

Network Function Edition

(PT-L785U)

This projector has networking functions which allow it to be controlled through a web browser on a PC.

The controlled items are:

- **Projector's settings and adjustment**
- **Projector's status display**
- **Transmission of a E-mail message when the projector has a problem**

Connecting a PC

■ System requirements

The following system specifications are required in order to use the networking functions.

Hardware requirements

OS: Windows XP/2000/Me (Millennium Edition)/98SE (Second Edition)

CPU: Pentium III or faster or compatible processor
(Celeron 633 MHz or faster is recommended)

RAM: 64 MB or more (128 MB or more for Windows XP/2000)

Hardware conditions: If you want to use the e-mail function, make sure the system can handle e-mail.

Web browser: Internet Explorer 6.0 or newer, Netscape Communicator 7.0 or newer

LAN cable

Type: Category 5 compatible straight cable

Length: 100 meters or less

Note:

Note that operation is not guaranteed when used with system environments other than the above or on homemade computers.

Operation is not guaranteed for all computers that meet the above conditions.

■ Connection example

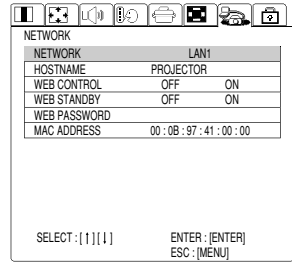

Note:

Touching the LAN port with your hand (or body) when you are carrying a static charge may damage the equipment due to a discharge of static electricity. Therefore, be careful not to touch the LAN port or metal parts of the LAN cable.

Projector Settings

■ Network settings screen

- 1 Press the [MENU] button.
The menu screen appears.
- 2 Use the [◀▶] buttons to display the Network Settings screen, then press the [ENTER] button.
- 3 Use the [▲▼] buttons to select a parameter, then change its setting.

Parameter	Description
NETWORK	Select this parameter and press the [ENTER] button in order to set DHCP, IP address, subnet mask, and gateway settings. (See the next page for detailed information.)
HOSTNAME	<ol style="list-style-type: none"> 1. Select this parameter and press the [ENTER] button in order to set the name of the projector in the network. 2. Use the [▲▼◀▶] buttons to select alphanumeric characters (up to 16 characters), then press the [ENTER] button. 3. Select [OK], then press the [ENTER] button.
WEB CONTROL	Use the [◀▶] buttons to toggle web control ON/OFF. ON: Enables control through a web browser. OFF: Disables control through a web browser.
WEB STANDBY	Use the [◀▶] buttons to toggle web standby ON/OFF. ON: During standby, the lamp in the projector can be turned on through web browser controls. OFF: During standby, the lamp in the projector cannot be turned on through web browser controls.
WEB PASSWORD	<p>The default setting is “panasonic” (all lower case). Use the following procedure to change the password. This procedure sets the password which is entered on page 6.</p> <ol style="list-style-type: none"> 1. Select this parameter to set the password to be entered when the projector is accessed through a web browser, then press the [ENTER] button. 2. Use the [▲▼◀▶] buttons to select alphanumeric characters (up to 16 characters), then press the [ENTER] button. 3. Select [OK], then press the [ENTER] button.
MAC ADDRESS	A MAC address (Media Access Control Address) which is unique to the network equipment is displayed here. The MAC address may be needed when, for example, a DHCP server is used.

■ Network status screen

1 Select [NETWORK] on the screen discussed on the preceding page, then press the [ENTER] button.

2 Use the [▲▼] buttons to select a parameter, then change its setting.

NETWORK	
ID	LAN1
DHCP	OFF ON
IP ADDRESS	192.168.0.0
SUBNET MASK	255.255.255.0
GATEWAY	192.168.0.254
	ENTER ESC

SELECT : [] [] []
 ENTER : [ENTER]
 ESC : [MENU]

Parameter	Description
ID	IDs are identification numbers under which settings are stored. Three different IDs can be stored (LAN1 through LAN3).
DHCP	Use the [◀▶] buttons to toggle this setting ON/OFF. ON: Select this setting to automatically acquire an IP address using a DHCP server. OFF: Select this setting if you are not using a DHCP server.
IP ADDRESS	Enter settings in these parameters if you are not using a DHCP server.
SUBNET MASK	1. Select a parameter, then press the [ENTER] button. 2. Use the [▲▼◀▶] buttons to select numbers and periods, then press the [ENTER] button.
GATEWAY	3. Select [OK], then press the [ENTER] button.

