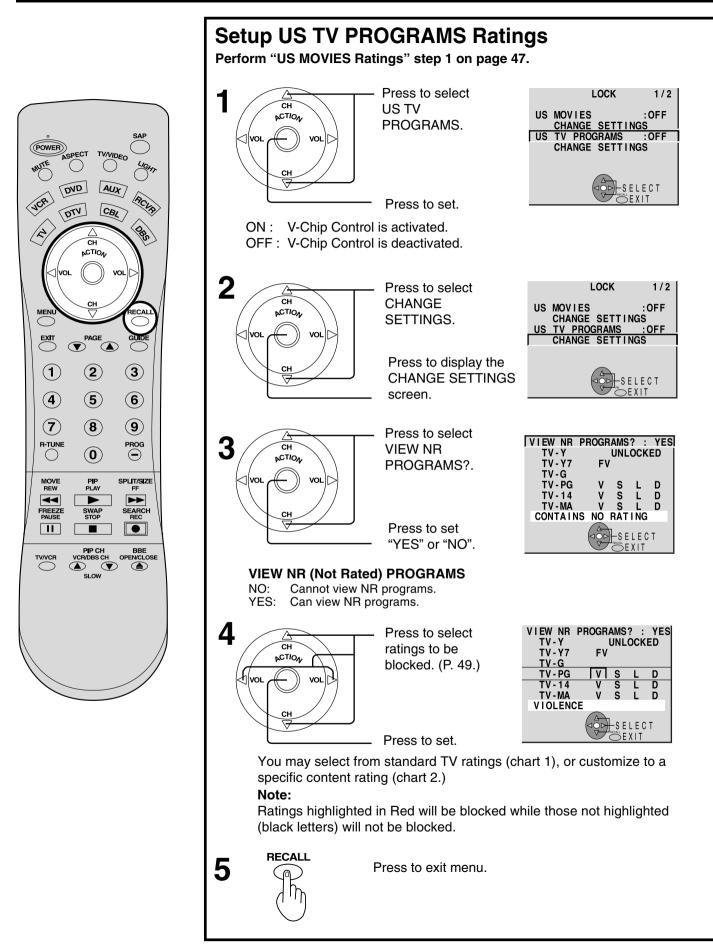

A 4-digit code must be entered to view a blocked program or change rating settings. Press the ACTION button to display the MENU screen and select SET UP.

For assistance, please call : 1-888-VIEW PTV(843-9788)

Lock Feature

Blocking Message

<When V-Chip Control is activated>

Temporarily deactivate V-Chip control

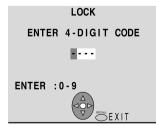

Enter your secret code in the blocking message screen.

• V-Chip control is reactivated when power is turned off or power failure occurs.

Reset User's Memory Functions

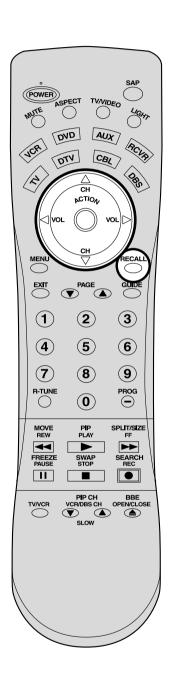

Use when moving unit to a new location, or if the secret code is forgotten.

While the OSD at right is displayed, press the VOL - button on the Projection display and ACTION button on the Remote control at same time for more than 5 seconds. When reset is finished, power shuts off automatically.

Closed Captions

This receiver has a built in decoder that provides a visual depiction of the audio portion of a television program in the form of written words across the screen (white or colored letters on a black background). It allows the viewer to read the dialogue of a television program or other information.

CAPTION MODE Activates the On-Screen Closed Caption feature. When activated this feature will remain on until OFF is selected in this menu. Press the ACTION button to display the MENU screen and select SET UP. Press to select ADJUST | SET UP | CAPTION. CH ACTION LANGUAGE : ENGL | SH CHANNEL voi " 🖕 V I DEO Press to display PAGE--SELECT the CAPTION screen. CAPTION Press to select 2 CAPTION MODE. СН CAPTION MODE : OFF ACTION, CC ON MUTE : CAP C1 voi VOL SELECT Press repeatedly to select CAPTION MODE. NO(OFF) → CAP C1 → TEXT C1 -**TEXT C2** CAP C2 🔺 **Closed Caption Modes from which to Choose** Caption Mode: CAP C1 or C2

A narration of selected TV programs is displayed.

Check TV program listings for C. C. (Closed Caption) broadcasts.

Caption Mode: TEXT C1 or C2

The lower half of the screen will be blocked out. When the TV station broadcasts information, such as program listings, it will appear in this space.