Notes:

- If you are using a DHCP server, make sure it is on and ready.
- IP address, subnet mask, and gateway settings should be obtained from your network administrator.

Using Web Browser Control

■ Access procedure

- 1 Start the web browser on your PC, then enter the IP address which was set in the projector.

- 2 Enter “user1” in the user name field, then enter the password in the password field.

The default setting is “panasonic” (all lower case). If you have changed the password, enter the new password here. If you forget your password, set a new password using the procedure described on page 4.

The host name set in the projector is displayed in the “Realm” field.

- 3 Click [OK].

The Basic Control page is displayed.

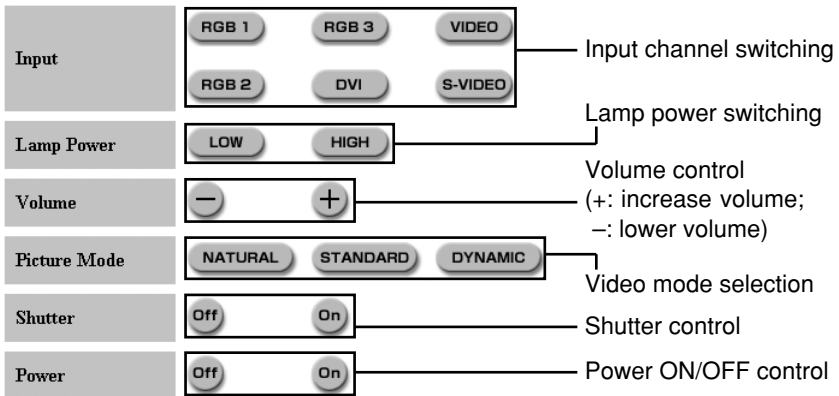

Note:

Do not enter settings or perform controls with multiple web browser windows open at the same time.

Basic control page

This page is the first page displayed when the projector is accessed through a web browser.

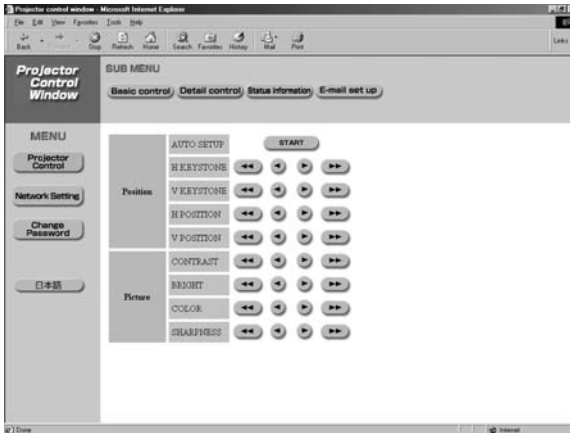

To move from another page, click [Projector Control], then [Basic control].

Using Web Browser Control (continued)

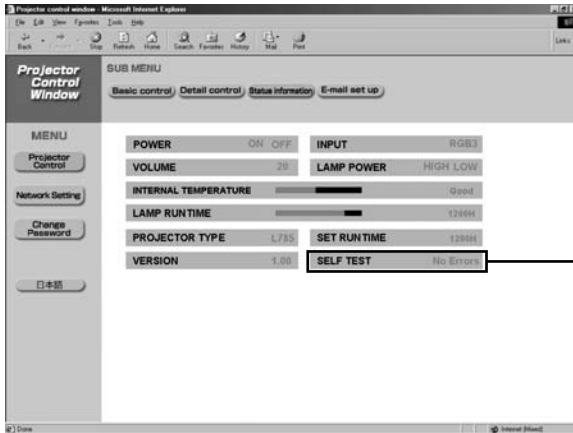

■ Detail control page

Click [Projector Control], then [Detail control] to display the Detail control page.