Caption Mode: OFF

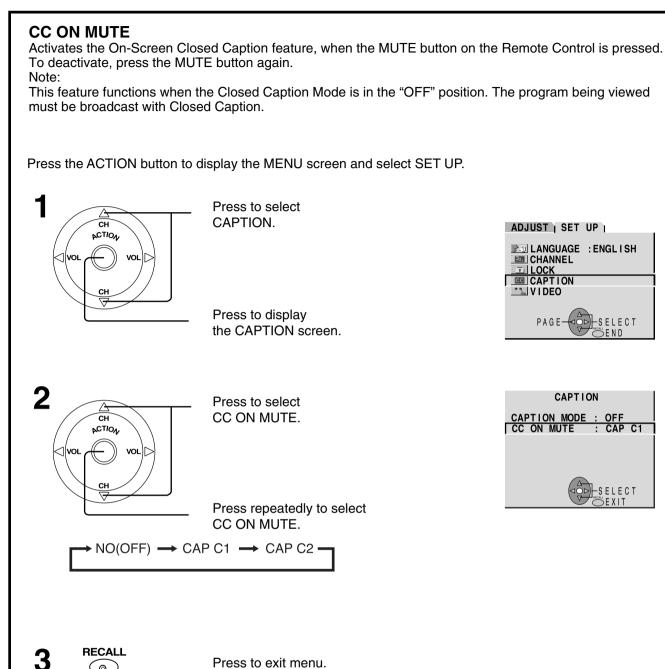

Closed Caption /Text narration will not be displayed.

Note:

The closed caption or text signal may be broadcast over C1, C2, or both. Also, text contents can vary so you may wish to try different settings.

Press to exit menu.

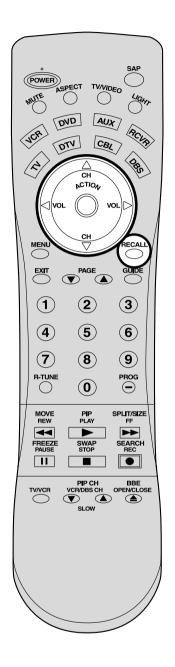

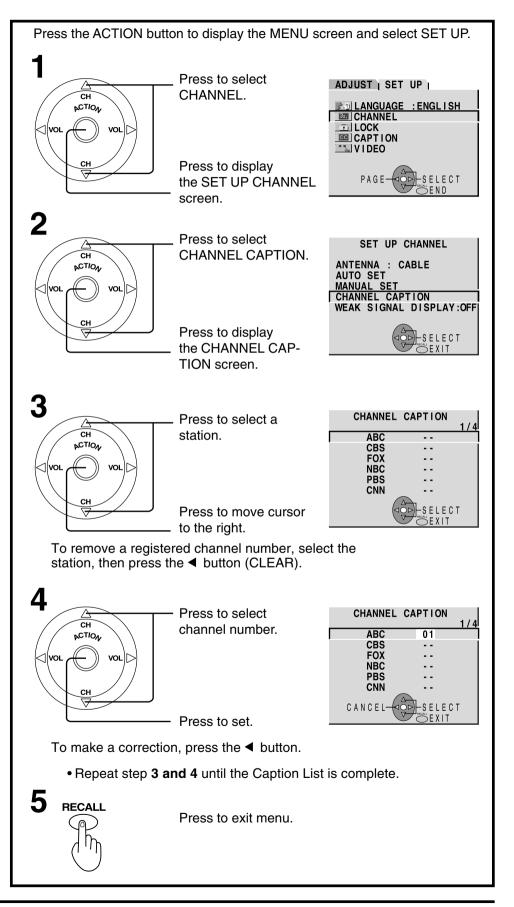

Notes:

- The setting for CC ON MUTE is valid only when the CC MODE is OFF, CC MODE set to ON will override CC ON MUTE.
- Closed Caption is not displayed if the input signal is COMPONENT VIDEO INPUT of 480P or more, or from RGB.

Channel Caption Feature

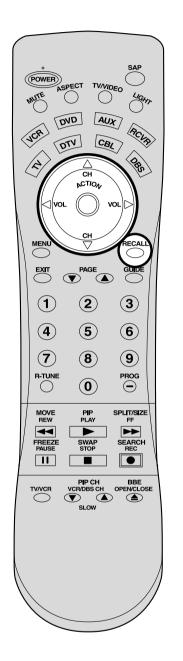

Station names, e.g. ABC, TNN, etc. so that they will appear when a channel is selected. Choose 24 preset names.

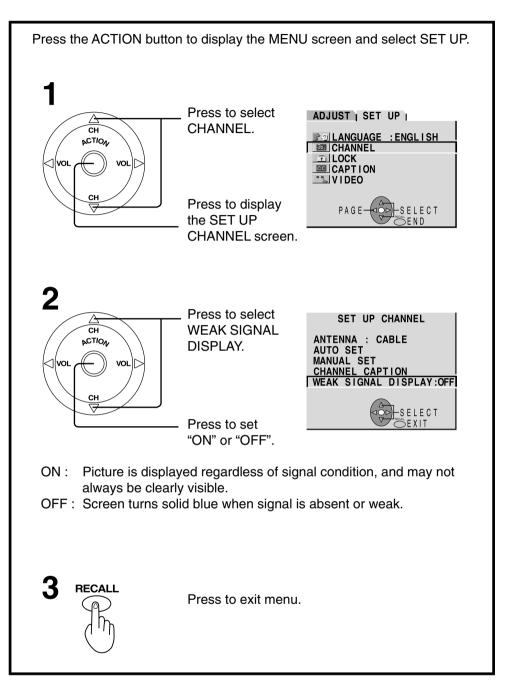

Weak Signal Display Feature

When "ON" is selected, the picture is displayed even when a broadcast signal is weak or non-existent.

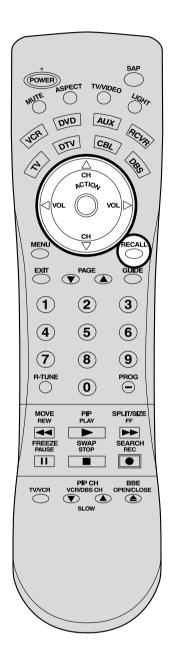

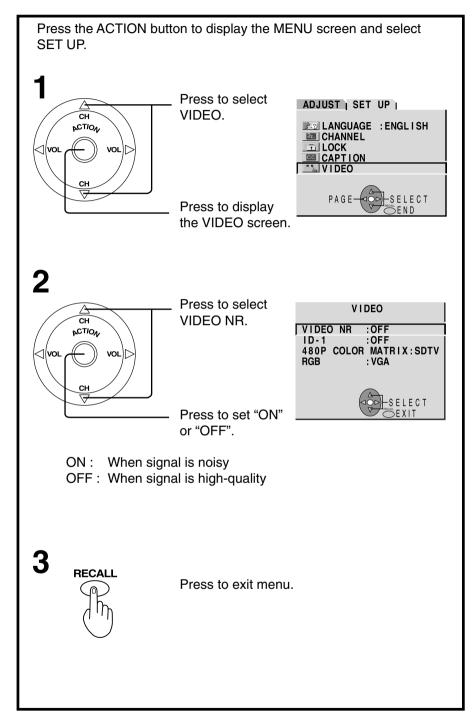

Note:

If unit is connected to equipment which has blue back feature, selecting "ON" will have no effect on the other equipment.

Video NR (Noise Reduction) Feature

In the event of weak signal conditions, the Video NR circuitry reduces noise in the luminance channel. It is important to note that Video NR should remain OFF for maximum picture detail when receiving a strong signal or viewing high-quality video.

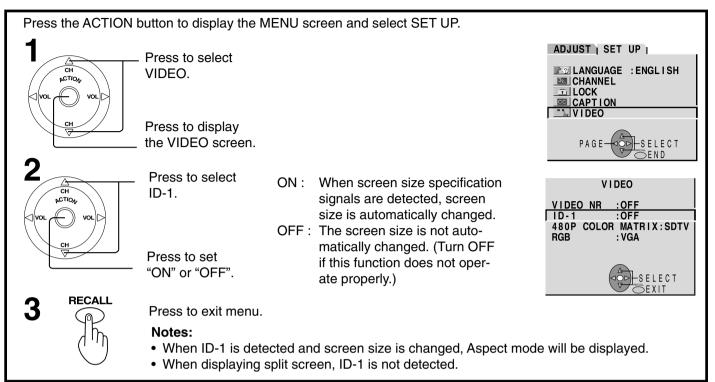

Note:

When an RGB signal is input, VIDEO NR is set to OFF only.

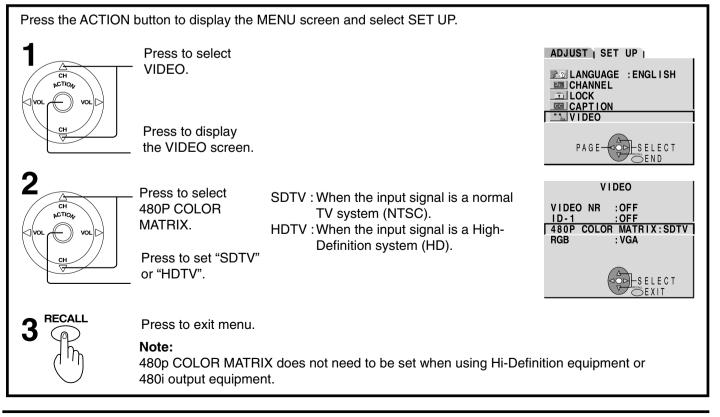

Automatically changing screen size

If the received signal contains screen size specifications in RF, VIDEO INPUT (1-3) or COMPONENT VIDEO INPUT (1-2), the screen size is automatically changed.