■ Status information page

Click [Projector Control], then [Status information] to display the Status information page.

When
Error Click Here is
displayed, refer to the
next page.

[OK]
[OK]
[OK]

[OK]: Normal
[FAILED]: Error

Note:

In the case of some errors, the standby status is established in order to protect the projector. "WEB STANDBY" must be set to [ON] to display the error information page. (See page 4.)

When [FAILED] has appeared for an item:

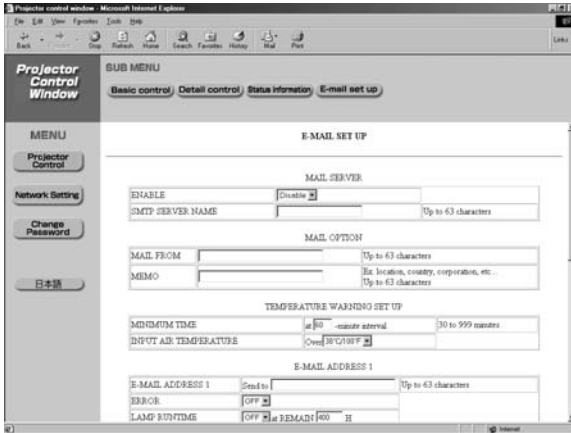

Item	Description
FAN	Trouble has occurred in the fan or its drive circuit. The network functions are disabled when the standby status has been established by this error.
INPUT AIR TEMPERATURE	The input air temperature is too high. It may be that the projector is being used where the ambient temperature is high such as near a heating appliance.
EXHAUST TEMPERATURE	The air exhaust temperature is too high. The air outlet or exhaust holes may be blocked.
LAMP REMAIN TIME	The lamp runtime has exceeded the prescribed cumulative time, and it is now time to replace the lamp.
LAMP STATUS	Trouble has occurred in the lamp or its drive circuit.
INPUT AIR TEMP. SENSOR	Trouble has occurred in the sensor used to detect the input air temperature.
EXHAUST TEMP. SENSOR	Trouble has occurred in the sensor used to detect the exhaust temperature.
BATTERY	The backup battery has been run out.

If requesting service, ask your nearest Authorised Service Center.

Using Web Browser Control (continued)

E-mail setup page

With this projector, if a problem occurs or if the lamp usage time reaches a set value, an e-mail message can be sent to one or more preset e-mail addresses (maximum two addresses). Click [Projector Control], then [E-mail set up] to display the E-mail setup page.

E-mail Enable/Disable toggling SMTP server field

MAIL SERVER	
ENABLE	Disable
SMTP SERVER NAME	Up to 63 characters

Sender field

(alphanumeric characters)

MAIL OPTION

MAIL FROM	Up to 63 characters
MEMO	Ex. location, country, corporation, etc... Up to 63 characters

Memo field

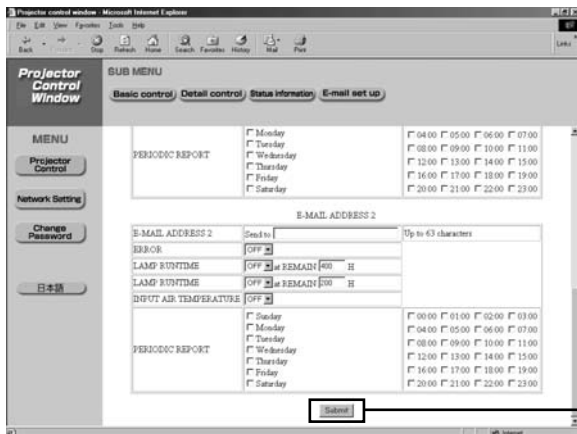

(alphanumeric characters)

TEMPERATURE WARNING SET UP

MINIMUM TIME	at 60 -minute interval	30 to 999 minutes
INPUT AIR TEMPERATURE	Over 38°C/100°F	