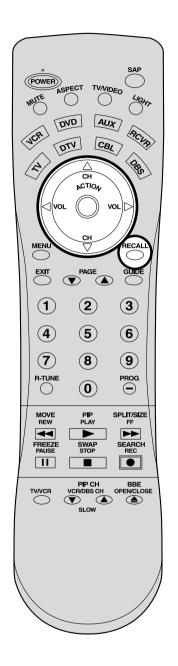

Setting when 480p signals (sequential scan) are input through COMPONENT VIDEO INPUT

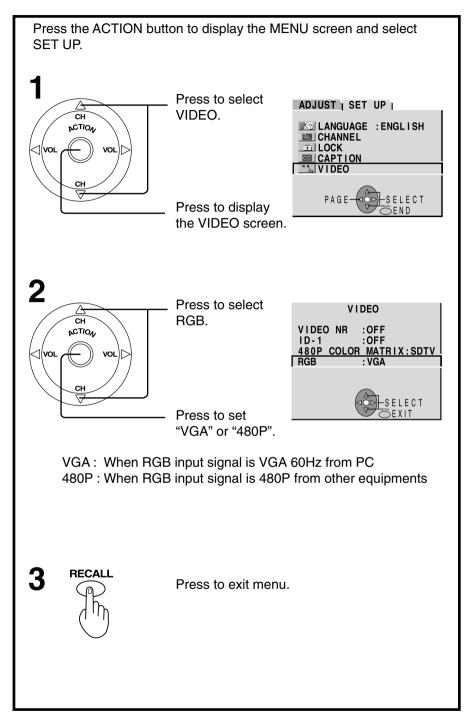

Adjust 480p signals to achieve a natural color from digital equipment connected to COMPONENT VIDEO INPUT (Y, P_B / C_b , P_R / C_r input terminals).

RGB Input Feature

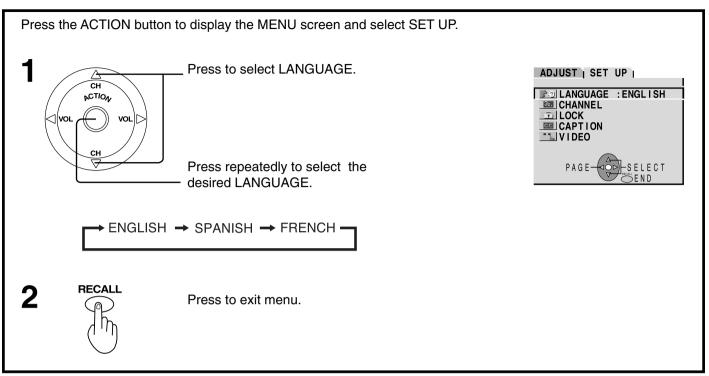

Set the signal to be input to the Projection display's front PC IN terminal. Most of analog RGB signals are selected automatically. When RGB input signal is VGA 60Hz from PC or 480P from other equipment, you must manually switch to the desired input.

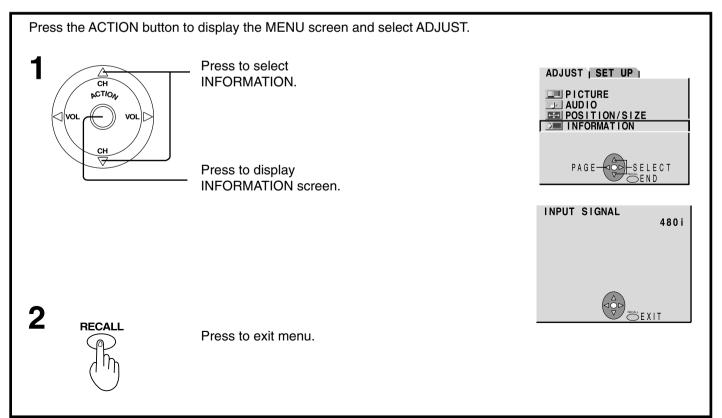

Switching languages for display

The language of the Projection display is set to English as the factory setting. To select one of 3 different languages for on-screen displays, follow the instructions below.

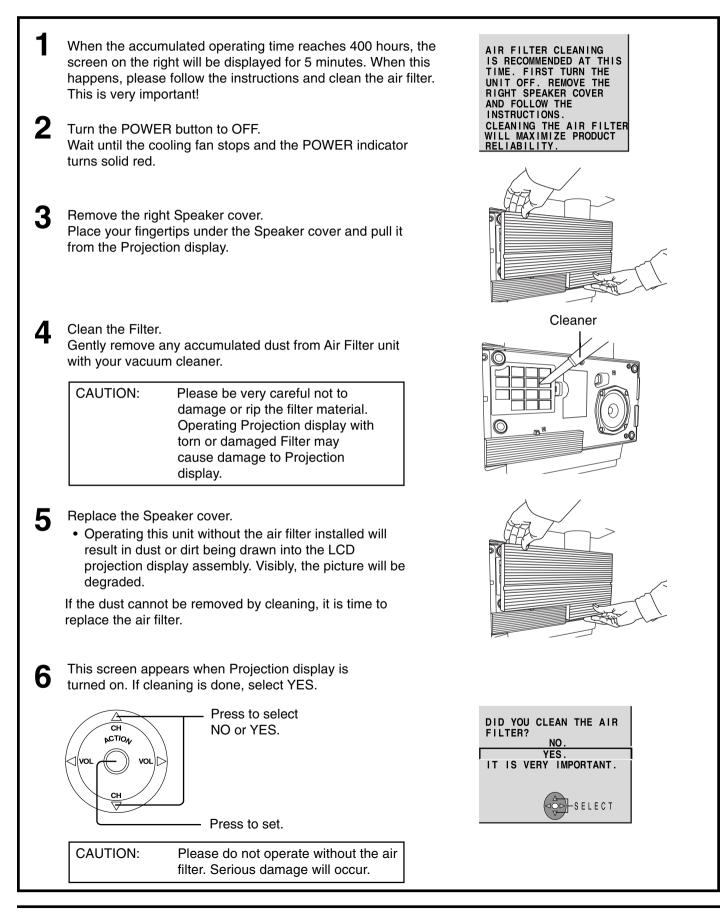

Information

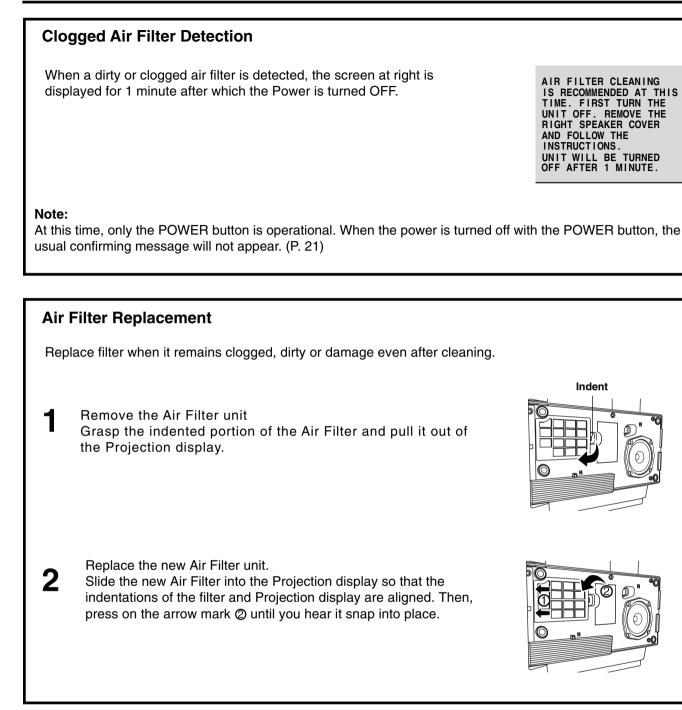

You can display the input signal type. Display items differ depending on the input signal.

Cleaning the Air Filter

The Air Filter should be cleaned about every 400 hours.

Replacing the lamp unit

The lamp unit is sold separately. To purchase a replacement, call the Panasonic accessory department, toll free at: 1-800-332-5368. Lamp unit Part No. : TY-LA1500

Lamp unit replacement period

The lamp has a maximum life of about 5 000 hours.

- When the stipulated time is reached, "THE LAMP NEEDS TO BE REPLACED, ••••" will be displayed for about 5 minutes.
- The LAMP indicator lights red.

THE LAMP NEEDS TO BE REPLACED,AND THE LAMP HOUR METER NEEDS TO BE RESET.

EYIT

Due to the characteristics and use conditions of individual lamps, the lamp may cease to light before the stated lamp life.

Influences of frequent lighting, continuous light use for over 24 hours, the number of times lit, the length of time between lightings, etc. may shorten lamp life.