Minimum sending interval field (applies only to temperature warnings)

Set temperature selection (38 °C/100 °F, 40 °C/104 °F, 42 °C/108 °F and 44 °C/111 °F)

Button to update settings

Change lamp usage time set value

ON/OFF toggling for permission to send e-mail based on lamp usage time

ON/OFF toggling for permission to send e-mail based on air intake sensor temperature

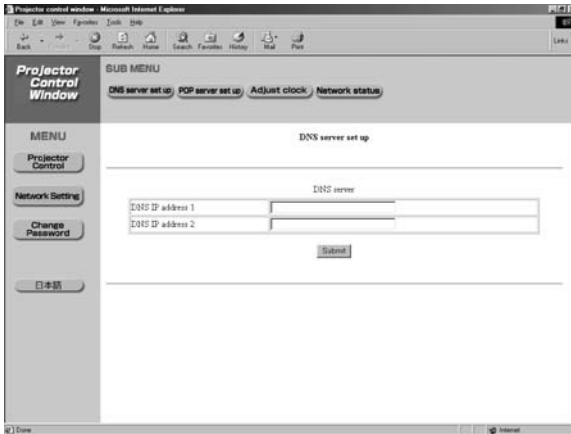

Periodic warning interval setting (e-mail is sent on the checked days of the week/times)

※ The settings for e-mail address 1 are the same.

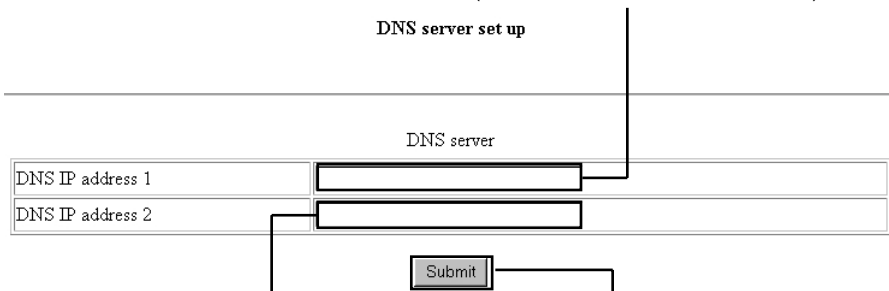

Using Web Browser Control (continued)

■ DNS server setup page

Click [Network Setting], then [DNS Server set up] to display the DNS Server Setup page.

Primary DNS server address
Available input characters:
Numbers (0 - 9), period (.)
(ex. ※※※.※※※.※※※.※※※)

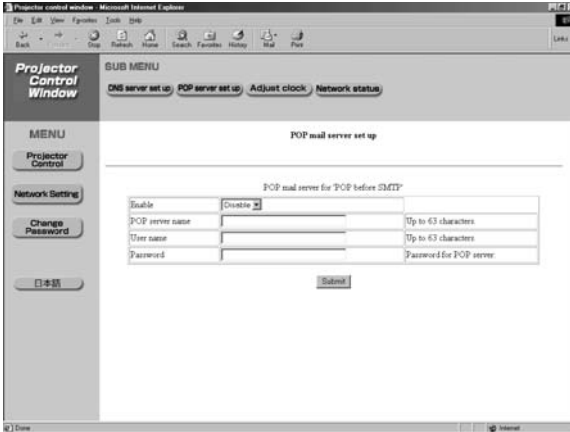

Secondary DNS server address
Available input characters:
Numbers (0 - 9), period (.)
(ex. ※※※.※※※.※※※.※※※)

Button to update settings

POP server setup page

Click [Network Setting], then [POP server set up] to display the POP Server Setup page.

toggling between
Enabling/Disabling
POP before SMTP

POP server name field
Available input characters:
Alphanumeric characters (A-Z, a-z, 0-9),
hyphen (-), period (.)

Enable	Disable ▾	POP mail server for 'POP' before SMTP'
POP server name	<input type="text"/>	Up to 63 characters.
User name	<input type="text"/>	Up to 63 characters.
Password	<input type="password"/>	Password for POP server.