(Because of this, we recommend having a replacement lamp on hand.)

WARNING:

The high-pressure lamp could explode if not properly handled and lamp fragments could cause injury.

Important Points to keep in mind

When replacing the lamp unit with a new one, pay attention to the following points.

Warning:

 Because the temperature of the lamp unit is elevated immediately after its use, directly touching it may cause burns. Please allow the lamp to cool before handling or replacing the lamp unit.

Cautions for Lamp Unit Replacement:

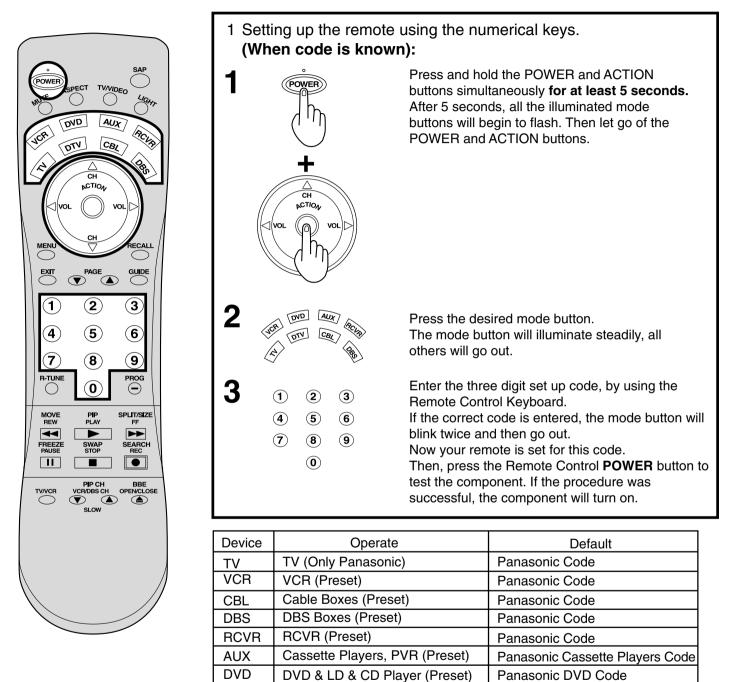

- Handle the removed old lamp unit carefully. If handled improperly, it may have a risk of explosion.
- Wear gloves when replacing the lamp unit.
- If replacing the lamp unit becomes necessary during the operation of the TV, follow the procedure below to turn off the power and wait until the lamp unit cools completely.
- 1. Press the POWER button on the remote control unit to turn off the power.
- 2. Wait for about 1 minute until the cooling fan stops.
 - The lamp cooling fan will continue to operate for about 1 minute after turning off the power. Do not unplug the power cord from the outlet until the fan has stopped. Avoid interrupting the power line by using circuit breakers or switchable power strips.
- 3. After the cooling fan has stopped, Unplug the power cord from the outlet.
- Please wait more than one hour for lamp replacement.
- [If you need to replace the lamp more urgently]
- The Projection display has a forced cooling feature. After the POWER button is turned OFF, and sometime during about the first minute of the normal cooling fan operation, press the VOL+ button on the Projection display and the ▲ button on the Remote control at same time for more than 5 seconds. The cooling fan operates for about 10 minutes.

Refer to the instructions enclosed with the lamp unit (Part No.: TY-LA1500) when replacing the lamp.

Remote Control Quick Reference Guide (Operating peripheral equipment)

Programming The Illuminated Remote Control Using Access Codes

The remote control can be preset for other manufacturers, by utilizing the **REMOTE MODE SELECTION BUTTONS** for **CABLE, DTV, VCR, RCVR** (a **Receiver** or **Amplifie**r), **DVD (DVD or CD)**, **DBS** and **AUX** (for **Cassette Player** or a **PVR**.) Details on remote control buttons to operate peripheral equipment. (PP. 66, 67)

Notes:

• Due to changes in infra-red commands used by manufacturers, some brands have several codes. If your unit does not respond to the first code, please try the next one.

Panasonic Code

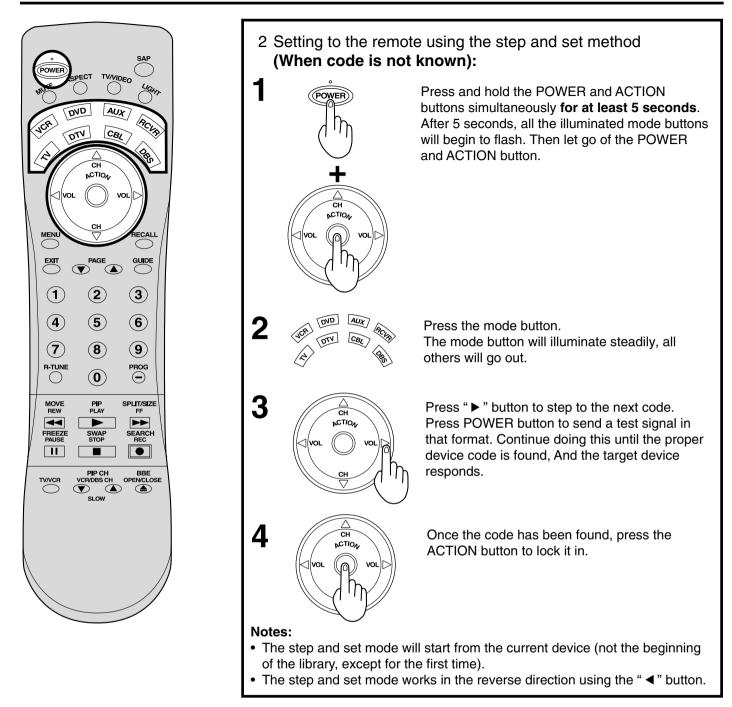

- If an incorrect number is entered (or there is an incomplete entry after 30 seconds), the button illumination goes out (no blink) and settings are unchanged.
- Repeat setup after remote battery replacement.
- Remote will not control every component made by the manufacturer listed.

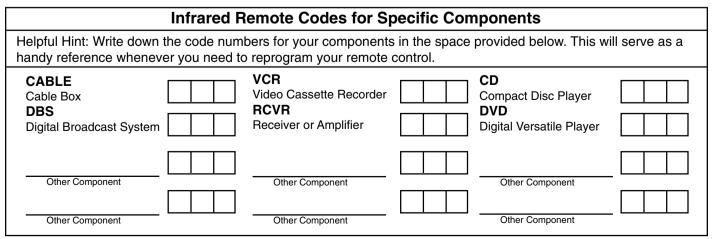

DTV

If you get no response, your particular component cannot be controlled. There are NO additional codes for the products listed. If your product is not listed, then the remote is not compatible with that product.

STB (Only Panasonic)

Remote Control Quick Reference Guide (Operating peripheral equipment)

Troubleshooting

Before you call for service, determine the symptoms and make a few simple checks as shown below.

Symptoms	Checks	Page
Power does not turn ON	 Is the power plug plugged in? 	21
Lamp does not light up.	 If the Lamp will not light after turning on the power 2 or 3 times, the Lamp may be damaged. Please consult your nearest dealer. 	-
The power turns OFF		
The POWER indicator flashes orange twice every 5 seconds.	The lamp cover is ajar. Firmly replace the cover.	60
The TEMP indicator flashes 2 or 4 times every 5 seconds.	Check whether or not the vents are clogged.Is the set being used in a location that is hot?	-
The TEMP indicator flashes 5 times every 5 seconds.	Please clean the Air Filter.	58
Power turns off while another indicator is flashing.	Please consult your nearest dealer.	-
Remote control does not function	 Are the batteries dead or inserted incorrectly? Is the remote control sensor in direct light of fluorescent lamps or other strong sources of light? Did you correctly set the remote control code? 	7 - 61
Image shakes Image is not clear Color patches or no color	 Is the antenna or antenna cable old, broken or shorted? Is the antenna cable connected properly? When using a VCR and selecting channels on the TV, is the TV/VIDEO mode for the VCR set to TV? 	- 12-14 -
Image appears doubled or tripled.	 Is the antenna facing the right direction? Is the antenna receiving any signals reflected off of mountains or buildings. 	-
Images disappear at the top and bottom of the screen	• When using 16:9 image software, there is no picture at the top and bottom of the screen (cinema vision size software, etc.).	-
During ZOOM modes, the image is cut off at the top and bottom.	Has the screen position been changed? If so, adjust screen positioning.	30,31,40,41
The projection display set makes a high whistling sound when the power is ON.	 This is the sound of the internal starting UP. This is not a malfunction. 	-
Some parts of the screen are always lit while others do not light up. Some parts of the screen do not light up.	This is a characteristic of the LCD panel and not a malfunction.	-
Fan is operating even though TV Power is OFF.	 This is because the cooling fan is operating. The fan will stop after about 1 minute. 	21
An OSD instructing to clean the filter is displayed.	After cleaning the filter, select YES.	58
An OSD instructing to replace the lamp is displayed. (The LAMP indicator is lit red.)	Replace lamp with a new one.	60
Relighting the lamp when it is hot makes a sound.	This is a characteristic of the lamp and not a malfunction.	-
Leaving stationary images, such as still video images, web pages, or filler bars (used for NORMAL aspect mode), on- screen for an extended period of time can leave ghost images on the screen.	• This is a characteristic of the LCD panel and not a malfunction. Try displaying constantly moving pictures which fill the entire screen, or turn the power OFF for a while to return the screen to normal.	-

Cleaning

To ensure continued excellent performance by this product, periodic cleaning is recommended.