POP server user
name field

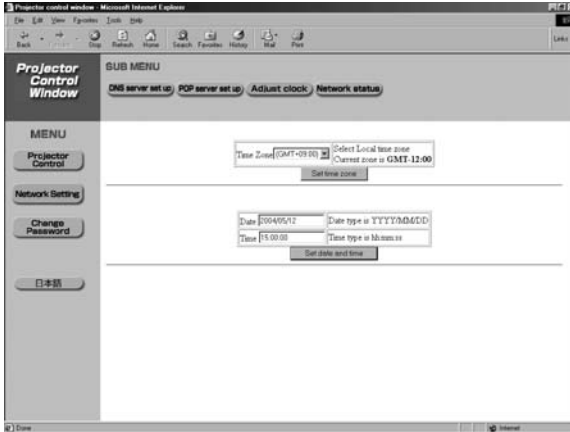

POP server
password field

Button to update settings

Using Web Browser Control (continued)

■ Adjust clock page

Click [Network Setting], then [Adjust clock] to display the Adjust clock page.

Time zone selection

Button to update time zone setting

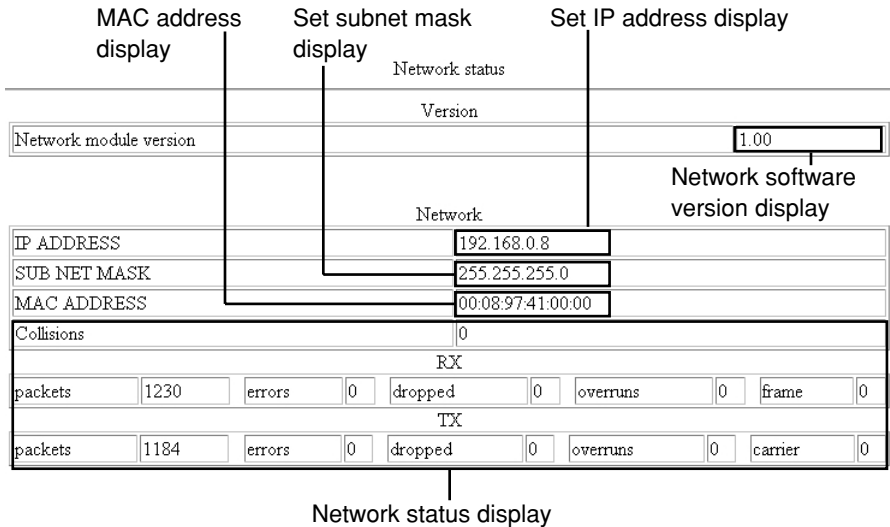

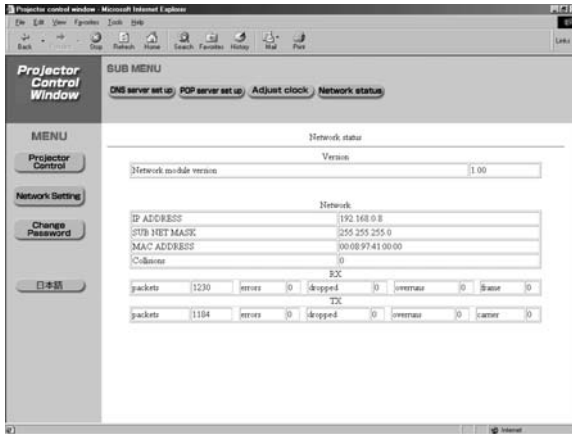

Note:

If the time becomes incorrect immediately after setting the correct time, then the battery needs to be changed. Contact the dealer where you bought the projector to have the battery changed.

■ Network status page

Click [Network Setting], then [Network status] to display the Network status page.

Using Web Browser Control (continued)

■ Password change page

This page can be used to change the password entered on page 6. The password can be changed even through the PC. See page 4 for information on changing the password through the projector.

Click [Change Password].