The unit contains many plastic parts. For this reason DO NOT use benzine, thinner or other chemicals to clean the unit.	Dust will accumulate on the picture screen. Please wipe with a soft cloth from time to time. If you use a chemically treated cloth, please be careful to follow the instructions that come with the cloth.
DO NOT bring into contact with insecticide or other volatile substances. DO NOT allow the unit to come into contact for extended periods with rubber or vinyl products.	Remove dirt and soiling by wiping with a light cloth. Even if the unit is heavily soiled, do not apply cleaner directly to the unit. Soak a cloth in a solution of neutral cleanser diluted with water. Then wring out the cloth, wipe the unit clean, and finish by wiping with a dry cloth. Do not use any type of cleansers on the picture screen.

Panasonic Multi-Media Projection Display Limited Warranty

Limited Warranty Coverage

If your product does not work properly because of a defect in materials or workmanship, Panasonic Consumer Electronics Company or Panasonic Sales Company (collectively referred to as "the warrantor") will, for the length of the period indicated on the chart below, which starts with the date of original purchase ("warranty period"), at its option either (a) repair your product with new or refurbished parts, or (b) replace it with a new or a refurbished product. The decision to repair or replace will be made by the warrantor.

CATEGORY	PARTS	LABOR	SERVICE
Multi-Media Projection Display	One (1) Year	One (1) Year	In-Home or Carry-In

During the "Labor" warranty period there will be no charge for labor. During the "Parts" warranty period, there will be no charge for parts. You must carry-in your product or arrange for in-home service during the warranty period. If non-rechargeable batteries are included, they are not warranted. This warranty only applies to products purchased and serviced in the United States or Puerto Rico. This warranty is extended only to the original purchaser of a new product which was not sold "as is". A purchase receipt or other proof of the original purchase date is required for warranty service.

Carry-in or In-Home Service

For In-Home or Carry-In Service in the United States call 1-888-VIEW-PTV (1-888-843-9788).

For assistance in Puerto Rico call Panasonic Sales Company (787)-750-4300 or fax (787)-768-2910.

In-Home service requires clear, complete and easy access to the product by the authorized servicer and does not include removal or re-installation of an installed product. It is possible that certain in-home repairs will not be completed in-home, but will require that the product, or parts of the product, be removed for shop diagnosis and/or repair and then returned.

Limited Warranty Limits And Exclusions

This warranty ONLY COVERS failures due to defects in materials or workmanship, and DOES NOT COVER normal wear and tear or cosmetic damage. The warranty also does not cover damages which occurred in shipment, or failures which are caused by products not supplied by the warrantor, or failures which result from accidents, misuse, abuse, neglect, mishandling, misapplication, alteration, faulty installation, set-up adjustments, misadjustment of consumer controls, improper cleaning of or failure to clean the air filter, power line surge, lightning damage, modification, or commercial use (such as in a hotel, office, restaurant, or other business), rental use of the product, service by anyone other than a Factory Servicenter or other Authorized Servicer, or damage that is attributable to acts of God.

THERE ARE NO EXPRESS WARRANTIES EXCEPT AS LISTED UNDER "LIMITED WARRANTY COVERAGE". THE WARRANTOR IS NOT LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OF THIS PRODUCT, OR ARISING OUT OF ANY BREACH OF THIS WARRANTY. (As examples, this excludes damages for lost time, cost of having someone remove or re-install an installed unit if applicable, or travel to and from the servicer. The items listed are not exclusive, but are for illustration only.) ALL EXPRESS AND IMPLIED WARRANTIES, INCLUDING THE WARRANTY OF MERCHANTABILITY, ARE LIMITED TO THE PERIOD OF THE LIMITED WARRANTY.

Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitations on how long an implied warranty lasts, so the exclusions may not apply to you.

This warranty gives you specific legal rights and you may also have other rights, which vary, from state to state. If a problem with this product develops during or after the warranty period, you may contact your dealer or Servicenter. If the problem is not handled to your satisfaction, then write to the warrantor's Consumer Affairs Department at the addresses listed for the warrantor.

PARTS AND SERVICE (INCLUDING COST OF AN IN-HOME SERVICE CALL, WHERE APPLICABLE) WHICH ARE NOT COVERED BY THIS LIMITED WARRANTY ARE YOUR RESPONSIBILITY.
